November 8, 2016

To the Citizens, Governor,
and Members of the Legislature
of the State of Utah:

It is our pleasure to present the 2016 Comprehensive Annual Financial Report of the State of Utah in accordance with *Utah Code* Section 63A-3-204. Responsibility for the accuracy of the data and the completeness and fairness of the presentation, including all disclosures, rests with the State's management. To the best of our knowledge and belief, the enclosed data accurately presents the State's financial position and results of operations in all material respects in accordance with generally accepted accounting principles (GAAP). We believe that all disclosures necessary to enable the reader to gain an understanding of the State's financial activities are included.

Internal Control. The State's systems of internal control over assets recorded in the accounting system have been designed to provide reasonable, but not absolute, assurance of safeguarding assets against loss from unauthorized use or disposition and to ensure the reliability of financial records for preparing financial statements. The concept of reasonable assurance recognizes that the cost of a control should not exceed the benefits likely to be derived and that the evaluation of costs and benefits requires estimates and judgments by management.

Independent Auditors. In compliance with state statute, an annual financial audit of the "State Reporting Entity" is completed each year by the Office of the Utah State Auditor in conjunction with other independent audit firms. Their audits were conducted in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States. The Utah State Auditor's report and the opinion on the fair presentation of the Basic Financial Statements are included in the Financial Section of this report.

Single Audit. Federal regulations also require the State to undergo an annual "Single Audit" in conformance with the Title 2 U.S. Code of Federal Regulations (CFR) Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Information related to the Single Audit, including the schedule of expenditures of federal awards, audit findings and recommendations, summary of prior audit findings, and the Utah State Auditor's report, is issued in a separate report.

Management's Discussion and Analysis (MD&A). The discussion and analysis beginning on page 17 provides an overview and analysis of the State's Basic Financial Statements. This letter of transmittal is intended to complement the MD&A and should be read in conjunction with it.

PROFILE OF THE GOVERNMENT

Structure. As shown in the organizational chart on page 12, state government is divided into three separate branches: legislative, executive, and judicial. The duties of each branch are outlined in the *Constitution of Utah*, which can be amended only by vote of the Legislature and a majority vote of the State's citizens, and in the *Utah Code*, which can be amended by the Legislature or by citizen initiatives. State government provides various services to over 3,047,000 citizens. Services

include building and maintaining roads; providing public safety, health, and environmental protection services to protect the general welfare of the State’s citizens; helping adults, children, and families through difficult times such as abuse, divorce, illness, death, and unemployment; fostering an attractive business climate to encourage economic growth; and protecting public lands and natural resources for conservation and recreational activities. The State also provides significant financial support to its higher education institutions, local governments, and school districts to help those entities meet the specific needs of their constituents.

The State Reporting Entity. The State Reporting Entity includes the *primary government* and its *component units*. The *primary government* of the State of Utah includes all funds, departments, agencies, and other organizational units governed by the Legislature or the constitutional officers of the State. In addition to these *primary government* activities, this report includes information related to component units for which the primary government is financially accountable. Although such information is provided in this report, the MD&A and Basic Financial Statements focus on the primary government and its activities. Separately issued financial statements are available from the significant discretely presented component units and should be read to obtain a better understanding of their financial conditions. Additional information on all discretely presented component units can be found in the notes to the financial statements (see Note 1. A. on page 65).

Budgetary Process and Control. The *Constitution of Utah* requires that budgeted expenditures not exceed estimated revenues and other sources of funding, including beginning fund balances. Annually, the Governor is required to submit a balanced budget for the governmental funds with an annual appropriated budget (General, Education, Transportation, Transportation Investment, and Debt Service Funds), by function (e.g., health), and activity (e.g., medical assistance) to the Legislature. The Legislature authorizes expenditures by line item in the annual *Appropriations Acts*. Line item is the legal level of budgetary control. The Acts also identify the sources of funding for budgeted expenditures. In the event actual revenues are insufficient to cover budgeted expenditures, the Governor must order budget reductions or call a special session of the Legislature to address budget issues. Adjustments to the budget may also be made throughout the year for changes in departmental or fund revenues so that line items and funds will not end the fiscal year in a deficit position. For additional information on the budgetary process and control, see the Required Supplementary Information and related notes beginning on page 142.

INFORMATION USEFUL IN ASSESSING A GOVERNMENT’S ECONOMIC CONDITION

Local Economy. The Utah economy continues to outperform national averages. Utah’s economy is expected to grow moderately through 2017 on the strength of steady job and wage growth.

Utah’s unemployment rate averaged 3.5 percent in 2015 and is expected to increase to an average of 3.7 percent in 2016, and 3.6 percent in 2017. In 2015, personal income increased by 6.2 percent and nonagricultural wages increased by 7 percent. In 2016, personal income is expected to increase by 5.7 percent and nonagricultural wages are expected to increase by 7.2 percent. Taxable retail sales increased by 6.1 percent in 2015 and are expected to increase by 5 percent in 2016.

Total construction value was \$6.9 billion in 2015, a 19 percent increase from the prior year, primarily due to an increase in nonresidential permit value. This marked the fifth consecutive year in which total construction value has increased. In 2016, total construction value is expected to increase slightly to \$7.1 billion. Residential construction was \$3.8 billion in 2015, a 15.2 percent increase from the prior year as housing continued to play a role in the economic expansion. Residential permit value is expected to increase to \$4 billion, or 5.3 percent in 2016.

In 2016, Utah population is estimated at 3,047,000, which is an increase of 1.7 percent over the prior year. Utah had positive net migration of approximately 17,600 people in 2015 and is expected to grow by 17,900 in 2016. Utah has had positive net migration for the past 26 years and this trend is expected to continue in the coming years.

Industries. Utah’s job market continues to expand as it rebounds from the national recession that began in late 2007. Utah’s nonagricultural employment is expected to increase by 3.6 percent in 2016 and by 3.1 percent in 2017, which is near the Utah average yearly rate of 3.1 percent (1950 through June 2016). All industrial sectors added jobs to Utah’s employment base, with the exception of natural resources and mining, which contracted by 900 jobs. Trade, transportation, and utilities added 8,600 new jobs, with retail trade contributing most of the gains. Education and health services also added 8,600 new jobs, primarily in health services. Financial activities added 6,600 new jobs, with most of the increase in finance and insurance. Leisure and hospitality added 6,000 new jobs, with the largest increase in food services and drinking places. The results for August 2015 to August 2016 are presented in the following table.

State of Utah
Jobs by Industry of Utah's Labor Force
(Expressed in Thousands)

	Number of Jobs		Numerical Change	Percentage Change	Components of Labor Force
	2016 (est.)	2015	2015 to 2016	2015 to 2016	2016 (est.)

Source: Utah Department of Workforce Services and the U.S Bureau of Labor Statistics, August 2016.

Outlook. The national economy is expected to continue to grow moderately in the last half of 2016 and into 2017. As in prior recoveries, the Utah economy continues to grow more rapidly than the nation. Factors that support the continued growth include: 1) low gas prices; 2) strong consumer spending; 3) demographic advantages; and 4) an attractive business environment. Despite this positive outlook for the Utah economy, downside risks are still present. Primarily due to external factors, these risks include negative interest rates, the slowdown in growth in China, unexpected or low probability events with far reaching consequences, and a decline in retail and corporate profits at the national level. Overall, Utah is expected to grow at a moderate pace barring any major disruptions to the global and national economies.

FINANCIAL PLANNING AND POLICIES

Debt Administration. As part of long-term financial planning, the State has used a combination of bonding and pay-as-you-go methods to meet its infrastructure needs. In fiscal years 2006 through 2007 the State bonded less and primarily funded projects with the pay-as-you-go method using one-time and ongoing money. In fiscal years 2008 through 2014, under budget constraints coupled with a low interest rate environment, the State elected to increase its debt by issuing bonds for highway and/or building projects that otherwise would have been funded from current resources. During the years debt was issued, the State continued to fund some projects with cash. In fiscal years 2015 and 2016, the State continued its prudent fiscal

management by paying cash for buildings. In fiscal year 2016, there were no general obligation bond issuances, authorizations, or refundings. As of June 30, 2016, the State's general obligation debt per capita was \$848. The State has an aggressive policy of repaying its general obligation debt within seven years for debt associated with capital facilities and fifteen years for highway construction projects. More information about the State's long-term debt is found in Note 10 to the Basic Financial Statements on page 109.

Revenue and Expenditure Forecasts. Economists and budget analysts from the Executive and Legislative branches of government work with experts from the private sector and academia to develop the consensus revenue forecast used for establishing the State's annual budget. The final 2016 consensus revenue forecast projected a moderate increase of 3 percent in fiscal year 2016 from 2015 actual revenue for combined General and Education Fund. For fiscal year 2017, 4.7 percent growth is projected. The long-term average annual revenue growth rate, adjusted for inflation, was approximately 3.4 percent for fiscal periods 1971 through 2015. (See the Budgetary Highlights – General Fund in the MD&A on page 25 for a comparison of budgeted to actual results for fiscal year 2016.)

The final 2016 consensus revenue forecast projected a moderate increase of 3 percent in fiscal year 2016 from 2015 actual revenue for combined General and Education Fund. For fiscal year 2017, 4.7 percent growth is projected. The long-term average annual revenue growth rate, adjusted for inflation, was approximately 3.4 percent for fiscal periods 1971 through 2015. (See the Budgetary Highlights – General Fund in the MD&A on page 25 for a comparison of budgeted to actual results for fiscal year 2016.)

Budget Stabilization. In accordance with Sections 63J-1-312 and 313 of the *Utah Code*, the State maintains the General Fund Budget Reserve Account in the General Fund (the “Rainy Day Fund”) and an Education Fund Budget Reserve Account in the Education Fund (the “Education Reserve”). State law requires 25 percent of any revenue surplus in the General Fund to be deposited in the Rainy Day Fund after any required Medicaid growth savings transfer is made (see Medicaid Sustainability section below) and 25 percent of any revenue surplus in the Education Fund to be deposited in the Education Reserve, in each case up to a statutory limit. State law limits the totals of the Rainy Day Fund and Education Reserve based on the amount of appropriations from the General Fund and Education Fund, respectively, for the fiscal year in which the surplus occurred. For additional information on the State's budget stabilization accounts see Note 12.B. on page 121.

Medicaid Sustainability. The State implemented reforms in the Medicaid program in an effort to bring Medicaid growth more in line with overall state revenue growth. The reforms align financial incentives in the health care system by replacing the fee-for-service model with one or more risk-based delivery models. When a General Fund revenue surplus occurs, an amount representing the Medicaid growth savings from the new risk-based delivery models will be deposited into the “Medicaid Budget Stabilization Account.” The account will then be used to meet the growing needs in the program in years when growth is expected to be at least 8 percent. For additional information on the State's budget stabilization accounts, see Note 12.B. on page 121.

Public Education Growth. Projections indicate that an additional 9,730 new students will enroll in fall 2016. Due to the current and future enrollment growth, and the demands it places on state funding, public education continues to be a top priority for the Governor and the Legislature. The Office of the Legislative Fiscal Analyst developed a Public Education Distribution Model that allows legislators to see how proposed education policy changes will impact funding.

Federal Funding. In an effort to prepare for potential future reductions in federal funding for critical state programs, the Legislature requires most state agencies including public education and higher education institutions to report specific federal funding information to the Legislature. Annually, these entities must report total federal receipts received the preceding fiscal year in addition to providing contingency plans in the event federal receipts are reduced by either 5 percent or 25 percent.

The Legislature created the Federal Funds Commission to study and make recommendations on federal funding issues. The Commission is tasked with considering the financial stability of the federal government, the risk that the State will experience a reduction in the amount or value of federal funds, and methods to avoid or minimize the risk. Legislators also passed legislation that requires economists and budget analysts from the Executive and Legislative branches of government to consider expected changes in federal funding when preparing the annual revenue volatility report and, if appropriate, recommend changes to amounts or limits of reserve funds.

In addition, all federal funds for state agencies must go through the annual appropriations process. To gain tighter control over federal grants that span several years, the Legislature also requires multiyear grants to go through an approval and summary requirements process, including approval in the annual *Appropriations Acts*.

Spending Limitation. The State has a statutory appropriations limit. The appropriations limit adjusts annually pursuant to a statutory formula based on population and inflation. The definition of appropriations includes only appropriations from General Fund and Education Fund sources (spending for public education and for transportation is exempt from the limitation). For the fiscal year ended June 30, 2016, the State was \$510.8 million below the appropriations limitation.

