Comprehensive Annual Financial Report

# State Of Utah COMPREHENSIVE ANNUAL FINANCIAL REPORT

For The Fiscal Year Ended June 30, 2015

### CONSTITUTIONAL OFFICERS OF THE STATE OF UTAH

Gary R. Herbert	
Spencer J. Cox	
John Dougall	
Richard K. Ellis	
Sean D. Reyes	Attorney General
Wayne L. Niederhauser	President of the Senate
Greg Hughes	
Matthew B. Durrant	

### OTHER STATE OFFICIALS

Kimberly K. Hood	Executive Director, Department of Administrative Services
Kristen Cox	
Jonathan C. Ball	
John M. Schaff, CIA	

### **ACKNOWLEDGMENTS**

Report prepared by:

Marcie L. Handy, CPA

Scott R. Blackham, CPA

Lynn G. Bodrero, CPA

Julia A. D'Alesandro, CPA, CIA

Jessica L. Hardy

Amanda L. Hensley

Darin C. Janzen

Lynda B. McLane, CPA

Deborah S. Memmott

Robert D. Miles

Gary E. Morris, CPA, CGMA

Cory A. Weeks

Sean M. Williford

Special appreciation is given to all of the budget and accounting officers throughout the State whose extra time and effort made this report possible.

### **Department of Administrative Services**

Kimberly K. Hood Executive Director

**Division of Finance** 

John C. Reidhead, CPA Director

November 4, 2015

To the Citizens, Governor, and Members of the Legislature of the State of Utah:

It is our pleasure to present the 2015 Comprehensive Annual Financial Report of the State of Utah in accordance with Section 63A–3–204 of the *Utah Code*. Responsibility for the accuracy of the data and the completeness and fairness of the presentation, including all disclosures, rests with the State's management. To the best of our knowledge and belief, the enclosed data accurately presents the State's financial position and results of operations in all material respects in accordance with generally accepted accounting principles (GAAP). We believe that all disclosures necessary to enable the reader to gain an understanding of the State's financial activities are included.

**Internal Control.** The State's systems of internal control over assets recorded in the accounting system have been designed to provide reasonable, but not absolute, assurance of safeguarding assets against loss from unauthorized use or disposition and to ensure the reliability of financial records for preparing financial statements. The concept of reasonable assurance recognizes that the cost of a control should not exceed the benefits likely to be derived and that the evaluation of costs and benefits requires estimates and judgments by management.

**Independent Auditors.** In compliance with state statute, an annual financial audit of the "State Reporting Entity" is completed each year by the Office of the Utah State Auditor in conjunction with other independent audit firms. Their audits were conducted in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States. The Utah State Auditor's report and the opinion on the fair presentation of the Basic Financial Statements are included in the Financial Section of this report.

**Single Audit.** Federal regulations also require the State to undergo an annual "Single Audit" in conformance with the Federal Single Audit Act of 1984, as amended, and the U.S. Office of Management and Budget Circular A–133, *Audits of State and Local Governments and Non-Profit Organizations*. Information related to the Single Audit, including the schedule of expenditures of federal awards, audit findings and recommendations, summary of prior audit findings, and the Utah State Auditor's report, is issued in a separate report.

**Management's Discussion and Analysis (MD&A).** The discussion and analysis beginning on page 17 provides an overview and analysis of the State's Basic Financial Statements. This letter of transmittal is intended to complement the MD&A and should be read in conjunction with it.

### PROFILE OF THE GOVERNMENT

**Structure.** As shown in the organizational chart on page 12, state government is divided into three separate branches: legislative, executive, and judicial. The duties of each branch are outlined in the *Constitution of Utah*, which can be amended only by vote of the Legislature and a majority vote of the State's citizens, and in the *Utah Code*, which can be amended by the Legislature or by citizen initiatives. State government provides various services to over 2,987,000 citizens. Services

include building and maintaining roads; providing public safety, health, and environmental protection services to protect the general welfare of the State's citizens; helping adults, children, and families through difficult times such as abuse, divorce, illness, death, and unemployment; fostering an attractive business climate to encourage economic growth; and protecting public lands and natural resources for conservation and recreational activities. The State also provides significant financial support to its higher education institutions, local governments, and school districts to help those entities meet the specific needs of their constituents.

**The State Reporting Entity.** The State Reporting Entity includes the *primary government* and its *component units*. The *primary government* of the State of Utah includes all funds, departments, agencies, and other organizational units governed by the Legislature or the constitutional officers of the State. In addition to these *primary government* activities, this report includes information related to component units for which the primary government is financially accountable. Although such information is provided in this report, the MD&A and Basic Financial Statements focus on the primary government and its activities. Separately issued financial statements are available from the significant discretely presented component units and should be read to obtain a better understanding of their financial conditions. Additional information on all discretely presented component units can be found in the notes to the financial statements (see Note 1. A. on page 65).

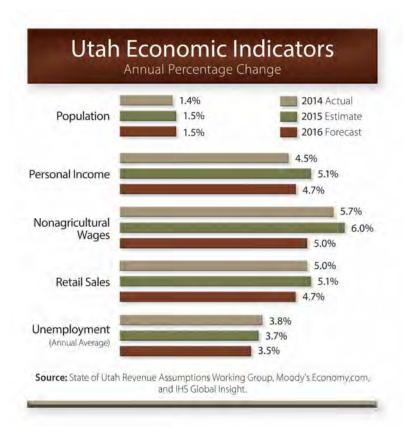

**Budgetary Process and Control.** The *Constitution of Utah* requires that budgeted expenditures not exceed estimated revenues and other sources of funding, including beginning fund balances. Annually, the Governor is required to submit a balanced budget for the governmental funds with an annual appropriated budget (General, Education, Transportation, Transportation Investment, and Debt Service Funds), by function (e.g., health), and activity (e.g., medical assistance) to the Legislature. The Legislature authorizes expenditures by line item in the annual *Appropriations Acts*. Line item is the legal level of budgetary control. The Acts also identify the sources of funding for budgeted expenditures. In the event actual revenues are insufficient to cover budgeted expenditures, the Governor must order budget reductions or call a special session of the Legislature to address budget issues. Adjustments to the budget may also be made throughout the year for changes in departmental or fund revenues so that line items and funds will not end the fiscal year in a deficit position. For additional information on the budgetary process and control, see the Required Supplementary Information and related notes beginning on page 132.

### INFORMATION USEFUL IN ASSESSING A GOVERNMENT'S ECONOMIC CONDITION

**Local Economy.** The Utah economy continues to outperform national averages. Utah's economy is expected to grow moderately through 2016 on the strength of a vibrant and diverse economy.

Utah's unemployment rate averaged 3.8 percent in 2014 and is expected to decline slightly to an average of 3.7 percent in 2015 and 3.5 percent in 2016. In 2014, personal income increased by 4.5 percent and nonagricultural wages increased by 5.7 percent. In 2015, personal income is expected to increase by 5.1 percent and nonagricultural wages are expected to increase by 6 percent. Taxable retail sales increased by 5 percent in 2014 and are expected to increase by 5.1 percent in 2015.

Total construction value was \$5.6 billion in 2014, a 9.8 percent increase from the prior year, primarily due to an increase in nonresidential permit value. This marked the fourth consecutive year in which total construction value has increased. In 2015, total construction value is expected to increase 25 percent to \$7 billion. Residential construction was \$3.3 billion in 2014, a 3.1 percent increase from the prior year as housing continued to play a role in the economic expansion. Residential permit value is expected to increase to \$4 billion, or 21.2 percent in 2015.

In 2015, Utah population is estimated at 2,987,000, which is an increase of 1.5 percent over the prior year. Utah had positive net migration of approximately 4,000 people in 2014 and is expected to grow by 8,700 in 2015. Utah has had positive net migration for the past 25 years and this trend is expected to continue in the coming years.

**Industries.** Utah's job market continues to expand as it rebounds from the national recession that began in late 2007. Utah's nonagricultural employment is expected to increase by 3.7 percent in 2015 and by 3.1 percent in 2016, which is near the Utah average yearly rate of 3.1 percent (1950 through June 2015). All industrial sectors added jobs to Utah's employment base, with the exception of natural resources and mining, which contracted by 800 jobs. Leisure and hospitality added 12,800 new jobs, primarily in the food services category. Professional and business contributed 9,600 jobs, primarily in the high-paying professional, scientific, and technical services category. Education and health services added 9,400 new jobs, with health services contributing most of the new jobs. Trade, transportation, and utilities added 6,900 new jobs, with the retail contributing all of these gains. The results for August 2014 to August 2015 are presented in the following table.

State of Utah Jobs by Industry of Utah's Labor Force (Expressed in Thousands)

	Num of Jo		Numerical Change	Percentage Change	Components of Labor Force
	2015 (est.)	2014	2014 to 2015	2014 to 2015	2015 (est.)

Source: Utah Department of Workforce Services and the U.S Bureau of Labor Statistics, August 2015.

**Outlook.** The national economy is expected to grow at a slower pace in the last half of 2015 and into 2016. As in prior recoveries, the Utah economy continues to grow more rapidly than the nation. Factors that support the continued growth include: 1) a diverse mix of industries; 2) a highly productive, well-educated workforce; 3) a business-friendly climate; and 4) significant capital investment in Utah's technology and other industries, and public sector projects, all of which will spur future growth. Despite this positive outlook, risks remain due to the Utah's increased global interconnectivity. These risks include the future instability in financial markets, the slowdown in growth in China, and geopolitical risks. Overall, Utah is expected to grow at a steady and robust pace barring any major disruptions to the global and national economies.

### FINANCIAL PLANNING AND POLICIES

**Debt Administration.** As part of long-term financial planning, the State has used a combination of bonding and pay-as-you-go methods to meet its infrastructure needs. In fiscal years 2005 through 2007 the State bonded less and primarily funded projects with the pay-as-you-go method using one-time and ongoing money. In fiscal years 2008 through 2014, under budget constraints coupled with a low interest rate environment, the State elected to increase its debt by issuing bonds for highway and/or building projects that otherwise would have been funded from current resources. During the years debt was issued, the State continued to fund some projects with cash. In fiscal year 2015, the State continued its prudent fiscal management by

paying cash for buildings, as detailed on page 9 in the Infrastructure section. In fiscal year 2015, the State also advance refunded \$221 million of general obligation bonds to take advantage of the low interest rate environment. During the 2015 General Session, the State authorized \$474.7 million in new general obligation bonds for the new prison project. As of June 30, 2015, the State's general obligation debt per capita was \$987. The State has an aggressive policy of repaying its general obligation debt within seven years for debt associated with capital facilities and fifteen years for highway construction projects. More information about the State's long-term debt is found in Note 10 to the Basic Financial Statements on page 101.

Revenue and Expenditure Forecasts. Economists and budget analysts from the Executive and Legislative branches of government work with experts from the private sector and academia to develop the consensus revenue forecast used for establishing the State's annual budget. The final 2015 consensus revenue forecast projected a moderate increase of 5.1 percent in fiscal year 2015 from 2014 actual revenue for combined General and Education Fund. For fiscal year 2016, 3.4 percent growth is projected. The long-term average annual revenue growth rate, adjusted for inflation, was approximately 3.3 percent for fiscal periods 1971 through 2014. (See the Budgetary Highlights – General Fund in the MD&A on page 25 for a comparison of budgeted to actual results for fiscal year 2015.)

**Budget Stabilization.** In accordance with Sections 63J–1–312 and 313 of the *Utah Code*, the State maintains the General Fund Budget Reserve Account in the General Fund (the "Rainy Day Fund") and an Education Fund Budget Reserve Account in the Education Fund (the "Education Reserve"). State law requires 25 percent of any revenue surplus in the General Fund to be deposited in the Rainy Day Fund after any required Medicaid growth savings transfer is made (see Medicaid Sustainability section below) and 25 percent of any revenue surplus in the Education Fund to be deposited in the Education Reserve, in each case up to a statutory limit. State law limits the totals of the Rainy Day Fund and Education Reserve based on the amount of appropriations from the General Fund and Education Fund, respectively, for the fiscal year in which the surplus occurred. For additional information on the State's budget stabilization accounts see Note 12.B. on page 114.

**Medicaid Sustainability.** The State implemented reforms in the Medicaid program in an effort to bring Medicaid growth more in line with overall state revenue growth. The reforms align financial incentives in the health care system by replacing the feefor-service model with one or more risk-based delivery models. When a General Fund revenue surplus occurs, an amount representing the Medicaid growth savings from the new risk-based delivery models will be deposited into the "Medicaid Budget Stabilization Account." The account will then be used to meet the growing needs in the program in years when growth is expected to be at least 8 percent. In fiscal 2014, a revenue surplus allowed the first deposit to the account. For additional information on the State's budget stabilization accounts, see Note 12.B. on page 114.

**Public Education Growth.** Projections indicate that an additional 7,951 new students will enroll in fall 2015. Due to the current and future enrollment growth, and the demands it places on state funding, public education continues to be a top priority for the Governor and the Legislature. The Office of the Legislative Fiscal Analyst developed a Public Education Distribution Model that allows legislators to see how proposed education policy changes will impact funding.

**Federal Funding.** In an effort to prepare for potential future reductions in federal funding for critical state programs, the Legislature requires most state agencies including public education and higher education institutions to report specific federal funding information to the Legislature. Annually, these entities must report total federal receipts received the preceding fiscal year in addition to providing contingency plans in the event federal receipts are reduced by either 5 percent or 25 percent.

The Legislature created the Federal Funds Commission to study and make recommendations on federal funding issues. The Commission is tasked with considering the financial stability of the federal government, the risk that the State will experience a reduction in the amount or value of federal funds, and methods to avoid or minimize the risk. Legislators also passed legislation that requires economists and budget analysts from the Executive and Legislative branches of government to consider expected changes in federal funding when preparing the annual revenue volatility report and, if appropriate, recommend changes to amounts or limits of reserve funds.

In addition, all federal funds for state agencies must go through the annual appropriations process. To gain tighter control over federal grants that span several years, the Legislature also requires multiyear grants to go through an approval and summary requirements process, including approval in the annual Appropriations Acts.

**Spending Limitation.** The State has a statutory appropriations limit. The appropriations limit adjusts annually pursuant to a statutory formula based on population and inflation. The definition of appropriations includes only appropriations from General Fund and Education Fund sources (spending for public education and for transportation is exempt from the limitation). For the fiscal year ended June 30, 2015, the State was \$655.9 million below the appropriations limitation.

Adequate Funding for Ongoing Programs. The Legislature has been working toward ensuring all programs have adequate ongoing funding. Coming into the 2015 General Session of the Legislature, before accounting for growth in costs or revenues, the State was facing a structural imbalance of \$24.6 million for the 2016 fiscal year budget. A structural imbalance occurs when ongoing programs are funded with one-time revenue. Of the \$24.6 million, \$13.3 million was associated with the cost of a change to the employee annual leave program. The imbalance was eliminated by statutorily modifying the program. The remaining imbalance was due to the delayed fiscal impact of an increase in tourism marketing earmarks. To eliminate the imbalance, legislators provided an ongoing appropriation for only the "base" program and funded the incremental growth with one-time money until performance criteria are validated.

**Operating/Capital Expenditure Accountability.** During the 2014 General Session, the Legislature passed House Bill 311, *Budgeting Amendments*, House Bill 357, *Budgetary Amendments*, and House Joint Rules Resolution 11, *Budget Process Amendments* to implement budget policy changes. These budget bills are aimed at smoothing revenue volatility by recognizing above trend growth, managing the volatility with rainy day deposit mechanisms, and treating windfalls as one-time revenue. In addition, House Bill 357, makes the in-depth budget reviews part of the regular budget process. House Bill 311 requires the Legislative Fiscal Analyst to prepare, before each annual general session of the Legislature, a summary showing the current status of the State's debt, long-term liabilities, contingent liabilities, General Fund borrowing, reserves, fund and nonlapsing balances, and cash-funded capital investments, as compared to the prior nine fiscal years. In keeping with this charge, the Legislative Fiscal Analyst has implemented a "fiscal health dashboard" website where legislators and citizens can quickly and easily check Utah's fiscal health.

### **MAJOR INITIATIVES**

During fiscal year 2015, the State of Utah continued to rank among the top states in total job growth, private sector job growth, and low unemployment. Due to continued economic expansion, the consensus revenue forecast adopted during the 2015 General Session anticipates that fiscal year 2016 will mark the sixth consecutive year of growth in unrestricted General Fund and Education Fund revenue collections.

Approximately \$739 million in new unrestricted revenue was available for appropriation during the 2015 General Session due to a \$113 million revenue surplus at the end of fiscal year 2014 and upward revisions to fiscal year 2015 and 2016 revenue forecasts. The Legislature set aside \$389 million of this revenue for ongoing appropriations and \$350 million for one-time appropriations. In addition, the Legislature re-directed \$101 million from various sources, including the Medicaid Restricted Account, the Comprehensive Health Insurance Pool, other reserves, and reductions in state matching funds for Medicaid and the Children's Health Insurance Program (CHIP). The Legislature also enacted changes that will provide \$75 million additional property tax revenue for public education. Together, new revenue and funding reallocations provided \$915 million for new appropriations in fiscal years 2015 and 2016 for infrastructure needs, growth in public education, and other priorities listed below. In addition, the Legislature enacted tax changes related to transportation funding.

**Public Education.** During the 2015 General Session, the Legislature increased public education appropriations from state funds by \$309 million, which represents over one-third of new unrestricted appropriations from the General Fund and Education Funds. The largest increases for public education included \$104 million ongoing for a 4 percent increase in the value of the Weighted Pupil Unit (WPU – the primary funding mechanism for public education); \$75 million ongoing in property tax revenue to equalize per-student funding across school districts; \$57.8 million ongoing for anticipated growth in enrollment of 7,951 students in Fall 2015; \$14.5 million one-time for a building at the Utah Schools for the Deaf and Blind's Salt Lake City campus; \$8.0 million (\$7 million ongoing and \$1 million one-time) for the School Turnaround and Leadership Development Act; and \$6 million one-time to reimburse teachers for supplies and materials. Additionally, the Utah Education and Telehealth Network received \$12 million one-time for initiatives supporting public education efforts. Together, these represent an increase of approximately 7 percent in the state portion of public education funding.

**Higher Education.** State funding for higher education, including capital development projects, was increased by nearly \$203 million during the 2015 General Session. This represents 22 percent of new unrestricted appropriations from the General and Education Funds. A total of \$115.3 million one-time was provided for new higher education facilities and land acquisition. Other significant increases were \$21.1 million for staff compensation and benefits; \$9 million (\$2 million ongoing and \$7 million one-time) in performance-based funding; \$10.9 million (\$9.4 million ongoing and \$1.5 million one-time) for various science, technology, engineering, and math (STEM) initiatives and research; and \$3 million ongoing for increased capacity at Utah College of Applied Technology campuses.

**Justice Reinvestment and Prison Relocation.** During the 2015 General Session, nearly \$14 million (\$12 million ongoing and \$2 million one-time) was appropriated for justice reinvestment initiatives coordinated by criminal justice and social service agencies. The funding will include additional resources for treatment of substance abuse and mental health disorders, reentry, community supervision, technology, research, and incentives to local government to implement evidence-based practices. These changes are projected to divert 95 percent of the anticipated growth over the next 20 years and avert over \$540 million in corrections spending. The Legislature also instructed the Prison Relocation Commission to choose a site for the construction of new prison facilities, with the recommendation subject to subsequent approval by the Governor and Legislature. The Legislature authorized the issuance of \$474.7 million in general obligation bonds for the prison relocation project and appropriated \$80 million one-time to a new restricted account that can be used for the project.

Social Services. During the 2015 General Session, the Legislature appropriated \$55.4 million in new state funding for social service programs. The largest appropriations included \$7.9 million (\$5.4 million ongoing and \$2.5 million one-time) for the Division of Services for People with Disabilities (DSPD) to increase salaries for direct care staff who provide services to DSPD clients and to reduce the waiting list for services; \$7.9 million (\$5.4 million ongoing and \$2.5 million one-time) for Medicaid physician, anesthesia, and dental reimbursement rates; \$6.9 million one-time for the State Office of Rehabilitation; \$6.4 million one-time for Medicaid local health authority behavioral health support; \$5.2 million (\$4.9 million ongoing and \$0.3 million one-time) to increase the accountable care organization administrative fees and to cover the federal health care reform tax on Medicaid and CHIP plans; \$5.1 million one-time for costs associated with the replacement of the Department of Health's Medicaid Management Information System; \$3.3 million one-time to expand the use of Medicaid Accountable Care Organizations into rural counties; and \$3.2 million one-time for a pilot program that expands Medicaid coverage for children with disabilities and complex medical conditions.

**Infrastructure.** In addition to the \$209.8 million one-time appropriations for higher education, prison relocation, and public education capital development projects, \$72.5 million in one-time funding was appropriated for other capital development projects, including \$39.7 million for the Unified State Laboratories and \$9.5 million for the Huntsman Cancer Institute. The State also set aside \$64.8 million in increased ongoing funding for capital improvements to existing facilities, including higher education facilities. In addition to building infrastructure, the Legislature appropriated \$11 million one-time for dam upgrades that will be matched by federal funding and \$17.5 million one-time to upgrade public safety radios.

**Transportation.** During the 2015 General Session, the Legislature passed House Bill 362, *Transportation Infrastructure Funding*, which imposes higher gasoline, diesel, and natural gas taxes. The increased revenue to the Transportation Fund is estimated to be \$24.6 million in fiscal year 2016 and \$75 million in fiscal year 2017, which will be used for transportation projects.

**Employee Compensation.** During the 2015 Legislative Session, \$30 million was appropriated from the General Fund and Education Fund for non-higher education state employee salary and benefit increases. The Legislature approved the equivalent of a 2.25 percent salary increase for state employees and provided 0.75 percent for targeted salary adjustments. In addition to the compensation general increases, \$2.2 million in ongoing funding was appropriated to increase compensation for correctional staff, and \$5.4 million was provided for health insurance cost increases.

**State Employee Other Postemployment Benefit Plan.** For the State Employee Other Postemployment Benefit (OPEB) plan, the annual required contribution (ARC) of \$30.3 million was used to establish the OPEB budget for fiscal year 2016. The ARC represents a level of funding that, if paid on an ongoing basis, is actuarially projected to fund the benefits over a period of twenty years.

### AWARDS AND ACKNOWLEDGEMENTS

The Government Finance Officers Association (GFOA) awarded the *Certificate of Achievement for Excellence in Financial Reporting* to the State of Utah for its comprehensive annual financial report for the fiscal year ended June 30, 2014. This was the thirtieth consecutive year the State has achieved this prestigious award.

In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current comprehensive annual financial report continues to meet the Certificate of Achievement Program's requirements, and we are submitting it to GFOA to determine its eligibility for another certificate. We are committed to this effort, and we intend to maintain a highly qualified and professional staff to make this certification possible.

The preparation of this report would not have been possible without the efficient and dedicated service of the entire staff of the Division of Finance, Department of Administrative Services. We also express our gratitude to the budget and accounting officers throughout state government and the Office of the Utah State Auditor for their assistance.

Sincerely,

John Reidhard

John C. Reidhead, CPA Director of Finance

### **INDEPENDENT STATE AUDITOR'S REPORT**

To Members of the Utah State Legislature and
The Honorable Gary R. Herbert
Governor, State of Utah

### **Report on the Financial Statements**

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Utah (State) as of and for the year ended June 30, 2015, and the related notes to the financial statements, which collectively comprise the State's basic financial statements, as listed in the table of contents.

### Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

### Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We did not audit the financial statements of the Public Employees Health Program, the University of Utah's hospital and component units, or the Utah State University Research Foundation. These entities collectively represent 22 percent of the assets, 16 percent of the net position, and 40 percent of the revenues of the aggregate discretely presented component units. Also, we did not audit the financial statements of Utah State Retirement Systems, which represent 66 percent of the assets, 65 percent of the net position/fund balances, and 24 percent of the revenues/additions of the aggregate remaining fund information. The financial statements for these entities were audited by other auditors whose reports have been furnished to us, and our opinions, insofar as they relate to the amounts included for these entities, are based solely on the reports of the other auditors. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in

the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

### **Opinions**

In our opinion, based on our audit and the reports of other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State as of June 30, 2015, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

### **Emphasis of Matter**

For fiscal year 2015, the State implemented Governmental Accounting Standards Board Statement No. 68, Accounting and Financial Reporting for Pensions, and Statement No. 71, Pension Transition for Contributions Made Subsequent to the Measurement Date. As a result of these required changes in accounting principle, the State recorded reductions in beginning net position of \$823 million for governmental activities, \$12 million for business-type activities, and \$263 million for discrete component units. The amounts reported for ending net position reflect the newly required net pension assets, deferred outflows of resources, net pension liabilities, and deferred inflows of resources related to the State's participation in defined benefit retirement systems. See Notes 2 and 17 for further information. Our opinions are not modified with respect to these matters.

Also, due to changes in legislation, Utah Housing Corporation is no longer reported as a discrete component unit and the Utah Communications Authority has been added as a discrete component unit. The net effect of these changes resulted in a net decrease in beginning net assets for discrete component units of \$219 million. See Note 2 for further information. Our opinion on aggregate discretely presented component units is not modified with respect to these matters.

### **Other Matters**

### Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the following information—1) management's discussion and analysis (pages 17–29) and 2) the budgetary comparison schedules and information about the State's pension plans, other postemployment benefit plans, and infrastructure assets reported using the modified approach (pages 132–149)—be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an

opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

### Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the State's basic financial statements. The supplementary information, such as the combining and individual fund financial statements and schedules, and the other information, such as the introductory and statistical sections, are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The combining and individual fund financial statements and schedules (pages 153–219) are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America by us and other auditors. In our opinion, based on our audit, the procedures performed as described above, and the reports of the other auditors, the combining and individual fund financial statements and schedules are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The introductory and statistical sections (pages 1–12 and 223–261, respectively) have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

### Other Reporting Required By Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report, dated November 4, 2015, on our consideration of the State's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the State's internal control over financial reporting and compliance.

Office of the Utah State Auditor

Office of the Utan State auditor

November 4, 2015

### INTRODUCTION

The following is a discussion and analysis of the State of Utah's financial performance and condition, providing an overview of the State's activities for the fiscal year ended June 30, 2015. Please read it in conjunction with the transmittal letter in the Introductory Section of this report and with the State's financial statements that follow this section.

### **HIGHLIGHTS**

### Government-wide

- Total assets and deferred outflows of resources of the State exceeded liabilities and deferred inflows of resources by \$22.704 billion (reported as net position). Of this amount, \$2.042 billion (unrestricted net position) may be used to meet the government's ongoing obligations while \$20.662 billion is restricted for specific uses or invested in capital assets.
- As a result of implementing GASB Statement 68, *Accounting and Financial Reporting for Pensions*, the State recorded \$1 million net pension asset, \$122.9 million deferred outflows of resources, \$815.4 million net pension liability, and \$78.8 million deferred inflows of resources for the primary government. This was the primary reason for an \$839.6 million adjustment to the beginning unrestricted net position in fiscal year 2015. After adjustments, the State's total net position increased by \$601.7 million or 2.7 percent over the prior year. Net position of governmental activities increased by \$431.6 million or 2.3 percent. Net position of business-type activities increased by \$170 million or 5.7 percent.

### **Fund Level**

- The governmental funds reported combined ending fund balances of \$5.363 billion, an increase of \$238.9 million in comparison with the prior year. Approximately 32.7 percent or \$1.755 billion of the ending fund balance is considered unrestricted (committed or assigned, or unassigned) and is available for spending either at the government's discretion or upon legislative approval. There was no unassigned fund balance available for future appropriations at yearend.
- The General Fund ended the fiscal year with a zero dollar surplus by using \$15.7 million of the \$189.9 million of General Fund budgeted revenues set aside for fiscal year 2016. Because there was no revenue surplus, there were no statutory transfers from the General Fund to any stabilization or reserve accounts.
- The Education Fund ended the year with a "revenue surplus" of \$118 million. After a statutory transfer of \$59 million from the revenue surplus to the Education Budget Reserve Account, the Education Fund ended the year with a \$59 million "revenue surplus."
- The State's stabilization accounts, the General Fund Budget Reserve Account (Rainy Day Fund), Medicaid Budget Stabilization Account, and Education Budget Reserve Account, ended the fiscal year with balances of \$141.2 million, \$17.1 million and \$349.5 million, respectively.
- Overall, sales tax revenues in the governmental funds increased \$83.1 million or 3.9 percent, compared to \$27.1 million or 1.3 percent increase in the prior year. Tax revenues increased \$56.6 million or 2.8 percent in the General Fund and \$303.8 million or 9.3 percent in the Education Fund.

### **Long-term Debt**

• The State's long-term bonded debt decreased a net \$118.8 million or 2.4 percent. General obligation bonds for the primary government decreased \$321.6 million or 9.8 percent, while revenue bonds for the primary government increased \$202.8 million or 12.6 percent.

### OVERVIEW OF THE FINANCIAL STATEMENTS

This report includes the State's Basic Financial Statements, Required Supplementary Information, and Supplementary Information. The Basic Financial Statements include three components: government-wide financial statements, fund financial statements, and notes to the financial statements.

### Government-wide Statements — Reporting the State as a Whole

The Statement of Net Position and the Statement of Activities beginning on page 33 together comprise the *government-wide financial statements*. These statements provide a broad overview of the State's finances as a whole with a long-term focus and are prepared using the *full-accrual* basis of accounting, similar to private-sector companies. This means all revenues and expenses are recognized regardless of when cash is received or spent, and all assets, deferred outflows of resources, liabilities, and deferred inflows of resources, including capital assets and long-term debt, are reported at the entity level. The government-wide statements report the State's *net position* – the difference between assets, deferred outflows of resources, liabilities, and deferred inflows of resources – and how it has changed from the prior year. Over time, increases and decreases in net position measure whether the State's overall financial condition is getting better or worse. In evaluating the State's overall condition, however, additional non-financial factors should be considered such as the State's economic outlook, changes in its demographics, and the condition of its capital assets and infrastructure. The government-wide statements report three activities:

- Governmental Activities Most of the State's basic services fall under this activity including education, transportation, public safety, courts, corrections, health, and human services. Taxes and federal grants are the major funding sources for these programs.
- Business-type Activities The State operates certain activities much like private-sector companies by charging fees to customers to cover all or most of the costs of providing the goods and services. Student loans, unemployment compensation, water loan programs, and liquor sales are examples of business-type activities.
- Component Units A number of entities are legally separate from the State, yet the State remains financially accountable for them. Colleges and Universities, Utah Communications Authority, and Utah State Fair Corporation are examples of component units.

### Fund Financial Statements — Reporting the State's Most Significant Funds

The fund financial statements beginning on page 38 provide detailed information about individual major funds, not the State as a whole. A fund is a group of related accounts that the State uses to keep track of specific resources that are segregated for a specific purpose. Some funds are required by law to exist, while others are established internally to maintain control over a particular activity. All of the State's funds are divided into three types, each of which uses a different accounting approach:

- Governmental Funds Most of the State's basic services are accounted for in governmental funds and are essentially the same functions reported as *governmental activities* in the government-wide statements. Governmental funds use the *modified accrual* basis of accounting, which measures the flow of current financial resources that can be converted to cash and the balances left at yearend that are available for future spending. This *short-term* view of the State's financial position helps determine whether the State has sufficient resources to cover expenditures for its basic services in the near future.
- Proprietary Funds Proprietary funds include enterprise funds and internal service funds and account for state activities that are operated much like private-sector companies. Like the government-wide statements, proprietary fund statements are presented using the full-accrual basis of accounting. Activities whose customers are mostly outside of state government (e.g., water loans to local governments) are accounted for in enterprise funds and are the same functions reported as business-type activities. Thus, the enterprise fund financial statements reinforce the information reported for business-type activities in the government-wide statements, but provide more detail and additional information, such as cash flows. Activities whose customers are mostly other state agencies (e.g., motor pool) are accounted for in internal service funds. The internal service fund activities are consolidated with the governmental activities in the government-wide statements because those services predominantly benefit governmental rather than business-type activities.
- Fiduciary Funds Fiduciary funds account for assets that, because of trust relationships, can be used only for trust beneficiaries. The State is responsible for ensuring these assets are used for their intended purposes. Fiduciary funds use *full-accrual* accounting, but are *not* included in the government-wide statements because their assets are not available to finance the State's own programs.

### **Reconciliation between Government-wide and Fund Statements**

The financial statements include schedules on pages 40 and 44 that reconcile and explain the differences between the amounts reported for *governmental activities* on the government-wide statements (full accrual basis of accounting, long-term focus) with amounts reported on the *governmental* fund statements (modified accrual basis of accounting, short-term focus). The following are some of the major differences between the two statements:

- Capital assets and long-term debt are included on the government-wide statements, but are not reported on the governmental fund statements.
- Capital outlay spending results in capital assets on the government-wide statements, but is expenditures on the governmental fund statements.
- Bond proceeds result in liabilities on the government-wide statements, but are other financing sources on the governmental fund statements.
- Certain tax revenues that are earned but not yet available are reported as revenue on the government-wide statements, but are deferred inflows of resources (unavailable revenue) on the governmental fund statements.

### **Notes to the Financial Statements**

The notes beginning on page 64 provide additional schedules and information that are essential to a complete understanding of the financial statements. The notes apply to both the government-wide financial statements and the fund financial statements.

### **Required Supplementary Information (RSI)**

Following the Basic Financial Statements are budgetary comparison schedules for major funds with legally adopted budgets and condition assessment data related to infrastructure. In addition, the RSI includes up to ten years of information on the State's pension plans, including schedules on the employer proportionate share of the net pension liability, changes in the net pension liability, and employer contributions. RSI also includes schedules on the funded status and employer contributions for the State's defined benefit Other Postemployment Benefit Plans. RSI further supports the information in the basic financial statements.

### **Supplementary Information**

Supplementary Information includes combining statements for the State's nonmajor governmental, nonmajor enterprise, internal service funds, fiduciary funds, and for nonmajor discretely presented component units. This section also includes schedules which compare budgeted expenditures to actual results at the legal level of control, which is generally the line item level of the *Appropriations Acts*.

### **Statistical Section**

This section provides up to ten years of financial, economic, and demographic information.

### **Adjustments to Beginning Net Position**

As described in Note 2 of the financial statements on page 73, beginning net position was adjusted as noted below.

- \$822.9 million decrease in governmental activities Implementation of GASB Statement 68.
- \$12.3 million decrease in business-type activities Implementation of GASB Statement 68.
- \$4.4 million decrease in business-type activities described in Note 2 of the financial statements on page 73.