Adequate Funding for Ongoing Programs. The Legislature has been working toward ensuring all programs have adequate ongoing funding. Coming into the 2016 General Session of the Legislature, before accounting for growth in costs or revenues, the State had a small structural surplus of \$752 thousand for the 2017 fiscal year budget. Legislators were able to maintain and expand the structural surplus to \$12.8 million in the 2016 General Session and 2016 Second Special Session. In addition to matching ongoing commitments to ongoing sources, they took two additional measures. They passed Senate Bill 80, *Infrastructure Funding Amendments*, which will, over time, eliminate two transportation earmarks as further described in the Infrastructure section below. The Legislature also provided \$20 million ongoing appropriations for one-time capital development projects, putting recurring resources into buildings.

Operating/Capital Expenditure Accountability. During the 2014 General Session, the Legislature passed laws and rules to implement budget policy changes. These budget bills were, in part, aimed at smoothing revenue volatility by recognizing above trend growth, managing the volatility with rainy day deposit mechanisms, and treating windfalls as one-time revenue. The Legislature added in-depth budget reviews to the regular budget process. The legislation also required that the Office of the Legislative Fiscal Analyst prepare, before each annual general session of the Legislature, a summary showing the current status of the State's debt, long-term liabilities, contingent liabilities, General Fund borrowing, reserves, fund and nonlapsing balances, and cash-funded capital investments, as compared to the prior nine fiscal years. In addition, the Legislative Fiscal Analyst also implemented a "fiscal health dashboard" website where legislators and citizens can quickly and easily check Utah's fiscal health.

MAJOR INITIATIVES

During fiscal year 2016, the State of Utah continued to rank among the top states in private sector job growth and overall job growth. Due to continued economic expansion, the consensus revenue forecast adopted during the 2016 General Session anticipates that fiscal year 2017 will mark the seventh consecutive year of growth in unrestricted General Fund and Education Fund revenue collections.

Approximately \$550 million in new unrestricted revenue was available for appropriation during the 2016 General Session due to the fiscal year 2015 surplus and forecasted revenue growth in fiscal years 2016 and 2017. Under the consensus forecast, \$400 million of this revenue was available for ongoing appropriations and \$150 million for one-time appropriations. In addition, the Legislature re-directed \$118 million from various sources, including the Medicaid Restricted Account, reductions in state matching funds for the Children's Health Insurance Program (CHIP), Temporary Assistance for Needy Families (TANF) for school readiness programs, changes to sales tax earmarks, and other reserves. Together, new revenue and funding reallocations provided \$668 million for new appropriations in fiscal years 2016 and 2017. Highlights of new appropriations for public and higher education, infrastructure needs, and other priorities are summarized below.

Public Education. During the 2016 General Session, the Legislature increased public education appropriations by \$275 million, including an additional \$12 million from TANF for school readiness programs, and \$18 million from program balances for public education. This represents 41 percent of new unrestricted appropriations from the General Fund and Education Funds. The largest increases for public education included \$82.3 million ongoing for a 3 percent increase in the value of the Weighted Pupil Unit (WPU – the primary funding mechanism for public education); \$94.4 million ongoing for an anticipated student enrollment increase of over 9,700 in fall 2016; and \$14.4 million ongoing to increase funding for charter schools. Altogether, the fiscal year 2017 state K-12 budget provides a 6.7 percent increase in the state portion of public education funding, compared to fiscal year 2016.

Higher Education. State funding for higher education, including capital development projects, was increased by nearly \$172 million during the 2016 General Session. This represents 26 percent of new unrestricted appropriations from the General and Education Funds. A total of \$114 million one-time was provided for new higher education facilities and land acquisitions. Other significant increases included \$24.9 million for staff compensation and benefits in fiscal year 2017; \$8.8 million one-time for the Board of Regents' Scholarship program; \$5 million ongoing for market demand programs; \$5 million one-time for performance-based allocations; and \$2.5 million ongoing to expand programs at the Utah Applied Technology College campuses. The total state portion of fiscal year 2017 higher education funding increased by 4.9 percent, compared to fiscal year 2016.

Social Services. During the 2016 General Session, the Legislature appropriated \$88.8 million in new state funding for social service programs. The largest appropriations included \$38.7 million for Medicaid caseload growth in fiscal years 2016 and 2017; \$8 million for the Division of Services for People with Disabilities (DSPD) to increase salaries for direct care staff who provide services to DSPD clients, fund the additional needs of existing Medicaid waiver clients; and reduce the waiting list for services; \$6.4 million for local mental health Medicaid match; and \$2.7 million for Medicaid physician, nursing home, and dental reimbursement rates. The Legislature passed a provision to expand Medicare to certain low income and at-risk individuals. The state portion of the ongoing cost of the Medicaid expansion to the General Fund will be \$15 million per year. The state funding will be augmented by federal revenue and restricted funds. An additional \$1 million one-time was provided to add 70 additional children to a pilot program that expands Medicaid coverage for children with disabilities and complex medical conditions. During the General Session, the Legislature passed a law that moves the Utah State Office Rehabilitation from the State Board of Education to the Department of Workforce Services. Because of the move, the office will now be funded through the General Fund instead of the Education Fund. A restricted account was set up to facilitate the transition between funding sources.

Infrastructure. In addition to the \$114 million in appropriations for higher education capital projects, \$37 million was appropriated for other capital development projects. These projects include \$21.5 million for the Hill Air Force Base Falcon Hill Software Building (a non-state project), \$6 million for the Environmental Quality Technical Support Center, \$4.2 million for the expansion of the State Archives storage vault, \$2.5 million in other non-state projects, \$2.1 million for the State Developmental Center, and \$1 million for the Weber Valley Multi-Use Youth Center. The State also increased ongoing funding for capital improvements to existing facilities, including higher education facilities, by \$6.3 million. During the 2016 General Session, the Legislature passed Senate Bill 80, *Infrastructure Funding Amendments*, which shifts 20 percent of an existing 1/16 percent sales tax earmark from transportation to the Water Infrastructure Restricted Account beginning in fiscal year 2018. The remaining portion of the earmark will be incrementally shifted over to water infrastructure over a five year period. A separate 1/64 percent sales tax earmark for transportation was eliminated, which will leave an additional \$8.9 million in the General Fund in fiscal year 2017.

Employee Compensation. During the 2016 Legislative Session, \$22.7 million was appropriated from the General Fund and Education Fund for non-higher education state employee salary and benefit increases in fiscal year 2017. The Legislature approved the equivalent of a 2 percent salary increase for state employees. In addition to the compensation general increases, \$8.2 million was provided for health insurance cost increases.

State Employee Other Postemployment Benefit Plan. The annual required contribution (ARC) for the State Employee Other Postemployment Benefit (OPEB) plan was \$29.1 million. The Legislature considered this ARC when establishing the OPEB budget for fiscal year 2017. The ARC represents a level of funding that, if paid on an ongoing basis, is actuarially projected to fund the benefits over a period of twenty years.

AWARDS AND ACKNOWLEDGEMENTS

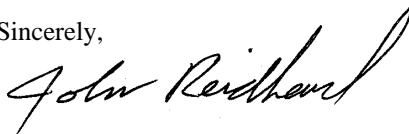

The Government Finance Officers Association (GFOA) awarded the *Certificate of Achievement for Excellence in Financial Reporting* to the State of Utah for its comprehensive annual financial report for the fiscal year ended June 30, 2015. This was the thirty-first consecutive year the State has achieved this prestigious award.

In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current comprehensive annual financial report continues to meet the Certificate of Achievement Program's requirements, and we are submitting it to GFOA to determine its eligibility for another certificate. We are committed to this effort, and we intend to maintain a highly qualified and professional staff to make this certification possible.

The preparation of this report would not have been possible without the efficient and dedicated service of the entire staff of the Division of Finance, Department of Administrative Services. We also express our gratitude to the budget and accounting officers throughout state government and the Office of the Utah State Auditor for their assistance.

Sincerely,

A handwritten signature in black ink, appearing to read "John Reidhead". The signature is written in a cursive style with a large, sweeping initial "J".

Governor, State of Utah

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Utah (State) as of and for the year ended June 30, 2016, and the related notes to the financial statements, which collectively comprise the State's basic financial statements, as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We did not audit the financial statements of the Public Employees Health Program, the University of Utah Hospital and Clinics (UUHC) and component units, or the Utah State University Research Foundation. These entities collectively represent 23 percent of the assets, 17 percent of the net position, and 41 percent of the revenues of the aggregate discretely presented component units. Also, we did not audit the financial statements of Utah Retirement Systems, which represent 64 percent of the assets, 63 percent of the net position/fund balances, and 15 percent of the revenues/additions of the aggregate remaining fund information. The financial statements for these entities were audited by other auditors whose reports have been furnished to us, and our opinions, insofar as they relate to the amounts included for these entities, are based solely on the reports of the other auditors. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal

control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, based on our audit and the reports of other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State as of June 30, 2016, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the following information—1) management’s discussion and analysis (pages 17–29) and 2) the budgetary comparison schedules and information about the State’s pension plans, other postemployment benefit plans, and infrastructure assets reported using the modified approach (pages 142–163)—be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management’s responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the State’s basic financial statements. The supplementary information, such as the combining and individual fund financial statements and schedules, and the other information, such as the introductory and statistical sections, are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The combining and individual fund financial statements and schedules (pages 167–233) are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America by us and other auditors. In our opinion, based on our audit, the procedures performed as described above, and the reports of the other auditors, the combining and individual fund financial

statements and schedules are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The introductory and statistical sections (pages 1–12 and 237–275, respectively) have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

Other Reporting Required By *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report, dated November 8, 2016, on our consideration of the State’s internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the State’s internal control over financial reporting and compliance.

Office of the Utah State Auditor

Office of the Utah State Auditor
November 8, 2016

INTRODUCTION

The following is a discussion and analysis of the State of Utah's financial performance and condition, providing an overview of the State's activities for the fiscal year ended June 30, 2016. Please read it in conjunction with the transmittal letter in the Introductory Section of this report and with the State's financial statements that follow this section.

HIGHLIGHTS

Government-wide

- Total assets and deferred outflows of resources of the State exceeded liabilities and deferred inflows of resources by \$23.595 billion (reported as net position). Of this amount, \$2.180 billion (unrestricted net position) may be used to meet the government's ongoing obligations while \$21.415 billion is restricted for specific uses or invested in capital assets.
- The State's total net position increased by \$888.9 million or 3.9 percent over the prior year. Net position of governmental activities increased by \$783.8 million or 4 percent. Net position of business-type activities increased by \$105.1 million or 3.3 percent.

Fund Level

- The governmental funds reported combined ending fund balances of \$5.421 billion, an increase of \$55.6 million in comparison with the prior year. Approximately 33 percent or \$1.792 billion of the ending fund balance is considered unrestricted (committed, assigned, or unassigned) and is available for spending either at the government's discretion or upon legislative approval.
- The General Fund ended the fiscal year with a \$7.2 million unassigned fund balance. This unassigned fund balance is after statutory transfers of \$8.8 million to the Medicaid Budget Stabilization Account, \$2.4 million to the General Fund Budget Reserve Account (Rainy Day Fund), and \$2.4 million to the Wildland Fire Suppression Fund.
- The Education Fund ended the year with zero dollar surplus by using \$2.2 million of the \$100.5 million Education Fund budgeted revenues set aside for fiscal year 2017. Because there was no revenue surplus, there were no statutory transfers from the Education Fund to the Education Budget Reserve Account.
- The State's stabilization accounts, the General Fund Budget Reserve Account (Rainy Day Fund), Medicaid Budget Stabilization Account, and Education Budget Reserve Account, ended the fiscal year with balances of \$143.6 million, \$25.9 million and \$349.5 million, respectively.
- Sales tax revenues in the governmental funds increased \$98.5 million or 4.5 percent, compared to \$83.1 million or 3.9 percent increase in the prior year. Total tax revenues increased \$30 million or 1.4 percent in the General Fund and \$155.2 million or 4.3 percent in the Education Fund.

Long-term Debt

- The State's long-term bonded debt decreased a net \$547 million or 11.5 percent. General obligation bonds for the primary government decreased \$364.5 million or 12.4 percent, while revenue bonds for the primary government decreased \$182.5 million or 10.1 percent.

OVERVIEW OF THE FINANCIAL STATEMENTS

This report includes the State's Basic Financial Statements, Required Supplementary Information, and Supplementary Information. The Basic Financial Statements include three components: government-wide financial statements, fund financial statements, and notes to the financial statements.

Government-wide Statements — Reporting the State as a Whole

The Statement of Net Position and the Statement of Activities beginning on page 33 together comprise the *government-wide financial statements*. These statements provide a broad overview of the State's finances as a whole with a long-term focus and are prepared using the *full-accrual* basis of accounting, similar to private-sector companies. This means all revenues and expenses are recognized regardless of when cash is received or spent, and all assets, deferred outflows of resources, liabilities, and deferred inflows of resources, including capital assets and long-term debt, are reported at the entity level. The government-wide statements report the State's *net position* – the difference between assets and deferred outflows of resources, compared to liabilities and deferred inflows of resources – and how it has changed from the prior year. Over time, increases and decreases in net position measure whether the State's overall financial condition is getting better or worse. In evaluating the State's overall condition, however, additional non-financial factors should be considered such as the State's economic outlook, changes in its demographics, and the condition of its capital assets and infrastructure. The government-wide statements report three activities:

- *Governmental Activities* – Most of the State's basic services fall under this activity including education, transportation, public safety, courts, corrections, health, and human services. Taxes and federal grants are the major funding sources for these programs.
- *Business-type Activities* – The State operates certain activities much like private-sector companies by charging fees to customers to cover all or most of the costs of providing the goods and services. Student loans, unemployment compensation, water loan programs, and liquor sales are examples of business-type activities.
- *Component Units* – A number of entities are legally separate from the State, yet the State remains financially accountable for them. Colleges and Universities, Utah Communications Authority, and Utah State Fair Corporation are examples of component units.

Fund Financial Statements — Reporting the State's Most Significant Funds

The fund financial statements beginning on page 38 provide detailed information about individual major funds, not the State as a whole. A fund is a group of related accounts that the State uses to keep track of specific resources that are segregated for a specific purpose. Some funds are required by law to exist, while others are established internally to maintain control over a particular activity. All of the State's funds are divided into three types, each of which uses a different accounting approach:

- *Governmental Funds* – Most of the State's basic services are accounted for in governmental funds and are essentially the same functions reported as *governmental activities* in the government-wide statements. Governmental funds use the *modified accrual* basis of accounting, which measures the flow of current financial resources that can be converted to cash and the balances left at yearend that are available for future spending. This *short-term* view of the State's financial position helps determine whether the State has sufficient resources to cover expenditures for its basic services in the near future.
- *Proprietary Funds* – Proprietary funds include enterprise funds and internal service funds and account for state activities that are operated much like private-sector companies. Like the government-wide statements, proprietary fund statements are presented using the *full-accrual* basis of accounting. Activities whose customers are mostly outside of state government (e.g., water loans to local governments) are accounted for in *enterprise funds* and are the same functions reported as *business-type activities*. Thus, the *enterprise fund* financial statements reinforce the information reported for *business-type activities* in the government-wide statements, but provide more detail and additional information, such as cash flows. Activities whose customers are mostly other state agencies (e.g., motor pool) are accounted for in *internal service funds*. The internal service fund activities are consolidated with the governmental activities in the government-wide statements because those services predominantly benefit governmental rather than business-type activities.
- *Fiduciary Funds* – Fiduciary funds account for assets that, because of trust relationships, can be used only for trust beneficiaries. The State is responsible for ensuring these assets are used for their intended purposes. Fiduciary funds use *full-accrual* accounting, but are *not* included in the government-wide statements because their assets are not available to finance the State's own programs.

Reconciliation between Government-wide and Fund Statements

The financial statements include schedules on pages 40 and 44 that reconcile and explain the differences between the amounts reported for *governmental activities* on the government-wide statements (full accrual basis of accounting, long-term focus) with amounts reported on the *governmental* fund statements (modified accrual basis of accounting, short-term focus). The following are some of the major differences between the two statements:

- Capital assets and long-term debt are included on the government-wide statements, but are not reported on the governmental fund statements.
- Capital outlay spending results in capital assets on the government-wide statements, but is expenditures on the governmental fund statements.
- Bond proceeds result in liabilities on the government-wide statements, but are other financing sources on the governmental fund statements.
- Certain tax revenues that are earned but not yet available are reported as revenue on the government-wide statements, but are deferred inflows of resources (unavailable revenue) on the governmental fund statements.

Notes to the Financial Statements

The notes beginning on page 64 provide additional schedules and information that are essential to a complete understanding of the financial statements. The notes apply to both the government-wide financial statements and the fund financial statements.

Required Supplementary Information (RSI)

Following the Basic Financial Statements are budgetary comparison schedules for major funds with legally adopted budgets and condition assessment data related to infrastructure. In addition, the RSI includes up to ten years of information on the State's pension plans, including schedules on the employer proportionate share of the net pension liability, changes in the net pension liability, and employer contributions. RSI also includes schedules on the funded status and employer contributions for the State's defined benefit Other Postemployment Benefit Plans. RSI further supports the information in the basic financial statements.

Supplementary Information

Supplementary Information includes combining statements for the State's nonmajor governmental, nonmajor enterprise, internal service funds, fiduciary funds, and for nonmajor discretely presented component units. This section also includes schedules which compare budgeted expenditures to actual results at the legal level of control, which is generally the line item level of the *Appropriations Acts*.

Statistical Section

This section provides up to ten years of financial, economic, and demographic information.

Adjustments to Beginning Net Position

As described in Note 2 of the financial statements on page 73, beginning net position was adjusted as noted below. To enhance comparability, all amounts presented for fiscal year 2016 in this discussion and analysis were revised, to reflect these changes as if the changes had been made in the prior year.

- \$1.94 million increase in governmental activities – required by legislation and board action as described in Note 2 of the financial statements on page 73.
- \$367 thousand decrease in business-type activities – implementation of GASB Statement 68 for the Utah Dairy Commission.

FINANCIAL ANALYSIS OF THE STATE AS A WHOLE

Net Position

The State's total net position increased \$888.9 million or 3.9 percent in fiscal year 2016. In comparison, net position in the prior year increased \$601.7 million or 2.7 percent. The increase in total net position reflects an economy that continues to improve and the active management of the State's resources. The change in net position is comprised of the following:

- *Net Investment in Capital Assets* – Total invested in capital assets net of related debt increased \$692.4 million or 4.7 percent as the State's investment in highways and buildings exceeded depreciation and the net additional debt that was incurred to finance capital-related projects.
- *Restricted Net Position* – Total restricted net position increased \$62.1 million or 1.1 percent over the prior year:
 - Restricted net position of governmental activities decreased \$27.6 million or 0.7 percent. The decrease was due to a \$112.1 million or 7.9 percent decrease in the net position of expendable public education as less was set aside for future appropriations. This decrease was partially offset by the following increases. Net assets restricted for transportation increased 61.6 million or 44.2 percent due in part to an increase in unspent restricted revenues from a new 4.9 cent per gallon gas tax and an increase in gallons sold. Nonexpendable public education net assets increased \$22.6 million or 1 percent due to revenues generated from land use and gains on the sale of trust lands in the permanent Trust Lands Fund.

Restricted net position of business-type activities increased by \$89.7 million or 4.5 percent, primarily due to a \$76.6 million increase in the Unemployment Compensation Fund as unemployment compensation revenues exceeded related claims. Restricted net position within Water Loan Programs also increased \$13.1 million due to additional loan capital provided from federal grants and investment income.

- *Unrestricted Net Position* – Total unrestricted net position in governmental activities increased \$122.7 million or 13.8 percent due to the amount unspent and carried forwarded in capital projects. Unrestricted net position in business-type activities increased \$11.7 million or 1 percent because the State provided additional capital for the Water Loan Programs from dedicated sales tax revenues, which was offset by small decreases in other business activities.

State of Utah
Net Position as of June 30
(Expressed in Thousands)

	Governmental Activities		Business-type Activities		Total Primary Government	
	2016	2015	2016	2015	2016	2015
Current and Other Assets	\$ 7,166,486	\$ 7,038,832	\$ 5,571,153	\$ 5,950,516	\$ 12,737,639	\$ 12,989,348
Capital Assets	18,027,135	17,639,960	90,715	91,945	18,117,850	17,731,905
Total Assets	\$ 25,193,621	\$ 24,678,792	\$ 5,661,868	\$ 6,042,461	\$ 30,855,489	\$ 30,721,253
Deferred Outflows of Resources	\$ 392,288	\$ 155,542	\$ 11,979	\$ 7,927	\$ 404,267	\$ 163,469
Current and Other Liabilities	\$ 1,041,096	\$ 1,002,892	\$ 56,342	\$ 59,265	\$ 1,097,438	\$ 1,062,157
Long-term Liabilities	4,092,443	4,188,850	2,321,605	2,811,033	6,414,048	6,999,883
Total Liabilities	\$ 5,133,539	\$ 5,191,742	\$ 2,377,947	\$ 2,870,298	\$ 7,511,486	\$ 8,062,040
Deferred Inflows of Resources	\$ 112,915	\$ 86,967	\$ 40,802	\$ 30,075	\$ 153,717	\$ 117,042
Net Position:						
Net Investment in Capital Assets	\$ 15,478,397	\$ 14,789,631	\$ 20,384	\$ 16,740	\$ 15,498,781	\$ 14,806,371
Restricted	3,849,854	3,877,468	2,065,552	1,975,859	5,915,406	5,853,327
Unrestricted	1,011,204	888,526	1,169,162	1,157,416	2,180,366	2,045,942
Total Net Position	\$ 20,339,455	\$ 19,555,625	\$ 3,255,098	\$ 3,150,015	\$ 23,594,553	\$ 22,705,640
Percent change in total Net Position from prior year	4.0 %		3.3 %		3.9 %	

The largest component of the State's net position, 65.7 percent, reflects investments in capital assets (e.g., land, buildings, equipment, intangible assets, roads, and other infrastructure) less the outstanding debt issued to finance those assets. These types of assets are not available for future spending, nor can they be readily liquidated to pay off their related liabilities. Resources needed to repay capital-related debt must be provided from other sources.

Restricted net position comprises 25.1 percent of total net position and is subject to constitutional, legal, or external constraints on use. Net position that is restricted by the *Constitution of Utah* includes individual income and corporate income taxes that can be used only for public and higher education costs and proceeds from fees, taxes, and other charges related to motor vehicles that can be used only for transportation expenses.

The remaining balance of unrestricted net position may be used to meet the State's ongoing obligations, though certain laws and internally imposed commitments or assignments of resources further limit the purposes for which much of the net position may be used.

The following schedule and charts summarize the State's total revenues, expenses, and changes in net position for fiscal year 2016:

(Charts on next page.)

State of Utah Total Revenues | FY 2016 State of Utah Total Expenses | FY 2016

Changes in Net Position

This year the State received 54.2 percent of its revenues from state taxes and 29.7 percent of its revenues from grants and contributions, primarily from federal sources. In the prior year, state taxes accounted for 52.7 percent and grants and contributions were 31.1 percent of total revenues. Charges for goods and services such as licenses, permits, liquor sales, park fees, and court fees, combined with other miscellaneous collections, comprised 16.1 percent of total revenues in fiscal year 2016, and the same percentage in fiscal year 2015.

Governmental Activities

The State’s total governmental revenues from all sources increased \$99.4 million or 0.9 percent. Tax revenues increased \$242.3 million or 3.7 percent due to continued improvement in the economy. These increases are similar to the increase at the fund level. However, due to differences in measurement focus and timing of collections, the increase at the government-wide level should not be used to predict future increases at the fund statement or budget level. With the exception of Higher Education and Transportation, as discussed below, other significant changes in governmental activities’ revenues and expenses mirror the changes in the governmental funds. For further discussion, see the section entitled “Financial Analysis of the State’s Governmental Funds” on page 23.

- *Higher Education* – Expenses increased \$133 million, as compared to the prior year, due to an increase in the amount spent by the primary government for building projects completed and transferred to colleges and universities. When these buildings are completed, ownership is transferred to the colleges and universities and reported as expenses on the government-wide statements. However, there is no impact on the governmental fund statements.
- *Transportation* – Expenses increased \$28.5 million, as compared to the prior year, due to a decrease in the amount spent for capital outlay (i.e. land, state roads, and bridges). In the prior year, expenses were lower because the amount expended for capital outlay was higher. The amount expended for capital outlay is not reported as expenses but as an asset on the government-wide statements.

The following table shows to what extent program revenues (charges for services and grants) covered program expenses. For fiscal year 2016, program revenues covered \$4.834 billion, or 43.3 percent of \$11.154 billion total program expenses. For the remaining \$6.320 billion or 56.7 percent of program expenses, the State relied on state taxes and other general revenues.