### FINANCIAL ANALYSIS OF THE STATE AS A WHOLE

### **Net Position**

The State's total net position increased \$601.7 million or 2.7 percent in fiscal year 2015. In comparison, net position in the prior year increased \$1.47 billion or 7.1 percent. As a result of implementing GASB Statement 68, *Accounting and Financial Reporting for Pensions*, the State recorded \$1 million net pension asset, \$122.9 million deferred outflows of resources, \$815.4 million net pension liability, and \$78.8 million deferred inflows of resources for the primary government. This was the primary reason for an \$839.6 million adjustment to the beginning unrestricted net position in fiscal year 2015. The increase in total net position, after the impacts of Statement 68, reflects an economy that continues to improve and the active management of the State's resources. The change in net position is comprised of the following:

- Net Investment in Capital Assets Total invested in capital assets net of related debt increased \$766.7 million or 5.5 percent as the State's investment in highways and buildings exceeded depreciation and the net additional debt that was incurred to finance capital-related projects.
- Restricted Net Position Total restricted net position increased \$521.2 million or 9.8 percent over the prior year:
  Restricted net position of governmental activities increased \$279.9 million or 7.8 percent. The increase was due in part to a \$168.9 million or 13.6 percent increase in the net position of expendable public education as a result of increased individual and corporate income tax revenues. Nonexpendable public education net assets also increased \$155.6 million or 7.5 percent primarily due to revenues generated from land use and sale of trust lands in the permanent Trust Lands Fund. The balance of the increase was due to an increase in investment values because of general market conditions. These increases were offset by a \$36.1 million or 20.2 percent decrease in

net position restricted for transportation due to a distribution to a local government as directed by the legislature. Restricted net position of business-type activities increased by \$241.3 million or 13.9 percent, primarily due to a \$132.8 million increase in the Unemployment Compensation Fund as unemployment compensation revenues exceeded related claims. Restricted net position within Student Assistance Programs also increased \$85.1 million due to funds previously classified as unrestricted that were restricted for loans. Various loan programs provided an additional \$20 million in loan capital from federal grants and investment income.

• Unrestricted Net Position – Total unrestricted net position in governmental activities decreased \$612.4 million or 40.9 percent primarily due to the implementation of GASB Statement 68. For additional information, refer to Note 2 on page 73. After considering the impact of GASB Statement 68, unrestricted net position in governmental activities increased \$95.7 million primarily due to a \$59.8 million increase in the amount unspent and carried forwarded in general fund and capital projects. Unrestricted net position in business-type activities decreased \$73.8 million or 6 percent in part due to the implementation of GASB Statement 68. After considering the impact of GASB Statement 68, unrestricted net position in business-type activities decreased \$81.4 million within Student Assistance Programs due to funds previously classified as unrestricted that were restricted for loans. This decrease was offset by an \$18.9 million increase because the State provided additional capital for various loan programs from dedicated sales tax revenues.

### State of Utah Net Position as of June 30 (Expressed in Thousands)

	Govern Activ				Business-type Activities					Total Primary Government

Percent change in total													
Net Position from prior year		2.3 %				5.7 %				2.7 %			

<sup>\*</sup> The 2014 amounts presented here have not been restated for the implementation of GASB Statement 68 for pensions or other adjustments. Complete information necessary to fully restate the 2014 amounts was not available. See Note 2.

The largest component of the State's net position, 65.2 percent, reflects investments in capital assets (e.g., land, buildings, equipment, intangible assets, roads, and other infrastructure) less the outstanding debt issued to finance those assets. These types of assets are not available for future spending, nor can they be readily liquidated to pay off their related liabilities. Resources needed to repay capital-related debt must be provided from other sources.

Restricted net position comprises 25.8 percent of total net position and is subject to constitutional, legal, or external constraints on use. Net position that is restricted by the *Constitution of Utah* includes individual income and corporate income taxes that can be used only for public and higher education costs and proceeds from fees, taxes, and other charges related to motor vehicles that can be used only for transportation expenses.

The remaining balance of unrestricted net position may be used to meet the State's ongoing obligations, though certain laws and internally imposed commitments or assignments of resources further limit the purposes for which much of the net position may be used.

The following schedule and charts summarize the State's total revenues, expenses, and changes in net position for fiscal year 2015:

(Table on next page)

(Charts on next page.)

### **Changes in Net Position**

This year the State received 52.7 percent of its revenues from state taxes and 31.1 percent of its revenues from grants and contributions, primarily from federal sources. In the prior year, state taxes accounted for 50.1 percent and grants and contributions were 33.7 percent of total revenues. Charges for goods and services such as licenses, permits, liquor sales, park fees, and court fees, combined with other miscellaneous collections, comprised 16.1 percent of total revenues in fiscal year 2015, compared to 16.2 percent in fiscal year 2014.

### **Governmental Activities**

The State's total governmental revenues from all sources increased \$300 million or 2.6 percent. Tax revenues increased \$460.5 million or 7.5 percent due to continued improvement in the economy. These increases are similar to the increase at the fund level. However, due to differences in measurement focus and timing of collections, the increase at the government-wide level should not be used to predict future increases at the fund statement or budget level. With the exception of Transportation and General Government, as discussed below, other significant changes in governmental activities' revenues and expenses mirror the changes in the governmental funds. For further discussion, see the section entitled "Financial Analysis of the State's Governmental Funds" on page 23.

- Transportation Expenses decreased \$50.4 million, as compared to the prior year, due to an increase in the amount spent for capital outlay (i.e. land, state roads, and bridges). In the prior year, expenses were higher because the amount expended for capital outlay was lower. The amount expended for capital outlay is not reported as expenses but as an asset on the government-wide statements.
- General Government Expenses increased \$25.3 million, as compared to the prior year, primarily due to a reduction in expense in the prior year on the government-wide statements for settlement obligation costs. Such costs are reported on the accrual basis and expenses are reported when incurred on the government-wide statements.

The following table shows to what extent program revenues (charges for services and grants) covered program expenses. For fiscal year 2015, program revenues covered \$4.965 billion, or 46.9 percent of \$10.581 billion total program expenses. For the remaining \$5.615 billion or 53.1 percent of program expenses, the State relied on state taxes and other general revenues.

(Table on next page)

### State of Utah Net Cost of Governmental Activities

(Expressed in Thousands)

		Program Expenses				N Prog (Expenses)	_		Program Revenues as a Percentage of Program Expenses		
		2015	_	2015		2015		2014	20	15	2014

Interest and Charges on Long-term Debt		98,442				(98,442)		(110,034)		0.0 %	0.0 %
Total Governmental Activities	\$ 1	0,580,906	\$	4,965,456	\$	(5,615,450)	\$	(5,052,630)	2	16.9 %	50.7 %

### **Business-type Activities**

Changes in the State's business-type activities mirror the changes noted in the State's proprietary funds, except as described below. The changes in the State's proprietary funds are detailed in the section entitled "Financial Analysis of the State's Proprietary Funds" on page 27. Overall, revenues from the State's business-type activities decreased \$31.2 million or 3.4 percent from the prior year. Charges for services decreased \$26.6 million primarily due to a \$61.2 million decrease in the Unemployment Compensation Fund, \$11.9 million decrease in Water Loan Programs, and \$6.8 million decrease in the Community Impact Loan Fund. The decreases in charges for services within Water Loan Programs and the Community Impact Loan Fund were due a reclassification of operating interest on notes and mortgages to nonoperating investment income. These decreases were offset by a \$28.4 million increase in charges for services in Student Assistance Programs and a \$24.6 million increase in liquor sales due to higher sales volume. Operating grants and contributions decreased \$5.7 million primarily due to a \$15 million decrease in the Unemployment Compensation Fund and a \$13.9 million decrease in the Federal Health Insurance Pool as the Pool discontinued operations and enrollees transitioned from this temporary program to coverage under the *Patient Protection and Affordable Care Act of 2010.* These decreases were offset by a \$17.3 million increase in operating grants and contributions in Water Loan Programs and small increases in various other business-type activities. Total expenses for the State's business-type activities decreased \$27.2 million or 4.4 percent, largely the result of a \$56.3 million decrease in the Unemployment Compensation Fund, offset by a \$31.5 million increase in Student Assistance Programs.

All of the State's business-type activities operate primarily from program revenues, except for the Water Loan Programs and the Agriculture Loan Fund that by law receive dedicated sales tax revenues and the Community Impact Loan Fund that receives federal mineral lease revenues transferred from the General Fund to provide additional capital for loans. Accounting standards require unemployment taxes that are collected from employers and deposited in the Unemployment Compensation Fund to be reported as charges for services rather than taxes. Therefore, taxes in the business-type activities are comprised entirely of sales tax revenues in the water and agriculture loan programs.

### FINANCIAL ANALYSIS OF THE STATE'S GOVERNMENTAL FUNDS

### **Fund Balances**

At June 30, 2015, the State's governmental funds reported combined ending fund balances of \$5.363 billion. Of this amount, \$2.383 billion or 44.4 percent is nonspendable, either due to its form or legal constraints, and \$1.225 billion or 22.8 percent is restricted for specific programs by external constraints, constitutional provisions, or contractual obligations. Unspent bond proceeds, revenue restricted for public education, revenue that derives from the operation of motor vehicles on public highways, and mineral lease revenues are included in restricted fund balance. An additional \$1.339 billion or 25 percent of total fund balance has been committed to specific purposes. Committed amounts cannot be used for any other

purpose unless approved by the Legislature. An additional \$416 million or 7.8 percent of total fund balance has been assigned to specific purposes, as expressed by legislative intent. There was no unassigned fund balance available for future appropriations at yearend.

### State of Utah Governmental Fund Balances as of June 30, 2015 (Expressed in Thousands)

	General Fund	Education Fund	Transpor- tation Fund	ansportation nvestment Fund	Trust Lands Fund	:	Nonmajor Funds	_	Total
Nonspendable	\$ 124,597	\$ _	\$ 13,605	\$ _	\$ 2,244,902	\$	_	\$	2,383,104
Restricted	34,278	1,002,163	148,332	2,823	_		37,800		1,225,396
Committed	496,758	_	49,425	566,767			226,377		1,339,327
Assigned	252,369	_	150	_			163,044		415,563
Unassigned	· —	_	_	_			_		_
Total	\$ 908,002	\$ 1,002,163	\$ 211,512	\$ 569,590	\$ 2,244,902	\$	427,221	\$	5,363,390
Percent change from prior year	4.8 %	10.7 %	(15.0)%	(9.8)%	7.4 %		11.4 %		4.7 %

### **General Fund**

The General Fund's total fund balance increased by \$41.9 million or 4.8 percent in fiscal year 2015. The General Fund ended the year with a zero dollar surplus, or unassigned fund balance, by using \$15.7 million of the \$189.9 million of General Fund budgeted revenues set aside for fiscal year 2016. This left \$174.2 million set aside in the budget and assigned by the Legislature for fiscal year 2016 appropriations. In the prior year, the General Fund ended the year with a \$7.2 million surplus, or unassigned balance.

Specific changes in the General Fund balance included the following:

- Nonspendable fund balance increased by \$11.8 million or 10.5 percent. Prepaid items increased \$23.9 million due to increases in payments for accountable care organization (ACO), substance abuse, mental health, Children's Health Insurance Plan (CHIP), and dental programs all within the Medicaid program that require payments in advance. This increase was offset by an \$11.8 million decrease in the long-term portion of interfund loans receivable with Internal Services Funds due to a reduction of the loan balances.
- Restricted fund balance decreased by \$6.6 million or 16.2 percent due to decreases in revenues set aside for specific purposes due to constraints that are imposed externally or by law.
- Committed fund balance decreased by \$10.6 million or 2.1 percent, primarily due to a \$25.5 million decrease in monies set aside for committed purposes, offset by a \$17.3 million increase in agency carry-forward monies. There were no statutory transfers to the General Fund Budget Reserve Account (Rainy Day Fund), which ended the year with a balance of \$141.2 million.
- Assigned fund balance increased by \$54.5 million or 27.6 percent. The increase was primarily due to a \$63.7 million increase in the amount set aside for next year's budget, offset by a \$9.2 million decrease in various other assigned sources.

Total tax collections in the General Fund increased \$56.6 million or 2.8 percent due to an improving economy. Sales and use tax increased \$67.6 million, or 4.1 percent. Other taxes decreased \$11 million or 3 percent due to a \$29.1 million decrease in severance tax as a result of lower energy prices and a decline in production. This decrease was offset by a \$4.5 million increase in insurance premium tax, a \$3.2 million increase in cigarette and tobacco tax, and smaller increases in miscellaneous other taxes. Overall, sales tax revenue in all governmental funds increased \$83.1 million or 3.9 percent.

Total General Fund non-tax revenues increased \$38.2 million or 1.1 percent, explained as follows: Federal contracts and grants increased \$25.9 million or 1 percent primarily due to a \$22 million increase in federal funding for the CHIP and Medicaid Programs and a \$17.3 million increase in federal funds provided for public health services. These increases were offset by a \$15.1 million decrease in federal funding for community and family health services grants. Additional details regarding the change in federal contracts and grants are provided below in terms of the corresponding changes in expenditures. Miscellaneous and other revenue increased \$17.6 million or 7.4 percent primarily due to a \$59.3 million increase in rebates, offset by a \$35.1 million decrease in collections from global settlements within the Medicaid Program and \$6.6 million decreases in various other miscellaneous revenues. Charges for Services increased \$14.4 million, driven by demand for government services. Federal mineral lease revenue decreased \$19.6 million or 12.4 percent due to lower energy prices and a decline in production. The General Fund revenue also increased by \$16.3 million due to a special item that was

the result of the dissolution of the Comprehensive Health Insurance Pool (discrete component unit) and refund of the cash balance back to the State's general fund.

Overall, total General Fund expenditures increased by \$244.6 million or 4.1 percent due in part to a 1 percent salary increase for state employees, .25 percent for discretionary increases, and increases in retirement and health insurance costs. Expenditures also increased as the State responded to an improving economy and an increase in the public's demand for some government services. Significant changes in expenditures occurred in the following areas:

- Higher Education Total expenditures increased \$93.6 million or 11.4 percent due to additional state appropriations. Funding was provided for higher education employee salary increases and increases in retirement and health insurance costs. Major new state-funded initiatives included: 1) \$57 million to improve funding equity and address specific priorities among the higher education institutions; 2) \$5 million to the State Board of Regents for scholarships and performance-based funding; 3) \$6.8 million for the Utah College of Applied Technology to improve funding equity, increase capacity for career and technical education, and for administration; and 4) \$2 million to Dixie State University for university status.
- Health and Environmental Quality Total expenditures increased \$83.8 million or 3.5 percent due to overall growth
  in both Medicaid and CHIP programs. Specifically, expenditures increased for managed health care, home and
  community based waiver programs, capitated mental health services, and the CHIP program. These increases were
  primarily due to caseload growth, resulting in part from implementation of the Patient Protection and Affordable Care
  Act for a full fiscal year, and authorized rate increases.
- Human Services and Juvenile Justice Services Total expenditures increased \$30.3 million or 4.4 percent primarily due to an \$18.4 million increase in funding for people with disabilities as additional clients were served and new services were provided. Mental health services and initiatives increased \$11.5 million as additional funding was provided for community mental health services, Medicaid match funding, and an increase in personnel, drug and medical costs.
- Employment and Family Services Total expenditures increased \$25.3 million or 3.7 percent primarily due to a \$28 million increase in expenditures in the housing programs as a result of an increase in housing applications and construction. This increase was offset by slight decreases in various other programs.

### **Budgetary Highlights** — General Fund

The Legislature adopted the initial fiscal year 2015 budget during the 2014 General Session (January to March 2014). The original consensus revenue estimates in the General Fund budget at the start of fiscal year 2015, excluding department-specific revenue sources such as federal grants and departmental collections, and miscellaneous transfers, were 3.5 percent higher than the final fiscal year 2014 budget. The increase was primarily due to growth in the sales and use tax due to the improving economy. Budgeted expenditures were 7.4 percent higher than the final fiscal year 2014 budget. The Governor and Legislature were able to balance the original fiscal year 2015 budget with revenue growth, one-time monies, legislative changes to revenue, and targeted base budget reductions.

The fiscal year 2015 budget was again addressed during the 2015 General Session of the Legislature (January to March 2015). General revenue estimates had increased \$31.3 million from the original consensus estimates adopted during the 2014 General Session due to projected increases in sales tax, insurance premium tax, severance tax, and miscellaneous other revenues. The increased revenue estimates allowed the Legislature to set aside \$189.9 million for fiscal year 2016 appropriations. In the end, taxes and other general revenues ended the year \$33.2 million below final budgeted amounts. However, agencies lapsed \$4.5 million of unspent budgeted dollars back to the General Fund. General revenues below final budgeted amounts were also covered by various statutory transfers and adjustments that occurred at yearend. In addition, the amount set aside for fiscal year 2016 appropriations was reduced by \$15.7 million.

Final budgets of department-specific revenue sources decreased from original budgets primarily due to a decrease in expected federal contracts and grants. Actual department-specific revenues decreased from final budgets due to a decrease in federal mineral lease revenue. Final budgets for many of the departmental-specific revenue sources and related expenditures such as federal grants, departmental collections, and miscellaneous revenues, are generally revised based on actual collections. The difference between final budgeted expenditures and actual expenditures is primarily due to nonlapsing and unspent restricted funds that will be carried forward to the next year.

### **Education Fund**

Restricted fund balance in the Education Fund increased by \$97 million or 10.7 percent from the prior year as revenues exceeded expenditures and transfers out. The amount unspent and carried forward for education decreased by \$44.2 million. Amounts set aside for fiscal year 2016 appropriations increased by \$98.9 million. Tax accruals restricted by law for education increased by \$22.4 million.

In addition, the Education Fund ended the year with "revenue surplus" of \$118 million. In the event of a "revenue surplus" in the Education Fund, state law requires 25 percent of the surplus to be transferred to the Education Fund Budget Reserve Account, a budget stabilization account. State law requires an additional 25 percent to repay prior year transfers out of the fund, but limits these transfers to 11 percent of Education Fund appropriations. Of the \$118 million revenue surplus, \$59 million was transferred to the Education Budget Reserve Account. The Education Fund ended the year with a \$59 million "revenue surplus" after the statutory transfer to the Education Fund Budget Reserve Account. The Education Budget Reserve Account ended the year with a balance of \$349.5 million.

Overall, total revenue in the Education Fund increased by \$358.1 million or 9.4 percent. Individual income tax increased by \$295.5 million or 10.1 percent and corporate income tax increased \$43.8 million or 13.6 percent. These increases are primarily due to an economy that continues to improve, and also due to the timing of tax revenue received and accrued at yearend. Federal contracts and grants also increased by \$13.1 million and investment income increased by \$4.6 million. Other taxes decreased by \$35.5 million and miscellaneous other revenue increased by \$36.3 million primarily as a result of the portion of liquor sales allocated by law for school lunch that were reclassified from other taxes to other revenues.

Overall, expenditures increased by \$138.4 million or 4.3 percent in the Education Fund. The increase was primarily due to a \$118 million increase in the Minimum School Program to provide for student enrollment growth and to increase the weighted pupil unit value, which is the primary funding mechanism for public education. Expenditures also increased by \$13.4 million due to additional funding spent for the Child Nutrition and Initiative Programs. The balance of the increase was due to the timing of expenditures accrued at yearend.

### **Transportation Fund**

Total fund balance in the Transportation Fund decreased \$37.3 million or 15 percent from the prior year. Restricted fund balance decreased by \$37.6 million or 20.2 percent primarily due to a \$48.2 million distribution to a local government, as explained below, which was offset by a \$7.8 million increase in restricted funds for right of way purchase and small increases in various other restricted sources. Committed fund balance increased \$2.2 million or 4.6 percent due to an increase in unspent sales and use tax collections for highway projects at yearend. Assigned fund balance decreased by \$1.4 million or 90.4 percent due to a decrease in unspent general revenues appropriated to the Transportation Fund. Nonspendable inventory decreased by \$413 thousand or 2.9 percent.

Overall, transportation revenues decreased by \$35.3 million or 3.6 percent. The decrease resulted from the following changes in revenue as compared to the prior year:

- Federal contracts and grants decreased by \$30 million or 8.7 percent as a result of timing differences related to highway construction projects, as explained below.
- Sales and use tax revenues statutorily designated for transportation projects decreased \$32.9 million or 43 percent due to legislation that directed that certain local option sales tax be distributed directly to a local government and expended as determined by that local government's legislative body.
- Miscellaneous and other revenues increased \$14.7 million or 71.6 percent primarily due to \$10.1 million increase as certain revenue was reclassified as miscellaneous revenue from restricted sales taxes. The increase was also due to a \$5 million increase in revenue received from cooperative agreements with local governments for construction projects.
- Motor and special fuels tax increased \$12.2 million or 3.4 percent due to a \$3.3 million increase in collections and an \$8.9 million increase due to the timing of tax revenue received and accrued at yearend.

Expenditures for the Transportation Fund increased slightly by \$219 thousand or .02 percent due to timing differences related to highway construction projects, as explained below. Net other financing sources (uses) decreased by \$20.5 million or 31 percent, primarily because of a \$10.4 million decrease in federal mineral lease revenue transferred into the fund and a \$13.3 million decrease in transfers in for bond payments.

Authorized federal funding for highway construction remains relatively stable from year to year. However, the spending of state and federal revenue reflects the timing of highway construction projects, which is impacted by a variety of circumstances such as environmental studies or existing weather conditions. In addition, the Department of Transportation has discretion on allocating federal funds among projects, which impacts the amount of federal revenue reported in the Transportation Fund.

### **Transportation Investment Fund**

Fund balance in the Transportation Investment Fund decreased by \$61.8 million or 9.8 percent from the prior year. Restricted fund balance decreased \$23.7 million or 89.4 percent as general obligation bond proceeds were used for highway projects.

Committed fund balance decreased by \$38.1 million or 6.3 percent due to the increase in expenditures which utilized sales and use tax revenue that was unspent in the prior year.

Overall, revenues increased \$35.4 million or 7.5 percent. Sales and use tax revenues statutorily reallocated from use in the General Fund to use for highway projects increased \$48.3 million or 12.8 percent. This increase was offset by a \$15.2 million decrease or 100 percent in miscellaneous and other revenue as a result of a court settlement in the prior year. Net other financing sources (uses) decreased by \$202.1 million or 436.8 percent due to a \$250 million general obligation bond issuance in the prior year compared to no bonds issued in the current year. This decrease was offset by a \$46.4 million increase in net other financial sources (uses) as a result of less transfers out of the fund. Expenditures increased by \$62.1 million or 24.1 percent from the prior year due to increased spending on highway construction projects.

### **Trust Lands Fund**

The fund balance of the permanent Trust Lands Fund increased by \$155.6 million or 7.4 percent from the prior year. The increase was due to a \$63 million change in investment values because of general market conditions. Revenue generated from land use and sales of trust lands contributed \$89.7 million to the increase in fund balance. The permanent fund also generated \$45.8 million of cash investment earnings that is earmarked for distribution to local school districts. The principal in the fund is held in perpetuity (nonspendable) with earnings restricted primarily to support public education.

### FINANCIAL ANALYSIS OF THE STATE'S PROPRIETARY FUNDS

### **Student Assistance Programs**

As a result of implementing GASB Statement 68, *Accounting and Financial Reporting for Pensions*, the beginning net position of the Student Assistance Programs decreased \$1.3 million. For additional information see Note 2 on page 73. After adjusting for the impact of GASB Statement 68, the net position increased \$4.1 million or 1.1 percent from the prior year, due to changes in total assets, liabilities, and deferred inflows of resources. Total assets increased \$1.39 billion primarily due to a significant increase in student loans receivable. Total liabilities also increased \$1.397 billion due to an increase in student loan revenue bonds and notes payable and line of credit used to acquire additional eligible loans. These increases were offset by a \$10.7 million decrease in deferred inflows of resources as a result of a decrease in the deferred amount on refundings of bonded debt. The increase in student loans receivable resulted in a \$28.4 million increase in program revenues and \$26.8 million increase in student loan servicing and related expenses. Of total net position of \$368.1 million, \$320.1 million is restricted for use within the programs by bond covenants or federal law.

### **Unemployment Compensation Fund**

The State's average unemployment rate for fiscal year 2015 decreased slightly from the prior year. Federal grant revenue decreased \$18.4 million or 103.8 percent due to a decrease in benefits paid for the Emergency Unemployment Compensation (EUC) program, which ended January 1, 2014, and other federal programs. Employer tax revenue decreased \$61.2 million or 17.2 percent due to overall contribution rate decreases from the prior year, and lower claims volume. Expenses decreased \$56.3 million or 24.1 percent due to fewer claims paid and an improving economy. Employer taxes and other revenues exceeded benefit payments resulting in the increase of net position of \$132.8 million or 16.1 percent. The entire net position of \$959.3 million is restricted for use within the programs by state and federal law.

### **Water Loan Programs**

The net position of the Water Loan Programs increased \$33.1 million or 3.8 percent from the prior year. Additional capital for loans was provided from \$27.9 million in dedicated sales tax revenues, \$15.1 million in federal grants, and \$13.4 million investment income. These increases were offset by program grant expenses of \$14 million, interest expense of \$1.8 million, and other operating expenses of \$2.5 million. Of total net position of \$913.7 million, \$422.6 million is restricted for use within the Water Loan Programs by federal grant requirements and \$163.5 million is restricted as pledged receivables for outstanding revenue bonds.

### **Community Impact Loan Fund**

The net position of the Community Impact Loan Fund increased \$2.3 million or .3 percent from the prior year, due to investment income of \$7.7 million offset by \$4.7 million transferred out of the fund for community development programs. There is no restriction on the fund's net position.

### CAPITAL ASSET AND LONG-TERM DEBT ADMINISTRATION

### **Capital Assets**

The State's capital assets increased a net \$494.8 million during the year. The change consisted of net increases in construction in progress of \$242 million; infrastructure (i.e., state roads and bridges) of \$158.1 million; building and improvements of \$52.8 million; and land and related assets of \$48.7 million. There were net decreases in machinery and equipment of \$5.2 million and software of \$1.6 million. Several buildings financed by the State are actually owned by the colleges and universities, which are discrete component units of the State. Therefore, while the capital assets are on the component unit's financial statements, any outstanding debt issued by the State to finance construction of those assets is reported as a liability of the State's governmental activities. This in turn reduces unrestricted net position. As of June 30, 2015, the State had \$252.4 million of outstanding debt related to capital assets of component units.

At June 30, 2015, the State had commitments in capital projects funds of \$387.878 million for building projects and \$228.5 million for highway construction and improvement projects. The State also had commitments of \$281.1 million for road construction and other contract commitments in the Transportation Fund. Funding for the commitments will come from existing resources in these funds and from future appropriations and bond proceeds.

The State has adopted an allowable alternative to reporting depreciation for state roads and bridges (infrastructure assets) maintained by the Utah Department of Transportation (UDOT). Under this alternative method, referred to as the "modified approach," UDOT must maintain an asset management system and demonstrate that the infrastructure is being preserved at or above established condition levels. Infrastructure assets accounted for under the modified approach are not depreciated, and maintenance and preservation costs are expensed.

The State's established condition level for state roads is to maintain a certain percentage of mileage at a "fair" or better condition. The Interstate system has a target of 95 percent rated as "fair" or better, Level 1 roads (over 1,000 Average Annual Daily Traffic) at 90 percent, and Level 2 roads (under 1,000 Average Annual Daily Traffic) at 80 percent. The most recent biannual condition assessment completed in 2014 indicated that 99.7 percent of Interstate and 91.7 percent of Level 1 roads were in "fair" or better condition. These results reflect maintaining Interstate and Level 1 roads above target percentages and consistent with calendar year 2012, when 99.5 percent of Interstate and 93.5 percent of Level 1 were assessed as "fair" or better condition. In 2013 Level 1 and Level 2 roads were redefined from a "2,000" to a 1,000 Average Annual Daily Traffic threshold, resulting in 75.3 percent of Level 2 roads at a "fair" or better condition in 2014 compared to 82.1 percent in 2012. The State has corrective procedures in place to meet the Level 2 condition target by the next assessment in calendar year 2016.

The State's established condition level for bridges is to maintain 50 percent with a rating of "good" and no more than 10 percent of bridges with a "poor" rating. The most recent condition assessment, completed in April 2015, indicated that 73 percent and 1 percent of bridges were in "good" and "poor" condition, respectively. These results reflect maintaining bridges at a consistent condition level as 2014 when 73.4 percent of the bridges were assessed as "good" or better, and 1 percent assessed were in "poor" condition.

During fiscal year 2015, the State spent \$329.3 million to maintain and preserve roads and bridges. This amount is 41 percent above the estimated amount of \$233.6 million needed to maintain these assets at established condition levels.

More information about capital assets is included in Note 8 on page 97, and more detailed information on the State's modified approach for reporting infrastructure is presented in the Required Supplementary Information on pages 148 and 149.

### **Long-term Debt**

The Constitution of Utah allows the State to contract debts not exceeding 1.5 percent of the value of the total taxable property of the State (i.e. constitutional debt limit). The Legislature authorizes general obligation indebtedness within this limit. The State Appropriation and Tax Limitation Act (i.e., statutory debt limit) further limits the outstanding general obligation debt of the State to not exceed 45 percent of the maximum allowable state budget appropriation limit. As of June 30, 2015, the general obligation indebtedness of the State was \$1.606 billion below the constitutional debt limit and \$1.164 billion below the statutory debt limit.

Revenue bonds of the State Building Ownership Authority are not backed by the general taxing authority of the State, but are payable from revenue provided through appropriations of the Legislature or other operating revenues. Revenue bonds of the Student Assistance Programs and Water Loan Programs are not backed by the general taxing authority of the State, but are payable solely from specific fees or loan repayments as pledged in the bond indentures.

(Table on next page)

### State of Utah Net Outstanding Bonded Debt as of June 30

(Expressed in Millions)

	Govern Acti			Busine Acti	• •	Total l Gover	•	Percentage Change
	2015	_	2014	 2015	 2014	 2015	 2014	2014 to 2015
General Obligation Bonds Revenue Bonds:	\$ 2,949.7	\$	3,271.3	\$ _	\$ _	\$ 2,949.7	\$ 3,271.3	(9.8)%
State Building Ownership Auth	169.6		187.2	80.0	81.4	249.6	268.6	(7.1)%
Student Assistance Programs	_		_	1,511.1	1,284.1	1,511.1	1,284.1	17.7 %
Water Loan Progams				47.2	 52.4	47.2	 52.4	(9.9)%
Total Bonds Payable	\$ 3,119.3	\$	3,458.5	\$ 1,638.3	\$ 1,417.9	\$ 4,757.6	\$ 4,876.4	(2.4)%

Total general obligation bonds payable net of premiums and discounts decreased \$321.6 million (offset by a \$202.8 million increase in revenue bonds payable for an overall net decrease of \$118.8 million during the fiscal year). The State issued \$221 million of general obligation bonds during the fiscal year as the State sought to take advantage of lower interest rates to advance refund portions of prior general obligation bonds. In addition, the State issued a total of \$307 million of revenue bonds. Of the revenue bonds issued, \$30 million was used to advance refund portions of prior revenue bonds to take advantage of lower interest rates, and \$277 million was used to advance refund certain outstanding student loan revenue bonds in the Student Assistance Programs.

The State's active management of its resources has helped the State maintain its triple-A rating on general obligation bonds from all three national rating agencies, and double-A rating on lease revenue bonds from two national rating agencies from which ratings were sought. These ratings are the best available and save millions of dollars in interest costs each year because the State is able to obtain very favorable interest rates on new debt. Note 10 beginning on page 101 contains more information about the State's outstanding debt.

### ECONOMIC OUTLOOK AND NEXT YEAR'S BUDGET

Original general revenue estimates of the General Fund for fiscal year 2016 are 3.2 percent higher than actual fiscal year 2015 revenues. Original estimates of the Education Fund for fiscal year 2016 are .3 percent higher than actual fiscal year 2015 revenues. The Legislature balanced the 2016 budget through increased projected revenue collections, prior year reserves, program savings and fund transfers.

Preliminary data for fiscal year 2016 show tax revenues to be in line with estimates. The overall unemployment rate is expected to be 3.7 percent in 2015, slightly down from the average 2014 rate of 3.8 percent. Taxable retail sales are expected to increase 5.1 percent in 2015 and increase 4.7 percent in 2016. Personal income is expected to increase 5.1 percent in 2015, and 4.7 percent in 2016. Because these indicators are measured on a calendar year basis, the impact on the State budget will not be fully realized until well into fiscal year 2016. The Governor and Legislature will review the fiscal year 2016 budget again during the upcoming 2016 General Session and take action as necessary to ensure a balanced budget.

### CONTACTING THE STATE'S DIVISION OF FINANCE

This financial report is designed to provide our citizens, taxpayers, customers, investors, and creditors with a general overview of the State's finances and to demonstrate the State's accountability for the money it receives. If you have questions about this report or need additional financial information, please contact the Department of Administrative Services: Division of Finance, Financial Reporting Section at 2110 State Office Building, Salt Lake City, UT, 84114, phone (801) 538-3082 or visit our Web site at: www.finance.utah.gov.

The preceding discussion and analysis focuses on the State's primary government operations. With the exception of a few nonmajor component units, the State's component units each issue separate audited financial statements that include their respective management's discussion and analysis. Component unit statements may be obtained from their respective administrative offices or from the Office of the Utah State Auditor, Utah State Capitol Complex, East Office Building, Suite E310, Salt Lake City, UT 84114 or online at auditor.utah.gov.

### General Fund

This fund is the principal operating fund of the State. It accounts for all financial resources not accounted for and reported in another fund.

### **Education Fund**

This fund accounts for all corporate and income taxes that support public and higher education in the State. This fund is also used to account for specific revenues and expenditures that support the public elementary and secondary schools.

## Transportation Fund

This fund is maintained to account for revenues and expenditures associated with highway construction and maintenance. Principal funding is provided from dedicated highway user taxes, fees, and federal funds.

## Transportation Investment Fund

This capital projects fund is used to account for revenues and expenditures associated with the construction and reconstruction of specific state and federal highways. Projects designated for the Transportation Investment Capacity program are accounted for within this fund. Funding is provided from highway general obligation bonds, federal funds, vehicle registration fees, sales and use taxes, and appropriations.

### Trust Lands

This permanent fund accounts for land grants and the sale of lands received from the federal *Enabling Act*. The principal in the fund is perpetual with the earnings used primarily to support public education.

## Nonmajor Funds

Nonmajor governmental funds are presented by fund type beginning on page 154.