(Table on next page)

State of Utah
Net Cost of Governmental Activities

(Expressed in Thousands)

	Program Expenses	Less Program Revenues	Net Program (Expenses) / Revenues		Program Revenues as a Percentage of Program Expenses	
			2016	2015	2016	2015
General Government	\$ 457,564	\$ 276,688	\$ (180,876)	\$ (76,510)	60.5 %	82.7 %

Interest and Charges on Long-term Debt	93,598	—	(93,598)	(98,442)	0.0 %	0.0 %
Total Governmental Activities	\$ 11,153,855	\$ 4,833,744	\$ (6,320,111)	\$ (5,615,450)	43.3 %	46.9 %

Business-type Activities

Changes in the State's business-type activities mirror the changes noted in the State's proprietary funds, except that the State's proprietary funds provide detail summarized by program or fund, while the business-type activity is presented overall. The changes in the State's proprietary funds are detailed in the section entitled "Financial Analysis of the State's Proprietary Funds" on page 27. Overall, revenues from the State's business-type activities increased \$3.5 million or 0.4 percent from the prior year. Other general revenues increased \$45.3 million due to a reclassification of investment income to other general revenues from operating grants and contributions. This change was made to comply with applicable accounting standards. Charges for services increased slightly by \$546 thousand. These increases were offset by a \$43.8 million decrease in operating grants and contributions mainly due to the reclassification of investment income, as described above. Total expenses for the State's business-type activities increased \$66.1 million or 11.2 percent. This increase was primarily due to a \$42.8 million increase in expenses in the Student Assistance Programs related to an increase in interest expense as a result of a significant increase in student loans receivable in the prior year and corresponding increase in student loan revenue bonds and notes payable. Expenses related to liquor retail sales also increased \$17.8 million.

All of the State's business-type activities operate primarily from program revenues, except for the Water Loan Programs and the Agriculture Loan Fund that by law receive dedicated sales tax revenues and the Community Impact Loan Fund that receives federal mineral lease revenues transferred from the General Fund to provide additional capital for loans. Accounting standards require unemployment taxes that are collected from employers and deposited in the Unemployment Compensation Fund to be reported as charges for services rather than taxes. Therefore, taxes in the business-type activities are comprised entirely of sales tax revenues in the water and agriculture loan programs.

FINANCIAL ANALYSIS OF THE STATE'S GOVERNMENTAL FUNDS

Adjustments to Beginning Fund Balances

As described in Note 2 of the financial statements on page 73, beginning fund balances of governmental funds were adjusted as noted below. To enhance comparability, all amounts presented for fiscal year 2015 in this discussion and analysis were restated to reflect these changes, as if the changes had been made in the prior year.

- \$3.472 million increase in General Fund – required by legislation and board action.
- \$506 thousand increase in Education Fund (major special revenue fund) – required by legislation and board action.
- \$2.952 million decrease in Transportation Fund (major special revenue fund) – required by legislation and board action.
- \$914 thousand increase in Miscellaneous Special Revenue (nonmajor special revenue fund) – reclassification of the Water Commissioner Fund from a fiduciary fund to a nonmajor special revenue fund, as required by legislation.

Fund Balances

At June 30, 2016, the State's governmental funds reported combined ending fund balances of \$5.421 billion. Of this amount, \$2.415 billion or 44.6 percent is nonspendable, either due to its form or legal constraints, and \$1.214 billion or 22.4 percent is restricted for specific programs by external constraints, constitutional provisions, or contractual obligations. Unspent bond proceeds, revenue restricted for public education, revenue that derives from the operation of motor vehicles on public highways, and mineral lease revenues are included in restricted fund balance. An additional \$1.305 billion or 24.1 percent of total fund balance has been committed to specific purposes. Committed amounts cannot be used for any other purpose unless approved by the Legislature. An additional \$479 million or 8.8 percent of total fund balance has been assigned to specific purposes, as expressed by legislative intent. The remaining \$7.2 million or 0.1 percent of fund balance is unassigned and available for future appropriations.

State of Utah
Governmental Fund Balances as of June 30, 2016
(Expressed in Thousands)

	General Fund	Education Fund	Transportation Fund	Transportation Investment Fund	Trust Lands Fund	Nonmajor Funds	Total

Restricted	38,124	848,157	206,811	2,393	—	118,080	1,213,565
Committed	546,782	—	51,959	480,070	—	226,501	1,305,312
Assigned	132,126	—	—	—	—	347,321	479,447
Unassigned	7,196	—	—	—	—	—	7,196
Total	\$ 858,154	\$ 848,157	\$ 272,760	\$ 482,463	\$ 2,267,538	\$ 691,902	\$ 5,420,974
Percent change from prior year	(5.8)%	(15.4)%	30.8 %	(15.3)%	1.0 %	61.6 %	1.0 %

General Fund

The General Fund's total fund balance decreased by \$53.3 million or 5.8 percent in fiscal year 2016. The General Fund ended the year with a \$7.2 million surplus, or unassigned fund balance due to the lapsing of unspent budgeted dollars. In the prior year, the General Fund ended the year with a zero dollar surplus, or unassigned fund balance.

Specific changes in the General Fund balance included the following:

- Nonspendable fund balance increased by \$9.3 million or 7.5 percent. Prepaid items increased \$9.8 million due to increases in payments for accountable care organization (ACO), substance abuse, mental health, Children's Health Insurance Plan (CHIP), and dental programs – all within the Medicaid program that require payments in advance. This increase was offset by slight decreases in the long-term portion of loans receivable and inventory.
- Restricted fund balance increased by \$3.8 million or 11.2 percent due to increases in revenues set aside for specific purposes due to constraints that are imposed externally or by law.
- Committed fund balance increased by \$50 million or 10.1 percent due in part to a \$23.3 million increase in agency carry-forward monies. Monies set aside for specific purposes increased \$15.5 million. The remaining increase was due to yearend statutory transfers to the Medicaid Budget Stabilization Account (\$8.8 million) and the General Fund Budget Reserve Account (\$2.4 million). The General Fund Budget Reserve Account ended the year with a balance of \$143.6 million.
- Assigned fund balance decreased by \$123.7 million or 48.4 percent. The decrease was primarily due to a \$116.5 million decrease in the amount set aside for next year's budget, in addition to small decreases in various assigned sources.

Total tax collections in the General Fund increased \$30 million or 1.4 percent. Sales and use tax increased \$59 million, or 3.4 percent. Other taxes decreased \$29 million or 8.1 percent primarily due to a \$40.6 million decrease in severance tax as a result of lower energy prices and a decline in production. This decrease was offset by a \$13.1 million increase in insurance premium tax. Overall, sales tax revenue in all governmental funds increased \$98.5 million or 4.5 percent due to moderate growth in the Utah economy.

Total General Fund non-tax revenues increased \$32.6 million or 0.9 percent, explained as follows: Federal contracts and grants increased \$97.2 million or 3.7 percent primarily due to a \$90.5 million increase in federal funding for the CHIP and Medicaid Programs and a \$6.2 million increase in federal funds provided for family health and preparedness. Additional details regarding the change in federal contracts and grants are provided below in terms of the corresponding changes in expenditures. Charges for services increased \$16.7 million, or 3.7 percent driven by demand for government services. These increases were offset by the decreases in other non-tax revenue as follows. Federal mineral lease revenue decreased \$69.4 million or 50.1 percent due to lower

energy prices and a decline in production. Miscellaneous and other revenue decreased \$13.1 million or 5.1 percent primarily due to \$15.1 million in one-time health insurance rebates received in the prior year, offset by small increases in various other miscellaneous revenues.

Overall, total General Fund expenditures increased by \$249 million or 4 percent as the State responded to an improving economy and an increase in the public's demand for some government services. Significant changes in expenditures occurred in the following areas:

- *Health and Environmental Quality* – Total expenditures increased \$105 million or 4.2 percent due to growth in both Medicaid and CHIP programs. These increases were primarily due to: 1) caseload growth; 2) authorized rate increases, including managed health care; and 3) the costs of federal programs, including Disproportionate Share Hospitals (hospitals that serve a low-income and uninsured patients) and Medicare Parts B and D.
- *Higher Education* – Total expenditures increased \$53.9 million or 5.9 percent due to an increase in state appropriations. Funding was provided for higher education employee compensation and benefit increases. Major new state-funded system-wide initiatives included: 1) \$9 million for performance-based funding; 2) \$4.5 million for the Engineering Initiative; 3) \$4 million for Research and Graduate programs; and 4) \$3 million for the Board of Regents' Scholarship. Other initiatives included: 1) \$4.9 million for operations and maintenance of new state-funded buildings; 2) \$3 million for UCAT campus equity funding; and 3) \$1.9 million for the Math Competency Initiative. The Utah Education and Telehealth Network was provided an additional \$9.8 million. The balance of the increase resulted from smaller increases at the institution level.
- *Human Services and Juvenile Justice Services* – Total expenditures increased \$41.8 million or 5.8 percent due in part to a \$27.1 million increase in services for people with disabilities, as additional funding was provided for an increase in salaries for direct care service workers. Expenditures also increased \$5.7 million for substance abuse and mental health treatment programs, which included \$4.5 million for the Justice Reinvestment Initiative. This initiative holds offenders accountable while securing our communities in a way that takes into account individual risks and treatment needs. The balance of the increase was due to additional funding provided for services and cost items across all programs.
- *General Government* – Total expenditures increased \$30.4 million or 8.7 percent primarily due to a \$21.5 million increase to provide funding for the Hill Air Force Base Falcon Hill Software building (a non-state project). An additional \$2 million was spent to increase payments to local jails housing state offenders. Attorney General expenditures increased \$5 million, including \$2 million to expand staff and provide salary equity adjustments, \$1.1 million for a new information technology case management system, and \$1 million for litigation related to the protection of the sage grouse. The balance of the increase in general government expenditures resulted from smaller increases in various other programs.

In addition to the significant changes in expenditures described above, the increase in overall expenditures is also due to a \$25.4 million increase as a result of a 2.25 percent salary increase for most state employees, a 0.75 percent market comparability adjustment, and increases in health insurance costs.

Budgetary Highlights — General Fund

The Legislature adopted the initial fiscal year 2016 budget during the 2015 General Session (January to March 2015). The original consensus revenue estimates in the General Fund budget at the start of fiscal year 2016, excluding department-specific revenue sources such as federal grants and departmental collections, and miscellaneous transfers, were 2.7 percent higher than the final fiscal year 2015 budget. The increase was primarily due to growth in the sales and use tax due to the improving economy. Budgeted expenditures were 10.9 percent higher than the final fiscal year 2015 budget. The Governor and Legislature were able to balance the original fiscal year 2016 budget with revenue growth, one-time monies, legislative changes to revenue, and targeted base budget reductions.

The fiscal year 2016 budget was again addressed during the 2016 General Session of the Legislature (January to March 2016). General revenue estimates had decreased \$63.8 million from the original consensus estimates adopted during the 2015 General Session due to projected decreases in sales tax, severance tax, and insurance premium tax. Despite the projected decreases, revenue estimates and base budget resources allowed the Legislature to set aside \$47.7 million for fiscal year 2017 appropriations. The Governor called the Legislature into a Third Special Session in July 2016, during which an additional \$10 million was set aside for fiscal 2017 appropriations. In the end, taxes and other general revenues ended the year \$14.2 million above final budgeted amounts.

Final budgets of department-specific revenue sources decreased from original budgets primarily due to a decrease in expected federal contracts and grants. Actual department-specific revenues decreased from final budgets due to a decrease in the state mineral lease revenue. Final budgets for many of the departmental-specific revenue sources and related expenditures such as federal grants, departmental collections, and miscellaneous revenues, are generally revised based on actual collections. The

difference between final budgeted expenditures and actual expenditures is primarily due to nonlapsing and unspent restricted funds that will be carried forward to the next year.

Education Fund

Restricted fund balance in the Education Fund decreased by \$154.5 million or 15.4 percent from the prior year as expenditures and transfers out exceeded revenues. The amount unspent and carried forward for education decreased by \$7.1 million. Amounts set aside for fiscal year 2017 appropriations decreased by \$107.9 million. Tax accruals restricted by law for education increased by \$14.1 million.

In addition, the Education Fund ended the year with a zero dollar surplus by using \$2.2 million restricted and budgeted to be used for fiscal year 2017 to cover revenue shortfalls that occurred in fiscal year 2016. There were no statutory transfers to the Education Fund Budget Reserve Account, a budget stabilization account, which ended the year with a balance of \$349.5 million.

Overall, total revenue in the Education Fund increased by \$177.5 million or 4.3 percent. Individual income tax increased by \$181.6 million or 5.7 percent primarily due to an economy that is growing steadily and sustainably. Corporate income tax decreased \$26.4 million or 7.2 percent largely due to weaker corporate profits caused by the stronger dollar and diminished revenue growth. Charges for services increased by \$8.9 million due to an increase in reimbursements that were previously recorded as a reduction of expenditures, but were re-evaluated. Investment income increased by \$5.9 million. Federal contracts and grants increased by \$5.4 million. Miscellaneous other revenue increased by \$1.8 million due to an increase in liquor sales allocated by law for school lunch.

Overall, expenditures increased by \$215.3 million or 6.4 percent in the Education Fund. The increase was primarily due to a \$170.7 million increase in the Minimum School Program to provide for student enrollment growth and to increase the weighted pupil unit value, which is the primary funding mechanism for public education. Expenditures also increased by \$18.8 million for the School Building Program. Expenditures for Initiative Programs increased by \$8.7 million as grants were provided to low performing schools. Expenditures for Child Nutrition also increased \$7.2 million.

Transportation Fund

Total fund balance in the Transportation Fund increased \$64.2 million or 30.8 percent from the prior year. Restricted fund balance increased by \$61.4 million or 42.3 percent primarily due to an increase in the unspent balance of restricted revenues, mainly an increase in motor and special fuels tax, as explained below. Committed fund balance increased \$2.5 million or 5.1 percent due to an increase in unspent sales and use tax collections for highway projects at yearend. Assigned fund balance decreased by \$150 thousand or 100 percent as unspent general revenues from the prior year were utilized. Nonspendable inventory increased by \$385 thousand or 2.8 percent.

Overall, transportation revenues increased by \$24.5 million or 2.6 percent. The increase resulted from the following changes in revenue as compared to the prior year:

- Motor and special fuels tax increased \$53.9 million or 14.5 percent due in part to a new 4.9 cent per gallon gas tax and also due to an increase in gallons sold as consumers took advantage of lower gas prices.
- Miscellaneous and other revenues increased \$18 million or 51 percent due to an increase in revenue from local governments provided for construction projects.
- Sales and use tax revenues statutorily designated for transportation projects increased \$2.6 million or 6 percent as a result of an improving economy.
- Charges for services decreased by \$44.2 million or 49.2 percent, primarily due to \$30 million of internal transactions between divisions that were re-evaluated and eliminated. The remaining decrease was due to certain revenue related to local governments that was re-evaluated and is no longer reported in the Transportation Fund, but was moved to an agency fund.
- Federal contracts and grants decreased by \$8.4 million or 2.6 percent as a result of timing differences related to highway construction projects.

Expenditures for the Transportation Fund decreased by \$68.4 million or 7.6 percent in part due to \$30 million elimination of transactions between divisions, as described above in terms of the decrease in revenue. The balance of the decrease was due to timing differences related to highway construction projects, as explained below. Net other financing sources (uses) increased by \$8.6 million or 9.9 percent due to a decrease in transfers out for bond payments.

Authorized federal funding for highway construction remains relatively stable from year to year. However, the spending of state and federal revenue reflects the timing of highway construction projects, which is impacted by a variety of circumstances such

as environmental studies or existing weather conditions. In addition, the Department of Transportation has discretion on allocating federal funds among projects, which impacts the amount of federal revenue reported in the Transportation Fund.

Transportation Investment Fund

Fund balance in the Transportation Investment Fund decreased by \$87.1 million or 15.3 percent from the prior year. Restricted fund balance decreased a slight \$430 thousand or 15.2 percent due to a change in the fair value of investments. Committed fund balance decreased by \$86.7 million or 15.3 percent due to the increase in expenditures which utilized sales and use tax revenue that was unspent in the prior year.

Overall, revenues increased \$39.8 million or 7.8 percent. Sales and use tax revenues, statutorily reallocated from use in the General Fund to use for highway projects, increased \$36.7 million or 8.6 percent. License, permits and fees increased \$3.3 million or 4.3 percent as the result of an increase in motor vehicle registration fees. Other financing sources (uses) decreased by \$47.8 million or 14.3 percent due to an increase in transfers out for bond payments. Expenditures increased by \$21.8 million or 6.8 percent from the prior year due to increased spending on highway construction projects.

Trust Lands Fund

The fund balance of the permanent Trust Lands Fund increased by \$22.6 million or 1 percent from the prior year. The increase resulted from revenue of \$32 million generated from land use and \$23.3 million from gains on the sale of land. This revenue was offset by a \$34.5 million decrease in investment values because of general market conditions. The permanent fund also generated \$49.9 million of cash investment earnings that is earmarked for distribution to local school districts. The principal in the fund is held in perpetuity (nonspendable) with earnings restricted primarily to support public education.

FINANCIAL ANALYSIS OF THE STATE'S PROPRIETARY FUNDS

Student Assistance Programs

The net position of the Student Assistance Programs decreased \$3.4 million or 0.93 percent from the prior year due to changes in total assets, liabilities and deferred inflows of resources. Total assets decreased \$479.8 million primarily due to a decrease in student loans receivable and interest receivable. These programs received \$507 million in principal payments on student loans during the fiscal year. Total liabilities decreased \$486.6 million primarily due to decreases in revenue bonds payable and line of credit because the programs paid \$483.7 million in principal on student loan revenue bonds and notes, and line of credit during the fiscal year. These decreases were offset by a \$10.2 million increase in deferred inflows of resources as a result of an increase in the fair value of interest rate swap agreements. Of total net position of \$364.7 million, \$320.8 million is restricted for use within the programs by bond covenants or federal law.

Unemployment Compensation Fund

The State's average unemployment rate for the fiscal year 2016 increased slightly from the prior year. Employer tax revenue decreased \$55 million or 18.6 percent due to an overall contribution rate decrease from the prior year. Expenses increased \$5.4 million or 3.1 percent due to a slight increase in claims volume. Employer taxes and other revenues exceeded benefit payments resulting in the increase of net position of \$76.6 million or 7.4 percent. The entire net position of \$1 billion is restricted for use within the programs by state and federal law.

Water Loan Programs

The net position of the Water Loan Programs increased \$35.9 million or 3.9 percent from the prior year. Additional capital for loans was provided from \$29.3 million in dedicated sales tax revenues, \$14 million in investment income, and \$11.3 million in federal grants. These increases were offset by program grant expenses of \$9 million, other operating expenses of \$4.2 million, and interest expense of \$1.7 million. Of total net position of \$949.6 million, \$435.7 million is restricted for use within the Water Loan Programs by federal grant requirements and \$160.6 million is restricted pursuant to bond agreements within the programs.

Community Impact Loan Fund

The net position of the community Impact Loan fund decreased \$4.6 million or 0.7 percent from the prior year, primarily due to investment income of \$8.6 million and federal contracts and grants of \$5.1 million offset by \$17.5 million transferred out of the fund for community development programs. There is no restriction on the fund's net position.

CAPITAL ASSET AND LONG-TERM DEBT ADMINISTRATION**Capital Assets**

The State's capital assets increased a net \$385.9 million during the year. The change consisted of net increases in infrastructure (i.e., state roads and bridges) of \$234.6 million; land and related assets of \$66.2 million; construction in progress of \$56.6 million; building and improvements of \$21.1 million; and machinery and equipment of \$9.8 million. There was a net decrease in software of \$2.4 million. Several buildings financed by the State are actually owned by the colleges and universities, which are discrete component units of the State. Therefore, while the capital assets are on the component unit's financial statements, any outstanding debt issued by the State to finance construction of those assets is reported as a liability of the State's governmental activities. This in turn reduces unrestricted net position. As of June 30, 2016, the State had \$196.9 million of outstanding debt related to capital assets of component units.

At June 30, 2016, the State had commitments in capital projects funds of \$284.9 million for building projects and \$217.6 million for highway construction and improvement projects. The State also had commitments of \$404.9 million for road construction and other contract commitments in the Transportation Fund. Funding for the commitments will come from existing resources in these funds and from future appropriations and bond proceeds.

The State has adopted an allowable alternative to reporting depreciation for state roads and bridges (infrastructure assets) maintained by the Utah Department of Transportation (UDOT). Under this alternative method, referred to as the "modified approach," UDOT must maintain an asset management system and demonstrate that the infrastructure is being preserved at or above established condition levels. Infrastructure assets accounted for under the modified approach are not depreciated, and maintenance and preservation costs are expensed.

The State's established condition level for state roads is to maintain a certain percentage of mileage at a "fair" or better condition. The Interstate system has a target of 95 percent rated as "fair" or better, Level 1 roads (over 1,000 Average Annual Daily Traffic) at 90 percent, and Level 2 roads (under 1,000 Average Annual Daily Traffic) at 80 percent. The most recent biannual condition assessment completed in 2015 indicated that 99.5 percent of Interstate and 92.7 percent of Level 1 roads were in "fair" or better condition. These results reflect maintaining Interstate and Level 1 roads above target percentages and are consistent with calendar year 2014, when 99.7 percent of Interstate and 91.7 percent of Level 1 were assessed as "fair" or better condition. In 2013 Level 2 roads were redefined to a 1,000 Average Annual Daily Traffic threshold (previously 2,000), resulting in the Level 2 percentage of roads at a "fair" or better condition dropping below the target in 2014. The 2015 assessment of Level 2 roads indicate that 79.2 percent were in "fair" or better condition, compared to 75.3 percent in 2014. The State has corrective processes in place to meet the Level 2 condition target by the next assessment.

The State's established condition level for bridges is to maintain 50 percent with a rating of "good" and no more than 10 percent of bridges with a "poor" rating. The most recent condition assessment, completed in April 2016, indicated that 70.9 percent and 1.4 percent of bridges were in "good" and "poor" condition, respectively. These results reflect maintaining bridges at a consistent condition level as 2015 when 73 percent of the bridges were assessed as "good" or better, and 1 percent assessed were in "poor" condition.

During fiscal year 2016, the State spent \$343.3 million to maintain and preserve roads and bridges. This amount is 44.1 percent above the estimated amount of \$238.3 million needed to maintain these assets at established condition levels.

More information about capital assets is included in Note 8 on page 106, and more detailed information on the State's modified approach for reporting infrastructure is presented in the Required Supplementary Information on pages 162 and 163.

Long-term Debt

The *Constitution of Utah* allows the State to contract debts not exceeding 1.5 percent of the value of the total taxable property of the State (i.e. constitutional debt limit). The Legislature authorizes general obligation indebtedness within this limit. The *State Appropriation and Tax Limitation Act* (i.e., statutory debt limit) further limits the outstanding general obligation debt of the State to not exceed 45 percent of the maximum allowable state budget appropriation limit. As of June 30, 2016, the general obligation indebtedness of the State was \$2.266 billion below the constitutional debt limit and \$1.378 billion below the statutory debt limit.

Revenue bonds of the State Building Ownership Authority are not backed by the general taxing authority of the State, but are payable from revenue provided through appropriations of the Legislature or other operating revenues. Revenue bonds of the Student Assistance Programs and Water Loan Programs are not backed by the general taxing authority of the State, but are payable solely from specific fees or loan repayments as pledged in the bond indentures.

State of Utah
Net Outstanding Bonded Debt as of June 30
(Expressed in Millions)

	Governmental Activities		Business-type Activities		Total Primary Government		Total Percentage Change
	2016	2015	2016	2015	2016	2015	2015 to 2016
General Obligation Bonds	\$ 2,585.2	\$ 2,949.7	\$ —	\$ —	\$ 2,585.2	\$ 2,949.7	(12.4)%
Revenue Bonds:							
State Building Ownership Auth.	249.5	169.6	78.7	80.0	328.2	249.6	31.5 %
Student Assistance Programs	—	—	1,255.2	1,511.1	1,255.2	1,511.1	(16.9)%
Water Loan Programs	—	—	42.0	47.2	42.0	47.2	(11.0)%
Total Bonds Payable	\$ 2,834.7	\$ 3,119.3	\$ 1,375.9	\$ 1,638.3	\$ 4,210.6	\$ 4,757.6	(11.5)%

Total general obligation bonds payable net of premiums and discounts decreased \$364.5 million. Revenue bonds payable net of premiums and discounts decreased \$182.5 million for an overall net decrease of \$547 million during the fiscal year. The State did not issue general obligation bonds during the fiscal year. The State issued a total of \$98.15 million of revenue bonds to fund capital facility projects.