# Reconciliation of the Balance Sheet — Governmental Funds To the Statement of Net Position

, 2015		(Expressed in Tho
Total Fund Balances – Governmental Funds		\$ 5,363,390
The total net position reported for governmental activities in the Statement of Net		
Position is different because:		
Capital assets used in governmental activities are not financial resources and		
therefore are not reported in the governmental funds: (See Note 8)		
Land and Related Non-depreciable Assets	\$ 1,790,751	
Infrastructure, Non-depreciable	13,550,863	
Construction in Progress	789,698	
Buildings, Equipment, and Other Depreciable Assets	2,593,591	
Accumulated Depreciation	(1,173,064)	17,551,839
Deferred inflows of resources are not reported in the governmental funds:		
Revenues are not available soon enough after yearend to pay for the current		
period's expenditures	625,348	
Related to pensions	(72,618)	552,730
	(, =, = = )	22_,.23
Internal service funds are used by management to charge the costs of certain		
activities, such as insurance, technology services, and fleet operations to individual		
governmental funds. The assets, deferred outflows of resources, liabilities, and		
deferred inflows of resources of the internal service funds are included in		
governmental activities in the Statement of Net Position.		20,603
		20,000
Deferred outflows of resources are not reported in the governmental funds:		
Amount on refunding of bonded debt	34,682	4.5.400
Related to pensions	112,800	147,482
Other assets not available in the current period and therefore are not reported in the		
governmental funds:		
Other Postemployment Benefit Asset, net	5,668	6 601
Net Pension Asset	1,023	6,691
Long-term liabilities and related accrued interest are not due and payable in the		
current period and therefore are not reported in the governmental funds: (See Note 10)		
General Obligation and Revenue Bonds Payable	(2,996,580)	
Unamortized Bond Premiums	(122,315)	
Accrued Interest on Bonds Payable	(1,059)	
Pollution Remediation Obligation	(5,086)	
Settlement Obligation	(4,471)	
Compensated Absences	(185,792)	
Capital Leases	(20,287)	
Other Postemployment Benefit Obligation, net	(4,126)	
Net Pension Liability	(749,334)	(4,089,050)

# Reconciliation of the Statement of Revenues, Expenditures, and Changes in Fund Balances — Governmental Funds

To 1	the	Statement	of	Activities
------	-----	-----------	----	------------

e Fiscal Year Ended June 30, 2015		(Expi	essed in Thousar
Net Change in Fund Balances – Governmental Funds		\$	238,905
The change in net position reported for governmental activities in the Statement of Activities is different because:			
Governmental funds report capital outlays as expenditures. However, in the Statement of Activities the cost of those assets is allocated over their estimated useful lives as depreciation expense. The primary government also constructs buildings for component units. When the buildings are completed they are "transferred" to component units and are reported as expenses in the Statement of Activities. This is the amount by which capital outlays of \$695,248 exceeded depreciation expense of \$(92,907) and buildings "transferred" to component units of \$(71,822) in the current period. (See Note 8)			530,519
In the Statement of Activities only the gain/loss on the sale of assets is reported, whereas in the governmental funds, the proceeds from the sales increase financial			
resources. Thus the change in net position differs from the change in governmental fund balance by the cost of the assets sold.			(27,586)
Net effect of revenues reported on the accrual basis in the Statement of Activities that are reported as deferred inflows of resources in the governmental funds, as they are unavailable and do not provide current financial resources.			78,854
Internal service funds are used by management to charge the costs of certain activities, such as insurance, technology services, and fleet operations to individual governmental funds. The net revenue (expense) of the internal service funds is			
reported with governmental activities.			7,928
Bond proceeds and capital leases provide current financial resources to governmental funds by issuing debt which increases long-term liabilities in the Statement of Net Position. Repayments of bond and capital lease principal are expenditures in the governmental funds, but reduce liabilities in the Statement of Net Position: (See Note 10)  Bonds Issued  Premiums on Bonds Issued  Defeasance on Bonds  Amount Deferred on Refunding  Payment of Bond Principal  Capital Lease Payments	\$ (221,765) (47,562) 225,349 22,798 319,739 1,507		300,066
Expenditures are recognized in the governmental funds when paid or due for: items not normally paid with available financial resources; and interest on long-term debt unless certain conditions are met. However, the Statement of Activities is presented on the accrual basis and expenses are reported when incurred, regardless of when financial resources are available or expenditures are paid or due. This adjustment combines the net changes of the following balances:			
Pollution Remediation Obligation Costs  Settlement Obligation Costs  Compensated Absences Expenses  Accrued Interest on Bonds Payable  Amortization of Bond Premiums  Amortization of Deferred Amount on Refunding of Bonded Debt  Contracts Payable Payments  Other Postemployment Benefit Obligation Costs, net  Pension Costs, net	241 2,457 (1,113) 102 63,426 (5,289) 5,585 19 60,453		125,881

## Proprietary Fund Financial Statements

## Student Assistance Programs

These programs are administered by the State Board of Regents and are comprised of the Utah Higher Education Assistance Authority Student Loan Guarantee Program and the Student Loan Purchase Program. The purpose of these programs is to guarantee the repayment of student loans made by participating lenders to eligible borrowers and service outstanding student loans. Funds are acquired from the sale of bonds, lines-of-credit, and funding notes.

## **Unemployment Compensation Fund**

This fund pays claims for unemployment to eligible recipients and is funded through employer contributions and reimbursements, and federal grants.

## Water Loan Programs

These programs provide loans to local governments, water districts, and other entities for the purpose of upgrading water storage facilities and other related structures. Capital for this fund was provided from the General Fund and from general obligation bonds that were repaid with general tax revenues. Additional funds have been generated by issuing water loan recapitalization revenue bonds that are secured by pledged principal and interest payments of specific revolving water resources loan funds.

## Community Impact Loan Fund

This fund provides loans to local governments to alleviate the social, economic, and public financial impacts resulting from the development of the State's natural resources. Working capital for this fund is provided from federal mineral lease funds transferred from the General Fund. This fund also administers loans and loan guarantees from federal funds to small businesses under the Small Business Credit Initiative.

## Nonmajor Funds

Nonmajor enterprise funds are presented beginning on page 178.

### Governmental Activities – Internal Service Funds

These funds are maintained to account for the operation of state agencies that provide goods or services to other state agencies and other governmental units on a cost-reimbursement basis. These funds are presented in more detail beginning on page 190.

## Fiduciary Fund Financial Statements

## Pension and Other Employee Benefit Trust Funds

These funds are used to account for the defined benefit pension plans and defined contribution plans administered by the Utah Retirement Systems, and the Post-Retirement Benefits Trust Funds, defined benefit other postemployment benefit plans (OPEB Plans), and other employee benefit plans administered by the State.

### Investment Trust Fund

This fund is used to account for the investments related to external participants in the Utah State Public Treasurer's Investment Fund.

## Private Purpose Trust Funds

These funds are used to report resources of all other trust arrangements under which principal and income benefit individuals, private organizations, or other governments.

## Agency Funds

Agency funds account for assets held by the State as an agent for other governmental units, other organizations, or individuals.

Individual funds are presented by fund type beginning on page 200.

## NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies of the State of Utah conform in all material respects with Generally Accepted Accounting Principles (GAAP) as prescribed by the Governmental Accounting Standards Board (GASB). Preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

#### A. Reporting Entity

For financial reporting purposes, the State of Utah's reporting entity includes the "primary government" and its "discrete component units." The primary government includes all funds, agencies, boards, commissions, and authorities that are considered an integral part of the State's activities. The State's discrete component units are legally separate organizations for which the State's elected officials are financially accountable.

The GASB has set forth criteria to be considered in determining financial accountability. These criteria include appointing a voting majority of an organization's governing body and either: (1) the ability of the State to impose its will on that organization; or (2) the potential for the organization to provide specific financial benefits to, or impose specific financial burdens on the State.

Where the State does not appoint a voting majority of an organization's governing body, GASB standards require inclusion in the reporting entity if: (1) an organization is fiscally dependent on the State because its resources are held for the direct benefit of the State or can be accessed by the State; and (2) the potential for the organization to provide specific financial benefits to, or impose specific financial burdens on the State. In addition, discrete component units can be other organizations for which the nature and significance of their relationship with the primary government are such that exclusion would cause the financial statements to be misleading.

Except where noted below, the State's discrete component units issue their own separately audited financial statements as special-purpose governments engaged only in business-type activities. These financial statements can be obtained from their respective administrative offices or from the Office of the Utah State Auditor, Utah State Capitol Complex, East Office Building, Suite E310, Salt Lake City, UT 84114 or online at auditor.utah.gov.

Entities such as the local school districts, charter schools, and other local authorities of various kinds that may only partially meet the criteria for inclusion in this report have not been included. The State's support of the public education system is reported in the Education Fund (special revenue fund).

#### **Blended Component Units**

A component unit should be reported as part of the primary government and blended into the appropriate funds if: (I) services are provided entirely or almost entirely to the primary government; (2) the governing body is substantively the same as the governing body of the primary government; or(3) the component unit's total debt outstanding is expected to be repaid entirely or almost entirely by the primary government.

Utah State Building Ownership Authority (blended with the primary government's debt service and capital projects funds) — The Authority was created by the Legislature as a body politic and corporate for the sole purpose of financing, owning, leasing, and operating facilities to meet the needs of state government. In addition, any debt is paid entirely with resources of the State. The Board is comprised of three members: the Governor or designee, the State Treasurer, and the Chair of the State Building Board. Separate financial statements are not required or issued for the Authority.

#### **Discrete Component Units**

Discretely presented component units are reported in a separate column and/or rows in each of the government-wide statements to emphasize that they are legally separate from the State.

Except for the Utah Communications Authority, Utah Schools for the Deaf and Blind, and the Utah College of Applied Technology, the Governor appoints at least a majority of the governing board members of each of the State's discrete component units, subject in most cases with consent from the Senate. The Utah Communications Authority is included in the reporting entity because of its ability to provide specific financial benefits or impose financial burdens on the State; by statute it may issue debt enhanced by the State and it operates programs supplemented with state revenue. The other discrete component units are included in the reporting entity because, under the criteria established by GASB, the State has the ability to impose its will on these organizations.

The State has the ability to impose its will on the colleges and universities, the Public Employees Health Program, and the Comprehensive Health Insurance Pool due to the level of budget or day-to-day oversight. The Governor-appointed board members of the Military Installation Development Authority, Heber Valley Historic Railroad Authority, and Utah State Fair Corporation can be replaced at will.

The State does not appoint a voting majority of the governing board members of the Utah Schools for the Deaf and Blind or the Utah College of Applied Technology. However, they are included in the reporting entity because they meet both the fiscal dependency and financial benefit and burden relationship; the State approves and modifies their budgets and provides financial support.

The determination that a discrete component unit is "major" is based on the nature and significance of its relationship to the primary government. The State's major discrete component units

Public Employees Health Program — This Program provides employee medical and other insurance services predominantly for agencies of the State. It also provides claims processing and insurance services for local governments and other public entities within Utah. The Program is administered by the Utah State Retirement Board.

University of Utah and Utah State University — These universities are funded primarily through state appropriations, tuition, federal grants, and private donations and grants. In addition to instruction, these universities provide research and

other services. The operations of the University of Utah also include its hospital and clinics.

The State's non-major discrete component units are:

Utah Communications Authority — This Authority was established by the Utah State Legislature as a quasi-governmental entity. Its purpose is to provide public safety communication services and facilities on a regional or statewide basis for the benefit and use of all state and local governmental agencies.

Comprehensive Health Insurance Pool — This Pool is a nonprofit quasi-governmental entity established within the State Insurance Department. It provides access to health insurance coverage for residents of the State who were considered uninsurable. The 2014 Utah Legislature repealed the Comprehensive Health Insurance Pool Act effective July 1, 2015. Pool enrollment and coverage were terminated on December 31, 2013, and all enrollees were encouraged to transition to qualified health plans offered through the Utah Federal Facilitated Marketplace.

Utah Schools for the Deaf and the Blind — These Schools provide practical education to individuals with hearing and/or vision impairments. Although not required, these Schools issue separate but unaudited financial statements.

Utah State Fair Corporation — This Corporation is a nonprofit public corporation that operates the State Fair Park and conducts the Utah State Fair and other various expositions and entertainment events.

Colleges and Universities — Weber State University, Southern Utah University, Salt Lake Community College, Utah Valley University, Dixie State University, Snow College, and the Utah College of Applied Technology. Separate audited financial statements are issued for the branch campuses of the Utah College of Applied Technology.

Utah Charter School Finance Authority — This Authority was created to provide an efficient and cost-effective method of issuing conduit debt on behalf of charter schools to acquire or construct charter school facilities. The debt is the responsibility of the charter schools, and neither the State nor any political subdivision of the State is obligated for repayment of the debt. Accordingly, this debt is not included as part of the State's reporting entity. No financial statements are required or issued.

Military Installation Development Authority — This Authority is an independent, nonprofit entity whose purpose is to provide for the development and improvement of project areas near military installations throughout the State.

Heber Valley Historic Railroad Authority — This Authority is an independent state agency that maintains and operates a scenic and historic railroad in and around the Heber Valley. The Authority issues a separate publicly available compilation report.

#### **Fiduciary Component Units**

Utah Retirement Systems (URS) (pension trust and defined contribution plans) – URS administers pension funds for various public employee retirement systems and plans of the State and its political subdivisions. URS is an independent state agency subject to legislative and executive department budgetary examination and comment. The Utah State Retirement Board, a seven-member

board, is established by statute to administer the systems and plans, and to serve as investment trustees of the funds. Six members are appointed by the Governor with the advice and consent of the Senate, while the State Treasurer serves as the seventh member. Because of the State's trustee responsibilities for these systems and plans, GAAP requires them to be reported as pension trust funds of the primary government rather than discrete component units.

Utah Educational Savings Plan Trust (Private Purpose Trust Fund) — This trust is a non-profit, self-supporting entity that was created as a means to encourage investment in a public trust to pay for future higher education costs. It is administered by the Utah State Board of Regents acting in its capacity as the Utah Higher Education Assistance Authority. Because of the State's trustee responsibilities for this plan, GAAP requires it to be reported as a private purpose trust fund of the primary government rather than a discrete component unit.

In accordance with GAAP, fiduciary funds and component units that are fiduciary in nature are excluded from the government-wide financial statements.

### **Related Organization** (Excluded from Financial Statements)

Workers' Compensation Fund — This Fund is a nonprofit quasipublic corporation created by the Legislature for a public purpose that provides workers' compensation insurance to private and public employers. Although the Governor appoints six of the seven board of directors for the Fund, there is no financial accountability. The State does not have the ability to impose its will on the Fund and the Fund does not provide specific financial benefits to, or impose specific financial burdens on the State.

Utah Housing Corporation — Utah Housing Corporation (UHC) is a statutorily created public corporation. UHC issues bonds to provide capital for housing and home mortgages, especially for low and moderate-income families. Although the Governor appoints eight of the nine members of the governing board, there is no financial accountability. The State does not have the ability to impose its will on UHC and UHC does not provide specific financial benefits to, or impose specific financial burdens on the State.

#### B. Government-wide and Fund Financial Statements

#### **Government-wide Financial Statements**

The Statement of Net Position and Statement of Activities report information on all non-fiduciary activities of the primary government and its component units. Primary government activities are distinguished between *governmental* and *business-type* activities. Governmental activities generally are financed through taxes, intergovernmental revenues, and other non-exchange revenues. Business-type activities are financed in whole or in part by fees charged to external parties for goods or services.

The Statement of Net Position presents the reporting entity's non-fiduciary assets, deferred outflows of resources, liabilities, and deferred inflows of resources, with the difference reported as net position. Net position is restricted when there are constraints either externally imposed or imposed by constitutional provisions or enabling legislation.

The Statement of Activities demonstrates the degree to which the direct expenses of a given activity or segment is offset by program revenues. Direct expenses are those that are clearly identifiable within a specific activity. The State does not allocate general government (indirect) expenses to other activities. Program revenues include: (I) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given activity; and (2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular activity. Taxes and other revenues not meeting the definition of program revenues are reported as general revenues.

#### **Fund Financial Statements**

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide statements. For governmental and proprietary fund financial statements, the emphasis is on major individual governmental and enterprise funds, with each displayed in a separate column. All remaining governmental and enterprise funds are aggregated and reported as nonmajor funds. Internal service funds are also aggregated and reported in a separate column on the proprietary fund financial statements.

## C. Measurement Focus, Basis of Accounting, and Financial Statement Presentation

#### **Government-wide Financial Statements**

The government-wide financial statements are prepared using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when the related liability is incurred, regardless of the timing of the cash flows. Nonexchange transactions in which the State receives value without directly giving equal value in exchange, include taxes, grants, and donations. Tax revenue is recognized in the fiscal year in which the related sales, wages, or activity being taxed occurred. Revenue from grants and donations is recognized in the fiscal year in which all eligibility requirements have been met.

#### **Governmental Fund Financial Statements**

The governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collected within the current period or expected to be collected soon enough thereafter to pay liabilities of the current period. For this purpose, the State generally considers taxes and other revenues to be available if the revenues are collected within 45 days after yearend. An exception to this policy is federal grant revenues, which generally are considered to be available if collection is expected within 12 months after yearend.

Expenditures are generally recorded when the related liability is incurred, as under the accrual basis of accounting. However, expenditures for principal and interest on long-term debt are recorded when due or when amounts have been accumulated in the debt service fund for payment of interest to be made early in the following year. Also, expenditures and related liabilities for compensated absences, pension benefits, postemployment

benefits, and claims and judgments are recorded only to the extent they have matured (i.e., come due for payment).

**Major Governmental Funds** — The State reports the following major governmental funds:

- General Fund. This fund is the principal operating fund of the State. It accounts for all financial resources not accounted for and reported in another fund.
- Education Fund. This special revenue fund accounts for all corporate taxes, income taxes, and revenues from taxes on intangible property that support public and higher education. Specific revenues that support public elementary and secondary schools in the State are also reported in the Education Fund.
- Transportation Fund. This special revenue fund accounts for dedicated highway user taxes, fees, and federal funds associated with construction, maintenance, and repair of state highways and local roads.
- Transportation Investment Fund. This capital projects fund accounts for vehicle registration fees, sales and use taxes, bond proceeds, and federal funds used in the construction and reconstruction of specific highway projects. Projects designated for the Transportation Investment Capacity program are accounted for in this fund.
- **Trust Lands Fund**. This is a permanent fund that accounts for land grants and the sale of lands received from the federal *Enabling Act*. The principal in the fund is perpetual, with the earnings used primarily to support public education.

Nonmajor Governmental Funds — The State's nonmajor governmental funds include special revenue funds, capital projects funds, and debt service funds. The nonmajor special revenue funds account for specific revenue sources that are restricted or committed to expenditures for specific purposes. Examples include tobacco settlement monies, environmental activities, crime victim reparations, debt collections, and rural development programs. The capital projects funds account for resources used for capital outlays including the acquisition, construction, or improvement of capital facilities other than those financed by the Transportation Investment Fund, proprietary funds or assets held in trust. The debt service funds account for resources used for the payment of principal and interest on general long-term debt obligations.

#### **Proprietary Fund Financial Statements**

The financial statements of the proprietary funds are reported using the economic resources measurement focus and the accrual basis of accounting, similar to the government-wide financial statements described previously. Proprietary funds include both enterprise and internal service fund types. Enterprise funds report the activities for which fees are charged to external users for goods or services. Internal service funds account for goods and services provided primarily to other agencies or funds of the State, rather than to the general public.

Proprietary funds distinguish operating revenues and expenses from non-operating. Operating revenues and expenses generally result from providing services, producing, and delivering goods in connection with a proprietary fund's principal ongoing operations. Revenues and expenses not meeting this definition, such as subsidies and investment earnings, are reported as non-operating.

**Major Enterprise Funds** — The State reports the following major enterprise funds in its proprietary fund statements:

- Student Assistance Programs. These programs guarantee
  the repayment of student loans made by participating lenders
  to eligible borrowers and service outstanding student loans.
- Unemployment Compensation Fund. This fund pays claims for unemployment to eligible recipients.
- Water Loan Programs. These programs provides loans to local governments, water districts, and other entities for the purpose of upgrading water storage facilities and other related structures.
- Community Impact Loan Fund. This fund provides loans
  to local governments to alleviate the social, economic, and
  public financial impacts resulting from the development of
  the State's natural resources. This fund also administers loans
  to small businesses under the Small Business Credit Initiative.

Non-major Enterprise Funds — The State's nonmajor enterprise funds include loan programs for low-income housing, agricultural, energy efficiency, transportation infrastructure, and other purposes; Alcoholic Beverage Control (state liquor stores); Utah Correctional Industries; State Trust Lands Administration; Utah Dairy Commission; and the Federal Health Insurance Pool.

The Federal Health Insurance Pool (nonmajor enterprise fund) discontinued operations since enrollees in this temporary insurance program transitioned into the qualified health plans offered through the Utah Federal Facilitated Marketplace. The financial statements are for the 18 month time period from January 1, 2014 to June 30, 2015. This covers the calendar year until the contract ended and the six month wrap-up period that followed. See Note 2 for additional information.

**Internal Service Funds** — The State reports the internal service fund type in the proprietary funds statements. The activities accounted for in internal service funds include technology services, general services, fleet operations, risk management, property management, and human resource management. In the government-wide financial statements, internal service funds are included with governmental activities.

### **Fiduciary Fund Financial Statements**

The fiduciary funds account for assets held by the State in a trustee capacity or as an agent for other individuals or organizations. The fiduciary fund financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. The following fiduciary fund types are reported:

Pension and Other Employee Benefit Trust Funds — These funds account for the plan assets, deferred outflows of resources, liabilities, deferred inflows of resources, net position, and changes in net position of: (1) defined benefit pension plans and defined contribution plans administered by Utah Retirement Systems; (2) the Post-Retirement Benefits Trust Funds, defined benefit other postemployment health care plans administered by the State for state employees and elected officials; and (3) Other Employee Benefits Trust Fund, used to separately account and

report assets dedicated for employee benefits other than postemployment healthcare benefits, that are administered through the Post-Retirement Benefits Trust Funds.

**Investment Trust Fund** — This fund is used to account for the investments related to external participants in the Utah State Public Treasurer's Investment Fund.

**Private Purpose Trust Funds** — These funds report resources of all other trust arrangements in which principal and income benefit individuals, private organizations or other governments. Examples include the Utah Navajo Royalties Holding Trust, Unclaimed Property Trust, Employers' Reinsurance Trust, Petroleum Storage Tank Trust, and the Utah Educational Savings Plan Trust.

**Agency Funds** — These funds account for assets held by the State as an agent for other governmental units, other organizations, or individuals. These funds include fines, forfeitures, tax collections, and withholding taxes for employees.

#### **Discrete Component Unit Financial Statements**

The combining discrete component unit financial statements are presented in order to provide information on each of the major discrete component units included in the discrete component unit's column of the government-wide statements. The discrete component unit financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. The information is presented in order to be consistent with the government-wide statements, and is less detailed than the presentation in each discrete component unit's separately issued financial statements.

#### D. Fiscal Yearends

All funds and discretely presented component units are reported using fiscal years which end on June 30, except the defined benefit pension plans and defined contribution plans (fiduciary funds), administered by Utah Retirement Systems, Public Employees Health Program (major discrete component unit), Utah State Fair Corporation (nonmajor discrete component unit), and Utah Dairy Commission, which have fiscal years ending December 31.

E. Assets, Deferred Outflows of Resources, Liabilities, Deferred Inflows of Resources, and Net Position/Fund Balances

#### **Cash and Cash Equivalents and Investments**

Cash equivalents are generally considered short-term, highly liquid investments with a maturity of three months or less from the purchase date. The Student Assistance Programs (major enterprise fund) use a trustee for their long-term investing needs, and they consider any cash and cash equivalents held by their trustee as investments.

All cash deposited with the State Treasurer by state entities is maintained by the Treasurer in various pooled investment funds. The State Treasurer invests the deposited cash, including the cash float, in short-term securities and other investments. All interest revenue is allocated to the General Fund unless state law or trust agreements require allocations of interest to other funds. Funds authorized to receive interest earnings are segregated into separate

investment pools, and interest is allocated based on cash balances in the pool.

Investments (including cash equivalents) are under the control of the State Treasurer or other administrative bodies as determined by law. In certain instances, investments may be restricted by law or other legal instruments. Investments are presented at fair value. The fair value of investments is based on published prices and quotations from major investment brokers at current exchange rates, as available. For investments where no readily ascertainable fair value exists, management, in consultation with their investment advisors, has determined the fair values for the individual investments. Investments held as security deposits which are not held for investment purposes are carried at cost. The fair value of real estate investments held by the Permanent Fund and Utah Retirement Systems (pension trust and defined contribution plans) has been estimated based on independent appraisals and/or property cash flow.

The State's Unemployment Compensation Fund (major enterprise fund) monies are required by the Social Security Act to be invested in the U.S. Department of Treasury, Bureau of Public Debt Unemployment Trust Fund (BPDUTF), which is not registered with the SEC. The fair value of the position in the BPDUTF is the same as the value of the BPDUTF shares.

Utah Retirement Systems (pension trust and defined contribution plans) had five types of derivative financial instruments at yearend: futures, currency forwards, options, swaps, and Synthetic Guaranteed Investment Contracts. Futures contracts are traded on organized exchanges to minimize credit risk. Currency forwards are entered into in order to hedge the exposure to changes in foreign currency exchange rates on foreign currency denominated portfolio holdings. Options give the right, but not the obligation, to buy (call) or sell (put) an asset at a preset price over a specified period. Interest rate swap agreements are entered into in an attempt to manage their exposure to interest rate risk. Interest rate risk represents the exposure to fair value losses arising from the future changes in prevailing market interest rates. Synthetic Guaranteed Investment Contracts are available to members in the Utah Retirement Systems Defined Contribution Plans. The Student Assistance Program (major enterprise fund) entered into an interest rate exchange (swap) agreement relating to some of its student loan revenue bonds. The Board accounts for the swap agreement as a fair value hedging derivative instrument to create a variable rate cost of funds that will be lower than the variable rate cost achievable in the cash bond market. See Note 3 for additional information about derivatives.

#### Receivables

Accounts receivables in the governmental and business-type activities consist mainly of amounts due from the Federal Government, customers, and others. Receivables from the Federal Government are reasonably assured; accordingly, no allowance for uncollectible accounts has been established.

Notes/mortgages receivables in the governmental and businesstype activities are primarily long-term loans for local governments and agricultural development, home mortgages, and individual student loans. The interest rates on the loans vary but are generally lower than market rates and, in some cases, are non-interest bearing. Student loans in the Student Assistance Programs (business-type activities) are fixed and variable rate federally insured loans. Student loans are insured at 95 to 100 percent of their principal balance depending on the date disbursed.

Receivables for capital lease payments, as reported in the governmental activities, are direct financing capital lease arrangements between State Building Ownership Authority (blended component unit) and certain College and Universities (discrete component units). The capital lease receivable is reported net and represents the sum of the future minimum lease payments to be received, less any executory costs and any unearned interest revenue on the capital lease. Receivables from the discrete component unit are reasonably assured; accordingly, no allowance for uncollectible accounts has been established.

Accrued taxes include receivables for taxpayer-assessed taxes where the underlying exchange has occurred in the period ending June 30 or prior, net of applicable estimated refunds and allowances.

Note 5 provides a disaggregation of governmental and businesstype receivables, including a breakout of current/noncurrent balances and established allowances.

### Inventories, Prepaid Items, and Other Assets

Proprietary funds and component units' inventories are valued at the lower of cost or market. Cost evaluation methods include firstin-first-out (FIFO), last-in-first-out (LIFO), average cost, weighted average, weighted moving average, and retail inventory method.

Governmental fund inventories are recorded as expenditures when purchased except for Transportation Fund inventories and state park inventories (reported in the General Fund), that are recorded as expenditures when consumed. Both Transportation Fund inventories and state park inventories are valued using a weighted average cost.

Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items in both the government-wide and fund financial statements. The cost of prepaid items is recorded as expenditures/expenses when consumed rather than when purchased.

Other Assets, as reported on the Statement of Net Position, governmental activities column, include assets of the Trust Lands Fund (Permanent Fund) acquired under the 1894 Utah Enabling Act that are not considered investments. The net pension asset and the net other postemployment benefit (OPEB) asset are also reported as Other Assets.

#### Capital Assets

Capital assets, which include land and related assets, buildings, equipment, intangible assets (software), and infrastructure (roads, bridges, drainage systems, lighting systems, and similar items), are reported in the applicable governmental or business-type activities columns, or in the component units column on the government-wide Statement of Net Position. Capital assets of proprietary funds and fiduciary funds are also recorded in their respective fund statements. Capital assets, with the exception of infrastructure and internally generated software, are defined by the State as assets, which cost \$5 thousand or more when acquired and have an estimated useful life greater than one year. Infrastructure assets are capitalized if the cost is over \$1 million. Internally generated

software is capitalized if the cost is over \$500 thousand. Purchased or constructed capital assets are recorded at cost or at estimated historical cost where historical cost is not available. Donated capital assets are valued at their estimated fair value at the date of donation.

Capital assets purchased by governmental funds are recorded as expenditures in the governmental fund financial statements. Interest expense for capital asset construction related to governmental activities is not capitalized. Interest expense incurred during construction of capital facilities related to business-type activities and discrete component units is immaterial and is not capitalized in all cases.

Buildings, equipment, and other assets are depreciated or amortized using the straight-line method over the following estimated useful lives:

Asset Class	Years
Equipment/Software	3–15
Aircraft and Heavy Equipment	5-30
Buildings and Improvements	30-40
Land Improvements	5-20
Infrastructure	15-80

As provided by GASB standards, the State has elected to use the "modified approach" to account for infrastructure assets (i.e., roads and bridges) maintained by the State's Department of Transportation. This includes infrastructure acquired prior to fiscal year 1981. Under this approach, depreciation expense is not recorded and only improvements that increase the capacity or efficiency of an infrastructure asset are capitalized. Using this approach requires the State to: (I) maintain an inventory of the assets and perform periodic condition assessments; (2) estimate each year the annual amount to maintain and preserve the assets at the condition level set by the State; and (3) document that the assets are being preserved approximately at or above the condition level set by the State. Other infrastructure, which is primarily maintained by the Department of Natural Resources, is capitalized and depreciated.

Most works of art and historical treasures of the primary government are not capitalized or depreciated. These assets are held for public exhibition, education, or research rather than financial gain. These assets are also protected, unencumbered, and preserved; and subject to policies requiring the proceeds from sales of collection items to be used to acquire other collection items. The State's assets of this nature include the State Fine Art Collection, photographs, prints, paintings, historical documents and artifacts, monuments, statues, and paleontological and archaeological collections.

#### **Deferred Outflows of Resources**

Deferred outflow of resources represents a consumption of net position by the government that applies to a future period(s) and so will not be recognized as an outflow of resources (expense/expenditure) until then. Deferred outflows of resources are reported in the applicable governmental or business-type activities columns, or in the component units column on the government-wide Statement of Net Position. See Note 11 for a disaggregation of deferred outflows. Deferred outflows of resources of governmental funds, proprietary funds, and discrete component units are reported in detail in their respective fund statements.

#### **Accrued Liabilities**

Accrued liabilities include the liability for employee payrolls and liabilities accruing over time where demand for payment is due shortly after fiscal yearend. See Note 6 for additional information about accrued liabilities.

#### **Unearned Revenue**

In the government-wide statements, governmental fund statements, proprietary fund statements, and fiduciary fund statements, unearned revenue is recorded when cash or other assets are received prior to being earned.

### **Policy Claims Liabilities**

Policy claims liabilities are for insurance claims incurred prior to the reporting date and are based on actuarial estimates; however, policy claims liabilities for Unemployment Insurance are for claims filed as of the reporting date. A substantial portion of policy claims liabilities is long-term in nature. Therefore, claims liabilities are reported as long-term liabilities on the Statement of Net Position. See Note 10 for additional information about policy claims liabilities.

#### **Long-term Debt**

Long-term debt such as the net pension liability, revenue bonds, claims, contracts and notes payable directly related to and intended to be paid from proprietary funds or discretely presented component units are included in the accounts of such funds. All other long-term debt, such as the compensated absences, claim or settlement obligations, pollution remediation obligations, general obligation bonds, net pension liability, and lease revenue bonds are reported in the government-wide financial statements. Bond premiums and discounts are amortized over the life of the bonds using the bonds outstanding method or straight-line method, which approximates the effective interest method. Bonds payable are reported net of the applicable bond premium or discount. Bond issuance costs are recognized during the current period.

In the governmental fund financial statements, long-term debt is recognized when due or expected to be financed from current expendable available financial resources. Bond premiums and discounts, as well as bond issuance costs, are recognized during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources, while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

The Tax Reform Act of 1986 requires governmental entities issuing tax-exempt bonds to refund to the U.S. Treasury interest earnings on bond proceeds in excess of the yield on those bonds. Governmental entities must comply with arbitrage rebate requirements in order for their bonds to maintain tax-exempt status. Entities are required to remit arbitrage rebate payments for non-purpose interest to the federal government at least once every five years over the life of the bonds. Federal regulations also require the Student Assistance Programs (major enterprise fund) to keep the yield on student loans within a designated percentage of the interest cost of the related tax-exempt borrowing. One method

of reducing this yield is to make yield reduction payments to the United States Treasury. Estimated yield reduction payments may be made by the end of the tenth year and every fifth year thereafter during the life of the bonds. Some State of Utah bonds may be exempt from the rebate requirements if they meet certain statutory exceptions per the regulations. At June 30, 2015, there was no liability for yield reduction payments or for non-purpose interest arbitrage rebate in the Student Assistance Programs.

Arbitrage liability is treated as an expense in the government-wide Statement of Net Position and the proprietary fund financial statements when the liability is recognized. Arbitrage liability is recorded as an expenditure in the governmental fund financial statements when the liability is due. Other arbitrage liabilities are immaterial.

### **Compensated Absences and Postemployment Benefits**

For most employees vacation leave is accrued at a rate of four hours every two weeks for the first five years of employment, and grows to a rate of seven hours every two weeks after 20 years of employment. There is no requirement to use vacation leave, but a maximum of 320 hours may be carried forward at the beginning of each calendar year. Prior to January 1, 2014, employees had the option under certain circumstances to "convert" sick leave. Employees may use converted sick leave in place of vacation leave. Any unused vacation leave and converted sick is paid to employees upon termination. The total liability of the government-wide Statement of Net Position as part of long-term liabilities. However, in accordance with GAAP, the liability is not recorded in the governmental fund financial statements. See Note 10 for additional information about the liability.

Most employees earn sick leave at a rate of four hours for each two-week period, with no limit to the amount that can be accumulated. The State does not reimburse employees for unused sick leave upon termination unless the leave was earned prior to January 4, 2014 and the employees are eligible for retirement or the sick leave was "converted". Sick leave is expended when used.

At retirement, for participating agencies, an employee receives 25 percent of the value of all unused accumulated sick leave, earned prior to January 4, 2014, as a mandatory employer contribution into a 401(k) account. Each day of remaining sick leave earned prior to January 1, 2006, may be used to participate in the State Employee Other Postemployment Benefit Plan (State Employee OPEB Plan, a single-employer defined benefit healthcare plan) to purchase health and life insurance coverage or Medicare supplemental insurance. Any remaining sick leave earned on or after January 1, 2006, but before January 4, 2014, is converted to a value (based on the higher of the employee's rate of pay at retirement or the average pay rate of retirees in the previous year) and placed in a Health Reimbursement Arrangement administered by Utah Retirement Systems. The Annual Required Contribution (ARC) is funded by charges to agency budgets. The ARC is deposited and payments of postemployment health and life insurance benefits to retirees are made from the State Post-Retirement Benefits Trust Fund. See Note 18 for additional information about the State Employee OPEB Plan administered as an irrevocable trust.

The State of Utah also administers the Elected Official OPEB Plan, a single-employer defined benefit healthcare plan as an irrevocable trust. Only governors and legislators who retire after

January 1, 1998 and have four or more years of service can elect to receive and apply for this benefit. To qualify for health coverage, an elected official must be between 62 and 65 years of age and either be an active member at the time of retirement or have continued health coverage with the program until the date of eligibility. In addition, to qualify for health coverage, an elected official must have service prior to January 1, 2012. To qualify for Medicare supplemental coverage an elected official must be at least 65 years of age. In addition, the elected official must retire under Chapter 19, *Utah Governors' and Legislators' Retirement Act*, and have service prior to July 1, 2013. The State will pay a portion or all the health benefit costs for the elected official and spouse based on years of service. See Note 18 for additional information.

For administrative purposes, the State maintains compensated absences pools within the General Fund, Education Fund, and Transportation Fund. The ongoing payments from the pools are provided by charges to agency budgets as benefits are earned. Vacation leave taken as time off is paid from current budgets when used. Payment of leave balances at termination is made from the compensated absences pools. Proprietary funds, Utah Schools for the Deaf and the Blind, and private purpose trust funds of the primary government also participate in the pools and the State Employee OPEB Plan; and have no liability for leave or postemployment benefits once their contributions have been made.

Compensatory time for overtime worked may be earned up to a maximum of 80 hours. Any overtime exceeding 80 hours is paid when earned. In accordance with GAAP, compensatory time is expended when the leave is taken in governmental funds, but is expensed when earned for budgetary purposes.

Vacation earnings, sick leave earnings, and termination policies vary among discrete component units and from the primary government's policies, but usually vacation leave is expended when earned and sick leave is expended when used.

#### **Pensions**

For purposes of measuring the net pension liability and deferred outflows/inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the Utah Retirement Systems Pension Plan (URS) and additions to/deductions from URS's fiduciary net position have been determined on the same basis as they are reported by URS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. The primary government's proportionate share of pension amounts were further allocated to proprietary funds (business-type activities) based on the amount of employer contributions paid by each proprietary fund. Pension investments are reported at fair value.

### **Deferred Inflows of Resources**

Deferred inflows of resources represent an acquisition of net position that applies to a future period, and so will not be recognized as an inflow of resources (revenue) until that time. Deferred inflows of resources are reported in the applicable governmental or business-type activities columns or in the component units column on the government-wide Statement of Net Position. See Note 11 for a disaggregation of deferred inflows. Deferred inflows of resources of governmental funds, proprietary

funds, and discrete component units are reported in detail in their respective fund statements.

#### **Net Position/Fund Balances**

The difference between assets, deferred outflows of resources, liabilities, and deferred inflows of resources is "Net Position" on the government-wide, proprietary fund, and fiduciary fund financial statements and "Fund Balance" on the governmental fund financial statements.

In the governmental fund financial statements, fund balances are classified as nonspendable, restricted, or unrestricted (committed, assigned, or unassigned). Restricted balances represent those portions of fund balance where constraints placed on the resources are either externally imposed or imposed by law through constitutional provisions or enabling legislation. Committed fund balance represents amounts that can only be used for specific purposes pursuant to constraints imposed by formal action of the Legislature, such as dedicated revenues or legislation. Assigned fund balance is constrained by the Legislature's intent to be used for specific purposes, by directive of the Executive Appropriations Committee of the Legislature or in some cases by legislation. See Note 12 for additional information about fund balances.

The State maintains three stabilization accounts: (1) the General Fund Budget Reserve Account in the General Fund (the "Rainy Day Fund") reported as committed fund balance; (2) the Medicaid Growth Reduction and Budget Stabilization Restricted Account in the General Fund ("the Medicaid Budget Stabilization Account") reported as committed fund balance; and (3) the Education Budget Reserve Account in the Education Fund (the "Education Reserve") reported as restricted fund balance. The resources of these accounts may only be expended when specific non-routine budget shortfalls occur and upon appropriation by the Legislature. See Note 12 for additional information about the stabilization accounts.

#### F. Revenues and Expenditures/Expenses

When an expenditure/expense is incurred for purposes for which both restricted and unrestricted resources are available, it is the State's general policy to use restricted resources first. When expenditures/expenses are incurred for purposes for which unrestricted (committed, assigned, and unassigned) resources are available, and amounts in any of these unrestricted classifications could be used, it is the State's general policy to spend committed resources first. However, the State has some programs that are funded by appropriations from both unrestricted resources and resources required by law to be deposited in a specific subfund for a specific purpose (which may include restricted resources and unrestricted-committed resources). In those instances, it is the State's policy to expend those resources proportionally based on the amounts appropriated from each source.

#### Grants

Federal grants and assistance awards made on the basis of entitlement periods are recorded as revenues when entitlement occurs. All federal reimbursement-type grants are recorded as revenues when the related allowable expenditures are incurred and all applicable eligibility requirements are met.

Federal grants include nonmonetary transactions for food and vaccine commodities. Commodity revenues and expenditures are valued at its federally reported value. Commodity inventories at yearend are immaterial. For the fiscal year ended June 30, 2015, the State reported revenues and expenditures of \$27.154 million for commodities in the General Fund, and \$17.592 million for commodities in the Education Fund (special revenue fund).

#### **Investment Income**

Investment income includes interest, dividends and other earnings, and the change in fair value of investments. Negative investment income is reported where the decrease in the fair value of investments due to market conditions exceeded the other components of investment income.

In accordance with state law, interest and dividend income from investments in the Trust Lands Fund (permanent fund) and the State Endowment Fund (nonmajor governmental fund) is assigned to and reported directly in the Education Fund and the General Fund, respectively. A portion of the applicable income reported in the General Fund is then transferred into the State Endowment Fund to increase the principal in the fund as required by state law. The Trust Lands Fund generated \$45.846 million of cash investment earnings that was reported directly in the Education Fund. The State Endowment Fund generated \$3.201 million of cash investment earnings, of which \$1.931 million was reported in the General Fund and \$1.270 million was reported in the State Endowment Fund.

#### G. Interfund Transactions

#### **Government-wide Financial Statements**

Interfund Activity — In general, eliminations have been made to minimize the double counting of internal activity, including internal service fund type activity. However, interfund services, provided and used between different functional categories, have not been eliminated in order to avoid distorting the direct costs and program revenues of the applicable functions. Transfers between governmental and business-type activities are reported at the net amount.

**Interfund Balances** — Interfund receivables and payables have been eliminated from the government-wide Statement of Net Position, except for the residual amounts due between governmental and business-type activities.

#### **Governmental Fund Financial Statements**

**Interfund Activity** — Interfund transactions for goods sold or services rendered for a price approximating their external exchange value, and employee benefit contributions are accounted for as revenues and expenditures/expenses in the funds involved.

Transfers are used to report flows of cash (or other assets) between funds without equivalent flows of assets in return or a requirement for repayment. The State's transfers are based on legislative appropriations or other legal authority. Transfers are presented in Note 14.

# NOTE 2. BEGINNING NET POSITION ADJUSTMENTS AND OTHER CHANGES

For the fiscal year ended June 30, 2015, the State implemented the following new accounting standards issued by the Governmental Accounting Standards Board (GASB):

GASB Statement 68, Accounting and Financial Reporting for Pensions.

GASB Statement 71, Pension Transition for Contributions Made Subsequent to the Measurement Date.

GASB Statement 68 and 71 – These Statements establish standards for measuring and recognizing liabilities, assets, deferred outflows of resources, deferred inflows of resources, and expense/expenditures for pensions provided to employees of the primary government and its component units. It requires the State to record the State's proportionate share of the net pension liability in the government-wide financial statements and in the proprietary funds and component unit financial statements.

As a result of implementing this Statement, beginning net position of governmental activities was reduced \$822.93 million on the Statement of Activities. This reduction reflects a \$920.087 million share of the beginning net pension liability, \$286 thousand of beginning net pension asset, and \$96.871 million of contributions made to Utah Retirement Systems (URS) between January 1 and June 30, 2014. \$54.348 million of the adjustment to beginning net position is for Governmental Activities – Internal Service Funds as reflected in the Statement of Revenues, Expenses, and Changes in Fund Net Position – Proprietary Funds.

Beginning net position for business-type activities on the Statement of Activities was reduced by \$12.304 million. \$1.301 million of this reduction is also reported on the Statement of Revenues, Expenses, and Changes in Fund Net Position – Proprietary Funds (Student Assistance Programs – major enterprise fund) with the remaining \$11.003 million reported in Nonmajor Enterprise Funds. This reduction reflects a \$14.391 million share of the beginning net pension liability and \$2.087 million of contributions made to URS between January 1 and June 30, 2014.

As a result of implementing GASB Statement 68, the beginning net position for the component units was reduced \$262.574 million on the Statement of Activities. This reduction is also reported on the Combining Statement of Activities – Component Units. This reduction reflects the component units' share of the beginning net pension liability of \$294.757 million, beginning net pension asset of \$100 thousand, and \$32.083 million of contributions made to URS between January 1 and June 30, 2014.

GASB Statement 68 and 71 was implemented for all component units, except Public Employees Health Program (major discrete component unit) and Utah State Fair Corporation (nonmajor discrete component unit) which have fiscal years ending December 31.

See Note 17 for further information on pension reporting.

#### Other Adjustments and Changes

The Federal Health Insurance Pool (nonmajor enterprise fund) discontinued operations since enrollees in this temporary insurance

program transitioned into the qualified health plans offered through the Utah Federal Facilitated Marketplace. The Pool paid for benefit claims (incurred by June 30, 2013 and received by June 30, 2014) and any administrative costs until the contract between the U.S. Department of Health and Human Services and the State Insurance Department ended on December 31, 2014.

In evaluating the inventory process used by Alcoholic Beverage Control (nonmajor enterprise fund) a discrepancy was discovered with the recording of inventory and cost of goods sold resulting in a prior period adjustment of \$4.406 million to reduce the beginning net position of business-type activities on the Statement of Activities. This adjustment is also reflected in the Statement of Revenues, Expenditures, and Changes in Fund Net Position – Proprietary Funds.

Legislation was passed that resulted in reporting Utah Communications Authority (UCA) as a nonmajor discrete component unit of the State. The relationship between the State and UCA as demonstrated through the legislative process was changed to become closely related and partially financially integrated and therefore it would be misleading to exclude UCA from presentation in the State's financial statements. As a result, a \$25.888 million increase was made to restate beginning net position reported on the government-wide Statement of Activities.

The Legislature authorized the dissolution of the Comprehensive Health Insurance Pool (nonmajor component unit) and a refund back to the State's general fund of any remaining cash balance in the Pool by June 30, 2015. This action resulted in the reporting of a \$16.288 million special item on the government-wide Statement of Activities.

During the 2015 General Session, the Legislature passed Senate Bill 67, *Utah Housing Corporation Act Amendments* which repealed statute that allowed Utah Housing Corporation (major discrete component unit) to issue debt enhanced by the State and issue low-income housing tax credits. Although legislation repealed the ability for the Corporation to provide specific financial benefits or impose financial burdens on the state, the Governor still appoints a majority of the Board. As a result, the Utah Housing Corporation is no longer reported as a discrete component unit but as a related organization with only footnote disclosure. As a result a \$244.487 million decrease was made to restate beginning net position reported on the government-wide Statement of Activities.

#### NOTE 3. DEPOSITS AND INVESTMENTS

Deposits and investments for the primary government and its discrete component units are governed by the Utah Money Management Act (*Utah Code*, Title 51, Chapter 7) and rules of the State Money Management Council. However, the Act also permits certain funds that have a long time horizon to make investments of a long-term nature, such as equities and bond mutual funds. In the primary government these are the State Endowment (special revenue fund), Trust Lands (permanent fund), Utah Educational Savings Plan Trust (private purpose trust), Employers' Reinsurance Trust (private purpose trust), Utah Retirement Systems, and employee benefit trust funds. The discrete component units exempt from the Act are Public Employees Health Program and the college and universities' endowment funds.

#### A. Primary Government

#### Custodial Credit Risk — Deposits

The custodial credit risk for deposits is the risk that in the event of a bank failure, the State's deposits may not be recovered. The Money Management Act requires that deposits be in a qualified depository. The Act defines a qualified depository as any financial institution whose deposits are insured by an agency of the federal government and that has been certified by the State Commissioner of Financial Institutions as having met the requirements of the Act and adhering to the rules of the State Money Management Council.

Deposits with qualified depository institutions in excess of FDIC insurance limits are uninsured and uncollateralized. Deposits are not collateralized nor are they required to be by state statute. The deposits for the primary government at June 30, 2015, were \$1.432 billion. These deposits are exposed to custodial credit risk as follows:

- \$524.741 million were exposed to custodial credit risk as uninsured and uncollateralized.
- Exposure to custodial credit risk cannot be determined for \$891.867 million of the primary government deposits which are in FDIC-insured accounts are held in trust by UESP at two banks. Funds in the FDIC-insured accounts are insured on a pass-through basis to each account owner at each bank up to \$250,000. The amount of FDIC insurance provided to an account owner is based on the total of (1) the value of an account owner's investment in the FDIC-insured account at each bank plus (2) the value of other accounts held (if any) at each bank, as determined by the banks and by FDIC regulations. It is the Account Owner's responsibility to

determine how investments in the FDIC-insured accounts would be aggregated with other investments at the banks for purposes of FDIC insurance coverage.

#### Investments

The Money Management Act defines the types of securities authorized as appropriate investments and the conditions for making investment transactions. Investment transactions may be conducted only through qualified depositories, certified dealers, or directly with issuers of the investment securities.

The Act authorizes investments in negotiable or nonnegotiable deposits of qualified depositories and permitted depositories; repurchase and reverse repurchase agreements; commercial paper that is classified as "first tier" by two nationally recognized statistical rating organizations; bankers' acceptances; obligations of the United States Treasury including bills, notes, and bonds; obligations, other than mortgage derivative products, issued by U.S. government sponsored enterprises (U.S. Agencies) such as the Federal Home Loan Bank System, Federal Home Loan Mortgage Corporation (Freddie Mac), and Federal National Mortgage Association (Fannie Mae); bonds, notes, and other evidence of indebtedness of political subdivisions of the State; fixed rate corporate obligations and variable rate securities rated "A" or higher, or the equivalent of "A" or higher, by two nationally recognized statistical rating organizations; shares or certificates in a money market mutual fund as defined in the Money Management Act; the Utah Public Treasurers' Investment Fund; and reciprocal deposits subject to rules of the State Money Management Council.

The Utah Educational Savings Plan Trust is permitted to invest in the Utah Public Treasurers' Investment Fund; mutual funds, securities, or other investments registered with the United States Securities and Exchange Commission; federally insured depository institutions; stable value products, including guaranteed investment contracts, guaranteed interest contracts, and guaranteed insurance contracts; and any investments that are determined by the board of directors of the Utah Educational Savings Plan to be appropriate and that would be authorized under the provisions of the Money Management Act or Rule 2 of the State Money Management Council.

The primary government's investments at June 30, 2015, are presented below. All investments, except those of the Utah Retirement Systems (URS) (pension trust and defined contribution plans), are presented by investment type and debt securities are presented by maturity. The URS' investments are presented consistent with their separately issued financial statements by investment type.

(Table on next page.)

The majority of the primary government's corporate debt securities are variable-rate securities, which adjust periodically to the prevailing market interest rates. Because these securities frequently reprice, interest rate risk is substantially reduced at each periodic reset date. In the table above, variable-rate securities are presented according to the length of time until the next reset date rather than the stated maturity.

In addition, significant funds with a long-term investment perspective have the following mix of investments (percentages are of the fund's total investments):

- Utah Educational Savings Plan Trust (private purpose trust) -\$4.362 billion, 58.1 percent, in domestic equity mutual fund securities; \$2.022 billion, 26.9 percent, in bond mutual funds; \$1.047 billion, 14.0 percent, in international equity mutual fund securities; and \$78.343 million, 1.0 percent, in the Utah Public Treasurers' Investment Fund.
- Trust Lands (permanent fund) \$1.007 billion, 46.6 percent, in domestic equity mutual fund securities; \$457.601 million, 21.2 percent, in bond mutual funds; \$409.352 million, 18.9 percent, in international equity mutual fund securities; \$271.667 million, 12.5 percent in real estate; and \$17.467 million, 0.8 percent, in the Utah Public Treasurers' Investment Fund.

- State Post-Retirement Benefits Trusts for state employee and elected official (pension and other employee benefit trust funds) - \$172.161 million, 77.0 percent, in bond mutual funds; \$45.283 million, 20.3 percent, in domestic equity mutual fund securities; and \$6.033 million, 2.7 percent, in the Utah Public Treasurers' Investment Fund.
- State Endowment Fund (special revenue fund) \$109.156 million, 65.0 percent, in domestic equity mutual fund securities; \$57.048 million, 33.9 percent, in bond mutual funds; and \$1.791 million, 1.1 percent, in the Utah Public Treasurers' Investment Fund.
- Student Assistance Programs (major enterprise fund) -\$84.832 million, 37.6 percent, in domestic equity mutual fund securities; \$140.245 million, 62.1 percent, in the Utah Public Treasurers' Investment Fund; and \$744 thousand, 0.3 percent, in the US Government securities.
- Employers' Reinsurance Trust (private purpose trust) -\$151.168 million, 87.9 percent, in bond mutual funds; and \$20.744 million, 12.1 percent, in the Utah Public Treasurers' Investment Fund.

#### **Interest Rate Risk** — **Investments**

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment.

The primary government's policy for managing interest rate risk is to comply with the Money Management Act. Section 51–7–11 of the Act requires that the remaining term to maturity of investments may not exceed the period of availability of the funds to be invested. The Act further limits the remaining term to maturity on all investments in commercial paper, bankers' acceptances, fixed rate negotiable deposits, and fixed rate corporate obligations to 270 days – 15 months or less. The Act further limits the remaining term to maturity on all investments in obligations of the United States Treasury; obligations issued by U.S. government sponsored enterprises; and bonds, notes, and other evidence of indebtedness of political subdivisions of the State to five years. In addition, variable rate negotiable deposits and variable rate securities may not have a remaining term to final maturity exceeding three years.

The Utah Retirement Systems (URS) (pension trust and defined contribution plans) manage their exposure to fair value loss arising from increasing interest rates by complying with the following policy:

- For domestic debt securities managers, an individual debt securities investment manager's portfolio will have an effective duration between 75 and 125 percent of the effective duration of the appropriate index.
- The international debt securities investment managers will maintain an effective duration of their portfolio between 80 and 120 percent of the appropriate index.

- The global debt securities investment managers will maintain an effective duration of their portfolio between 75 and 125 percent of the appropriate index.
- The global debt inflation-linked debt securities investment managers will maintain an effective duration of their portfolio between 80 and 120 percent of the appropriate index

Duration is a measure of a debt investment's exposure to fair value changes arising from changes in interest rates. It uses the present value of cash flows, weighted for those cash flows as a percentage of the investment's full price.

The URS compares an investment's effective duration against the Barclays Capital U.S. Aggregate Index for domestic debt securities, the Barclays Capital Global Aggregate Index (USD hedged) for global debt securities and the Barclays Capital World Government Inflation-Linked Investment Grade Custom Index (USD hedged) for inflation-linked debt securities. The index range at December 31, 2014, was 4.16 – 6.94 for domestic debt securities, 4.88 – 8.13 for global debt securities, and 9.42 – 14.12 for inflationlinked debt securities. The URS compares an investment's effective duration against the Barclays Capital U.S. Aggregate Index for domestic debt securities, the Barclays Capital Global Aggregate Index ex-U.S. (unhedged) for international debt securities and the Barclays Capital Global Inflation Linked Bond Index 1-10 Year (USD hedged) for inflation-linked debt securities. The index range as of December 31, 2014, was 4.16 - 6.94 for domestic debt securities, 5.81 – 8.71 for international debt securities and 3.60 – 5.40 for inflation-linked debt securities. At December 31, 2014, no individual debt security investment manager's portfolio was outside of the policy guidelines. At December 31, 2014, the following tables show the investments by investment type, amount, and the effective weighted duration.

#### **Credit Risk of Debt Securities**

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. The primary government, with the exception of the Utah Retirement Systems (URS) (pension trust and defined contribution plans), follows the Money Management Act as previously discussed as its policy for reducing exposure to investment credit risk.

The primary government's rated debt investments as of June 30, 2015, with the exception of URS, were rated by Standard and Poor's and/or an equivalent nationally recognized statistical rating organization and the ratings are presented below using the Standard and Poor's rating scale. Securities rated less than "A" the investment criteria at the time of purchase.

<sup>\*</sup> A1 and A2 are Commercial Paper ratings

The URS expects their domestic debt securities investment managers to maintain diversified portfolios by sector and by issuer using the following guidelines:

- U.S. Government and Agency Securities no restriction.
- Total portfolio quality will maintain a minimum overall rating of "A" (S&P) or equivalent rating.
- Securities with a quality rating of below BBB- are considered below investment grade. No more than 5 percent of an investment manager's assets at market with a single issuer of 1 percent of the total portfolio can be below investment grade.
- Upon approval, a domestic debt securities investment manager may invest up to 10 percent of the portfolio in non-U.S. dollar denominated bonds.
- Upon approval, the international debt securities investment managers may hold up to 25 percent of the market value of their portfolios in securities rated below investment grade

(S&P index BBB– or Moody's index Baa3). The remaining assets will have on average an investment grade rating.

The weighted quality rating average of the domestic debt securities, excluding pooled investments, at December 31, 2014, is AAA and the fair value of below grade investments is \$237.831 million or 5.65 percent.

The following table presents the URS credit risk ratings as of December 31, 2014:

#### Custodial Credit Risk — Investments

Custodial credit risk for investments is the risk that, in the event of a failure of the counter party, the State will not be able to recover the value of the investment or collateral securities that are in the possession of an outside party. The primary government does not have a formal policy for custodial credit risk.

The primary government's investments at June 30, 2015, except those of the Utah Retirement Systems (URS) (pension trust and defined contribution plans), were held by the State or in the State's name by the State's custodial banks.

URS does not have an investment policy regarding custodial credit risk. At December 31, 2014, URS has \$33.265 million frictional cash and cash equivalents subject to custodial credit risk in foreign banks in URS's name, Because it is in foreign banks, it is subject

to custodial risk. URS does not have an investment policy regarding custodial credit risk for frictional cash in foreign banks. URS also has other investments of \$34.932 million with exposure to custodial credit which has not been determined.

#### Concentration of Credit Risk — Investments

Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer.

Except for the Utah Retirement Systems (URS) (pension trust and defined contribution plans), the primary government's policy for reducing this risk of loss is to comply with the Rules of the State Money Management Council. Rule 17 of the State Money Management Council limits investments in a single issuer of commercial paper and corporate obligations to between 5 and 10 percent depending upon the total dollar amount held in the

portfolio. Such limitations do not apply to securities issued by the U.S. government and its agencies.

The primary government had no debt securities investments at June 30, 2015, with more than 5 percent of the total investments in a single issuer.

The URS' debt securities investments had no single issuer investments at December 31, 2014, that exceed their diversified portfolio by sector and by issuer using the following guidelines:

- AAA/Aaa Debt Securities no more than 5 percent of an investment manager's assets at market with a single issuer.
- AA-/Aa3 Debt Securities or higher no more than 4 percent of an investment manager's assets at market with a single issuer.
- A-/A3 Debt Securities or higher no more than 3 percent of an investment manager's assets at market with a single issuer.
- BBB-/Baa3 Debt Securities or higher no more than 2 percent of an investment manager's assets at market with a single issuer.
- For Debt Securities no individual holding shall constitute more than 10 percent of the market value of outstanding debt of a single issuer with the exception of the U.S. Government or its agencies, or collateralized mortgage obligations.
- For Domestic Equity Securities no individual holdings shall constitute more than 4 percent of the securities of any single issuer. Also, no more than 8 percent of an investment manager's assets shall be invested in the equity or Real Estate Investment Trust (REIT) securities of any single issuer at market; or if specifically authorized in the manager's contract, the exposure of the portfolio to any single issuer shall not exceed the greater of 5 percent of the portfolio value or 2 percent of the portfolio value plus the benchmark weight measured at the time of purchase.
- For International Equity Securities no more than 8 percent of an investment manager's assets shall be invested in the equity or REIT securities of any single issuer at market; or if specifically authorized in the manager's contract, the

exposure of the portfolio to any single issuer shall not exceed the greater of 5 percent of the portfolio value or 2 percent of the portfolio value plus the benchmark weight measured at the time of purchase.

As of December 31, 2014, URS had no single issuer investments that exceeded the above guidelines.

#### Foreign Currency Risk — Investments

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or a deposit. The primary government, except the Utah Retirement Systems (URS) (pension trust and defined contribution plans), does not have a formal policy to limit foreign currency risk.

The Utah Educational Savings Plan Trust (private purpose trust) has \$1.047 billion and the Trust Lands (permanent fund) has \$409.352 million invested in international equity funds. As such, no foreign currency risk is presented.

URS expects the International Securities Investment Managers to maintain diversified portfolios by sector and by issuer using the following guidelines:

- International investment managers invest in fixed income instruments and equity instruments of corporations headquartered outside of the United States unless specifically authorized within the investment manager's contract.
- Domestic investment managers are allowed to invest in international corporations traded in American Depository Receipts (ADR).
- Portfolios should be adequately diversified to limit foreign currency and security risk.

Risk of loss arises from changes in currency exchange rates. URS' exposure to foreign currency risk is shown in the table below.

(Table on next page.)

#### **B.** Discrete Component Units

#### Custodial Credit Risk — Deposits

The custodial credit risk for deposits is the risk that in the event of a bank failure, the discrete component unit's deposits may not be recovered.

The discrete component units follow the Utah Money Management Act by making deposits only in qualified depository institutions or in foreign depository institutions in accordance with rules of the State Money Management Council. Deposits with qualified depository institutions in excess of FDIC insurance limits amount are uninsured and uncollateralized. Deposits are not collateralized nor are they required to be by state statute. The deposits for the discrete component units at June 30, 2015, were \$150.656 million. Of these, \$141.915 million were exposed to custodial credit risk as uninsured and uncollateralized.

#### **Investments**

The discrete component units follow the applicable investing criteria described above for the primary government, with the exception of Public Employees Health Program which is exempt from the Money Management Act.

College and university funds from gifts, private grants, and the corpus of funds functioning as endowments are invested according

to the requirements of the Uniform Prudent Management of Institutional Funds Act (UPMIFA) and State Board of Regents Rule 541, Management and Reporting of Institutional Investments (Rule 541) or separate endowment investment policies which have been approved by their Board of Trustees and by the Board of Regents. The UPMIFA and Rule 541 allow the Entity to invest endowment funds (including gifts, devises, or bequests of property of any kind from any source) in any investments allowed by the Money Management Act or any of the following subject to satisfying certain criteria: professionally managed pooled or commingled investment funds registered with the Securities and Exchange Commission or the Comptroller of the Currency (e.g., mutual funds); professionally managed pooled or commingled investment funds created under 501(f) of the Internal Revenue Code which satisfy the conditions for exemption from registration under Section 3(c) of the Investment Company Act of 1940; any investment made in accordance with the donor's directions in a written instrument; and any alternative investment funds that derive returns primarily from high vield and distressed debt (hedged or non-hedged), private capital (including venture capital, private equity, both domestic and international), natural resources, and private real estate assets or absolute return and long/short hedge funds.

The discrete component units' debt investments at June 30, 2015, are presented below:

#### Interest Rate Risk — Investments

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The discrete component units' policy for managing interest rate risk is the same as described above for the primary government and endowment funds complying with the UPMIFA and Rule 541, as applicable. For institutions of higher education, the limit is ten years remaining term to maturity on all investments in obligations of the United States Treasury; obligations issued by U.S. government sponsored enterprises; and bonds, notes, and other evidence of indebtedness. For endowment funds, Rule 541 is more general, requiring only that investments be made as a prudent investor would, by considering the purposes, terms, distribution requirements, and

other circumstances of the endowments and by exercising reasonable care, skill, and caution.

#### **Credit Risk of Debt Securities**

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. The discrete component units' policy for reducing exposure to investment credit risk is the same as described above for the primary government. The discrete component units' debt investments as of June 30, 2015, were rated by Standard and Poor's and/or an equivalent nationally recognized statistical rating organization and the ratings are presented below using the Standard and Poor's rating scale.

#### Custodial Credit Risk — Investments

Custodial credit risk for investments is the risk that, in the event of a failure of the counter party, the discrete component units will not be able to recover the value of the investment or collateral securities that are in the possession of an outside party. The discrete component units do not have a formal policy for custodial credit risk.

The various discrete component units' investments at June 30, 2015, were held by the discrete component unit or in the name of the discrete component unit by the discrete component unit's custodial bank or trustee, except the following which were uninsured, were not registered in the name of the discrete component unit, and were held by (expressed in thousands):

<b>Equity Mutual Fund Securities: Domestic</b>	\$ 2,553

#### Concentration of Credit Risk — Investments

Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer. Except for Public Employees Health Program (PEHP) (major discrete component unit), the discrete component units' policy for reducing this risk of loss is the same as described above for the primary government for non-endowment funds. For college and university endowments funds, their policy for reducing this risk of loss is to follow the Uniform Prudent Management of Institutional Funds Act (UPMIFA) and State Board of Regents Rule 541, Management and Reporting of Institutional Investments or separate endowment investment policies which have been approved by their Board of Trustees and by the Board of Regents.

PEHP's policy limits the amount that may be invested in any one issuer to between 2 and 5 percent, depending on the credit rating of the security. There is no limit to investments in U.S. Government Securities. All investments are within policy limits.

The University of Utah held more than 5 percent in the Federal Home Loan Bank, the Federal Farm Credit Bank, and the Federal Home Loan Mortgage Corporation. These investments represent 24.5 percent, 5.5 percent, and 7.9 percent, respectively, of the University's total investments.

Utah State University held more than 5 percent of total investments in securities of the Federal Farm Credit Bank,

Federal Home Loan Bank, and the Federal Home Loan Mortgage Corporation. These investments represent 17.44 percent, 6.06 percent, and 6.77 percent, respectively, of the University's total investments.

#### Foreign Currency Risk — Investments

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or a deposit. The discrete component units do not have a formal policy to limit foreign currency risk.

#### C. Securities Lending

The Utah Retirement Systems (URS) (pension trust and defined contribution plans) and the PEHP participate in security lending programs as authorized by their Boards. Under these programs, securities are transferred to an independent broker or dealer in exchange for collateral in the form of cash, government securities, and irrevocable bank letters of credit equal to approximately 102 percent of the market value of the domestic securities on loan (for URS and PEHP) and for URS 106 percent of the market value of the international securities on loan, with a simultaneous agreement to return the collateral for the same securities in the future. For both state entities, their custodial bank is the agent for its securities lending program. Securities under loan are maintained in the financial records, and corresponding liabilities are recorded for market value of the collateral received.

At yearend, neither the URS nor PEHP had any credit risk exposure to borrowers because the collateral exceeded the amount borrowed. The securities on loan at yearend for the entities were \$2.197 billion and \$17.401 million, and the collateral received for those securities on loan was \$2.283 billion and \$17.827 million, respectively for URS and PEHP. Under the terms of the lending agreement, both state entities are indemnified against loss should the lending agent be unable to recover borrowed securities and distributions due to borrower insolvency or failure of the lending agent to properly evaluate the creditworthiness of the borrower. In addition, they are indemnified against loss should the lending agent fail to demand adequate and appropriate collateral on a timely basis. All securities loaned can be terminated on demand by either the state entity or the borrower. Cash collateral is invested in the lending agent's short-term investment pool.

The short-term investment pool guidelines specify that a minimum of 20 percent of the invested cash collateral is to be available each business day and that the dollar weighted average maturity of holdings should not exceed 60 days. The relationship between the maturities of the short-term investment pool and each of the state entities' loans is affected by the maturities of the securities loans made by other entities that use the agent's pool, which the state entities cannot determine. Since the securities lending collateral is in a pool maintained by the custodial bank, the state entities do not have the ability to pledge or sell the securities, and it is not necessary to report the total income and expenses of securities lending.

#### D. Derivative Financial Instruments

#### **Utah Retirement Systems**

The Utah Retirement Systems (URS) (pension trust and defined contribution plans) invests in derivative financial investments as authorized by Board policy. Derivatives are financial arrangements between two parties whose payments are based on, or "derived" from, the performance of some agreed-upon benchmark. All derivatives are considered investments. The fair value of all derivative financial instruments is reported in the Statements of Fiduciary Net Position—Pension and Other Employee Benefit Trust Funds. Within the investment asset class, swaptions are recorded in debt securities. By policy, portfolio liabilities associated with investments shall be backed by cash equivalents or deliverable securities. URS does not have a policy regarding master netting arrangements. At December 31, 2014, URS had five types of

derivative financial instruments: futures, currency forwards, options, swaps, and Synthetic Guaranteed Investment Contracts (SGIC).

Futures represent commitments to purchase (asset) or sell (liability) securities at a future date and at a specified price. Futures contracts are traded on organized exchanges (exchange traded) thereby minimizing URS' credit risk. The net change in the futures contracts value is settled daily in cash with the exchanges. Net gains or losses resulting from the daily settlements are included with trading account securities gains in the Statement of Changes in Fiduciary Net Position. At December 31, 2014, and December 31, 2013, URS' investments had the following notional futures balances as shown in the table below.