The State's active management of its resources has helped the State maintain its triple-A rating on general obligation bonds from all three national rating agencies, and double-A rating on lease revenue bonds from two national rating agencies from which ratings were sought. These ratings are the best available and save millions of dollars in interest costs each year because the State is able to obtain very favorable interest rates on new debt. Note 10 beginning on page 109 contains more information about the State's outstanding debt.

ECONOMIC OUTLOOK AND NEXT YEAR'S BUDGET

Original general revenue estimates of the General Fund for fiscal year 2017 are 3.2 percent higher than actual fiscal year 2016 revenues. Original estimates of the Education Fund for fiscal year 2017 are 5.2 percent higher than actual fiscal year 2016 revenues. The Legislature balanced the 2017 budget through projected revenue growth, prior year reserves, and funding reallocations.

Preliminary data for fiscal year 2017 show tax revenues to be in line with estimates. The overall unemployment rate is expected to be 3.7 percent in 2016, a slight increase from the average 2015 rate of 3.5 percent. Taxable retail sales are expected to increase 5 percent in 2016 and increase 5.1 percent in 2017. Personal income is expected to increase 5.7 percent in 2016, and 5.1 percent in 2017. Because these indicators are measured on a calendar year basis, the impact on the State budget will not be fully realized until well into fiscal year 2017. The Governor and Legislature will review the fiscal year 2017 budget again during the upcoming 2017 General Session and take action as necessary to ensure a balanced budget.

CONTACTING THE STATE'S DIVISION OF FINANCE

This financial report is designed to provide our citizens, taxpayers, customers, investors, and creditors with a general overview of the State's finances and to demonstrate the State's accountability for the money it receives. If you have questions about this report or need additional financial information, please contact the Department of Administrative Services: Division of Finance, Financial Reporting Section at 2110 State Office Building, Salt Lake City, UT, 84114, phone (801) 538-3082 or by email to utahcafr@utah.gov. You may also visit our website at: www.finance.utah.gov.

The preceding discussion and analysis focuses on the State's primary government operations. With the exception of a few nonmajor component units, the State's component units each issue separate audited financial statements that include their respective management's discussion and analysis. Component unit statements may be obtained from their respective administrative offices or from the Office of the Utah State Auditor, Utah State Capitol Complex, East Office Building, Suite E310, Salt Lake City, UT 84114 or online at auditor.utah.gov.

Governmental Fund Financial Statements

General Fund

This fund is the principal operating fund of the State. It accounts for all financial resources not accounted for and reported in another fund.

Education Fund

This fund accounts for all corporate and income taxes that support public and higher education in the State. This fund is also used to account for specific revenues and expenditures that support the public elementary and secondary schools.

Transportation Fund

This fund is maintained to account for revenues and expenditures associated with highway construction and maintenance. Principal funding is provided from dedicated highway user taxes, fees, and federal funds.

Transportation Investment Fund

This capital projects fund is used to account for revenues and expenditures associated with the construction and reconstruction of specific state and federal highways. Projects designated for the Transportation Investment Capacity program are accounted for within this fund. Funding is provided from highway general obligation bonds, federal funds, vehicle registration fees, sales and use taxes, and appropriations.

Trust Lands

This permanent fund accounts for land grants and the sale of lands received from the federal Enabling Act. The principal in the fund is perpetual with the earnings used primarily to support public education.

Nonmajor Funds

Nonmajor governmental funds are presented by fund type beginning on page 168.

**Reconciliation of the Balance Sheet — Governmental Funds
To the Statement of Net Position**

June 30, 2016

(Expressed in Thousands)

Total Fund Balances – Governmental Funds..... \$ 5,420,974

The total net position reported for governmental activities in the Statement of Net Position is different because:

Capital assets used in governmental activities are not financial resources and therefore are not reported in the governmental funds: (See Note 8)

Land and Related Non-depreciable Assets	\$ 1,855,935	
Infrastructure, Non-depreciable	13,788,115	
Construction in Progress	847,479	
Buildings, Equipment, and Other Depreciable Assets	2,709,940	
Accumulated Depreciation	<u>(1,265,122)</u>	17,936,347

Deferred inflows of resources are not reported in the governmental funds:

Revenues are not available soon enough after yearend to pay for the current period's expenditures	645,852	
Related to pensions	<u>(95,877)</u>	549,975

Internal service funds are used by management to charge the costs of certain activities, such as insurance, technology services, and fleet operations to individual governmental funds. The assets, deferred outflows of resources, liabilities, and deferred inflows of resources of the internal service funds are included in governmental activities in the Statement of Net Position.

31,362

Deferred outflows of resources are not reported in the governmental funds:

Amount on refunding of bonded debt	27,299	
Related to pensions	<u>340,454</u>	367,753

Other assets not available in the current period and therefore are not reported in the governmental funds:

Other Postemployment Benefit Asset, net	11,789	
Net Pension Asset	<u>475</u>	12,264

Long-term liabilities and related accrued interest are not due and payable in the current period and therefore are not reported in the governmental funds: (See Note 10)

General Obligation and Revenue Bonds Payable	(2,741,623)	
Unamortized Bond Premiums	(92,827)	
Accrued Interest on Bonds Payable	(1,454)	
Pollution Remediation Obligation	(6,401)	
Settlement Obligation	(365)	
Compensated Absences	(182,707)	
Capital Leases	(23,498)	
Other Postemployment Benefit Obligation, net	(3,848)	
Net Pension Liability	<u>(926,497)</u>	<u>(3,979,220)</u>

Total Net Position – Governmental Activities..... \$ 20,339,455

The Notes to the Financial Statements are an integral part of this statement.

**Reconciliation of the Statement of Revenues, Expenditures, and Changes in Fund Balances —
Governmental Funds
To the Statement of Activities**

For the Fiscal Year Ended June 30, 2016

(Expressed in Thousands)

Net Change in Fund Balances – Governmental Funds..... \$ 55,644

The change in net position reported for governmental activities in the Statement of Activities is different because:

Governmental funds report capital outlays as expenditures. However, in the Statement of Activities the cost of those assets is allocated over their estimated useful lives as depreciation expense. The primary government also constructs buildings for component units. When the buildings are completed they are “transferred” to component units and are reported as expenses in the Statement of Activities. This is the amount by which capital outlays of \$724,357 exceeded depreciation expense of \$(99,569) and buildings “transferred” to component units of \$(142,310) in the current period. (See Note 8) 482,478

In the Statement of Activities only the gain/loss on the sale of assets is reported, whereas in the governmental funds, the proceeds from the sales increase financial resources. Thus the change in net position differs from the change in governmental fund balance by the cost of the assets sold. (97,970)

Net effect of revenues reported on the accrual basis in the Statement of Activities that are reported as deferred inflows of resources in the governmental funds, as they are unavailable and do not provide current financial resources. 20,504

Internal service funds are used by management to charge the costs of certain activities, such as insurance, technology services, and fleet operations to individual governmental funds. The net revenue (expense) of the internal service funds is reported with governmental activities. 10,759

Bond proceeds and capital leases provide current financial resources to governmental funds by issuing debt which increases long-term liabilities in the Statement of Net Position. Repayments of bond and capital lease principal are expenditures in the governmental funds, but reduce liabilities in the Statement of Net Position: (See Note 10)

Bonds Issued	\$ (93,625)	
Premiums on Bonds Issued	(4,405)	
Capital Lease Additions	(5,100)	
Payment of Bond Principal	348,576	
Capital Lease Payments	1,889	247,335
	<u>1,889</u>	

Expenditures are recognized in the governmental funds when paid or due for: items not normally paid with available financial resources; and interest on long-term debt unless certain conditions are met. However, the Statement of Activities is presented on the accrual basis and expenses are reported when incurred, regardless of when financial resources are available or expenditures are paid or due. This adjustment combines the net changes of the following balances:

Pollution Remediation Obligation Costs	(1,315)	
Settlement Obligation Costs	4,106	
Compensated Absences Expenses	3,085	
Accrued Interest on Bonds Payable	(395)	
Amortization of Bond Premiums	33,899	
Amortization of Deferred Amount on Refunding of Bonded Debt	(7,383)	
Other Postemployment Benefit Obligation Costs, net	6,399	
Pension Costs, net	26,684	65,080
	<u>26,684</u>	<u>65,080</u>

Change in Net Position – Governmental \$ 783,830

The Notes to the Financial Statements are an integral part of this statement.

Proprietary Fund Financial Statements

Student Assistance Programs

These programs are administered by the State Board of Regents and are comprised of the Utah Higher Education Assistance Authority Student Loan Guarantee Program and the Student Loan Purchase Program. The purpose of these programs is to guarantee the repayment of student loans made by participating lenders to eligible borrowers and service outstanding student loans. Funds are acquired from the sale of bonds, lines-of-credit, and funding notes.

Unemployment Compensation Fund

This fund pays claims for unemployment to eligible recipients and is funded through employer contributions and reimbursements, and federal grants.

Water Loan Programs

These programs provide loans to local governments, water districts, and other entities for the purpose of upgrading water storage facilities and other related structures. Capital for this fund was provided from the General Fund and from general obligation bonds that were repaid with general tax revenues. Additional funds have been generated by issuing water loan recapitalization revenue bonds that are secured by pledged principal and interest payments of specific revolving water resources loan funds.

Community Impact Loan Fund

This fund provides loans to local governments to alleviate the social, economic, and public financial impacts resulting from the development of the State's natural resources. Working capital for this fund is provided from federal mineral lease funds transferred from the General Fund. This fund also administers loans and loan guarantees from federal funds to small businesses under the Small Business Credit Initiative.

Nonmajor Funds

Nonmajor enterprise funds are presented beginning on page 192.

Governmental Activities – Internal Service Funds

These funds are maintained to account for the operation of state agencies that provide goods or services to other state agencies and other governmental units on a cost-reimbursement basis. These funds are presented in more detail beginning on page 204.

Fiduciary Fund Financial Statements

Pension and Other Employee Benefit Trust Funds

These funds are used to account for the defined benefit pension plans and defined contribution plans administered by the Utah Retirement Systems, and the Post-Retirement Benefits Trust Funds, defined benefit other postemployment benefit plans (OPEB Plans), and other employee benefit plans administered by the State.

Investment Trust Fund

This fund is used to account for the investments related to external participants in the Utah State Public Treasurers' Investment Fund.

Private Purpose Trust Funds

These funds are used to report resources of all other trust arrangements under which principal and income benefit individuals, private organizations, or other governments.

Agency Funds

Agency funds account for assets held by the State as an agent for other governmental units, other organizations, or individuals.

Individual funds are presented by fund type beginning on page 214.

Component Unit Financial Statements

Public Employees Health Program

This program provides employee medical and other insurance services predominantly for agencies of the State. It also provides claims processing and insurance services for local governments and other public entities within Utah.

University of Utah and Utah State University

These universities are funded through state appropriations, tuition, federal grants, and private donations and grants. In addition to instruction, these universities provide research and other services. The operations of the University of Utah also include its hospital and clinics.

Nonmajor Component Units

Nonmajor component units are presented beginning on page 230.

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies of the State of Utah conform in all material respects with Generally Accepted Accounting Principles (GAAP) as prescribed by the Governmental Accounting Standards Board (GASB). Preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

A. Reporting Entity

For financial reporting purposes, the State of Utah's reporting entity includes the "primary government" and its "discrete component units." The primary government includes all funds, agencies, boards, commissions, and authorities that are considered an integral part of the State's activities. The State's discrete component units are legally separate organizations for which the State's elected officials are financially accountable.

The GASB has set forth criteria to be considered in determining financial accountability. These criteria include appointing a voting majority of an organization's governing body and either: (1) the ability of the State to impose its will on that organization; or (2) the potential for the organization to provide specific financial benefits to, or impose specific financial burdens on the State.

Where the State does not appoint a voting majority of an organization's governing body, GASB standards require inclusion in the reporting entity if: (1) an organization is fiscally dependent on the State because its resources are held for the direct benefit of the State or can be accessed by the State; and (2) the potential for the organization to provide specific financial benefits to, or impose specific financial burdens on the State. In addition, discrete component units can be other organizations for which the nature and significance of their relationship with the primary government are such that exclusion would cause the financial statements to be misleading.

Except where noted below, the State's discrete component units issue their own separately audited financial statements as special-purpose governments engaged only in business-type activities. These financial statements can be obtained from their respective administrative offices or from the Office of the Utah State Auditor, Utah State Capitol Complex, East Office Building, Suite E310, Salt Lake City, UT 84114 or online at auditor.utah.gov.