# Utah Retirement Systems (pension trust and defined contribution plans) Futures — Notional Market Value At December 31 (Expressed in Thousands)

**Defined Benefit Plans Defined Contribution Plans** 2014 2013 2014 2013 Cash and Cash Equivalent \$ Long..... \$ 218,339 \$ 202,857 \$ Short..... (372,928)(155,524)(50,701)(2,122)62,358 14,792 (2,218)Total Futures ..... \$ (430,540)

Options represent or give buyers the right, but not the obligation, to buy (call) or sell (put) an asset at a preset price over a specified period. The option's price is usually a small percentage of the underlying asset's value. As a writer of financial options, URS receives a premium at the outset of the agreement and bears the risk of an unfavorable change in the price of the financial instrument underlying the option. As a purchaser of financial

options, URS pays a premium at the outset of the agreement and the counterparty bears the risk of an unfavorable change in the price of the financial instrument underlying the option. At December 31, 2014, and December 31, 2013, URS investments had the following notional futures balances as shown in the table below.

# Utah Retirement Systems (pension trust and defined contribution plans) Options — Notional Market Value At December 31

Currency forwards represent forward foreign exchange contracts that are entered into in order to hedge the exposure to changes in foreign currency exchange rates on the foreign currency dominated portfolio holdings. A forward foreign exchange contract is a commitment to purchase or sell a foreign currency at a future date at a negotiated forward rate. The gain or loss arising from the difference between the original contracts and the closing of such contracts is included in net realized gains or losses on foreign currency related transactions.

At December 31, 2014, and December 31, 2013, URS investments included the following currency forwards balances (expressed in thousands):

<b>Currency Forwards</b>	 2014 Fair Value	2013 Fair Value
Forwards Subject to Foreign Currency Risk (pending foreign exchange sales):		
Defined Benefit Plans Defined Contribution Plans	\$ 24,944 2,451	\$ (11,049) (776)
Total Currency Forwards	\$ 27,395	\$ (11,825)

URS has entered into various inflation, credit default, and interest rate swap agreements in an attempt to manage their exposure to

inflation, credit, and interest rate risk. Interest rate and inflation risk represents the exposure to fair value losses arising from the future changes in prevailing market interest rates. Credit risk is an investor's risk of loss arising from a borrower who does not make payments as promised. Swaps represent an agreement between two or more parties to exchange sequences of cash flows over a period in the future. In the most common type of interest rate swap arrangement, one party agrees to pay fixed interest payments on designated dates to a counter party who, in turn, agrees to make return interest payments that float with some reference rate. The real estate interest rate swaps allowed URS to effectively convert most of their long-term variable interest rate credit facility loans into fixed interest rate loans, thereby mitigating some of their interest rate risk. All swap instruments contain collateral clauses. As of December 31, 2014, Barclays Bank PLC swaps had collateral held for \$2.852 million. Deutsche Bank securities swaps had collateral held for \$600 thousand, and JP Morgan Chase had collateral held for \$51 thousand. Gains and losses on swaps are determined based on market values and are recorded in the Statement of Changes in Fiduciary Net Position. Swap market values are determined by an independent third party. At December 31, 2014, and December 31, 2013, URS investments had the swap market value balances as shown in the following table:

Derivatives which are exchange traded are not subject to credit risk. No derivatives held are subject to custodial credit risk. The maximum loss that would be recognized at December 31, 2014, if all counterparties fail to perform as contracted is \$926.311 million. The maximum exposure is reduced by \$1.372 billion of liabilities,

resulting in no net exposure to credit risk. At December 31, 2014, the counterparties' credit ratings for currency forwards, options, and swaps are subject to credit risk. Credit ratings for the wrap contracts associated with the Synthetic Guaranteed Investment Contracts are shown in the table below.

In the URS Defined Contribution Plans, members are able to participate in Synthetic Guaranteed Investment Contracts (SGICs). The SGICs are fully benefit responsive which means that URS is prohibited from assigning and selling the contract or its proceeds to a third party without the consent of the issuer. Prospective interest crediting rate adjustments are provided to plan participants. The SGICs provide assurance that the probability of future rate adjustments resulting in an interest crediting rate less than zero is remote. The underlying investments are high credit quality

averaging A+ and therefore credit loss is remote. The terms of the SGICs require all plan participants to initiate transactions within the fund at contract value. The contract value is the fair value (cost plus accrued interest). The fair value of these contracts at December 31, 2014 is \$841.45 million and the market value is \$861.047 million. Credit ratings for the wrap contracts associated with the Synthetic Guaranteed Investment Contracts are also noted below

#### D. **Derivative Financial Instruments** (continued)

#### **Student Assistance Program**

The following are disclosures for derivative financial instruments held by Student Assistance Program (major enterprise fund).

Objective — In order to protect against the potential of rising interest rates on its variable rate debt, the Student Assistance Program Board entered into an interest rate exchange (swap)

agreement relating to the Board's student loan revenue bonds, Series 2010 EE ("Series 2010 Bonds") on December 21, 2010. The purpose of the swap is to create a variable rate cost of funds for the Series 2010 Bonds that will be lower than the variable rate cost achievable in the cash bond market. The Board accounts for the swap agreement as a fair value hedging derivative instrument and recognizes changes in fair values on the statement of Net Position as an asset or liability with a related deferred inflow or outflow of resources respectively. The terms of the swap agreement include:

Trade Date: ..... December 21, 2010 Effective Date..... December 30, 2010 Termination Date...... November 1, 2030 Initial Notional Amount ...... \$364,150,000 Counterparty Pays Fixed ...... Stepped fixed rates ranging from 4.66 % to 5.00 % Payment Dates..... The 1st day of May and November

Changes in the fair value of the swap agreement and the ending fair value of the swap agreement are summarized below:

**Student Assistance Program** Change in Fair Value For Fiscal Years Ending June 30 (Expressed in Thousands)

Derivative	Fair Value at	Fair Value at	Change in Fair
	June 30, 2015	June 30, 2014	Value
Interest Rate Exchange	\$ 18,068	\$ 18,308	\$ (240)

Swaps are not normally valued through exchange-type markets with easily accessible quotation systems and procedures. The fair market value was calculated using information obtained from generally recognized sources with respect to quotations, reporting of specific transactions and market conditions and based on accepted industry standards and methodologies.

**Credit Risk** — The risk of a change in the credit quality or credit rating of the Board and/or its counterparty. The counterparty's long-term ratings are "Aa3", "AA-" and "AA/AA-" by Moody's Investors Service, Standard & Poor's and Fitch Ratings, respectively.

The Board is exposed to credit risk on hedging derivative instruments that are in asset positions. To minimize its exposure to loss related to credit risk, it is the Board's policy to require counterparty collateral posting provisions in its non-exchangetraded hedging derivative instruments. These terms require full collateralization of the fair value of hedging derivative instruments in asset positions (net of the effect of applicable netting arrangements) should the counterparties' short-term and long-term credit ratings fall below "A-1" and "A," respectively, as issued by Standard & Poor's or below "Prime-1" and "A2," respectively, as issued by Moody's Investors Service. Collateral posted is to be in the form of cash, U.S. Treasury securities or agency securities held by a third-party custodian. The Board has never failed to access collateral when required.

It is the Board's policy to enter into netting arrangements whenever it has entered into more than one derivative instrument transaction

with a counterparty. Under the terms of these arrangements, should one party become insolvent or otherwise default on its obligations, close-out netting provisions permit the non-defaulting party to accelerate and terminate all outstanding transactions and net the transactions' fair values so that a single sum will be owed by, or owed to, the non-defaulting party.

Interest Rate Risk — The risk that the debt service costs associated with variable rate debt increases and negatively affects coverage ratios and cash flow margins. The Board is exposed to interest rate risk; as the 3-month LIBOR rate increases, the net payment on the swap agreement increases.

Basis Risk — The risk that arises when variable rates or prices of a swap agreement and a hedged item are based on different interest rate indexes. Because the swap agreement requires the Board to pay a variable rate to the counterparty and is receiving a fixed rate payment in return, basis risk is not applicable.

**Termination Risk** — The risk that the swap must be terminated prior to its stated final cash flow date. Purposes for termination include the deterioration of the Board's own credit, and the inability of the Board to obtain a replacement transaction with substantially similar terms. In such a circumstance, the Board would owe, or be owed, a termination payment. No termination events related to the swap agreement have occurred as of June 30, 2015.

**Rollover Risk** — The risk that the maturity of the swap contract is not coterminous with the maturity of the related bonds. The swap agreement and the underlying bonds have a final maturity date of November 1, 2030.

#### NOTE 4. INVESTMENT POOL

The Utah State Treasurer's Office operates the Utah Public Treasurers' Investment Fund (PTIF) investment fund. The PTIF is available for investment of funds administered by any Utah public treasurer. Participation is not required and no minimum balance or minimum/maximum transaction is required. State agencies and funds that are authorized to earn interest also invest in the PTIF as an internal investment pool. No separate report as an external investment pool has been issued for the PTIF.

The PTIF is not registered with the SEC as an investment company and is not rated. The PTIF is authorized and regulated by the Utah Money Management Act, (*Utah Code* Title 51, Chapter 7). The Act establishes the State Money Management Council, which oversees the activities of the State Treasurer and the PTIF. The Act lists the investments that are authorized which are high-grade securities and, therefore, minimizes credit risk except in the most unusual and unforeseen circumstances.

Deposits in the PTIF are not insured or otherwise guaranteed by the State of Utah, and participants share proportionally in any realized gains or losses on investments. The PTIF operates and reports to participants on an amortized cost basis. The income, gains, and losses, net of administration fees, of the PTIF are allocated to participants monthly on the ratio of the participant's share to the total funds in the PTIF based on the participant's average daily balance. This method differs from the fair value method used to value investments in these financial statements because the amortized cost method is not designed to distribute to participants all unrealized gains and losses in the fair values of the pool's investments. The total difference between the fair values of the investments in the pool and the values distributed to the pool participants using the amortized cost method described above is reported in the net position section of the following table as unrealized gains/losses. The PTIF may maintain an interest reserve to stabilize the monthly apportionment of interest. Any balance maintained in the interest reserve is reflected in the fair value valuation factor discussed below. The PTIF allocates income and issues statements on a monthly basis. Twice a year, at June 30 and December 31, which are the accounting periods for public entities, the investments are valued at fair value and participants are informed of the fair value valuation factor that enables them to adjust their statement balances to fair value.

The PTIF condensed financial statements, inclusive of external and internal participants along with the portfolio statistics for the fiscal year ended June 30, 2015, are as follows:

#### Utah Public Treasurers' Investment Fund Statement of Net Position June 30, 2015

#### **Deposits and Investments**

The following disclosure of deposits and investments is for the PTIF, which includes external and internal participants. These assets are also included in the Note 3 disclosures of deposits and investments for the primary government. To avoid duplication, some of the detailed information in Note 3 has not been repeated in this note.

#### Custodial Credit Risk — Deposits

The custodial credit risk for deposits is the risk that in the event of a bank failure, the PTIF's deposits may not be recovered. The PTIF follows the Money Management Act by making deposits only in qualified financial institutions in accordance with the Act.

The deposits in the bank in excess of the insured amount are uninsured and uncollateralized. Deposits are not collateralized nor are they required to be by state statute. The deposits for the PTIF at June 30, 2015, were \$27.248 million. Of those, \$26.250 million were exposed to custodial credit risk as uninsured and uncollateralized.

#### **Investments**

The PTIF follows the Money Management Act by investing only in securities authorized in the Act. See Note 3 for information on authorized investments.

The PTIF investments at June 30, 2015, are presented below.

#### Utah Public Treasurers' Investment Fund At June 30, 2015

(Expressed in Thousands)

		Investment Matu	irities (in years)		
Investment Type	Fair Value	Less Than 1	1–5		
<u>Debt Securities</u>					
Corporate Bonds and Notes	\$ 9,925,673	\$ 9,849,691	\$ 75,982		
Negotiable Certificates of Deposit	234,380	234,380	_		
Money Market Mutual Funds	500,000	500,000	_		
Commercial Paper	471,443	471,443	_		
	\$ 11,131,496	\$ 11,055,514	\$ 75,982		

The majority of the PTIF's corporate debt securities are variablerate securities, most of which reset every three months to the market interest rate. Because these securities frequently re-price to prevailing market rates, interest rate risk is substantially reduced at each periodic reset date. In the table above, variable-rate securities are presented according to the length of time until the next reset date rather than the stated maturity.

#### Interest Rate Risk — Investments

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The PTIF's policy for managing interest rate risk is to comply with the State's Money Management Act. See Note 3 for information on requirements of the Act related to interest rate risk.

#### **Credit Risk of Debt Securities**

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. The PTIF follows the Money Management Act as its policy for reducing exposure to investment credit risk. The PTIF's rated debt investments as of June 30, 2015, were rated by Standard and Poor's and/or an equivalent nationally recognized statistical rating organization and the ratings are presented below using the Standard and Poor's rating scale.

<sup>\*</sup> A1 and A2 are Commercial Paper ratings

#### Concentration of Credit Risk — Investments

Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer. The PTIF's policy for reducing this risk of loss is to comply with the Rules of the State Money Management Council. Rule 17 of the State Money Management Council limits investments in a single

issuer of commercial paper and corporate obligations to 5 percent of the total dollar amount held in the portfolio. The State Money Management Council limitations do not apply to securities issued by the U.S. government and its agencies. The PTIF had no debt securities investments at June 30, 2015, with more than 5 percent of the total investments in a single issuer.

Accounts receivable balances are an aggregation of amounts due from the federal government, customers, and others. Receivables from customers include charges for services to local governments, fees and fines issued by the courts and corrections, employer contributions for unemployment benefits, and receivables as a result of overpayments to individuals receiving state assistance.

Receivables for fiduciary funds listed above represent amounts due from fiduciary funds that were reclassified as external receivables on the government-wide Statement of Net Position. Other adjustments are due to differences in the presentation and the basis of accounting between the fund financial statements and the government-wide Statement of Net Position.

Aggregated receivables for major and nonmajor discrete component units at June 30, 2015, were \$574.698 million and \$115.164 million, respectively. These receivables are net of an allowance for doubtful accounts of \$276.695 million and \$11.863 million, respectively.

Accounts payable and accrued liability balances are an aggregation of amounts due to: (1) state employees for salaries/benefits; (2) service providers for childcare, job services and health services; (3) vendors and miscellaneous suppliers; (4) local and federal governments for services; (5) individuals and others as a result of tax overpayments or credits issued; and (6) interest due on bonds and other obligations.

Adjustments for fiduciary funds listed above represent amounts due to fiduciary funds that were reclassified as external payables on the government-wide Statement of Net Position. Other adjustments are due to differences in the presentation and the basis of accounting between the fund financial statements and the government-wide Statement of Net Position.

#### NOTE 7. INTERFUND BALANCES AND LOANS

#### **Interfund Balances**

Interfund balances at June 30, 2015, consisted of the following (in thousands):

Due to General Fund from:		
Education Fund	\$	289
Transportation Fund		700
Trust Lands Fund		9
Nonmajor Governmental Funds		1,972
Unemployment Compensation Fund		10,018

These balances resulted from the time lags between the dates that: (I) interfund goods and services are provided or reimbursable expenditures occur; (2) transactions are recorded in the accounting system; and (3) payments between funds are made.

#### **Interfund Loans**

At June 30, 2015, interfund loans receivable/payable balances consist of \$48.729 million revolving loans payable to the General Fund from Internal Service Funds. The balance payable to the General Fund from Internal Service Funds of \$48.729 million includes \$26.996 million that is not expected to be repaid within one year and is classified as nonspendable fund balance.

NOTE 8. CAPITAL ASSETS

Capital asset activity for the year ended June 30, 2015, was as follows (in thousands):

	Beginning Balance	Additions	Deletions	Ending Balance
Governmental Activities: Capital Assets Not Depreciated/Amortized: Land and Related Assets Infrastructure Construction in Progress	\$ 1,742,078 13,392,928 549,008	\$ 50,319 182,665 566,024	\$ (1,646) (24,730) (325,334)	\$ 1,790,751 13,550,863 789,698

Construction in progress of governmental activities includes amounts for buildings the State is constructing for colleges and universities and other discrete component units that are funded by state appropriations or state bond proceeds. As the buildings are completed, the applicable amounts are deleted from construction in progress of governmental activities and

"transferred" to the colleges and universities and other discrete component units. For fiscal year 2015, \$71.822 million of buildings were completed for colleges and universities. On the government-wide statement of activities, the building "transfers" are reported as higher education expenses of governmental activities and as program revenues of discrete component units.

Depreciation expense of governmental activities was charged to functions as follows (in thousands):

General Government	\$ 17,780
Human Services and Juvenile Justice Services	8,636
Corrections	5,869
Public Safety	15,388
Courts	6,071
Health and Environmental Quality	5,132
Employment and Family Services	10,826
Natural Resources	9,406
Heritage and Arts	587
Business, Labor, and Agriculture	1,064
Public Education	1,182
Transportation	10,966
Depreciation on capital assets of the State's internal	
service funds is charged to the various functions	
based on their usage of services provided	 18,726
Total Depreciation Expense	\$ 111,633

#### **Discrete Component Units**

The following table summarizes net capital assets reported by the discrete component units (in thousands):

	Public Employees Health Program	University of Utah	Utah State University	Nonmajor Component Units	Total

#### NOTE 9. LEASE COMMITMENTS

The State leases office buildings along with office and computer equipment. Although the lease terms vary, most leases are subject to annual appropriations from the State Legislature to continue the lease obligations. If an appropriation is reasonably assured, leases are considered noncancellable for financial reporting purposes.

Leases, that in substance are purchases, are reported as capital lease obligations. In the government-wide financial statements and proprietary fund financial statements, assets and liabilities resulting from capital leases are recorded at the inception of the lease at either the lower of fair value or the present value of the future minimum lease payments. The principal portion of lease payments reduces the liability, and the interest portion is expensed.

On the governmental fund financial statements, both the principal and interest portions of capital lease payments are recorded as expenditures of the applicable governmental function.

The primary government's capital lease payments were \$1.507 million in principal and \$929 thousand in interest for fiscal year 2015. As of June 30, 2015, the historical cost of the primary government's assets acquired through capital leases was \$37.979 million of which \$37.21 million was buildings and land and \$769 thousand was equipment and other depreciable assets. As of June 30,

2015, the accumulated depreciation of the primary government's assets acquired through capital leases was \$14.288 million of which \$13.562 million was buildings and \$726 thousand was equipment and other depreciable assets. Of the \$159.471 million in discrete component unit present value of future minimum lease payments noted below, \$98.48 million relates to capital lease arrangements between the primary government and certain colleges and universities (discrete component units).

Operating leases contain various renewal options, as well as some purchase options. However, due to the nature of the leases, they do not qualify as capital leases and the related assets and liabilities are not recorded. Any escalation clauses, sublease rentals, and contingent rents were considered immaterial to the future minimum lease payments and current rental expenditures. Operating lease payments are recorded as expenditures or expenses when paid or incurred.

Operating lease expenditures for fiscal year 2015 were \$26.118 million for the primary government and \$28.302 million for discrete component units. For fiscal year 2014, the operating lease expenditures were \$27.738 million for the primary government and \$28.194 million for discrete component units. Future minimum lease commitments for non-cancellable operating leases and capital leases as of June 30, 2015, were as follows:

#### **Future Minimum Lease Commitments**

Amounts in the beginning balance column for Discrete Component Units have been adjusted as follows: for Utah Housing Corporation (major component unit) revenue bonds were decreased by \$1.109 billion; net unamortized premiums / (discounts) were decreased by \$2.7 million; notes payables were decreased by \$194 million; and leave/termination benefits were decreased by \$861 thousand. For Utah Communications Authority (nonmajor component unit) capital leases/contracts payable were increased by \$186 thousand; and leave/termination benefits were increased by \$431 thousand. These adjustments remove beginning balances for Utah Housing Corporation and add beginning balances for Utah Communications Authority as described in Note 2.

<sup>\*</sup> The net pension liability of governmental activities is liquidated in the General Fund, Education Fund, or Transportation Fund according to the applicable employing state agency. The net pension liability of business-type activities is liquidated in the specific funds that pay the employer contributions and includes Student Assistance Program, the Internal Service Funds, Alcoholic Beverage Control, Utah Correctional Industries, and State Trust Lands Administration. The changes in the liability are netted as reductions for the governmental activities and business-type activities since that information is not readily available for inclusion. See Note 17 for additional pension information.

<sup>\*\*</sup> Compensated absences of governmental activities are liquidated in the General Fund, Education Fund, or Transportation Fund according to the applicable employing state agency. Claims liabilities of governmental activities are liquidated in the Risk Management Internal Service Fund. Net OPEB obligation of governmental activities is liquidated in the General Fund.

#### B. General Obligation Bonds

The State issues general obligation bonds to provide funds for acquisition, construction, and renovation of major capital facilities and for highway construction. In addition, general obligation bonds have been issued to refund general obligation bonds, revenue bonds, and capitalized leases. General obligation bonds are secured by the full faith and credit of the State. Debt service requirements are provided by legislative appropriation from the State's general tax revenues. As of June 30, 2015, the State had \$63.652 million of unissued general obligation highway

bond authorizations remaining, and \$474.7 million of unissued general obligation building bond authorizations remaining.

During fiscal year 2015, the State issued \$220.98 million Series 2015 general obligation refunding bonds. The proceeds were used to advance refund portions of the 2009 A and 2011 A general obligation bonds.

General obligation bonds payable information is presented below.

#### **General Obligation Bonds Payable**

(Expressed in Thousands)

Bond Issue	Date Issued	Maturity Date	Interest Rate	Original Issue	Balance June 30, 2015

#### C. Revenue Bonds

Revenue bonds payable consists of those issued by the Utah State Building Ownership Authority, the Utah State Board of Regents Student Loan Purchase Program, the State's Water Loan Programs, and various colleges and universities. These bonds are not considered general obligations of the State.

#### **Governmental Activities**

The Utah State Building Ownership Authority (SBOA) has issued bonds for the purchase and construction of facilities to be leased to state agencies and other organizations. The bonds are secured by the facilities and repayment is made from lease income appropriated by the Legislature and is not considered pledged revenue of the State. The outstanding bonds payable at June 30, 2015 are reported as a long-term liability of the governmental activities, except for \$78.379

million and \$1.634 million, which are reported in the Alcoholic Beverage Control Fund and the Utah Correctional Industries Fund (nonmajor enterprise funds), respectively. These portions are reported as liabilities of the business-type activities on the government-wide Statement of Net Position.

#### **Business-type Activities**

The Utah State Board of Regents Student Loan Purchase Program's (Student Assistance Programs) bonds were issued to provide funds for student loans and are secured by all assets of the Board of Regents Revenue Bond Funds and by the revenues and receipts derived from such assets. The Board of Regents has also issued a revenue bond for an office facility secured by funds within the Board of Regents budget that would otherwise be expended for rent.

The Student Assistance Programs include \$329.605 million of fixed rate bonds, \$160.961 million of bonds at a rate set at the 3-month LIBOR plus spread, \$404.65 million of bonds at a rate set at the 1-month LIBOR plus 0.6 percent, \$325.758 million of bonds at a rate set at the 1-month LIBOR plus 0.75 percent, \$238.619 million of bonds at a rate set at the 1-month LIBOR plus 0.55 percent, and \$10.85 million of bonds at a rate of set at the 1-month LIBOR plus 1.5 percent. The Programs' bonds also include adjustable rate bonds that are set by an auction procedure every 28 days in the amount of \$39.1 million.

The Student Assistance Program's bonds issued under the 1993 Trust Estate are limited obligations of the Board secured by and payable solely from the Trust Estate established by the indenture. The bonds and notes were issued to finance eligible student loans. The Trust Estate consists of student loans acquired under the indenture, all proceeds of the bonds and notes, and net revenues in the funds and accounts, and any other property pledged to the Trust Estate. The Board has pledged these assets and net revenues to repay \$524.261 million of outstanding student loan revenue bonds and student loan backed notes which are payable through 2046. Principal and interest paid for the current year and total net revenues before interest expense were \$72.598 million and \$6.305 million, respectively. The interest expense of (\$3.718 million) includes an entry to recognize \$8.8 million of deferred gain on bond redemptions.

The Student Assistance Program's notes issued under the 2012 Trust Estate are special limited obligations of the Board secured by the payable solely from the Trust Estate established by the indenture. The notes were issued to refinance eligible student loans and retire outstanding funding notes of the Board. The Trust Estate consists of student loans acquired under the indenture, all proceeds of the notes and net revenues in the funds and accounts, and any other property pledged to the Trust Estate. The Board has pledged these assets and net revenues to repay \$325.758 million of outstanding student loan backed notes which are payable through 2032. Principal and interest paid for the current year and total net revenue before interest expense were \$74.451 million and \$4.373 million, respectively.

The notes issued under the 2014 Trust Estate are special limited obligations of the Board secured by and payable solely from the Trust Estate established by the indenture. The notes were issued to retire outstanding student loan revenue bonds of the Board. The Trust Estate consists of student loans acquired under the indenture, all proceeds of the notes and net revenues in the funds and accounts,

and any other property pledged to the Trust Estate. The Board has pledged these assets and net revenues to repay \$238.619 million of outstanding student loan backed notes which are payable through 2039. Principal and interest paid for the current year and total net revenues before interest expense were \$40.102 million and \$3.283 respectively.

The notes issued under the 2015 Trust Estate are special limited obligations of the Board secured by and payable solely from the Trust Estate established by the indenture. The notes were issued to retire a portion of the outstanding advances from the Warehouse Facility to the Board. The Trust Estate consists of student loans acquired under the indenture, all proceeds of the notes and net revenues in the funds and accounts, and any other property pledged to the Trust Estate. The Board has pledged these assets and net revenues to repay \$415.5 million of outstanding student loan back notes which are payable through 2043. Total net loss before interest expense was \$2.681 million.

The bonds issued under the Office Facility Bond fund are limited obligations of the board secured solely by a pledge of the proceeds from the sale of the bonds and the monies and revenues in the fund and accounts held by the Trustee under the indenture. No other money, revenue or income of the Board is pledged to the repayment of the Office Facility Bonds. The bonds were issued to refund the series 2002 and Series 2004 Bonds. The Board has pledged these assets and net revenues to repay \$5.405 million of outstanding Office Facility Bonds which are payable through 2024. Principal and interest paid for the current fiscal year and total net revenues before interest expense were \$807 thousand and \$469 thousand, respectively.

The State's Water Loan Programs have issued recapitalization revenue bonds to provide additional capital for the State's revolving water resources loan programs. The bonds are secured by and repayments are made from the pledged principal and interest payments (pledged revenues) of specific revolving water resources loan funds. These pledged revenues will not be available for other purposes until the end of fiscal year 2023 when the bonds are completely paid off. Pledged revenues were projected to produce 150 percent of debt service requirements over the life of the bonds. The total principal and interest remaining to be paid on the bonds is \$54.888 million. For the current year, principal and interest paid and total repayments from pledged revenues were \$6.927 million and \$13.574 million, respectively. Of the bonds payable outstanding at June 30, 2015, \$47.242 million are reported in the Water Loan Program Fund (major enterprise fund). These portions are reported as liabilities of the business-type activities on the government-wide Statement of Net Position.

#### **Discrete Component Units**

The University of Utah, Utah State University and non-major discrete component units issued revenue bonds for various capital purposes including student housing, special events centers, student union centers, and hospital and research facilities. The bonds are secured by pledged student building fees and other income of certain college activities.

Information on pledged revenues for discrete component units for the fiscal year ended June 30, 2015 is presented below.

(Table on next page.)

#### D. Conduit Debt Obligations

In 1985, the State Board of Regents authorized the University of Utah (major discrete component unit) to issue Variable Rate Demand Industrial Development Bonds for the Salt Lake City Marriott University Park Hotel, separate from the University. The bonds are payable solely from revenues of the hotel. The bonds do not constitute a debt or pledge of the faith and credit of the University of Utah or the State and, accordingly, have not been reported in the accompanying financial statements. The outstanding balance of the bonds at June 30, 2015 is \$965 thousand.

The Utah Charter School Finance Authority (non-major discrete component unit) issued conduit debt obligations on behalf of various charter schools. The debt is the responsibility of the charter schools, and neither the State nor any political subdivision of the State is obligated in any manner for repayment of the debt. Accordingly, this debt has not been reported in the accompanying financial statements. The outstanding balance at June 30, 2015 is \$239.414 million in tax-exempt and \$340 thousand in taxable conduit debt.

#### E. Defeased Bonds and Bond Refunding

The State issued on April 29, 2015, \$220.98 million General Obligation Refunding Bonds Series 2015 to advance refund \$25.265 million, and \$199.28 million of Series 2009 A, and 2011 A General Obligation Bonds, respectively. The principal amount of the refunding bonds, \$47.527 million of original issue premium, and \$3.43 million provided from monies in the State's Series 2009 A and 2011 A sinking funds were paid to an escrow agent to be placed in an irrevocable trust account to provide for the debt service payments on the refunded bonds. Accordingly, the trust account assets and the liability for the defeased bonds are not included in the Statement of Net Position.

The advance refunding transaction resulted in a difference between the reacquisition price and the net carrying amount of the old debt of \$22.783 million. This difference, reported in the Statement of Net Position as a deferred outflow of resources, is being charged to operations through fiscal year 2027, using the bonds outstanding method, which approximates the effective interest method. The refunding reduced the State's aggregate debt service payments by \$11.712 million over 11 years and resulted in an economic gain (difference between the present values of the old and new debt service payments) of \$6.891 million.

On April 29, 2015, the Utah State Building Ownership Authority issued \$30.015 million of Lease Revenue Refunding Bonds Series 2015 to advance refund \$900 thousand, \$3.085 million, \$10.255 million, and \$16.825 million of Series 2003, 2006 A, 2007 A, and 2009 A Lease Revenue Bonds, respectively. The principal amount of the refunding bonds, \$5.273 million of original issue premium, and \$600 thousand provided from monies in the State's Series 2003, 2006 A, 2007 A, and 2009 A sinking funds were paid to an escrow agent to be placed in an irrevocable trust account to provide for the debt service payments on the refunded bonds. Accordingly, the trust account assets and the liability for the defeased bonds are not included in the Statement of Net Position.

The advance refunding transaction resulted in a difference between the reacquisition price and the net carrying amount of the old debt of \$4.195 million. This difference, reported in the Statement of Net Position as a deferred outflow of resources, is being charged to operations through fiscal year 2030, using the bonds outstanding method, which approximates the effective interest method. The refunding reduced the State's aggregate debt service payments by \$2.479 million over 15 years and resulted in an economic gain (difference between the present values of the old and new debt service payments) of \$2.053 million.

In prior years, the State defeased certain general obligation and revenue bonds by placing the proceeds of new bonds and other monies available for debt service in irrevocable trusts to provide for all future debt service payments on the old bonds. Accordingly, the trust account assets and the liability for the defeased bonds are not included in the Statement of Net Position. At June 30, 2015, the total amount outstanding of defeased general obligation bonds was \$374.195 million. At June 30, 2015, the total amount outstanding of defeased revenue bonds was \$34.725 million.

During fiscal year 2015, the University of Utah (major discrete component unit) issued three bond issues and also issued new Certificates of Participation to either fully or partially refund \$110.5 million of various bond issues. In July, the University issued \$76.2 million of General Revenue and Refunding Bonds Series 2014 B. Proceeds from these bonds are to be used to construct the Lassonde Living Learning Center, partially replace utility distribution infrastructure and to refund a portion of the Hospital Revenue and Refunding Bonds Series 2006 A. In January, the University issued General Revenue and Refunding Bonds Series 2015 A in the amount of \$45.33 million. Proceeds from these bonds are to be used towards the construction of the Mid-Valley Health Center and to retire a portion of the Taxable Commercial Paper General Revenue Refunding Notes Series 2013 B. In May, the University issued \$91.57 million General Revenue and Refunding Bonds Series 2015 B. Proceeds from the issue are to be used towards the construction of utility infrastructure and health sciences parking projects and to refund portions of the Taxable Commercial Paper General Revenue Refunding Notes Series 2013B, of the Auxiliary and Campus Facilities System Series 2010A Bonds, and of the Hospital Revenue and Refunding Bonds Series 2010 and 2011B bonds. Additionally, in June the University issued Refunding Certificates of Participation Series 2015 in the amount of \$10.05 million, proceeds of which are to be used towards refunding a portion of the 2007 Certificates of Participation. The refunding activity had limited impact on the retirement period but did result in an increase of aggregate debt service payments of \$6.1 million and a present value economic loss of approximately \$7.3 million.

In prior years, discrete component units defeased certain revenue bonds by placing the proceeds of new bonds and various bond reserves in irrevocable trusts to provide for all future debt service payments on the old bonds. Accordingly, the trust account assets and the liability for the defeased bonds are not included in the discrete component unit column on the Statement of Net Position. At June 30, 2015, \$243.215 million of college and university bonds outstanding are considered defeased.

#### F. Contracts Payable

Discrete component units capital leases/contracts payable include \$5.855 million in life annuity contracts.

#### G. Pollution Remediation Obligation

Under the federal Superfund law, the State is responsible for sharing remediation costs at sites where the Environmental Protection Agency expends Superfund trust monies for cleanup. Currently there are seven sites in various stages of cleanup, from initial assessment to cleanup activities. The pollution remediation liabilities associated with these sites were measured using the actual contract cost, where no changes in cost are expected, or the expected cash flow technique. Liability estimates are subject to change due to price increases or reductions, technology, or changes in applicable laws or regulations governing the remediation efforts. As of June 30, 2015, the liability is \$5.086 million. The State does not anticipate recovering reimbursements from the parties who caused the pollution.

#### H. Notes Payable

The Student Assistance Programs has a line of credit under the Warehouse Loan, Security and Servicing Agreement. The line of credit is a limited obligation of the Board secured by and payable solely from the pledged collateral. The line of credit was issued to acquire federally guaranteed student loans. The fund consists of student loans acquired under the agreement, all proceeds of the line of credit and net revenues in the funds and accounts, and any other property pledged to the fund. The Board has pledged these assets and net revenues to repay \$1.152 billion of outstanding principal which is payable through 2017. \$262.573 million in principal and \$9.405 million in interest will be paid in fiscal year 2016 and \$889.634 million in principal and \$4.6 million in interest will be paid in fiscal year 2017. Principal and interest paid for the current year and total net revenue before interest expense was \$511.128 million and \$1.968 million, respectively.

The notes payable balance consists of notes issued by discrete component units for the purchase of buildings, equipment and to provide a source of capital for the purchase of single family mortgage loans. The notes bear various interest rates and will be repaid over the next 17 years. They are secured by the related assets.

Payment information on notes payable is presented below:

#### Notes Payable Debt Service Requirements to Maturity Discrete Component Units For Fiscal Years Ending June 30

(Expressed in Thousands)

	Principal											
Fiscal Year	of State		Utah Nonmajor State Component University Units		Total Principal Required		Interest Required		Total Amount Required

#### I. Debt Service Requirements for Derivatives

#### **Business-type Activities**

As explained in Note 3.D., the Student Assistance Program (major proprietary fund) Board had issued on December 30, 2010, the Series 2010 EE bonds for the purpose of refinancing

certain outstanding bonds in the 1993 indentures. As part of this issuance, the Board entered into an interest rate exchange (swap) agreement relating to the Board's student loan revenue bonds. The projected net cash flows of the swap agreement are summarized below. The principal, interest, and net swap interest are included in the debt service schedule presented on page 107 for the Student Assistance Program.

#### Student Assistance Program Swap Payments and Associated Debt For Fiscal Years Ending June 30 (Expressed in Thousands)

Fiscal	Count	terparty Swap Pa	Interest Payments to	Total Payments	
Year	То	To From			
2016	\$ (6,942)	\$ 17,156	\$ 10,214	\$ (17,156)	\$ (6,942)
2017	(5,142)	13,061	7,919	(13,061)	(5,142)
2018	(4,351)	11,224	6,873	(11,224)	(4,351)

(Notes continue on next page.)

#### NOTE 11. DEFERRED OUTFLOWS AND INFLOWS OF RESOURCES

Deferred Outflows and Inflows of Resources reported on the Statement of Net Position as of June 30, 2015 consisted of the following:

#### **Deferred Outflows and Inflows of Resources**

(Expressed in Thousands)

	Primary G	overnment				
	Governmental Business-type Activities Activities					
Deferred Outflows:						
Deferred Amount on Refundings of Bonded Debt	\$ 34,696	\$ 4,962	\$ 10,685			
Deferred Amount of Federal Default Fee	_	910	_			
Deferred Outflows Relating to Pensions	120,846	2,055	41,471			
Total Deferred Outflows	\$ 155,542	\$ 7,927	\$ 52,156			
Deferred Inflows:						
Unavailable Revenue	\$ 9,354	\$ —	\$ —			
Deferred Amount on Refundings of Bonded Debt	_	10,832	264			
Fair Value of Interest Rate Swap Agreements	_	18,068	_			
Deferred Inflows Relating to Pensions	77,613	1,175	24,493			
Total Deferred Inflows	\$ 86,967	\$ 30,075	\$ 24,757			

Of the \$155.542 million deferred outflows of resources, reported in the governmental activities column, \$120.846 million represent deferred outflows relating to pensions, of which \$8.046 million are reported in the Internal Service Funds. The remaining \$34.696 million represent deferred amount on refundings of bonded debt, of which \$14 thousand are reported in the Internal Service Funds.

Of the \$86.967 million deferred inflows of resources, reported in the governmental activities column, \$77.613 million represent deferred inflows relating to pensions, of which \$4.995 million are reported in the Internal Service Funds. The remaining \$9.354

million in unavailable revenue represent imposed fees received before the period when those resources are permitted to be used.

Deferred outflows and inflows of resources for governmental funds, proprietary funds, and discrete component units are reported in detail in their respective fund statements.

Under the modified accrual basis of accounting, governmental funds reported \$634.702 million in unavailable revenue consisting of \$441.192 million from various taxes and \$193.510 million from other sources.

## NOTE 12. GOVERNMENTAL FUND BALANCES, BUDGET STABILIZATION ACCOUNTS, AND NET POSITION RESTRICTED BY ENABLING LEGISLATION

## A. Governmental Fund Balances – Restricted, Committed and Assigned

The State's fund balances represent: (1) Restricted Purposes, which include balances that are legally restricted for specific purposes due to constraints that are imposed by law through constitutional provisions or are externally imposed by creditors, grantors, contributors, or laws or regulations of other

governments; (2) Committed Purposes, which include balances that can only be used for specific purposes pursuant to constraints imposed by formal action of the Legislature; (3) Assigned Purposes, which includes balances that are constrained by the government's intent to be used for specific purposes, but are neither restricted nor committed. A summary of the nature and purpose of these reserves by fund type at June 30, 2015 follows:

(Summary on next page.)

#### **Governmental Fund Balances**

(Expressed in Thousands)

 $<sup>\</sup>hbox{* Resources restricted through constitutional provisions.}$ 

#### B. Budget Stabilization Accounts

In accordance with Sections 63J-1-312 and 313 of the Utah Code, the State maintains the General Fund Budget Reserve Account in the General Fund (the "Rainy Day Fund") and an Education Fund Budget Reserve Account in the Education Fund (the "Education Reserve"). These stabilization balances can only be used to cover budget shortfalls when appropriated by the Legislature. State law requires 25 percent of any revenue surplus in the General Fund to be deposited in the Rainy Day Fund after any required Medicaid growth savings transfer is made (see Medicaid Budget Sustainability Account discussion below) and 25 percent of any revenue surplus in the Education Fund to be deposited in the Education Reserve, in each case up to a statutory limit. State law limits the totals of the Rainy Day Fund and Education Reserve to 9 percent and 11 percent of appropriations from the General Fund and Education Fund, respectively, for the fiscal year in which the surplus occurred.

Historically, resources from the Rainy Day Fund or Education Reserve have only been expended during recessionary periods to cover overall budget shortfalls after other budgetary measures have been exhausted. Section 63J–1–217 of the *Utah Code* requires the State to maintain a balanced budget. If a revenue shortfall is expected, the Governor is required to direct state agencies to reduce commitments and expenditures by an amount proportionate to any revenue shortfall until the Legislature takes action to rectify the deficit. The Rainy Day Fund and the Education Reserve ended the year with balances of \$141.171 million and \$349.465 million, respectively. For the fiscal year ended June 30, 2015, there was no transfer into the Rainy Day Fund because there was no revenue surplus, as defined by law. There was \$59 million transferred into the Education Reserve as a result of a revenue surplus.

In accordance with Section 63J–1–315 of the *Utah Code*, the State maintains the Medicaid Growth Reduction and Budget Stabilization Restricted Account ("Medicaid Budget Stabilization Account"). The Legislature may appropriate money from the account only if Medicaid program expenditures are estimated to be 108 percent or more of Medicaid program expenditures for the previous year. The account is funded in a fiscal year when there are savings in the Medicaid Program and a General Fund revenue surplus. For the fiscal year ended June 30, 2015, although there was savings in the Medicaid Program, there was no transfer to the Medicaid Budget Stabilization Account because there was no revenue surplus.

#### C. Net Position Restricted by Enabling Legislation

The State's net position restricted by enabling legislation represent resources which a party external to a government—such as citizens, public interest groups, or the judiciary—can compel the government to use only for the purpose specified by the legislation. The government-wide Statement of Net Position reports \$5.871 billion of restricted net position, of which \$17.6 million is restricted by enabling legislation.

## NOTE 13. DEFICIT NET POSITION AND FUND BALANCE

Funds reporting a deficit total net position at June 30, 2015 are (in thousands):

\$ (30,077)
\$ (2,622)
\$ (32,815)
\$ (2,761)
\$

The deficit in the Employers' Reinsurance Trust represents the unfunded portion of the actuarial estimate of claims incurred. The Employers' Reinsurance Trust claims are funded from assessments on all workers' compensation insurance issued to employers within the State. The Utah Labor Commission sets the rate up to the maximum established by the Legislature to keep current revenues at a level sufficient to cover current cash disbursements. State law limits the State's liability to the cash or assets in the Employers' Reinsurance Trust only. State law also limits the Trust's liability to claims resulting from industrial accidents or occupational diseases occurring on or before June 30, 1994. For claims resulting from accidents or diseases on or after July 1, 1994, the employer or its insurance carrier is liable for resulting liabilities. Unfunded future claims are payable solely from future trust revenues.

The Petroleum Storage Tank Trust covers the cleanup costs of leaks from state-approved underground petroleum storage tanks. The assets in the fund are more than adequate to pay current claims. Unfunded future claims will be funded solely by future trust revenues.

The deficit net positions in the Technology Services Fund and in the Human Resource Management Fund are the result of implementing GASB Statement 68, *Accounting and Financial Reporting for Pensions*. This Statement requires the recognition and reporting of the net pension liability and related transactions, including a restatement of beginning net position, resulting in a deficit net position. The Technology Services Fund also reported a \$43.859 million deficit in the unrestricted portion of their net position at June 30, 2015, primarily as a result of implementing this Statement. See Note 2 for additional information.

Other than noted above, funds reporting a deficit position in the unrestricted portion of their net position at June 30, 2015 are (in thousands):

Internal Service Funds: Fleet Operations	Ф	(22 292)
*		. , ,
General Services	ф	(550)
Enterprise Funds:		
Alcoholic Beverage Control	\$	(3,403)
Utah Correctional Industries	\$	(323)

The Internal Service Fund deficit in Fleet Operations is mainly due to the significant investment in capital assets required for these operations. The deficit will be covered by future charges for services. Management may also seek rate increases to help reduce this deficit.

The Internal Service Fund deficit in General Services and the Enterprise Fund deficits in Alcoholic Beverage Control and Utah Correctional Industries are the result of implementing GASB Statement 68.

#### NOTE 14. INTERFUND TRANSFERS

Transfers between funds occur when one fund collects revenue and transfers the assets to another fund for expenditure or when one fund provides working capital to another fund. All transfers must be legally authorized by the Legislature through statute or an *Appropriation Act*. Interfund transfers for the fiscal year ended June 30, 2015 are as follows (in thousands):

#### Transferred To

	Governmental Funds												
Transferred From		General Education T			Fund		Transportation Investment Fund		Trust Lands		Nonmajor Governmental Funds

Internal Service Funds		1,900		_		_		_		_		_	
Total	\$	798,333	\$	9,348	\$	63,946	\$	85,313	\$	504	\$	702,172	

Continues Below

#### **Transferred To**

		Enterpri	ıds				
Transferred From	Ente	major rprise Funds	S	ternal ervice 'unds	Total		
General Fund	\$	2,255	\$	1,272	\$	238,880	
Education Fund		_		_		740,131	
Transportation Fund				_		153,012	
Transportation Investment Fund		_		_		333,711	
Nonmajor Governmental Funds		_		_		84,226	
Unemployment Compensation		_		_		4,612	
Water Loan Programs		_		_		5,316	
Community Impact Loan Fund		_		_		4,682	
Nonmajor Enterprise Funds		_		_		96,673	
Internal Service Funds						1,900	
Total	\$	2,255	\$	1,272	\$	1,663,143	

Transfers from major governmental funds to nonmajor governmental funds are primarily for debt service expenditures and capital facility construction. Transfers from nonmajor enterprise funds to the General Fund are mostly liquor profits from the Alcoholic Beverage Control Fund that are required by statute to be deposited in the General Fund. All other transfers are made to finance various programs as authorized by the Legislature.

During fiscal year 2015, the Legislature authorized transfers of \$1.9 million from the Internal Service Funds to the General Fund to subsidize general fund revenues. In addition, the Legislature authorized payments of \$894.376 million to discrete component units. Payments to discrete component units are reported as expenditures in both the General Fund governmental fund statements and the Governmental Activities column of the Statement of Activities. They are also reported as revenues in the Component Units column of the Statement of Activities.

## NOTE 15. LITIGATION, CONTINGENCIES, AND COMMITMENTS

#### A. Litigation

The State is involved in various legal actions arising in the ordinary course of business. The State is vigorously contesting all of these matters, but as of this date it is not possible to determine the outcome of these proceedings. In the opinion of the Attorney General and management, the ultimate disposition of these matters will not have a material adverse effect on the State's financial position.

 A lawsuit was filed by the Tobacco Companies against the settling states participating in a master settlement agreement in an effort to recoup tobacco settlement payments made in prior years. The plaintiffs allege that they are entitled to a non-participating manufacturer adjustment that will allow them to take a credit against these payment obligations. The dispute is currently subject to arbitration. It is impossible to determine the potential liability; however, any settlement will be a reduction in future state tobacco receipts.

 In addition to the items above, the State is contesting other legal actions totaling over \$35.163 million plus attorneys' fees and interest and other cases where the amount of potential loss is undeterminable. Some portions of the amounts sought have been paid by the State or placed in escrow.

#### B. Contingencies

- The State receives a significant amount of funding from the federal government. Funds flowing from the federal government to the State are subject to changes to federal laws and appropriations. Based on the reported financial position of the federal government it is reasonably possible that events will occur in the near term that will significantly affect the flow of federal funds to the State. The State is taking action to identify and address the impact a significant reduction of federal funds will have on the programs and operations of the State including requiring contingency plans from state agencies.
- Financial and compliance audits (Single Audit) of federal grants, contracts, and agreements were conducted under the provisions of the Federal Office of Management and Budget's circulars. As a result of the audits, identified questioned costs are immaterial. In addition, program compliance audits by the federal government are conducted periodically; however, an estimate of any potential disallowances on these audits and findings on other audits on noncompliance cannot be estimated as to the potential liability. The Single Audit for the fiscal year ended June 30, 2015, will be available in December 2015.
- Management's estimated liability for the Petroleum Storage Tank Trust (private purpose trust fund) is highly sensitive to change based on the short period of historical data and the uncertainty in estimating costs. Since it is not possible to determine the occurrence date of a leak in an underground storage tank, it is not possible to estimate the number or the associated costs of leaks that have not been detected.
- The Utah Fund of Funds (UFOF legally separate entity) was created by the passage of the Utah Venture Capital Enhancement Act in fiscal year 2003 to mobilize private investments and enhance the venture capital culture and infrastructure within the State. The State's involvement in this program is limited to public oversight of the UFOF primarily in the form of approving the issuance of contingent tax credit certificates, ensuring that the UFOF is achieving its statutory purposes of spurring economic development, and protecting against the redemption of contingent tax credits. The aggregate outstanding tax certificates available to the program cannot exceed: (1) \$130 million of contingent tax credits used as collateral or a guarantee on loans for the debt-based financing of investments initiated before July 1, 2014; or (2) \$120 million of contingent tax credits for a loan refinanced using debt-or equity-based financing; and (3) \$100 million used as an incentive for equity investments in the UFOF. The tax certificates are structured so that not more than \$20 million of contingent tax credits for each \$100 million increment of contingent tax liability may be redeemable in any fiscal year. At December 31, 2014,

\$100.636 million in loans were outstanding and invested in venture capital and private equity funds. The loans will mature in 2017. Under certain circumstances, the holder of a certificate is entitled to a refundable tax credit against tax liabilities imposed by *Utah Code Annotated*, Section 59–7, "Corporate Franchise and Income taxes," or Section 59–10, "Individual Income Tax Act." To date, the State has not had to place any contingent tax credits into the program and does not anticipate the use of tax credits anytime in the near future.

- The State is self-insured for liability claims up to \$1 million and beyond the excess insurance policy limit of \$10 million. The State is self-insured for individual property and casualty claims up to \$1 million and up to \$3.5 million in aggregate claims and beyond the excess insurance policy limit of \$1 billion per occurrence. According to an actuarial study and other known factors, \$46.931 million exists as either incurred but unfiled or unpaid claims. This amount is reported as a liability of the Department of Administrative Services' Risk Management Fund (internal service fund).
- The Utah School Bond Guaranty Act (*Utah Code Annotated, 1953*, as amended, Sections 53A–28–101 to 402), which took effect on January 1, 1997, pledges the full faith, credit, and unlimited taxing power of the State to guaranty full and timely payment of the principal and interest on general obligation bonds issued by qualifying local school boards. The primary purpose of the Guaranty Act is to reduce borrowing costs for local school boards by providing credit enhancement for Guaranteed Bonds. The local school boards do not meet the criteria for inclusion as part of the State's reporting entity.

In the event a school board is unable to make the scheduled debt service payments on its Guaranteed Bonds, the State is required to make such payments in a timely manner. For this purpose, the State may use any available monies, may use short-term borrowing from the State Permanent School Fund (part of the permanent Trust Lands Fund), or may issue short-term general obligation notes. The local school board remains liable to the State for any such payments on Guaranteed Bonds. Reimbursements to the State may be obtained by intercepting payment of state funds intended for the local school board. The State may also compel the local school board to levy a tax sufficient to reimburse the State for any guaranty payments.

The State Superintendent of Public Instruction is charged with monitoring the financial condition of local school boards and reporting, at least annually, its conclusions to the Governor, the Legislature, and the State Treasurer. The State Superintendent must report immediately any circumstances which suggest a local school board may not be able to pay its debt service obligations when due. The State has not advanced any monies for the payment of debt service on Guaranteed Bonds and does not expect that it will be required to advance monies for any significant period of time.

Local school boards have \$2.843 billion principal amount of Guaranteed Bonds outstanding at June 30, 2015 with the last maturity date being 2035. The State cannot predict the amount of bonds that may be guaranteed in future years, but no limitation is currently imposed by the Guaranty Act.

The Charter School Credit Enhancement Program (Program) (Utah Code Annotated, Sections 53A-20b-201 to 204), effective July 1, 2012, was established to reduce borrowing costs for qualifying charter schools by providing credit enhancement on bonds issued on behalf of those schools. Bonds issued under this Program are not legal obligations of the State, and neither the State nor any political subdivision of the State is obligated in any manner for repayment of the bonds. If a charter school with bonds issued under the Program draws on its debt service reserve fund, state law requires the Governor to request an appropriation from the Legislature to restore the school's debt service reserve fund to its required level or to meet any principal or interest payment deficiency. However, the Legislature is not required to make any such appropriations. A charter school is required to repay the State any appropriations it receives to restore its debt service reserves at the time and in the manner required by the Utah Charter School Finance Authority (Authority) (nonmajor discrete component unit).

When bonds are issued under the Program, the qualifying school pays up-front and ongoing fees at rates determined by the Authority. These fees are deposited into a restricted reserve account that was funded initially in 2012 with a \$3 million appropriation. These monies may be appropriated by the Legislature to replenish any deficiency in the debt service reserve fund of a charter school under the Program.

The Authority is the conduit issuer of Credit Enhancement Program bonds, and is responsible for developing criteria by which a charter school qualifies to participate in the Program. The Authority is also charged with monitoring the financial condition of qualifying charter schools and certifying, at least annually, the amount required to restore amounts on deposit in the debt service reserve funds of charter schools participating in the Program. The total amount of charter school debt enhanced by the Program is limited by formula. As of June 30, 2015, \$113.83 million of debt was outstanding under the Program.

- At June 30, 2015, the Utah Higher Education Assistance Authority Student Loan Guarantee Program (Student Assistance Programs, major enterprise fund) had guaranteed student loans outstanding with a current principal and interest balance of \$1.119 billion.
- The Attorney General of the State sued the tobacco industry for medical costs related to smoking. The State of Utah has signed on to a master settlement agreement along with 45 other states. The major tobacco manufacturers and most of the smaller manufacturers have joined the agreement. The State received \$35.412 million from tobacco companies in fiscal year 2015 and expects to receive approximately \$39.532 million in fiscal year 2016. Annual payments will be adjusted for factors such as inflation, decreased sales volume, previously settled law suits, disputed payments, and legal fees.
- The Utah School Readiness Initiative (*Utah Code Annotated*, Sections 53A-1b-101 to 111), effective May 13, 2014, created the School Readiness Board (Board) and enabled the Board to provide grants and enter into contracts with private entities in order to improve early childhood education for atrisk students. Under the terms of the contract, private investors will fund the program using a social impact bond.

This bond will offer the issuers a return on investment only if students in the program meet specific education benchmarks. The program is capped at 750 students for the first two years, but will grow in subsequent years. In fiscal year 2015, the State of Utah committed \$1.5 million that will cover student evaluations and any repayment of the social impact bond. It is anticipated the State of Utah will commit additional funds as the program grows.

#### C. Commitments

- At June 30, 2015, the Industrial Assistance Program of the General Fund had grant commitments of \$6.060 million, contingent on participating companies meeting certain performance criteria.
- At June 30, 2015, the Economic Development Tax Increment Financing Incentive program (EDTIF) had outstanding long-term contract commitments for General Fund cash rebates of \$89.301 million and Education Fund tax credits of \$559.83 million. These cash rebates and tax credits are contingent on participating companies meeting certain economic development performance criteria.
- At June 30, 2015, the Motion Picture Incentive Program had outstanding contract commitments for General Fund cash rebates of \$120 thousand and Education Fund tax credits of \$17.018 million. These cash rebates and credits are contingent upon participating motion picture companies meeting certain within-the-state production criteria.
- At June 30, 2015, the Utah Department of Transportation had construction and other contract commitments of \$509.532 million, of which \$281.071 million is for Transportation Fund (major special revenue fund) and \$228.461 million is for projects within the Transportation Investment Fund (major capital projects fund) highway projects. These commitments will be funded with future appropriations in the Transportation Fund and through proceeds of general obligation bonds and future appropriations in the Transportation Investment Fund.
- At June 30, 2015, the permanent Trust Lands Fund (permanent fund) had real estate commitments of \$152.796 million, of which \$112.784 million have been called, leaving a remaining commitment of \$40.012 million.
- At June 30, 2015, the State's capital projects funds (non-major capital projects funds) had construction commitments of \$387.878 million. These commitments will be funded with legislative appropriations, intergovernmental revenues, and proceeds of general obligation and lease revenue bonds.
- At June 30, 2015, the enterprise funds had loan commitments of approximately \$237.238 million and grant commitments of approximately \$63.940 million.
- Utah Retirement Systems (pension trust and defined contribution plans) has at its yearend December 31, 2014, committed to fund certain private equity partnerships, absolute return, and real estate projects for an amount of \$7.608 billion. Funding of \$4.438 billion has been provided by December 31, 2014, leaving an unfunded commitment of \$3.17 billion.

- Under the terms of various limited partnership agreements approved by the Board of Trustees or by the University of Utah (major discrete component unit) officers, the University is obligated to make periodic payments for advance commitments to venture capital and private equity investments. As of June 30, 2015, the University had committed, but not paid, a total of \$49.7 million in funding for these alternative investments.
- Under the terms of various limited partnership agreements approved by the Board of Trustees or by the Utah State University (major discrete component unit) officers, the University is obligated to make periodic payments for advance commitments to venture capital, natural resource, and private equity investments. As of June 30, 2015, the University had committed, but not paid, a total of \$7.89 million in funding for these alternative investments.
- At June 30, 2015, Utah State University (major discrete component unit) had outstanding commitments for the construction and remodeling of its buildings of appropriately \$30 million.

#### NOTE 16. JOINT VENTURES

#### **Utah Education Network**

The Utah Education Network (UEN) is a publicly funded consortium administered by the University of Utah supporting educational technology needs for Utah's public and higher education institutions, public libraries, and state agencies. UEN provides internet access for all Utah public middle schools, high schools, and higher education institutions. UEN also operates a fully interactive distance learning network interconnecting public schools and higher education institutions statewide. State appropriation support of UEN amounted to \$22.518 million for the year ended June 30, 2015. UEN is not separately audited, but is included in the audited financial statements of KUEN, a public broadcasting television station operated by the University. Copies of those statements can be obtained from KUEN's administrative offices.

#### NOTE 17. PENSION PLANS

#### A. Utah Retirement Systems

Utah Retirement Systems (URS) (pension trust and defined contribution plans) was established by Title 49 of *Utah Code Annotated*, 1953, as amended. URS administers the pension systems and plans under the direction of the URS Board, which consists of the State Treasurer and six members appointed by the Governor. URS has a separate accounting system and prepares a separately issued financial report covering all retirement systems and deferred compensation plans it administers. URS maintains records and prepares financial statements using fund accounting

principles and the accrual basis of accounting under which benefits and expenses are recognized when due and payable and revenues are recorded in the accounting period in which they are earned and become measurable. URS reports on a calendar yearend. The December 31, 2014 financial report has been included in this Comprehensive Annual Financial Report as a pension trust fund for URS within the fiduciary funds. Copies of the separately issued financial report that include financial statements and required supplemental information may be obtained by writing to Utah Retirement Systems, 560 East 200 South, Salt Lake City, Utah 84102, or visiting the website online at www.urs.org.

The URS operations are comprised of the following groups of systems/plan covering substantially all employees of the State, public education, and other political subdivisions of the State:

- The Public Employees Noncontributory Retirement System (Noncontributory System); the Public Employees Contributory Retirement System (Contributory System); and the Firefighters Retirement System (Firefighters System), which are defined-benefit multiple-employer, cost-sharing, public employee retirement systems;
- The Public Safety Retirement System (Public Safety System), which is a defined-benefit mixed agent and costsharing, multiple-employer retirement system;
- The Judges Retirement System (Judges System) and the Utah Governors and Legislators Retirement Plan, which are single-employer service retirement systems;
- The Tier 2 Public Employees Contributory Retirement System (Tier 2 Public Employees System); and the Tier 2 Public Safety and Firefighters Contributory System (Tier 2 Public Safety and Firefighters System), which are definedbenefit multiple-employer, cost-sharing, public employee retirement systems;
- Five defined contribution plans comprised of the 401(k) Plan, 457(b) Plan, Roth and Traditional IRAs, and Health Reimbursement Arrangement.

The Tier 2 Public Employees System became effective July 1, 2011. All eligible employees beginning on or after July 1, 2011, who have no previous service credit with any of the Utah Retirement Systems, are members of the Tier 2 Retirement System. Retirement benefits are specified by Title 49 of *Utah Code Annotated*, 1953, as amended. The retirement systems are defined-benefit plans wherein the benefits are based on age and/or years of service and highest average salary. Various plan options within the systems may be selected by retiring members. Some of the options require actuarial reductions based on attained age, age of spouse, and similar actuarial factors. A brief summary of eligibility for and benefits of the systems is provided in the following table:

(Table on next page.)

#### Summary of Eligibility and Benefits by System

	Noncontributory System	Contributory System	Public Safety System	Firefighters System	Judges System	Tier 2 Public Employees System	Tier 2 Public Safety and Firefighters System
Final Average Salary	Highest 3 Years	Highest 5 Years	Highest 3 Years		Highest 2 Years	Highest 5 Years	Highest 5 Years
Years of Service Required and/or Age Eligible for Benefit	30 years any age 25 years any age* 20 years age 60* 10 years age 62* 4 years age 65	30 years any age 20 years age 60* 10 years age 62* 4 years age 65	10 year	any age s age 60 age 65	25 years any age 20 years age 55* 10 years age 62 6 years age 70	35 years any age 20 years age 60* 10 years age 62* 4 years age 65	25 years any age 20 years age 60* 10 years age 62* 4 years age 65
Benefit Percent per Year of Service**	2.00 % per year all years	1.25 % per year to June 1975 2.00 % per year July 1975 to present		r up to 20 years r over 20 years	5.00 % first 10 years 2.25 % second 10 yea 1.00 % over 20 years	rs all years	1.50 % per year all years
COLA***	Up to 4.00 %	Up to 4.00 %	dependi	4.00 % ng on the loyer	Up to 4.00 % compounded	Up to 2.50 %	Up to 2.50 %

Note: The Utah Governors and Legislators Retirement Plan benefits are explained below.

Former governors at age 65 receive \$1,320 per month per term. Legislators receive a benefit at age 65 with four or more years of service at the rate of \$28.80 per month per year of service. Retirement at age 62 with ten or more years of service will receive an actuarial reduction. Both the governors' and legislators' benefits are adjusted based on the Consumer Price Index (CPI), limited to 4 percent of the base benefit per year.

Death benefits for active and retired employees are in accordance with retirement statutes. Upon termination of employment,

members of the Systems may leave their retirement account intact for future benefits based on vesting qualification, or withdraw the accumulated funds in their individual member account and forfeit service credits and rights to future benefits upon which the contributions were based.

At December 31, 2014, the following number of employees were covered by the State's (primary government's) single-employer plans:

#### Single-employer Plans Covered Employees December 31, 2014

	Judges System	Governors and Legislators Retirement Plan
Inactive Employees or Beneficiaries Currently Receiving Benefits	132	236
Inactive Employees Entitled to But Not Yet Receiving Benefits	4	79
Active Employees	114	105
Total Single-employer Plans Covered Employees	250	420

<sup>\*</sup> With actuarial reductions.

<sup>\*\*</sup> For members and retirees in the systems, prior to January 1, 1990, there may be a 3 percent benefit enhancement

<sup>\*\*\*</sup> All post-retirement cost-of-living adjustments are non-compounding and are based on the original benefit except for Judges, which is a compounding benefit. The cost-of-living adjustments are also limited to the actual Consumer Price Index (CPI) increase for the year, although unused CPI increases not met may be carried forward to subsequent years.

#### **Contribution Rates**

As a condition of participation in the Defined Benefit Systems, employers and/or employees are required to contribute certain percentages of salary and wages as authorized by statute and specified by the URS Board. Contributions are actuarially determined as an amount that, when combined with employee contributions (where applicable) is expected to finance the costs of benefits earned by employees during the year, with an

additional amount to finance any unfunded actuarial accrued liability. For the Utah Governors and Legislators plan, an annual appropriation is statutorily required to maintain this plan on a financially and actuarially sound basis. The State paid 100 percent of the contractually and statutorily required contributions. Contribution rates and contributions for the fiscal year ended June 30, 2015 are presented in the following table (dollars expressed in thousands):

#### Contributions

Systems/Plan	Employee Paid	Paid by Employer for Employee	Employer Paid		Primary overnment	_	Discrete ponent Units
Noncontributory Public Employees			22.19 %	\$	139,126	\$	55,043
Contributory				_		_	
Contributory Public Employees	_	6.00 %	17.70 %	\$	2,658	\$	2,153
Tier 2 Public Employees	_	_	18.27 %	\$	18,280	\$	11,410
Public Safety							
Contributory Public Safety	4.54 %	7.75 %	29.70 %	\$	35	\$	_
Noncontributory Public Safety	_	_	41.35 %	\$	43,865	\$	909
Tier 2 Public Safety		_	29.26 %	\$	3,699	\$	59
Firefighters							
Contributory Firefighters	_	15.05 %	3.82 %	\$	169	\$	_
Tier 2 Firefighters	_	_	10.80 %	\$	12	\$	
Judges		_	40.01 %	\$	6,179	\$	
Utah Governors and Legislators		Annual Appropriati	ion	\$	411	\$	_

Note: In addition to the contributions noted above the primary government paid an additional \$3.32 million in defined contributions required by statute. Statute requires participating Tier 2 employers to pay the corresponding non Tier 2 system amortization rate (.08 to18.54 percent) of the employee's compensation and that contribution is applied to the employer's corresponding non Tier 2 system liability.

(Notes continue on next page.)

Below are the changes in net pension liability for the State's (primary government's) single-employer system and plan:

# Single-employer Plans Changes in Net Pension Liability Increases (Decreases) For the Year Ended December 31, 2014 (Expressed in Thousands)

		Judges System	Utah Governors and Legislators Retirement Plan
Total Pension Liability Service Cost	-	\$ 4,895 13,641 2,602 (130) (11,361) 9,647	\$ 106 884 307 — (909) 388
Total Pension Liability – Beginning  Total Pension Liability – Ending	A	\$ 192,285	\$ 12,267
Plan Fiduciary Net Position  Contributions – Employee  Contributions – Employer  Court Fees  Net Investment Income  Benefit Payments  Administrative Expense  Net Transfers with Affiliated Systems  Net Change in Plan Fiduciary Net Position  Plan Fiduciary Net Position – Beginning  Plan Fiduciary Net Position – Ending	В	\$ 317 5,627 1,486 * 11,068 (11,361) (71) 1,092 8,158 155,676 \$ 163,834	\$ — 411 — 717 (909) (5) (14) — 200 10,166 \$ 10,366
Net Pension Liability / (Asset) – Ending $(A - B)$		\$ 28,451	\$ 1,901
Plan Fiduciary Net Position as a Percentage of the Total Pension Liability		85.2 %	84.5 %
Covered Employee Payroll		\$ 15,264	\$ 1,045
Net Pension Liability as a Percentage of Covered Employee Payroll		186.39 %	181.91 %

<sup>\*</sup> These court fees were recognized as revenue for support provided by nonemployer contributing entities.

(Notes continue on next page.)

#### Proportionate Share of Net Pension Asset and Liability

Utah Retirement Systems (URS) (pension trust and defined contribution plans) provides retirement benefits to employees of the primary government and its discrete component units as well as to public education and other political subdivisions of the State. At December 31, 2014, the net pension asset and the net pension liability for all URS systems is \$21.22 million and

\$3.478 billion respectively. The plan's fiduciary net position as a percent of the total pension liability is 88.5 percent. At December 31, 2014, the primary government's net pension asset and net pension liability is \$1.086 million and \$821.154 million respectively. The following table summarizes the State's (primary government's) net pension asset and liability by plan.

#### Primary Government Net Pension Asset and Liability \* December 31, 2014

(Dollars Expressed in Thousands)

System	Proportionate Share	Net Pension Asset	Net Pension Liability
Noncontributory System	24.07 %	\$ —	\$ 604,765
Contributory System	34.02 %	_	3,731
Public Safety System	98.11 %	_	182,306
Firefighters System	2.59 %	148	_
Judges System	100.00 %	_	28,451
Utah Governors and Legislators Retirement Plan	100.00 %	_	1,901
Tier 2 Public Employees System	17.95 %	544	_
Tier 2 Public Safety and Firefighters System	26.64 %	394	_
Total Net Pension Asset / Liability		\$ 1,086	\$ 821,154

<sup>\*</sup> Before amounts allocated for financial statement presentation.

The State's discrete component units participating in URS are primarily the colleges and universities. At December 31, 2014, the net pension asset and the net pension liability for the colleges and universities is \$336

thousand and \$250.1 million respectively. The following table summarizes the discrete component unit's net pension asset and liability by system.

#### Discrete Component Units Net Pension Asset and Liability December 31, 2014

(Dollars Expressed in Thousands)

System	Proportionate Share	Net Pension Asset	Net Pension Liability
Noncontributory System	9.70 %	\$ —	\$ 243,728
Contributory System	25.75 %	_	2,823
Public Safety System	1.89 %	_	3,517
Tier 2 Public Employees System	10.90 %	330	_
Tier 2 Public Safety and Firefighters System	0.43 %	6	
Total Net Pension Asset / Liability		\$ 336	\$ 250,068

#### **Deferred Outflows and Inflows of Resources**

The net pension asset and liability was measured as of December 31, 2014, and the total pension liability used to calculate the net pension asset and liability was determined by an actuarial valuation as of January 1, 2014 and rolled-forward using generally accepted actuarial procedures. The proportion of the net pension asset and liability was based upon actual historical employer contributions to the plan from the census data submitted to the plan for pay periods ending in 2014.