Entities such as the local school districts, charter schools, and other local authorities of various kinds that may only partially meet the criteria for inclusion in this report have not been included. The State's support of the public education system is reported in the Education Fund (special revenue fund).

Blended Component Units

A component unit should be reported as part of the primary government and blended into the appropriate funds if: (1) services are provided entirely or almost entirely to the primary government; (2) the governing body is substantively the same as the governing body of the primary government; or (3) the component unit's total debt outstanding is expected to be repaid entirely or almost entirely by the primary government.

Utah State Building Ownership Authority (blended with the primary government's debt service and capital projects funds) — The Authority was created by the Legislature as a body politic and corporate for the sole purpose of financing, owning, leasing, and operating facilities to meet the needs of state government. In addition, any debt is paid entirely with resources of the State. The Board is comprised of three members: the Governor or designee, the State Treasurer, and the Chair of the State Building Board. Separate financial statements are not required or issued for the Authority.

Discrete Component Units

Discretely presented component units are reported in a separate column and/or rows in each of the government-wide statements to emphasize that they are legally separate from the State.

Except for the Utah Communications Authority, Utah Schools for the Deaf and Blind, and the Utah College of Applied Technology, the State appoints at least a majority of the governing board members of each of the State's discrete component units, subject in most cases with consent from the Senate. The Utah Communications Authority, Utah Schools for the Deaf and Blind, and the Utah College of Applied Technology are included in the reporting entity because they meet both the fiscal dependency and financial benefit and burden relationship. The State provides financial support and approves the issuance of debt by Utah Communications Authority. The State approves and modifies the budgets and provides financial support for the Utah Schools for the Deaf and Blind and the Utah College of Applied Technology.

The State has the ability to impose its will on the colleges and universities and the Public Employees Health Program due to the level of budget or day-to-day oversight. The State appointed board members of the Military Installation Development Authority, Heber Valley Historic Railroad Authority, and Utah State Fair Corporation can be replaced at will.

The determination that a discrete component unit is "major" is based on the nature and significance of its relationship to the primary government. The State's major discrete component units are:

Public Employees Health Program — This Program provides employee medical and other insurance services predominantly for agencies of the State. It also provides claims processing and insurance services for local governments and other public entities within Utah. The Program is administered by the Utah State Retirement Board.

University of Utah and Utah State University — These universities are funded primarily through state appropriations, tuition, federal grants, and private donations and grants. In addition to instruction, these universities provide research and other services. The operations of the University of Utah also include its hospital and clinics.

The State's nonmajor discrete component units are:

Utah Communications Authority — This Authority was established by the Utah State Legislature as a quasi-governmental entity. Its purpose is to provide public safety communication services and facilities on a regional or statewide basis for the benefit and use of all state and local governmental agencies.

Utah Schools for the Deaf and the Blind — These Schools provide practical education to individuals with hearing and/or vision impairments. Although not required, these Schools issue separate but unaudited financial statements.

Utah State Fair Corporation — This Corporation is a nonprofit public corporation that operates the State Fair Park and conducts the Utah State Fair and other various expositions and entertainment events.

Colleges and Universities — Weber State University, Southern Utah University, Salt Lake Community College, Utah Valley University, Dixie State University, Snow College, and the Utah College of Applied Technology. Separate audited financial statements are issued for the applied technology colleges within the Utah College of Applied Technology.

Utah Charter School Finance Authority — This Authority was created to provide an efficient and cost-effective method of issuing conduit debt on behalf of charter schools to acquire or construct charter school facilities. The debt is the responsibility of the charter schools, and neither the State nor any political subdivision of the State is obligated for repayment of the debt. Accordingly, this debt is not included as part of the State's reporting entity. No financial statements are required or issued.

Military Installation Development Authority — This Authority is an independent, nonprofit entity whose purpose is to provide for the development and improvement of project areas near military installations throughout the State.

Heber Valley Historic Railroad Authority — This Authority is an independent state agency that maintains and operates a scenic and historic railroad in and around the Heber Valley. The Authority issues a separate publicly available compilation report.

Fiduciary Component Units

Utah Retirement Systems (URS) (pension trust and defined contribution plans) — URS administers pension funds for various public employee retirement systems and plans of the State and its political subdivisions. URS is an independent state agency subject to legislative and executive department budgetary examination and comment. The Utah State Retirement Board, a seven-member board, is established by statute to administer the systems and plans, and to serve as investment trustees of the funds. Six members are appointed by the State with the advice and consent of the Senate, while the State Treasurer serves as the seventh member. Because of the State's trustee responsibilities for these systems and plans, GAAP requires them to be reported as pension trust funds of the primary government rather than discrete component units.

Utah Educational Savings Plan Trust (Private Purpose Trust Fund) — This trust is a non-profit, self-supporting entity that was created as a means to encourage investment in a public trust to pay for future higher education costs. It is administered by the Utah State Board of Regents acting in its capacity as the Utah Higher Education Assistance Authority. Because of the State's trustee responsibilities for this plan, GAAP requires it to be reported as a private purpose trust fund of the primary government rather than a discrete component unit.

In accordance with GAAP, fiduciary funds and component units that are fiduciary in nature are excluded from the government-wide financial statements.

Related Organization (Excluded from Financial Statements)

Utah Housing Corporation — Utah Housing Corporation (UHC) is a statutorily created public corporation. UHC issues bonds to provide capital for housing and home mortgages, especially for low and moderate-income families. Although the Governor appoints eight of the nine members of the governing board, there is no financial accountability. The State does not have the ability to impose its will on UHC and UHC does not provide specific financial benefits to, or impose specific financial burdens on the State.

B. Government-wide and Fund Financial Statements

Government-wide Financial Statements

The Statement of Net Position and Statement of Activities report information on all nonfiduciary activities of the primary government and its component units. Primary government activities are distinguished between *governmental* and *business-type* activities. Governmental activities generally are financed through taxes, intergovernmental revenues, and other nonexchange revenues. Business-type activities are financed in whole or in part by fees charged to external parties for goods or services.

The Statement of Net Position presents the reporting entity's nonfiduciary assets, deferred outflows of resources, liabilities, and deferred inflows of resources, with the difference reported as net position. Net position is restricted when there are constraints either externally imposed or imposed by constitutional provisions or enabling legislation.

The Statement of Activities demonstrates the degree to which the direct expenses of a given activity or segment is offset by program revenues. Direct expenses are those that are clearly identifiable within a specific activity. The State does not allocate general government (indirect) expenses to other activities. Program revenues include: (1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given activity; and (2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular activity. Taxes and other revenues not meeting the definition of program revenues are reported as general revenues.

Fund Financial Statements

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide statements. For governmental and proprietary fund financial statements, the emphasis is on major individual governmental and enterprise funds, with each displayed in a separate column. All remaining governmental and enterprise funds are aggregated and reported as nonmajor funds. Internal service funds are also aggregated and reported in a separate column on the proprietary fund financial statements.

C. Measurement Focus, Basis of Accounting, and Financial Statement Presentation

Government-wide Financial Statements

The government-wide financial statements are prepared using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when the related liability is incurred, regardless of the timing of the cash flows. Nonexchange transactions in which the State receives value without directly giving equal value in exchange, include taxes, grants, and donations. Tax revenue is recognized in the fiscal year in which the related sales, wages, or activity being taxed occurred. Revenue from grants and donations is recognized in the fiscal year in which all eligibility requirements have been met.

Governmental Fund Financial Statements

The governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collected within the current period or expected to be collected soon enough thereafter to pay liabilities of the current period. For this purpose, the State generally considers taxes and other revenues to be available if the revenues are collected within 45 days after yearend. An exception to this policy is federal grant revenues, which generally are considered to be available if collection is expected within 12 months after yearend.

Expenditures are generally recorded when the related liability is incurred, as under the accrual basis of accounting. However, expenditures for principal and interest on long-term debt are recorded when due or when amounts have been accumulated in the debt service fund for payment of interest to be made early in the following year. Also, expenditures and related liabilities for compensated absences, pension benefits, postemployment benefits, and claims and judgments are recorded only to the extent they have matured (i.e., come due for payment).

Major Governmental Funds — The State reports the following major governmental funds:

- **General Fund.** This fund is the principal operating fund of the State. It accounts for all financial resources not accounted for and reported in another fund.
- **Education Fund.** This special revenue fund accounts for all corporate taxes, income taxes, and revenues from taxes on intangible property that support public and higher education. Specific revenues that support public elementary and secondary schools in the State are also reported in the Education Fund.
- **Transportation Fund.** This special revenue fund accounts for dedicated highway user taxes, fees, and federal funds associated with construction, maintenance, and repair of state highways and local roads.
- **Transportation Investment Fund.** This capital projects fund accounts for vehicle registration fees, sales and use taxes, bond proceeds, and federal funds used in the construction and reconstruction of specific highway projects. Projects designated for the Transportation Investment Capacity program are accounted for in this fund.
- **Trust Lands Fund.** This is a permanent fund that accounts for land grants and the sale of lands received from the federal *Enabling Act*. The principal in the fund is perpetual, with the earnings used primarily to support public education.

Nonmajor Governmental Funds — The State's nonmajor governmental funds include special revenue funds, capital projects funds, and debt service funds. The nonmajor special revenue funds account for specific revenue sources that are restricted or committed to expenditures for specific purposes. Examples include tobacco settlement monies, environmental activities, crime victim reparations, debt collections, and rural development programs. The capital projects funds account for resources used for capital outlays including the acquisition, construction, or improvement of capital facilities other than those financed by the Transportation Investment Fund, proprietary funds or assets held in trust. The debt service funds account for resources used for the payment of principal and interest on general long-term debt obligations.

Proprietary Fund Financial Statements

The financial statements of the proprietary funds are reported using the economic resources measurement focus and the accrual basis of accounting, similar to the government-wide financial statements described previously. Proprietary funds include both enterprise and internal service fund types. Enterprise funds report the activities for which fees are charged to external users for goods or services. Internal service funds account for goods and services provided primarily to other agencies or funds of the State, rather than to the general public.

Proprietary funds distinguish operating revenues and expenses from non-operating. Operating revenues and expenses generally result from providing services, producing, and delivering goods in connection with a proprietary fund's principal ongoing operations. Revenues and expenses not meeting this definition, such as subsidies and investment earnings, are reported as non-operating.

Major Enterprise Funds — The State reports the following major enterprise funds in its proprietary fund statements:

- **Student Assistance Programs.** These programs guarantee the repayment of student loans made by participating lenders to eligible borrowers and service outstanding student loans.
- **Unemployment Compensation Fund.** This fund pays claims for unemployment to eligible recipients.
- **Water Loan Programs.** These programs provide loans to local governments, water districts, and other entities for the purpose of upgrading water storage facilities and other related structures.
- **Community Impact Loan Fund.** This fund provides loans to local governments to alleviate the social, economic, and public financial impacts resulting from the development of the State's natural resources. This fund also administers loans to small businesses under the Small Business Credit Initiative.

Nonmajor Enterprise Funds — The State's nonmajor enterprise funds include loan programs for low-income housing, agricultural, energy efficiency, transportation infrastructure, and other purposes; Alcoholic Beverage Control (state liquor stores); Utah

Correctional Industries; State Trust Lands Administration; and the Utah Dairy Commission.

Internal Service Funds — The State reports the internal service fund type in the proprietary funds statements. The activities accounted for in internal service funds include technology services, general services, fleet operations, risk management, property management, and human resource management. In the government-wide financial statements, internal service funds are included with governmental activities.

Fiduciary Fund Financial Statements

The fiduciary funds account for assets held by the State in a trustee capacity or as an agent for other individuals or organizations. The fiduciary fund financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. The following fiduciary fund types are reported:

Pension and Other Employee Benefit Trust Funds — These funds account for the plan assets, deferred outflows of resources, liabilities, deferred inflows of resources, net position, and changes in net position of: (1) defined benefit pension plans and defined contribution plans administered by Utah Retirement Systems; (2) the Post-Retirement Benefits Trust Funds, defined benefit other postemployment health care plans administered by the State for state employees and elected officials; and (3) Other Employee Benefits Trust Fund, used to separately account and report assets dedicated for employee benefits other than postemployment healthcare benefits, that are administered through the Post-Retirement Benefits Trust Funds.

Investment Trust Fund — This fund is used to account for the investments related to external participants in the Utah State Public Treasurers' Investment Fund.