At December 31, 2014, the State (primary government) recognized pension expense of \$152.515 million. The State's discrete component units (colleges and universities) recognized pension expense of \$50.044 million. Deferred outflows of resources and deferred inflows of resources related to the recognition of pension expense are from the following sources (expressed in thousands):

## State of Utah Deferred Outflows and Inflows of Resources \* Related to Pensions December 31, 2014

(Expressed in Thousands)

	Primary Government		<b>Discrete Component Units</b>		
Source	Deferred Outflows of Resources	Deferred Inflows of Resources	Deferred Outflows of Resources	Deferred Inflows of Resources	
Differences between Expected and Actual Experience	\$ 1,905	\$ 45,795 33,565	\$ <u> </u>	\$ 15,166 8,482	
Net Differences between Projected and Actual Earnings on Pension Plan Investments	14,167	_	4,935	_	
Changes in Proportion and Differences Between Contributions and Proportionate Share of Contributions  Contributions Subsequent to the Measurement Date	— 107,589	_	 35,115	_	
Total	\$ 123,661	\$ 79,360	\$ 40,050	\$ 23,648	

<sup>\*</sup> Before amounts allocated for financial statement presentation.

The \$107.589 million and \$35.115 million reported as deferred outflows of resources by the primary government and discrete component units (colleges and universities) are the result of contributions subsequent to the measurement date of December 31, 2014. These contributions will be recognized as a reduction of net pension liability in the upcoming fiscal year.

Other amounts reported above as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows (expressed in thousands):

#### Recognition of Remaining Deferred Outflows and (Inflows) of Resources

Year Ended December 31	Primary Government	<b>Discrete Component Units</b>
2015	\$ (17,558)	\$ (4,824)
2016	\$ (17,558)	\$ (4,824)
2017	\$ (17,788)	\$ (4,824)
2018	\$ (9,723)	\$ (3,879)
2019	\$ (113)	\$ (58)
Thereafter	\$ (548)	\$ (304)

(Notes continue on next page.)

The total pension liability in the December 31, 2014 actuarial valuation was determined using the following actuarial

assumptions, applied to all periods included in the measurement:

#### **Summary of Actuarial Assumptions**

	Non- contributory System	Contributory System	Public Safety System	Firefighters System	Judges System	Utah Governors and Legislators Retirement Plan	Tier 2 Public Employees System	Tier 2 Public Safety and Firefighters System
Valuation Date	1/1/14	1/1/14	1/1/14	1/1/14	1/1/14	1/1/14	1/1/14	1/1/14
Measurement Date	12/31/14	12/31/14	12/31/14	12/31/14	12/31/14	12/31/14	12/31/14	12/31/14
Actuarial Cost Method	Entry Age	Entry Age	Entry Age	Entry Age	Entry Age	Entry Age	Entry Age	Entry Age
Actuarial Assumptions: Investment Rate of Return	7.50 %	7.50 %	7.50 %	7.50 %	7.50 %	7.50 %	7.50 %	7.50 %
Projected Salary Increases	3.50–10.75 %	3.50-10.75 %	3.50-9.25 %	3.50-9.75 %	3.50 %	None	3.50–10.75 %	3.50-9.25 %
Inflation Rate	2.75 %	2.75 %	2.75 %	2.75 %	2.75 %	2.75 %	2.75 %	2.75 %
Post-retirement Cost-of-living Adjustment	2.75 %	2.75 %	2.50 % or 2.75 % Depending on employer	2.75 %	2.75 %	2.75 %	2.50 %	2.50 %

Note: All post-retirement cost-of-living adjustments are non-compounding and are based on the original benefit except for Judges, which is a compounding benefit. The cost-of-living adjustments are also limited to the actual CPI increase for the year, although unused CPI increases not met may be carried forward to subsequent years.

The actuarial assumptions used in the January 1, 2014 valuation were based on the results of an actuarial experience study for the five year period ending December 31, 2013.

Active member mortality rates are a function of the member's gender, occupation, and age and are developed based upon plan experience. Retiree mortality assumptions are highlighted in the table below:

#### **Retired Member Mortality**

Class of Member	Men	Women
Educators	EDUM (90%)	EDUF (100%)
Public Safety and Firefighters	RP 2000mWC (100%)	EDUF (120%)
Local Government, Public Employees	RP 2000mWC (100%)	EDUF (120%)

EDUM = Constructed mortality table based on actual experience of male educators multiplied by given percentage.

EDUF = Constructed mortality table based on actual experience of female educators multiplied by given percentage.

RP 2000mWC = RP 2000 combined mortality table for males with white collar adjustments multiplied by given percentage.

#### **Target Allocations**

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best estimates ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by

weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the Systems target asset allocation as of December 31, 2014, are summarized in the table below:

(Table continues on next page.)

## Target Allocations Expected Return Arithmetic Basis

Asset Class	Target Asset Allocation	Real Return Arithmetic Basis	Expected Portfolio Real Rate of Return *
Equity Securities	40 %	7.06 %	2.82 %
Debt Securities	20	0.80 %	0.16
Real Assets	13	5.10 %	0.66
Private Equity	9	11.30 %	1.02
Absolute Return	18	3.15 %	0.57
Cash and Cash Equivalents	0	0.00 %	0.00
Total Asset Classes	100 %		5.23 %
Inflation			2.75
Expected Arithmetic Nominal Return			7.98 %

<sup>\*</sup> The total URS Defined Benefit long-term expected rate of return is 7.5 percent. It is comprised of an inflation rate of 2.75 percent and a real return of 4.75% that is net of investment expense.

#### **Discount Rate**

The discount rate used to measure the total pension liability was 7.5 percent and does not incorporate a municipal bond rate. The projection of cash flows used to determine the discount rate assumed that employee contributions will be made at the current contribution rate and that contributions from all participating employers will be made at contractually required rates that are actuarially determined and certified by the URS Board. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore, the

long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Sensitivity of the proportionate share of the net pension asset and liability to changes in the discount rate: The following presents the proportionate share of the State's (primary government's) net pension liability calculated using the discount rate of 7.5 percent, as well as what the proportionate share of the net pension liability would be if it were calculated using a discount rate that is 1 percentage-point lower (6.5 percent) or 1 percentage-point higher (8.5 percent) than the current rate:

#### Primary Government Changes in Discount Rate Net Pension Liability / (Asset)

(Expressed in Thousands)

_	1 % ncrease (8.5 %)
\$	102,156
	(19,588)

#### **B.** Defined Contribution Plans

The 401(k), 457(b), Roth and Traditional IRA Plans, and Health Reimbursement Arrangement (HRA) administered by URS, in which the State participates, are defined contribution plans. These plans are available as supplemental plans to the basic retirement benefits of the Retirement Systems and a primary retirement plan for some Tier 2 participants. Contributions may be made into the plans subject to plan and Internal Revenue Code limitations. Employer contributions may be made into the 401(k) and 457(b) plans at rates determined by the employers and according to Utah Title 49. There are 380 employers participating in the 401(k) Plan and 161 employers participating in the 457(b) Plan. There are 155,909 plan participants in the 401(k) Plan, 16,741 participants in the 457(b) Plan, 6,075 participants in the Roth IRA Plan, 1,349 participants in the Traditional IRA Plan, and 2,383 participants in the HRA.

After termination of employment, benefits are paid out to individuals in lump sum, or as periodic benefit payments, at the option of the participant based on individual account balances and plan provisions. The Defined Contribution Plans account balances are fully vested to the participants at the time of deposit except for Tier 2 required employer contributions and associated earnings during the first four years of employment. Investments of the plans are reported at fair value.

Employees of the State are eligible to participate in the defined contribution 401(k), 457(b), 403(b), Roth and Traditional IRA Plans. Employees, who contribute to a 401(k), 457, or IRA will get a match from the State of up to \$26 per pay period. In addition, the State and participating employers are required to contribute 1.5 percent of an employee's salary into a 401(k) for those employees who participate in the noncontributory system. For the Tier 2 Public Employee System, Tier 2 Public Safety System, and the Tier 2 Firefighters System, the State and participating employers are required to contribute varying amounts into a 401(k). The amounts range from 1.28 to 1.78 percent of an employee's salary for the hybrid defined benefit systems and 10 to 12 percent of an employee's salary for the defined contribution systems. These contributions vest immediately, except for the Tier 2 401(k) required contributions that are subject to a 4-year vesting period. The amounts contributed to the 401(k) Plan during the year ended June 30, 2015, by employees and employers are as follows: for Primary Government, \$35.408 million and \$29.099 million; for Component Units - Colleges and Universities, \$4.679 million and \$7.618 million. The amounts contributed by employees to the 457(b), Roth and Traditional IRA Plans (Primary Government and Component Units - Colleges and Universities) are \$6.397 million, \$3.004 million, and \$183 thousand, respectively.

#### Teachers Insurance and Annuity Association-College Retirement Equities Fund

Teachers Insurance and Annuity Association—College Retirement Equities Fund (TIAA—CREF) and Fidelity Investments, privately administered defined-contribution retirement plans, provides individual retirement fund contracts for each eligible participating employee. Eligible employees are mainly state college/university faculty and staff. Benefits to retired employees are generally based on the value of the individual contracts and the estimated life expectancy of the employee at retirement and are fully vested from the date of employment. The total current year required contribution and the amount paid is 14.2 percent of the

employee's annual salary. The State has no further liability once annual contributions are made.

The total contribution made by the colleges and universities (discrete component units) to the TIAA–CREF retirement system for June 30, 2015 and 2014, were \$188.29 million and \$177.14 million, respectively.

#### NOTE 18. OTHER POSTEMPLOYMENT BENEFITS

#### A. Other Postemployment Benefit Plans

The State administers the State Employee Other Postemployment Benefit Plan (State Employee OPEB Plan) through the State Post-Retirement Benefits Trust Fund as set forth in Section 67–19d–201 of the *Utah Code*. A separate Elected Official Other Postemployment Benefit Plan (Elected Official OPEB Plan) is provided for governors and legislators, and this Plan is administered through the Elected Official Post-Retirement Benefits Trust Fund as set forth in Section 67–19d–201.5 of the *Utah Code*. Both trust funds are irrevocable and legally protected from creditors. Both are also administered under the direction of a board of trustees, which consists of the State Treasurer, the Director of the Division of Finance, and the Director of the Governor's Office of Management and Budget or a designee.

Neither the State Post-Retirement Benefits Trust Fund, nor the Elected Official Post-Retirement Benefits Trust Fund issues a publicly available financial report, but are included in this report of the primary government using the economic resources measurement focus and the accrual basis of accounting under which expenses, including benefits and refunds, are recorded when the liability is incurred. Employer contributions are recorded in the accounting period in which they are earned and become measurable. Investments are reported at fair value and are based on published prices and quotations from major investment brokers at current exchange rates, as available. For investments where no readily ascertainable fair value exists, management, in consultation with their investment advisors have determined the fair values for the individual investments.

The State Legislature currently plans to contribute amounts to each trust fund that, at a minimum, is sufficient to fully fund the Annual Required Contribution (ARC), an actuarially determined rate in accordance with the parameters of GASB Statement 45, Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and amortize any unfunded actuarial liabilities (or funding excess) over a period not to exceed 30 years. There are no long-term contracts for contributions to the plans.

#### B. State Employee Other Postemployment Benefit Plan

At the option of individual state agencies, employees may participate in the State Employee OPEB Plan, a single-employer defined benefit healthcare plan, as set forth in Section 67–19–14(2) of the *Utah Code*. Only state employees entitled to receive retirement benefits are eligible to receive postemployment health and life insurance benefits, and in some situations dental coverage, from the State Employee OPEB Plan. Upon retirement, an employee receives 25 percent of the value of their unused accumulated sick leave as a mandatory employer contribution

into a 401(k) account. The employee may exchange eight hours of remaining unused accumulated sick leave earned prior to January 1, 2006, for one month of paid health and life insurance coverage up to age 65. After age 65, the employee may use any remaining unused accumulated sick leave, earned prior to January 1, 2006, to exchange for spouse health insurance to age 65, or Medicare supplemental insurance for the employee or spouse. In addition, any full-time employee of the Utah State Board of Education hired before July 1, 2012, who has attained at least five consecutive years of service with the agency, has the option of receiving postemployment health, dental, and life insurance coverage for up to five years or until the employee reaches age 65 regardless of their unused sick leave balance. Also, judges have their own retiree health coverage that is part of the State Employee OPEB Plan. As of December 31, 2014, the date of the latest actuarial valuation, approximately 5,843 retirees and their beneficiaries were receiving postemployment health and life insurance benefits, and an estimated 9,150 active state employees are eligible to receive future benefits under the State Employee OPEB Plan.

The contribution requirements of employees and the State are established and may be amended by the State Legislature. For retirees that participate in the State Employee OPEB Plan, health insurance premiums are paid 100 percent by the State for individuals that retired before July 1, 2000. Individuals retiring thereafter are required to contribute specified amounts monthly, ranging from 0 percent to 31.62 percent, toward the cost of health insurance premiums. For the year ended June 30, 2015, retirees contributed \$1.403 million, or approximately 5.3 percent of total premiums, through their required contributions of \$0 to \$675.83 per month depending on the coverage (single, double, or family) and health plan selected.

The Annual Required Contribution (ARC) of \$30.342 million, from the December 31, 2012, actuarial valuation, is 6.1 percent of annual covered payroll. Although the ARC was used to establish the final annual budget for fiscal year 2015, in prior years the State Legislature contributed more than the ARC. This overfunding of the ARC contributed to a net OPEB asset of \$5.668 million. It is reported on the Statement of Net Position (governmental activities) within Other Assets.

#### C. Elected Official Other Postemployment Benefit Plan

The Elected Official Other Postemployment Benefit Plan (Elected Official OPEB Plan) is a single-employer defined benefit

healthcare plan, as set forth in Section 49–20–404 of the *Utah Code*. Only governors and legislators (elected officials) that retire after January 1, 1998 and have four or more years of service can elect to receive and apply for health coverage or Medicare supplemental coverage. The State will pay 40 percent of the benefit cost for four years of service and up to 100 percent for ten or more years of service, for elected officials, and their spouses.

To qualify for health coverage, an elected official must be between 62 and 65 years of age and either be an active member at the time of retirement or have continued coverage with the program until the date of eligibility. In addition, to qualify for health coverage an elected official must have service as a legislator or governor prior to January 1, 2012.

To qualify for Medicare supplemental coverage an elected official must be at least 65 years of age. In addition, the elected official must retire under Chapter 19, *Utah Governors' and Legislators' Retirement Act*, and have service as an elected official prior to July 1, 2013.

As of December 31, 2014, the date of the latest actuarial valuation, approximately 82 retirees and their beneficiaries were receiving health or Medicare supplemental coverage, and an estimated 206 active and former elected officials may receive future benefits for themselves and qualifying dependents under the Elected Official Other Postemployment Benefit Plan. For the year ended June 30, 2015, elected officials that participated in the Elected Official OPEB Plan contributed \$27 thousand, or approximately 7.85 percent of total premiums, through their required contributions of \$0 (for ten or more years of service) to \$739.01 per month (for four years of service) depending on the coverage (single or double) and health plan selected.

The Annual Required Contribution (ARC) of \$1.321 million, from the December 31, 2012, actuarial valuation and used to establish the annual budget for fiscal year 2015, is 92.31 percent of annual covered payroll. For the fiscal year 2015, the State Legislature decided to contribute \$1.388 million, \$67 thousand more than the ARC.

The following table shows the components of the annual OPEB cost for the year, amount actually contributed to the plan, and changes in the net OPEB obligation for both the State Employee and Elected Official OPEB plans for fiscal year 2015 (dollar amount in thousands):

	State Employee OPEB Plan	Elected Official OPEB Plan
Annual required contribution	\$ 30,342 (263) 449	\$ 1,321 195 (333)
Annual OPEB cost (expense)	30,528 (30,342)	1,183 (1,388)
Increase (decrease) in net OPEB obligation  Net OPEB obligation (asset) – Beginning of year	186 (5,854)	(205) 4,331
Net OPEB obligation (asset) – End of year	\$ (5,668)	\$ 4,126

The annual OPEB cost, the percentage of annual OPEB cost contributed to the plan, and the net OPEB obligation (asset) for fiscal year 2015 and the two preceding years for both the State Employee and Elected Official OPEB plans were as follows (dollar amount in thousands):

	Fiscal Year Ended	Annual OPEB Cost		Percentage of Annual OPEB Cost Contributed	Net OPEB Obligation (Asset)		
State Employee OPEB Plan	6/30/2013	\$	37,722	100.92 %	\$	(6,047)	
	6/30/2014	\$	30,535	99.37 %	\$	(5,854)	
	6/30/2015	\$	30,528	99.39 %	\$	(5,668)	
Elected Official OPEB Plan	6/30/2013	\$	1,797	112.97 %	\$	5,206	
	6/30/2014	\$	1,155	175.76 %	\$	4,331	
	6/30/2015	\$	1,183	117.34 %	\$	4,126	

The funded status of both the State Employee and Elected Official OPEB plans as of December 31, 2014, was as follows (dollar amount in thousands):

	State Employee OPEB Plan	Elected Official OPEB Plan		
Actuarial accrued liability	\$ 386,532 205,498	\$ 12,694 8,863		
Unfunded actuarial accrued liability (funding excess)	\$ 181,034	\$ 3,831		
Funded ratio  Covered payroll  Unfunded actuarial accrued liability (funding excess) as a	53.2 % \$ 440,029	69.8 % \$ 1,751		
percentage of covered payroll	41.14 %	218.79 %		

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of events far into the future. Examples include assumptions about future employment, mortality, and the healthcare cost trend. Actuarially determined amounts are subject to continual revisions as actual results are compared with past expectations and new estimates are made about the future. The Schedule of Funding Progress, presented as required supplementary information following the notes to the financial statements, is designed to present multi-year trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liabilities for benefits.

Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employer and the plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point. The projection of benefits for financial reporting purposes does not explicitly incorporate the potential effects of legal or contractual funding limitations on the pattern of cost sharing between the employer and plan members in the future. The actuarial methods and assumptions used include techniques that are designed to reduce the effects of short-term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with the long-term perspective of the calculations. The actuarial methods and assumptions of both the State Employee and Elected Official OPEB plans as of December 31, 2014, were as follows:

(Table continues on next page.)

	State Employee OPEB Plan	Elected Official OPEB Plan
Actuarial valuation date	12/31/2014	12/31/2014
Actuarial cost method	Entry Age	Normal
Amortization method	Level Dollar Ar	nount; Open
Remaining amortization period	10 years	20 years
Asset valuation method	Fair Value	Fair Value
Actuarial assumptions:  Investment rate of return *	4.5 %	4.5 %
Healthcare inflation rate	5.2 % ir 4.2 % ult	

<sup>\*</sup> Includes an inflation assumption of 2.5 percent.

#### NOTE 19. RISK MANAGEMENT AND INSURANCE

It is the policy of the State of Utah to periodically assess the proper combination of commercial insurance and self-insurance to cover the risk of losses to which it may be exposed. This is accomplished by the State through the Risk Management Fund (internal service fund) and the Public Employees Health Program (PEHP) (major discrete component unit). The State is a major participant in these programs. All funds, departments, component units, public schools, and public authorities of the State may also participate in these programs.

The Risk Management Fund manages the general property, auto/physical damage, and general liability risks of the State. PEHP manages the group health, dental, and life insurance and long-term disability programs of the State. The University of Utah, Utah State University, Southern Utah University, Salt Lake Community College, and Utah Valley University (major and non-major discrete component units) each maintain self-insurance funds to manage health/dental care. The University of Utah also maintains a self-insurance fund to manage medical malpractice liabilities.

The State has determined that the Risk Management Fund and PEHP can economically and effectively manage the State's risks internally and have set aside assets for claim settlements through reserves. Risks are also covered through commercial insurance for excessive losses. The State is self-insured for liability claims up to \$1 million and beyond the excess insurance policy limit of \$10 million. The State is self-insured for individual property and casualty claims up to \$1 million and up to \$3.5 million in aggregate claims and beyond the excess insurance policy limit of \$1 billion per occurrence. The Risk Management Fund had property losses that exceeded the State's self-insured aggregate claim limit of \$3.5 million for the fiscal year ended June 30, 2013. However, these losses did not exceed the State's commercial excess insurance coverage. The Risk Management Fund did not have any losses or settlements that exceeded the State's self-insured aggregate claim limit or commercial excess insurance coverage for the fiscal years ended June 30, 2014 and June 30, 2015.

PEHP has reinsurance coverage for a life catastrophic occurrence in excess of \$4 million, not to exceed \$80 million per year. PEHP also has excess medical reinsurance for medical losses that exceed \$1.25 million on a person per year to a maximum of \$2 to \$5 million during the person's lifetime, depending on the participating group's lifetime maximum.

The Risk Management Fund and PEHP allocate the cost of providing claims servicing, claims payment, and commercial insurance by charging a "premium" to each participating public entity or employee, based on each organization's estimated current year liability and property values. Public entities participating in PEHP's medical and dental programs are grouped into various risk pools for purposes of establishing rates and retaining risk of loss. The primary government and the discrete component units of the State paid premiums to PEHP of \$251.714 million and \$36.451 million, respectively, for health and life insurance coverage in fiscal year 2015.

Risk Management and PEHP claims liabilities are reported when it is probable that a loss has occurred and the amount of that loss can be reasonably estimated and includes an amount for claims that have been incurred but not reported. Because actual claims liabilities are affected by complex factors including inflation, changes in legal doctrines and insurance benefits, and unanticipated damage awards, the process used in computing claims liabilities does not necessarily result in exact amounts. Claims liabilities are recomputed periodically by actuaries to take into consideration recently settled claims, the frequency of claims, and other economic and social factors. Inflation is included in this calculation because reliance is based on historical data that reflects past inflation and other appropriate modifiers. The Risk Management general liability reserves are reported using a discount rate of 1 percent. The PEHP long-term disability benefit reserves are reported using discount rates between 2 and 6.25 percent.

All employers who participate in the Utah Retirement Systems are eligible to participate in the Public Employees Long-term Disability Program per Section 49–21–201 of the *Utah Code*. Employees of those state departments who participate in the program and meet long-term disability eligibility receive benefits for the duration of their disability up to the time they are eligible for retirement or until age 65. Benefits begin after a three-month waiting period and are paid 100 percent by the program. As of June 30, 2015, there were 219 state employees receiving benefits. The program is funded by paying premiums to PEHP where assets are set aside for future payments. For the fiscal year ended June 30, 2015, the primary government and the

discrete component units of the State paid premiums of \$5.427 million and \$203 thousand, respectively, for the Long-term Disability Program.

The State covers its workers' compensation risk by purchasing insurance from Workers' Compensation Fund (a related organization). The University of Utah, Utah State University, Southern Utah University, Salt Lake Community College, and Utah Valley University report claims liabilities if it is probable that a liability has been incurred as of the date of the financial statements and the amount of the loss can be reasonably estimated. The University of Utah and the University of Utah Hospital and Clinics have a "claims made" umbrella malpractice

insurance policy in an amount considered adequate by its respective administrations for catastrophic malpractice liabilities in excess of the trusts' fund balances. Amounts for the current year are included below.

The following table presents the changes in claims liabilities balances (short and long-term combined). The Risk Management and College and University Self-Insurance balances are for the fiscal years ended June 30, 2014 and June 30, 2015. The PEHP balances are for the fiscal year ended June 30, 2013, the six months ended December 31, 2013, and for the calendar year ended December 31, 2014:

#### **Changes in Claims Liabilities**

(Expressed in Thousands)

C------ V----

	Current Year Claims and					
	Beginning Balance	Changes in Estimates	Claims Payments	Ending Balance		
Risk Management:						
2014	\$ 48,190	\$ 15,261	\$ (14,866)	\$ 48,585		
2015	\$ 48,585	\$ 11,144	\$ (12,798)	\$ 46,931		
Public Employees Health Program:						
2013	\$ 132,878	\$ 481,563	\$ (491,126)	\$ 123,315		
December 31, 2013	\$ 123,315	\$ 237,020	\$ (235,572)	\$ 124,763		
December 31, 2014	\$ 124,763	\$ 510,828	\$ (504,586)	\$ 131,005		
College and University Self-Insurance:						
2014	\$ 64,142	\$ 242,854	\$ (246,020)	\$ 60,976		
2015	\$ 60,976	\$ 294,799	\$ (278,783)	\$ 76,992		

#### NOTE 20. SUBSEQUENT EVENTS

Subsequent to June 30, 2015, The Governor's Office of Economic Development Board recommended and the director approved \$7.933 million of additional commitments to be credited over the next several years for the Economic Development Tax Increment Financing Incentive program (EDTIF) and the Motion Picture Incentive program. These commitments are contingent on participating companies meeting certain economic development performance criteria and within-the-state production criteria.

On July 9, 2015, the Utah State University (major discrete component unit) issued \$23.9 million of Student Building Fee Revenue Bonds, Series 2015. Principal on the bonds is due annually commencing June 1, 2017 through June 1, 2046. Bond interest is due semiannually commencing December 1, 2015 at rates ranging from 3 percent to 5 percent. Proceeds from these bonds are to be used to make renovations to the University's football stadium.

On September 23, 2015, the Utah State University (major discrete component unit) issued \$24.455 million of Student Fee and Housing System Revenue Bonds, Series 2015. Principal on the bonds is due annually commencing April 1, 2018 through April 1, 2038. Bond interest is due semiannually commencing April 1, 2016 at rates ranging from 3 percent to 5 percent. Proceeds from these bonds are to be used to finance the Valley View Residence

Hall replacement project including the construction of a new, modern housing facility within the main campus of the University.

On October 8, 2015, the Utah State University (major discrete component unit) issued \$19.5 million of Federally Taxable Research Revenue Bonds, Series 2015. Principal on the bonds is due annually commencing December 1, 2017 through December 1, 2046. Bond interest is due semiannually commencing December 1, 2015 at rates ranging from 1.17 percent to 3.521 percent. Proceeds from these bonds are to be used to finance the cost of construction and equipping a new Space Dynamic Laboratory facility located with the main campus of the University.

During the 2015 General Session the Legislature appropriated \$17.5 million to Utah Communications Authority (nonmajor component unit) for the fiscal year ending June 30, 2016. Of this amount, the Legislature designated \$1.5 million to be used for a study and the remaining \$16 million to be used for new system consoles, sites, and towers.

In March, 2015, the Utah State Board of Regents authorized the Utah State University (major discrete component unit) to issue \$17.5 million of Research Revenue Refunding Bonds, Series 2015. At June 30, 2015, the bonds had not been issued. The proceeds will be used to advance refund a portion of the University's 2009 Research Revenue Bonds.

# REQUIRED SUPPLEMENTARY INFORMATION

## **Budgetary Comparison Schedule General Fund**

For the Fiscal Year Ended June 30, 2015			(Expres	sed in Thousands)
	Original Budget	Final Budget	Actual	Variance with Final Budget

#### INFORMATION ABOUT BUDGETARY REPORTING

#### **Budgetary Presentation**

A Budgetary Comparison Schedule is presented for the General Fund and each of the State's major special revenue funds for which the Legislature enacts an annual budget. An annual budget is also adopted for the Transportation Investment Fund, a major capital projects fund, the Debt Service Fund, a nonmajor governmental fund, and the Alcoholic Beverage Control Fund, a nonmajor enterprise fund. The budgets are enacted through passage of *Appropriations Acts*. Budgets for specific general revenues are not adopted through an *Appropriations Act*, but are based on supporting estimates approved by the Executive Appropriations Committee of the Legislature. General revenues are those revenues available for appropriation for any program or purpose as allowed by law. Department-specific revenues are revenues dedicated by an *Appropriations Act* or restricted by other law or external grantor to a specific program or purpose.

Original budgets and related revenue estimates represent the spending authority enacted through *Appropriations Acts* as of June 30, 2015, and include nonlapsing carryforward balances from the prior fiscal year. Final budgets represent the original budget as amended by supplemental appropriations and related changes in revenue estimates, executive order reductions when applicable, and changes authorized or required by law when department-specific revenues either exceed or fall short of budgeted amounts.

Unexpended balances at yearend may: (1) lapse to unrestricted balances (committed, assigned, or unassigned) and be available for future appropriation; (2) lapse to restricted balances and be available for future appropriation restricted for specific purposes as defined by statute; or (3) be nonlapsing, which means balances are reported as either restricted or committed fund balance. The nonlapsing balances are considered automatically reappropriated as authorized by statute, by an *Appropriations Act*, or by limited encumbrances.

#### **Budgetary Control**

In September of each year, all agencies of the government submit requests for appropriations to the Governor's Office of Management and Budget so that a budget may be prepared. The budget is prepared by fund, function, and activity and includes information on the past year, current year estimates, and requested appropriations for the next fiscal year.

In January, the Governor recommends a budget to the Legislature. The Legislature considers those recommendations and prepares a series of *Appropriations Acts* that modify the State budget for the current year and constitute the State budget for the following year. The Legislature passes the *Appropriations Acts* by a simple majority vote. The *Appropriations Acts* becomes the State's authorized operating budget upon the Governor's signature. The *Constitution of Utah* requires that budgeted expenditures not exceed estimated revenues and other sources of funding, including beginning balances.

Budgetary control is maintained at the functional or organizational level, as identified by numbered line items in the *Appropriations Acts*. Budgets may be modified if federal funding or revenue specifically dedicated for a line item exceeds original estimates in the *Appropriations Acts*. If funding sources are not sufficient to cover the appropriation, the Governor is required to reduce the budget by the amount of the deficiency. Any other changes to the budget must be approved by the Legislature in a supplemental *Appropriations Act*.

Any department that spends more than the authorized amount must submit a report explaining the overspending to the State Board of Examiners. The Board will recommend corrective action, which may include a request to the Legislature for a supplemental appropriation to cover the deficit. If a supplemental appropriation is not approved, the department must cover the overspending with the subsequent year's budget. In the General Fund, the State Courts Administrator's budget for juror and witness fees was over expended by \$867 thousand. This deficit is allowed by statute and will be funded with future appropriations. All other appropriated budgets of the State were within their authorized spending levels.

#### **Spending Limitation**

The State also has an appropriation limitation statute that limits the growth in state appropriations. The total of the amount appropriated from unrestricted General Fund sources plus the income tax revenues appropriated for higher education is limited to the growth in population and inflation. The appropriations limitation can be exceeded only if a fiscal emergency is declared and approved by more than two-thirds of both houses of the Legislature, or if approved by a vote of the people. However, the appropriations limitation statute may be amended by a majority of both houses of the Legislature. Appropriations for debt service, emergency expenditures, amounts from other than unrestricted revenue sources, transfers to the Budgetary Reserve Account (Rainy Day Fund), Education Budget Reserve Account and the Transportation Investment Fund; or capital developments meeting certain criteria are exempt from the appropriations limitation. For the fiscal year ended June 30, 2015, the State was \$655.9 million below the appropriations limitation.

#### INFORMATION ABOUT THE STATE'S PENSION PLANS

#### A. Single-employer Plans

The State's defined benefit pension systems/plan is administered by the Utah Retirement Systems and is included in this Comprehensive Annual Financial Report as a pension trust fund within the fiduciary funds. The Judges System and the Utah Governors and Legislators Retirement Plan are single-employer service retirement plans.

The following schedule presents the State's (primary government's) proportionate share of the net pension liability for its single-employer retirement plans:

#### State of Utah – Single-employer Plans Schedule of the Proportionate Share of the Net Pension Liability December 31, 2014

(Expressed in Thousands)

	Judges System	Utah Governors and Legislators Retirement Plan
Proportion of the Net Pension Liability (Asset)	100.00 %	100.00 %
Proportionate Share of the Net Pension Liability (Asset)	\$ 28,451	\$ 1,901
Covered Employee Payroll	\$ 15,264	\$ 1,045
Proportionate Share of the Net Pension Liability (Asset) as a Percentage of its Covered Employee Payroll	186.39 %	181.91 %
Plan Fiduciary Net Position as a Percentage of the Total Pension Liability	85.20 %	84.50 %

(Required Supplementary Information continues on next page)

Below are the changes in net pension liability for the State's (primary government's) single-employer plans:

#### Notes to Single-employer Plans Schedule of Contributions

Methods and Assumptions Used to Determine Contribution Rates:

Actuarial Cost Method ......Entry Age Normal

Amortization Method .....Level Percentage of Payroll

Asset Valuation Method......5-year smoothed market

Investment Rate of Return.....7.5% Inflation...............2.75%

promotional increases for members with less than 25 years of service.

Mortality......Male: RP-2000 with white collar adjustments, projected with Scale AA from the year 2000.

Female: 120 percent of constructed mortality table based on actual experience of male

educators, projected with Scale AA from the year 2000.

#### Other Information:

The actuarially determined contribution rates are calculated as of January 1 and become effective on July 1 of the following year, which is 18 months after the valuation date. The Utah Retirement Systems' Board certifies the contribution rates that employers are contractually required to contribute to the Retirement System. According to Section 49-11-301(5) of the *Utah Code*, if the funded ratio of the plan is less than 110 percent, then the Board is permitted to maintain the prior year's contribution rate if the actuarially determined contribution is lower. The Board has historically followed this policy.

Significant Changes to Methods and Assumptions Used to Determine Contribution Rates:

#### • Investment Rate of Return

In 2008, the actuarial assumed rate of return (the discount rate) was modified from 8.0 to 7.75 percent, and then again in 2011 down to 7.5 percent. This rate is used in establishing retirement contribution rates and in determining current benefit reserve requirements.

#### Amortization

Changes implemented in 2009 include: losses in 2008 were amortized over the next 5 years (20 percent per year), and the unfunded actuarial accrued liability (UAAL) amortization period was modified from 20 to 25 years.

#### Notes to Multiple-employer Systems Schedule of Contributions

This schedule reflects the legislative authorized rates and contributions for these systems. Statute requires participating Tier 2 employers to pay the corresponding non-Tier 2 system amortization rate of the employee's compensation and that contribution is applied to the employer's corresponding non-Tier 2 system liability. This amortization adjustment to contributions and rates is not reflected in this schedule.

Significant Changes to Methods and Assumptions Used to Determine Contribution Rates:

#### • Investment Rate of Return

In 2008, the actuarial assumed rate of return (the discount rate) was modified from 8.0 to 7.75 percent, and then again in 2011 down to 7.5 percent. This rate is used in establishing retirement contribution rates and in determining current benefit reserve requirements.

#### Amortization

Changes implemented in 2009 include: losses in 2008 were amortized over the next 5 years (20 percent per year), and the unfunded actuarial accrued liability (UAAL) amortization period was modified from 20 to 25 years.

#### New Retirement Plans:

In 2011, the Tier 2 Retirement Systems became effective. All eligible employees beginning on or after July 1, 2011, who have no previous service credit with any of the Utah Retirement Systems, are members of the Tier 2 Retirement Systems.

#### INFORMATION ABOUT THE STATE'S OTHER POSTEMPLOYMENT BENEFIT PLANS

The State Employee Other Postemployment Benefit Plan (State Employee OPEB Plan) is administered through the State Post-Retirement Benefits Trust Fund as an irrevocable trust. Assets of the trust fund are dedicated to providing postemployment health and life insurance coverage to current and eligible future state retirees. Only state employees entitled to receive retirement benefits and meeting other specific eligibility criteria are eligible to receive postemployment benefits.

The following factors contributed to changes in the elements presented below in the Schedule of Funding Progress for the State Employee OPEB Plan from December 31, 2010 to December 31, 2012: (1) funding more than the Annual Required Contribution (ARC) over the last two years; (2) changing the amortization period from 25 years to 20 years; (3) healthcare trend assumptions decreased from a beginning rate of 9.5 percent to 8.5 percent; (4) average per capita claims costs are lower; and (5) active headcounts decreased 8.5 percent while retiree headcounts increased less than 2 percent.

The following factors contributed to changes in the elements presented below in the Schedule of Funding Progress for the State Employee OPEB Plan from December 31, 2012 to December 31, 2014: (1) changing the actuarial cost method from Projected Unit Credit to Entry Age Normal; (2) changing the medical trend assumptions to the Society of Actuaries Long-Run Medical Cost Trend Getzen Model: and (3) active headcounts decreased 15.8 percent while retiree headcounts increased less than 2.5 percent.

The following schedules present the State of Utah's funding progress and required employer contributions for the State Post-Retirement Benefits Trust Fund from the recent actuarial valuation and the two preceding valuations:

#### State Employee OPEB Plan Schedule of Funding Progress By Valuation Date

(Expressed in Thousands)

Valuation Date	Actuarial Value of Assets	Actuarial Accrued Liability (AAL)	Unfunded Actuarial Accrued Liability (UAAL)	Funded Ratio	Annual Covered Payroll	UAAL as a Percentage of Covered Payroll
December 31, 2010	\$ 106,605	\$ 481,393	\$ 374,788	22.15 %	\$ 589,817	63.54 %
December 31, 2012	\$ 150,107	\$ 408,661	\$ 258,554	36.73 %	\$ 496,491	52.08 %
December 31, 2014	\$ 205,498	\$ 386,532	\$ 181,034	53.16 %	\$ 440,029	41.14 %

#### State Employee OPEB Plan Schedule of Employer Contributions

Year Ended	Annual Required Contributions	Percentage Contributed
June 30, 2008	\$ 53,491	98.71 %
June 30, 2009	\$ 53,491	100.00 %
June 30, 2010	\$ 43,819	100.00 %
June 30, 2011	\$ 43,819	100.00 %
June 30, 2012	\$ 37,594	115.16 %
June 30, 2013	\$ 37,594	101.27 %
June 30, 2014	\$ 30,342	100.00 %
June 30, 2015	\$ 30,342	100.00 %

The Elected Official Other Postemployment Benefit Plan (Elected Official OPEB Plan) is administered through the Elected Official Post-Retirement Benefits Trust Fund. Only governors and legislators that retire after January 1, 1998 and meet other specific eligibility criteria are eligible for this benefit.

The following factors contributed to the changes in the elements presented below in the Schedule of Funding Progress for the Elected Official OPEB Plan from December 31, 2010 to December 31, 2012: (*I*) creation of a trust and funding more than the Annual Required Contribution (ARC) over the last two years; (*2*) changing the amortization period from 30 years to 20 years; (*3*) changing the discount rate to 4.5 percent from 4 percent; (*4*) healthcare trend assumptions decreased from a beginning rate of 9.5 percent to 8.5 percent; and (*5*) average per capita claims costs are lower.

The following factors contributed to the changes in the elements presented below in the Schedule of Funding Progress for the Elected Official OPEB Plan from December 31, 2012 to December 31, 2014: (*I*) funding more than the Annual Required Contribution (ARC) over the last two years; (*2*) changing the actuarial cost method from Projected Unit Credit to Entry Age Normal; and (*3*) changing the medical trend assumptions to the Society of Actuaries Long-Run Medical Cost Trend Getzen Model.

The following schedules present the State of Utah's funding progress and required contributions for the Elected Official Post-Retirement Benefits Trust Fund from the recent actuarial valuation and the two preceding valuations (using the projected unit credit method):

June 30, 2015	\$	1 321	105 07 %

#### INFORMATION ABOUT INFRASTRUCTURE ASSETS REPORTED USING THE MODIFIED APPROACH

As allowed by GASB Statement No. 34, *Basic Financial Statements—and Management's Discussion and Analysis—for State and Local Governments*, the State has adopted an alternative to reporting depreciation on roads and bridges (infrastructure assets) maintained by the Utah Department of Transportation (UDOT). This includes infrastructure acquired prior to fiscal year 1981. Under this alternative method, referred to as the "modified approach," infrastructure assets are not depreciated, and maintenance and preservation costs are expensed.

In order to utilize the modified approach, the State is required to:

- Maintain an asset management system that includes an up-to-date inventory of eligible infrastructure assets.
- Perform and document replicable condition assessments of the eligible infrastructure assets and summarize the results using a
  measurement scale.
- Estimate each year the annual amount to maintain and preserve the eligible infrastructure assets at the condition level established and disclosed by the State.
- Document that the infrastructure assets are being preserved approximately at, or above the condition level established by the State.

#### Roads

UDOT uses the Pavement Management System to determine the condition of 5,830 centerline miles of state roads. The assessment is based on Ride Quality, using the International Roughness Index (IRI) data. This data is also reported to the Federal Highways Administration (FHWA) and used for the National Condition Assessment reported to Congress. Ranges for Good, Fair and Poor condition were established to correlate with the national FHWA ranges. Additional condition measures for age, wheel path rutting and surface cracking are considered in project recommendations.

Category	IRI Range	Description
Good	< 95	Pavements that provide a smooth ride and typically exhibit few signs of visible distress suitable for surface seals and preservation.
Fair	95 to 170	Pavements with noticeable deterioration beginning to affect the ride in need of resurfacing.
Poor	> 170	Pavements with an unacceptable ride that have deteriorated to such an extent that they are in need of major rehabilitation.

#### **Condition Level - Roads**

The State performs complete assessments every other calendar year. Prior to 2013 complete assessments were performed every calendar year. The State has established a three System Level priority (Interstate, Level 1 and Level 2) with individual condition targets for each system. The condition target is to maintain a certain percentage of the mileage at a "fair" or better rating. The Interstate target is 95 percent, Level 1 (with over 1,000 Average Annual Daily Traffic) at 90 percent, and Level 2 (with less than 1,000 Average Annual Daily Traffic) at 80 percent. In 2013 Level 1 and Level 2 roads were redefined to a 1,000 Average Annual Daily Traffic threshold (previously 2,000), resulting in the Level 2 percentage being below target in 2014. The State has corrective processes in place to meet the Level 2 condition target by the 2016 assessment.

The following table reports the percentage of pavements with ratings of "fair" or better for the last three assessments for each system:

System	2014	2012	2011
Interstate System	99.7 %	99.5 %	98.3 %
Level 1 System	91.7 %	93.5 %	93.2 %
Level 2 System	75.3 %	82.1 %	82.7 %

The following table presents the State's estimated amounts needed to maintain and preserve roads at or above the established condition levels addressed above, and the amounts actually spent for each of the past five reporting periods (in thousands):

FISCAL YEAR	ESTIMATED SPENDING	ACTUAL SPENDING
2015	\$ 198,526	\$ 279,878
2014	\$ 193,282	\$ 298,484
2013	\$ 194,720	\$ 328,137
2012	\$ 204,647	\$ 371,133
2011	\$ 249,071	\$ 299,227

#### **Bridges**

UDOT uses the Structures Inventory System to monitor the condition of the 1,923 state-owned bridges. A number, ranging from 1 to 100, is calculated based on condition, geometry, functional use, safety, and other factors. Three categories of condition are established in relation to the number range as follows:

Category	Range	Description
Good	80 – 100	Preventive maintenance requirements include repair leaking deck joints, apply deck overlays and seals, place concrete sealers to splash zones, paint steel surfaces, and minor beam repairs.
Fair	50 – 79	Corrective repairs include deck, beam, and substructure repairs, fixing settled approaches, and repairing collision damage.
Poor	1 – 49	Major rehabilitation and replacement includes deck, beam, or substructure replacements or replacement of the entire bridge.

#### **Condition Level – Bridges**

The State performs assessments on 50 percent of bridges on an annual basis, each bridge being assessed every other year. The established condition level is to maintain 50 percent of the bridges with a rating of "good" and no more than 10 percent with a rating of "poor." The following table reports the results of the bridges assessed for the past three years:

Rating	2015	2014	2013
Good	73.0 %	73.4 %	72.4 %
Poor	1.0 %	1.0 %	1.0 %

The following table presents the State's estimated amounts needed to maintain and preserve bridges at or above the established condition levels addressed above, and the amounts actually spent for each of the past five reporting periods (in thousands):

FISCAL YEAR	ESTIMATED SPENDING	ACTUAL SPENDING
2015	\$ 35,034	\$ 49,390
2014	\$ 34,109	\$ 52,674
2013	\$ 34,362	\$ 57,907
2012	\$ 36,114	\$ 65,494
2011	\$ 43,954	\$ 52,805

SUPPLEMENTARY INFORMATION

This page intentionally left blank.

# Nonmajor Governmental Funds

#### State Endowment Fund

This fund accounts for a portion of proceeds relating to the State's settlement agreement with major tobacco manufacturers, severance tax revenue in excess of statutory base amounts, and money or other assets authorized under any provision of law. The principal of the fund cannot be appropriated except by a three-fourths vote of both houses of the Legislature and with the concurrence of the Governor. One-half of all interest and dividends earned on tobacco settlement proceeds in this fund is deposited in the General Fund.

#### Environmental Reclamation

This fund consists of various programs aimed at preserving open land, improving irrigation in the State, funding recycling programs, and funding cleanup and reclamation projects. Funds received are from state appropriations, fees and fines, recovered liens and costs, and voluntary contributions.

#### Crime Victim Reparation

This fund accounts for court-ordered restitution and a surcharge on criminal fines, penalties, and forfeitures. Monies deposited in this fund are for victim reparations, other victim services, and, as appropriated, costs of administering the fund.

#### Universal Telephone Services

This fund is designed to preserve and promote universal telephone service throughout the State by ensuring that all citizens have access to affordable basic telephone service. Revenues come from surcharges on customers' phone bills and from fines and penalties levied against telephone service providers by the Public Service Commission.

#### Consumer Education Fund

This fund accounts for revenues and expenditures associated with educating and training Utah residents in various consumer matters. Funding is provided through the assessment and collection of fines and penalties from various regulated professions.

#### Rural Development Fund

This fund promotes various programs in rural areas of the State including construction of communications systems and economic development grants to Native American tribes. Funding comes from oil and gas severance taxes and from royalties on mineral extractions on federal land within the State.

#### State Capitol Fund

This fund was created to account for the funding and operations of the State Capitol Preservation Board. Funds are used in part to pay for repairs and maintenance of Capitol Hill facilities and grounds. Funding is provided through fees and private donations.

#### Miscellaneous Special Revenue

This fund is made up of individual small funds set up to account for various revenue sources that are legally restricted to expenditures for specific purposes.

#### Capital Projects – General Government

This fund accounts for resources used for capital outlays including the acquisition or construction of major capital facilities for use by the State and its component units. The fund receives financial resources from the proceeds of general obligation bonds, legislative appropriations, and intergovernmental revenues.

# Capital Projects – State Building Ownership Authority

#### (Blended Component Unit)

This fund accounts for resources used for capital outlays including the acquisition or construction of major capital facilities for use by various state agencies. The fund receives financial resources from the proceeds of lease revenue bonds issued by the Authority and the interest earned on the proceeds of the bonds.

#### Debt Service – General Government

This fund accounts for the payment of principal and interest on the State's general obligation bonds. The fund receives most of its financial resources from appropriations made by the Legislature.

# Debt Service – State Building Ownership Authority

#### (Blended Component Unit)

This fund accounts for the payment of principal and interest on lease revenue bonds issued by the Authority. The fund receives financial resources from rent payments made by various state agencies occupying the facilities owned by the Authority. The fund also receives capital lease payments from certain college and university component units.

# Nonmajor Enterprise Funds

#### Housing Loan Programs

These programs provide loans or grants to low income or special needs individuals for construction, rehabilitation, or purchase of single or multi-family housing. Funds are provided from federal funds, loan repayments, appropriations, and interest earnings.

#### Agriculture Loan Fund

This fund is comprised of two separate revolving loan programs: the Agriculture Resource Development Fund and the Rural Rehabilitation Fund. Both programs issue farm loans for soil and water conservation projects and the rehabilitation of rural areas within the State.

#### Energy Efficiency Fund

This fund provides revolving loans to assist in the conversion of government and private fleet vehicles to clean fuel and for energy efficiency projects in political subdivisions and state facilities. Funds are provided from public and private contributions, appropriations, and interest earnings on loans and invested funds.

#### Transportation Infrastructure Loan Fund

This fund was created as a revolving loan fund to provide infrastructure assistance to local governments to expedite construction projects. The fund was capitalized with federal grants and state matching appropriations.

#### Alcoholic Beverage Control

The Alcoholic Beverage Control Commission was established to conduct, license, and regulate the sale of alcoholic beverages. Funding is provided through the sale of products. The net profit from the fund is transferred to the State's General Fund and is used for general government purposes.

#### **Utah Correctional Industries**

Utah Correctional Industries (UCI) was established to provide work training opportunities for inmates of the Utah State Prison. UCI manufactures and sells such items as license plates, furniture, highway signs, dairy and meat products, and provides printing and other miscellaneous products and services. Funding comes from charges for products and services.

#### State Trust Lands Administration

This agency manages the assets of the Trust Lands permanent fund. Its objective is to maximize the growth of principal and income production for the beneficiaries.

#### **Utah Dairy Commission**

The purpose of the Commission is to promote the use of dairy products. Its operations are comprised of promotion, advertising, research, and nutritional education regarding dairy products. Funding consists primarily of fees from milk producers.

#### Federal Health Insurance Pool

The Federal Health Insurance Pool is a temporary high risk health insurance program enacted by Section 1101(b) of the Patient Protection and Affordable Care Act, Public Law 111-148, known as the "Pre-Existing Condition Insurance Plan" or PCIP. The PCIP program provides health insurance coverage to uninsured individuals with pre-existing conditions who have been without insurance for at least six months. Ongoing operating costs are recovered through federal contract and premium charges.

## Internal Service Funds

### **Technology Services**

This fund is responsible for providing data processing and various other computer services along with voice and data communication services to state agencies.

#### General Services

This fund manages cooperative purchasing contracts and provides purchasing card, printing and mailing services, and surplus property services to state agencies. This fund also provides central accounting services for the Department of Administrative Services and warehouse services for the Department of Natural Resources.

### Fleet Operations

This fund provides motor pool, fuel network, and travel services to state agencies.

## Risk Management

This fund provides insurance coverage and loss prevention services to state agencies, institutions of higher education, and participating local school districts. Coverage is provided using a combination of self-insurance and private excess insurance.

## Property Management

This fund is responsible for the operation and maintenance of facilities used by state agencies. This fund is also used to account for the State's facility energy efficiency program.

## Human Resource Management

This fund provides human resource and payroll services to state agencies.

## Fiduciary Funds

## PENSION AND OTHER EMPLOYEE BENEFIT TRUST FUNDS

## Defined Benefit Pension Plans and Defined Contribution Plans

These funds are used to account for the various pension trust funds and defined contribution plans administered by the Utah Retirement Systems. Funding comes from employee and employer contributions and investment earnings. Contributions in some systems are augmented by fees, insurance premium taxes, or legislative appropriations.

#### Post-Retirement Benefits Trust Funds

The State administers the State Employee and the Elected Official Other Postemployment Benefit Plans as irrevocable trusts. These trusts funds account for the assets accumulated and the payments made for other postemployment benefits provided to current and future state employee and elected official retirees. Funding comes from employer contributions and investment earnings.

#### Other Employee Benefits Trust Fund

This fund is used to accumulate resources required to be held in trust to pay for other employee benefits.

#### PRIVATE PURPOSE TRUST FUNDS

#### Utah Navajo Royalties Holding

This fund receives oil royalties, operating, and other trust revenues. Funds received are used for the health, education, and general welfare of Navajo residents of San Juan County, Utah.

#### **Unclaimed Property Trust**

This fund is used to account for unclaimed property escheated to the State. Proceeds of the fund pay the administrative costs to operate the fund and any claims. The remaining proceeds are deposited in the Education Fund and can only be used to help fund public education.

#### Employers' Reinsurance Trust

This fund primarily provides compensation to individuals injured from industrial accidents or occupational diseases occurring on or before June 30, 1994, where the injury is of a permanent nature and workers' compensation benefits have expired. Revenues come from assessments on insurance

premiums and court-ordered penalties. The net position of the fund is held in trust for injured workers and cannot be used for any other purpose.

#### Petroleum Storage Tank Trust

This fund is used to pay the costs of damage caused by petroleum storage tank releases and provide revolving loan capital. Sources of funding include fees from participating companies, recovered costs and settlements from responsible parties, and investment income. The net position of this fund is held in trust for the benefit of participants and cannot be used for any other purpose.

#### Utah Educational Savings Plan Trust

This fund was created as a means to encourage investment in a public trust to pay for future higher education costs. Participant contributions are used to pay for future college expenses.

#### Miscellaneous Restricted Trust

This is made up of various small individual funds created to receive and disburse funds in accordance with applicable laws and trust agreements.

#### **AGENCY FUNDS**

#### Taxes and Social Security

This fund is used to account for federal withholding and social security taxes on the State's payroll.

#### County and Local Collections

This fund receives and disburses various taxes collected by the State on behalf of county and local governments.

#### State Courts

This fund receives and disburses various fines and forfeitures collected by the state courts on behalf of state and local agencies.

#### Deposits, Suspense, and Miscellaneous

This fund is made up of small individual funds set up to account for various receipts and disbursements.

## Nonmajor Component Units

### **Utah Communications Authority**

The Utah Communications Authority (UCA) provides public safety communications services and facilities on a statewide basis for the benefit and use of state, local, and federal agencies. UCA supports statewide interoperability of emergency communications throughout the State, and manages the 911 funds collected by the State for the benefit of the Public Safety Answering Points within the State. UCA operations are funded through service charges supplemented with federal grants and state fees and appropriations.

### Comprehensive Health Insurance Pool

The Pool was created as a nonprofit quasi-governmental entity to provide access to health insurance coverage for residents of the State who are considered uninsurable. Ongoing operating costs are recovered through premium charges supplemented with both appropriations from the General Fund and federal grants.

### Utah Schools for the Deaf and the Blind

The Schools were created to provide education to individuals with hearing and/or vision impairments, through direct and indirect education services, as well as consultation to their families and service providers.

## Military Installation Development Authority

This Authority is an independent, nonprofit entity whose purpose is to provide for the development and improvement of project areas near military installations throughout the State. Operations are funded through service charges, project revenue, and state appropriations.

## Heber Valley Historic Railroad Authority

The Authority was created to operate, maintain, improve, and provide for a scenic and historic railway in and around the Heber Valley in Wasatch County. Operations are funded primarily through user charges.

## Utah State Fair Corporation

The Corporation was created to operate the State Fair Park and conduct the Utah State Fair and other expositions and entertainment events. Operations are funded by admissions, rentals, donations, and state appropriations.

## Colleges and Universities

The colleges and universities are the State's public institutions of higher education. The nonmajor institutions of higher education are:

Weber State University | Southern Utah University | Salt Lake Community College | Utah Valley University Dixie State University | Snow College | Utah College of Applied Technology

#### STATISTICAL SECTION

Fiscal Year Ended June 30, 2015

This part of the State of Utah's comprehensive annual financial report presents detailed information as a context for understanding what the information in the financial statements, notes to the financial statements, and required supplementary information says about the State's overall financial health.

#### **Financial Trends Information**

These schedules present trend information to help the reader understand how the State's financial performance and fiscal health have changed over time.

Schedule A-1	Net Position by Component	224
Schedule A-2	Changes in Net Position	226
Schedule A-3	Fund Balances — Governmental Funds	230
Schedule A-4	Changes in Fund Balances — Governmental Funds	232

#### **Revenue Capacity Information**

These schedules contain information to help the reader understand the State's capacity to raise revenues and the sources of those revenues.

Schedule B–1	Revenue Base	234
Schedule B-2	Revenue Payers by Industry — Taxable Sales, Services, and Use Tax Purchases	236
Schedule B-3	Revenue Payers — Personal Income Tax	237
Schedule B-4	Personal Income Tax Rates	238

#### **Debt Capacity Information**

These schedules present information to help the reader understand and assess the State's levels of outstanding debt and the State's ability to issue additional debt in the future.

Schedule C-1	Ratios of Outstanding Debt by Type	240
Schedule C-2	Other Long-Term Liabilities	242
	Legal Debt Margin	
Schedule C-4	Statutory Debt Limit	244
	Pledged Revenue Bond Coverage	

#### **Demographic and Economic Information**

These schedules contain demographic and economic indicators to help the reader understand the environment within which the State's financial activities take place.

Schedule D-1	Demographic and Economic Indicators	247
Schedule D-2	Principal Employers	248
	Composition of Labor Force	
	Public Education Student Enrollment (K–12)	
Schedule D-5	Public Higher Education Enrollment	252

#### **Operating Information**

These schedules offer operating data to help the reader understand how the information in the State's financial report relates to the services it provides and the activities it performs.

Schedule E-1	Full-Time Equivalent State Employees by Function	254
Schedule E-2	Operating Indicators by Function	256
Schedule E-3	Capital Asset Statistics by Function	258

#### **Other Information**

These graphs and schedules offer a historical view of expenditures in constant dollars.

Schedule F-1	Expenditures — Historical and Constant Dollars	260
Schedule F-2	Per Capita Expenditures — Historical and Constant Dollars	261

Sources: Unless otherwise noted, the information in the following schedules is derived from the State of Utah Comprehensive Annual Financial Report.

Notes: This schedule has been restated for prior period adjustments, if practical, which were made to the fiscal year and preceding fiscal year in which the prior period adjustment was identified.

<sup>&</sup>lt;sup>1</sup> From fiscal years 2006 to 2007, governmental activities' restricted and unrestricted net position increased due to higher tax revenues from a strengthening economy. In fiscal years 2008 to 2010, governmental activities' restricted net decreased as the economy slowed and tax revenues declined. In fiscal years 2011 to 2013 restricted net position increased due to slightly higher revenues from a strengthening economy. In fiscal year 2014 restricted net position increased primarily due to an increase in investment values because of general market conditions. In fiscal year 2014, governmental activities' unrestricted net position increased due to an increase in carry-forward balances. In fiscal year 2015, governmental activities' restricted net position increased due to higher tax revenues from an improving economy and an increase in investment values because of general market conditions. In fiscal year 2015, unrestricted net position decreased due to the implementation of Governmental Accounting Standards Board Statement 68, *Accounting and Financial Reporting for Pensions* that required the measurement and recognition of the State's net pension liability.

<sup>&</sup>lt;sup>2</sup> From fiscal years 2006 to 2008, business-type activities' restricted net position increased due to unemployment revenues exceeding related claims. In fiscal year 2009, the weak economy caused an increase in unemployment claims, which in turn caused a decrease in the restricted net position of business-type activities. From 2010 to 2015, restricted net position has continued to steadily increase due to unemployment revenues exceeding related claims.

<sup>&</sup>lt;sup>3</sup> In fiscal years 2006 to 2009, and again in 2012 to 2014, business-type activities' unrestricted net position increased primarily due to the State providing additional capital to the loan funds from mineral lease revenue and dedicated sales tax revenues.

Notes: This schedule also has been restated for prior period adjustments, if practical, which were made to the fiscal year and preceding fiscal in which the prior period adjustment was identified.

<sup>&</sup>lt;sup>1</sup> Expenses for health and environmental quality have increased over the last ten fiscal years due to rising Medicaid program costs.

<sup>&</sup>lt;sup>2</sup> In fiscal year 2013, Legislative action moved the Housing and Community Development Division from heritage and arts to the employment and family services.

<sup>&</sup>lt;sup>3</sup> Public education expenses continue to increase for both enrollment growth and benefit-related costs for educators.

<sup>&</sup>lt;sup>4</sup> From fiscal years 2006 to 2007, general tax revenues, specifically sales and use taxes, individual income taxes, and corporate taxes, increased significantly compared to prior years due to Utah's continued economic improvement. In fiscal years 2008 to 2010, general tax revenues declined due to the recessionary economy. In fiscal years 2011 to 2015, general tax revenues increased due to slightly higher revenues from a strengthening economy.

<sup>&</sup>lt;sup>5</sup> From fiscal years 2006 to 2007 unemployment compensation expenses decreased, reflecting Utah's improved employment. However, beginning in fiscal year 2008 and continuing in fiscal year 2010, unemployment compensation expenses increased significantly as the economy continued to weaken at a faster pace than in prior years. In fiscal years 2011 to 2015, expenses decreased reflecting Utah's improving economy and employment.

<sup>&</sup>lt;sup>6</sup> In fiscal years 2010 and 2011, operating grants and contributions increased overall from the preceding and subsequent years, primarily due to increased federal programs funded in part by the *American Recovery and Reinvestment Act* in the Unemployment Compensation Fund and additional operating grants issued for loan related programs.

Notes: Beginning fiscal year 2010, the fund balance categories were reclassified as a result of implementing Governmental Accounting Standards Board (GASB) Statement 54, *Fund Balance Reporting and Governmental Fund Type Definitions*. Fund balance has not been restated for prior years.

This schedule has been restated for prior period adjustments, if practical, which were made to the fiscal year and preceding fiscal year in which the prior period adjustment was identified.

<sup>&</sup>lt;sup>1</sup> Beginning in fiscal year 2013, the nonspendable fund balance within the General Fund increased due to prepaid items. Additionally, nonspendable fund balance within the General Fund also increased in fiscal year 2013 due to an increase in the long-term portion of revolving loans within the Internal Service Funds.

<sup>&</sup>lt;sup>2</sup> In fiscal years 2013 to 2015, the nonspendable fund balance within other governmental funds increased primarily due to a change in investment values as a result of the rebounding economy.

<sup>&</sup>lt;sup>3</sup> In fiscal years 2012 to 2014, the committed fund balance within other governmental funds increased as a result of sales and use tax diversions for transportation projects.

<sup>&</sup>lt;sup>4</sup> The assigned fund balance within other governmental funds increased in fiscal year 2011, then decreased in fiscal years 2012 and 2013 as less funding was assigned for capital projects. In fiscal years 2014 and 2015, the assigned fund balance increased again as more funding was used for capital projects.

<sup>&</sup>lt;sup>5</sup> In fiscal year 2009, General Fund reserved fund balance decreased due to less reserves available as a result of the slowing economy.

<sup>&</sup>lt;sup>6</sup> In fiscal years 2006 to 2007, General Fund unreserved fund balance increased due to higher tax revenues from a strengthening economy. In fiscal years 2008 and 2009, General Fund unreserved fund balance decreased as the State's economy slowed. Sales and use tax diversions along with reductions in the sales tax rate also contributed to the decrease in tax revenues in the General Fund.

<sup>&</sup>lt;sup>7</sup> In fiscal years 2006 to 2007, and again in fiscal year 2009, unreserved fund balance for capital projects reported a deficit balance as a result of outstanding encumbrances on various capital related projects. Appropriations and bond proceeds available in subsequent fiscal years will fund these deficits.

Notes: This schedule also has been restated for prior period adjustments, if practical, which were made to the fiscal year and preceding fiscal year in which the prior period adjustment was identified.

<sup>&</sup>lt;sup>1</sup> From fiscal years 2006 to 2007, tax revenues, specifically sales and use taxes, individual income taxes, and corporate taxes, increased significantly compared to prior years due to Utah's continued economic growth. In fiscal years 2009 to 2010, tax revenues decreased significantly as the economy slowed. Sales and use tax diversions along with a reduction in the sales tax rate also contributed to this decrease. In fiscal years 2011 to 2015, tax revenues increased due to a rebounding economy.

 $<sup>^2</sup>$  In fiscal years 2009 and 2010, federal contracts and grants increased in part due to funding provided by the *American Recovery and Reinvestment Act* .

<sup>&</sup>lt;sup>3</sup> In fiscal year 2009, the decrease in the fair value of investments for the permanent fund created a negative revenue. In fiscal year 2013 and 2014, investment income increased due to an increase in the fair value of investments as the result of a rebounding economy. In fiscal year 2015, investment income decreased due to a change in the fair value of investments.

<sup>&</sup>lt;sup>4</sup> Expenditures for health and environmental quality have increased over the last ten fiscal years due to rising Medicaid program costs.

<sup>&</sup>lt;sup>5</sup> In fiscal year 2013, Legislative action moved the Housing and Community Development Division from heritage and arts to the employment and family services.

<sup>&</sup>lt;sup>6</sup> Public education expenditures continue to increase for both enrollment growth and benefit-related costs for educators.

<sup>&</sup>lt;sup>7</sup> In fiscal year 2012, the Transportation Investment Fund was reclassified as a capital projects fund. Expenditures relating to this fund have been reclassified from transportation expenditures to capital outlay beginning in fiscal year 2006, at the inception of the fund.

<sup>8</sup> Expenditures for transportation increased in fiscal years 2007 to 2010 as existing fund balances and federal resources were used to address the State's transportation infrastructure needs.

<sup>&</sup>lt;sup>9</sup> Expenditures for capital outlay increased in fiscal years 2010 to 2011 as additional funding through bond proceeds were used to address the State's transportation infrastructure needs.

<sup>&</sup>lt;sup>10</sup> In fiscal year 2015, the Comprehensive Health Insurance Pool (discrete component unit) was dissolved and the remaining cash balance was transferred to the State's general fund.

Note: The Utah State Legislature can raise the income tax rates by legislation, no vote of the populace is required; *Utah Constitution*, Article XIII, Section 5.

<sup>&</sup>lt;sup>1</sup> The Legislature increased income levels and lowered the maximum tax rate effective for calendar year 2006.

<sup>&</sup>lt;sup>2</sup> The Legislature passed an option for the taxpayer to use the single rate of 5.35 percent or the tax tables for calendar year 2007.

<sup>&</sup>lt;sup>3</sup> The Legislature passed a single tax rate for all taxpayers beginning with calendar year 2008.

Sources: Utah Department of Administrative Services, Division of Finance; Utah State Tax Commission – Property Tax; and Utah Governor's Office of Management and Budget – Demographics.

Note: Net general obligation and revenue bonded debt includes principal, premiums, discounts, and deferred amount on refundings of bonded debt for years prior to 2014. Beginning in 2014, deferred amounts on refunding of bonded debt is no longer reported as part of long-term liabilities, but now as Deferred Outflows or Inflows of Resources per the implementation of Governmental Accounting Standards Board (GASB) Statement 65, *Items Previously Reported as Assets and Liabilities*.

<sup>&</sup>lt;sup>1</sup> In 2015 the Student Assistance Programs issued a line of credit to acquire federally guaranteed student loans.

<sup>&</sup>lt;sup>2</sup> Ratios are calculated using personal income and population data. See Schedule D–1 for personal income and population data. During 2010 to 2012, the State issued just under \$1 billion in General Obligation bonds to take advantage of historically low interest rates and ease budget constraints for highway and building construction projects.

<sup>&</sup>lt;sup>3</sup> The percentage of Net General Obligation Bonded Debt based upon taxable property value is presented for comparative purposes. The State does not presently levy ad valorem property taxes for General Obligation Bonded Debt, but is authorized to do so in accordance with Title 59, Chapter 2, Part 901 of the *Utah Code*. See Schedule C–3 for taxable property value.

Source: Utah State Tax Commission and the Utah Department of Adminstrative Services, Division of Finance.

Note: Article XIV, Section 1 of the *Utah Constitution* allows the State to contract debts not exceeding 1.5 percent of the total taxable property in the State. The Legislature authorizes general obligation indebtedness within this limit. The State uses outstanding general obligation bond debt to comply within the constitutional debt limit. For fiscal year 2015, the State has other long-term contract liabilities consisting of unused vacation and other vested leave for employees of \$99.706 million. These contract liabilities do not affect the State's compliance with the constitutional debt limit.

Note: Article XIV, Section 5 of the *Utah Constitution* limits any funds borrowed to be used solely for purposes as authorized by law. In addition, Title 63J-3-402 of the *Utah Code* limits outstanding state general obligation debt to not exceed the applicable percentage (unless approved by more than two-thirds of both houses of the Legislature) of that fiscal year's appropriations limit. The State uses outstanding general obligation bond debt to comply within the constitutional debt limit. For fiscal year 2015, the State has other long-term contract liabilities consisting of unused vacation and other vested leave for employees of \$99.706 million. These contract liabilities do not affect the State's compliance with the constitutional debt limit.

<sup>&</sup>lt;sup>1</sup> Taxable property is assessed January 1 of each year. The value used for the fiscal year limitation is from the prior calendar year; assessed values as of January 1, 2014, are used for fiscal year 2015.

Fiscal Year											
2010		2011		2012		2013		2014		2015	
\$ 212,423	\$	205,284	\$	201,473	\$	201,294	\$	207,211	\$	221,650

Note: Details regarding the State's outstanding bonds can be found in Note 10. Long-term Liabilities in the financial statements.

<sup>&</sup>lt;sup>1</sup> Revenues for Water Loan Programs are primarily interest on revolving loan receivables; principal repayments are not included in gross revenues, but are pledged to cover debt service payments. Revenues for Student Assistance Programs are primarily interest on student loans and federal allowances.

<sup>&</sup>lt;sup>2</sup> Operating Expenses do not include interest, depreciation, or amortization expenses.

<sup>&</sup>lt;sup>3</sup> Coverage equals net available revenue divided by debt service.

<sup>&</sup>lt;sup>4</sup> Between years 2006 and 2009, the State did not issue any water loan recapitalization bonds.

<sup>&</sup>lt;sup>5</sup> Prior to 2015, only Student Loan Purchase Program bonds were presented. During February 2015, the Warehouse Facility Fund line of credit was issued for \$1.6 billion in order to acquire federally guaranteed student loans.

<sup>&</sup>lt;sup>6</sup> During 2011, the Student Assistance Programs had a substantial decrease in its provision for interest arbitrage rebate of \$37.2 million on its 1988 and 1993 revenue bonds.