Private Purpose Trust Funds — These funds report resources of all other trust arrangements in which principal and income benefit individuals, private organizations or other governments. Examples include the Navajo Trust Fund, Unclaimed Property Trust, Employers' Reinsurance Trust, Petroleum Storage Tank Trust, and the Utah Educational Savings Plan Trust.

Agency Funds — These funds account for assets held by the State as an agent for other governmental units, other organizations, or individuals. These funds include fines, forfeitures, tax collections, and withholding taxes for employees.

Discrete Component Unit Financial Statements

The combining discrete component unit financial statements are presented in order to provide information on each of the major discrete component units included in the discrete component unit's column of the government-wide statements. The discrete component unit financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. The information is presented in order to be consistent with the government-wide statements, and is less detailed than the presentation in each discrete component unit's separately issued financial statements.

D. Fiscal Yearends

All funds and discretely presented component units are reported using fiscal years which end on June 30, except the defined benefit pension plans and defined contribution plans (fiduciary funds), administered by Utah Retirement Systems, Public Employees Health Program (major discrete component unit), Utah State Fair Corporation (nonmajor discrete component unit), and Utah Dairy Commission, which have fiscal years ending December 31.

E. Assets, Deferred Outflows of Resources, Liabilities, Deferred Inflows of Resources, and Net Position/Fund Balances

Cash and Cash Equivalents and Investments

Cash equivalents are generally considered short-term, highly liquid investments with a maturity of three months or less from the purchase date. The Student Assistance Programs (major enterprise fund) use a trustee for their long-term investing needs, and they consider any cash and cash equivalents held by their trustee as investments.

All cash deposited with the State Treasurer by state entities is maintained by the Treasurer in various pooled investment funds. The State Treasurer invests the deposited cash, including the cash float, in short-term securities and other investments. All interest revenue is allocated to the General Fund unless state law or trust agreements require allocations of interest to other funds. Funds authorized to receive interest earnings are segregated into separate investment pools, and interest is allocated based on cash balances in the pool.

Investments (including cash equivalents) are under the control of the State Treasurer or other administrative bodies as determined by law. In certain instances, investments may be restricted by law or other legal instruments. Investments are presented at fair value. Accordingly, the change in fair value of investments is recognized as an increase or decrease to investment assets and investment income. The fair value measurements of investments is based on the hierarchy established by generally accepted accounting principles. The fair value hierarchy, which has three levels, is based on the valuation inputs used to measure an asset's fair value: Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs. Also certain investments that are measured at fair value using the net asset value per share (or its equivalent) as a practical expedient are not classified in the fair value hierarchy. The Trust Lands Fund (permanent fund) invests in both open and closed end real estate funds that issue quarterly account statements and the fair value of the investments is based upon the Fund's ownership interest in partners' capital.

The State's Unemployment Compensation Fund (major enterprise fund) monies are required by the Social Security Act to be invested in the U.S. Department of Treasury, Bureau of Public Debt Unemployment Trust Fund (BPDUTF), which is not registered with the SEC. The fair value of the position in the BPDUTF is the same as the value of the BPDUTF shares.

Utah Retirement Systems (pension trust and defined contribution plans) had five types of derivative financial instruments at yearend: futures, currency forwards, options, swaps, and Synthetic

Guaranteed Investment Contracts. Futures contracts are traded on organized exchanges to minimize credit risk. Currency forwards are entered into in order to hedge the exposure to changes in foreign currency exchange rates on foreign currency denominated portfolio holdings. Options give the right, but not the obligation, to buy (call) or sell (put) an asset at a preset price over a specified period. Interest rate swap agreements are entered into in an attempt to manage their exposure to interest rate risk. Interest rate risk represents the exposure to fair value losses arising from the future changes in prevailing market interest rates. Synthetic Guaranteed Investment Contracts are available to members in the Utah Retirement Systems Defined Contribution Plans. The Student Assistance Program (major enterprise fund) entered into an interest rate exchange (swap) agreement relating to some of its student loan revenue bonds. The Board accounts for the swap agreement as a fair value hedging derivative instrument to create a variable rate cost of funds that will be lower than the variable rate cost achievable in the cash bond market. See Note 3 for additional information about derivatives.

Receivables

Accounts receivables in the governmental and business-type activities consist mainly of amounts due from the Federal Government, customers, and others. Receivables from the Federal Government are reasonably assured; accordingly, no allowance for uncollectible accounts has been established.

Notes/mortgages receivables in the governmental and business-type activities are primarily long-term loans for local governments and agricultural development, home mortgages, and individual student loans. The interest rates on the loans vary but are generally lower than market rates and, in some cases, are noninterest bearing. Student loans in the Student Assistance Programs (business-type activities) are fixed and variable rate federally insured loans. Student loans are insured at 95 to 100 percent of their principal balance depending on the date disbursed.

Receivables for capital lease payments, as reported in the governmental activities, are direct financing capital lease arrangements between State Building Ownership Authority (blended component unit) and certain College and Universities (discrete component units). The capital lease receivable is reported net and represents the sum of the future minimum lease payments to be received, less any executory costs and any unearned interest revenue on the capital lease. Receivables from the discrete component unit are reasonably assured; accordingly, no allowance for uncollectible accounts has been established.

Accrued taxes include receivables for taxpayer-assessed taxes where the underlying exchange has occurred in the period ending June 30 or prior, net of applicable estimated refunds and allowances.

Note 5 provides a disaggregation of governmental and business-type receivables, including a breakout of current/noncurrent balances and established allowances.

Inventories, Prepaid Items, and Other Assets

Proprietary funds and component units' inventories are valued at the lower of cost or market. Cost evaluation methods include first-in-first-out (FIFO), last-in-first-out (LIFO), average cost, weighted average, weighted moving average, and retail inventory method.

Governmental fund consumable items are recorded as expenditures when purchased except for General Fund state park merchandise inventories and Transportation Fund road material inventories. State park inventories are valued at lower of cost or market and Transportation Fund inventories are valued using a weighted average cost.

Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items in both the government-wide and fund financial statements. The cost of prepaid items is recorded as expenditures/expenses when consumed rather than when purchased.

Other Assets, as reported on the Statement of Net Position, governmental activities column, include assets of the Trust Lands Fund (Permanent Fund) acquired under the 1894 Utah Enabling Act that are not considered investments. The net pension asset and the net other postemployment benefit (OPEB) asset are also reported as Other Assets.

Capital Assets

Capital assets, which include land and related assets, buildings, equipment, intangible assets (software), and infrastructure (roads, bridges, drainage systems, lighting systems, and similar items), are reported in the applicable governmental or business-type activities columns, or in the component units column on the government-wide Statement of Net Position. Capital assets of proprietary funds and fiduciary funds are also recorded in their respective fund statements. Capital assets, with the exception of infrastructure and internally generated software (funded with nonfederal resources), are defined by the State as assets, which cost \$5 thousand or more when acquired and have an estimated useful life greater than one year. Infrastructure assets are capitalized if the cost is over \$1 million. Internally generated software, funded with nonfederal resources, is capitalized if the cost is over \$500 thousand. Purchased or constructed capital assets are recorded at cost or at estimated historical cost where historical cost is not available. Donated capital assets are valued at their estimated fair value at the date of donation.

Capital assets purchased by governmental funds are recorded as expenditures in the governmental fund financial statements. Interest expense for capital asset construction related to governmental activities is not capitalized. Interest expense incurred during construction of capital facilities related to business-type activities and discrete component units is immaterial and is not capitalized in all cases.

Buildings, equipment, and other assets are depreciated or amortized using the straight-line method over the following estimated useful lives:

<u>Asset Class</u>	<u>Years</u>
Equipment/Software	3-15
Aircraft and Heavy Equipment	5-30
Buildings and Improvements	30-40
Land Improvements	5-20
Infrastructure	15-80

As provided by GASB standards, the State has elected to use the "modified approach" to account for infrastructure assets (i.e., roads and bridges) maintained by the State's Department of Transportation. This includes infrastructure acquired prior to fiscal year 1981. Under this approach, depreciation expense is not

recorded and only improvements that increase the capacity or efficiency of an infrastructure asset are capitalized. Using this approach requires the State to: (1) maintain an inventory of the assets and perform periodic condition assessments; (2) estimate each year the annual amount to maintain and preserve the assets at the condition level set by the State; and (3) document that the assets are being preserved approximately at or above the condition level set by the State. Other infrastructure, which is primarily maintained by the Department of Natural Resources, is capitalized and depreciated.

Most works of art and historical treasures of the primary government are not capitalized or depreciated. These assets are held for public exhibition, education, or research rather than financial gain. These assets are also protected, unencumbered, and preserved; and subject to policies requiring the proceeds from sales of collection items to be used to acquire other collection items. The State's assets of this nature include the State Fine Art Collection, photographs, prints, paintings, historical documents and artifacts, monuments, statues, and paleontological and archaeological collections.

Deferred Outflows of Resources

Deferred outflow of resources represents a consumption of net position by the government that applies to a future period(s) and so will not be recognized as an outflow of resources (expense/expenditure) until then. Deferred outflows of resources are reported in the applicable governmental or business-type activities columns, or in the component units column on the government-wide Statement of Net Position. See Note 11 for a disaggregation of deferred outflows. Deferred outflows of resources of governmental funds, proprietary funds, and discrete component units are reported in detail in their respective fund statements.

Accrued Liabilities

Accrued liabilities include the liability for employee payrolls and liabilities accruing over time where demand for payment is due shortly after fiscal yearend. See Note 6 for additional information about accrued liabilities.

Unearned Revenue

In the government-wide statements, governmental fund statements, proprietary fund statements, and fiduciary fund statements, unearned revenue is recorded when cash or other assets are received prior to being earned.

Policy Claims Liabilities

Policy claims liabilities are for insurance claims incurred prior to the reporting date and are based on actuarial estimates; however, policy claims liabilities for Unemployment Insurance are for claims filed as of the reporting date. A substantial portion of policy claims liabilities is long-term in nature. Therefore, claims liabilities are reported as long-term liabilities on the Statement of Net Position. See Note 10 for additional information about policy claims liabilities.

Long-term Debt

Long-term debt such as the net pension liability, revenue bonds, claims, contracts and notes payable directly related to and intended to be paid from proprietary funds or discretely presented component units are included in the accounts of such funds. All other long-term debt, such as the compensated absences, claim or settlement obligations, pollution remediation obligations, general obligation bonds, net pension liability, and lease revenue bonds are reported in the government-wide financial statements. Bond premiums and discounts are amortized over the life of the bonds using the bonds outstanding method or straight-line method, which approximates the effective interest method. Bonds payable are reported net of the applicable bond premium or discount. Bond issuance costs are recognized during the current period.

In the governmental fund financial statements, long-term debt is recognized when due or expected to be financed from current expendable available financial resources. Amortization of bond premiums and discounts, as well as bond issuance costs, are recognized during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources, while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

The *Tax Reform Act of 1986* requires governmental entities issuing tax-exempt bonds to refund to the U.S. Treasury interest earnings on bond proceeds in excess of the yield on those bonds. Governmental entities must comply with arbitrage rebate requirements in order for their bonds to maintain tax-exempt status. Entities are required to remit arbitrage rebate payments for non-purpose interest to the federal government at least once every five years over the life of the bonds. Federal regulations also require the Student Assistance Programs (major enterprise fund) to keep the yield on student loans within a designated percentage of the interest cost of the related tax-exempt borrowing. One method of reducing this yield is to make yield reduction payments to the United States Treasury. Estimated yield reduction payments may be made by the end of the tenth year and every fifth year thereafter during the life of the bonds. Some State of Utah bonds may be exempt from the rebate requirements if they meet certain statutory exceptions per the regulations. At June 30, 2016, there was no liability for yield reduction payments or for non-purpose interest arbitrage rebate in Student Assistance Programs' or State of Utah bonds.

Arbitrage liability is treated as an expense in the government-wide Statement of Net Position and the proprietary fund financial statements when the liability is recognized. Arbitrage liability is recorded as an expenditure in the governmental fund financial statements when the liability is due. Other arbitrage liabilities are immaterial.

Compensated Absences and Postemployment Benefits

For most employees vacation leave is accrued at a rate of four hours every two weeks for the first five years of employment, and grows to a rate of seven hours every two weeks after 20 years of employment. There is no requirement to use vacation leave, but a maximum of 320 hours may be carried forward at the beginning of each calendar year. The State established the State Employees' Annual Leave Trust Fund (other employee benefit trust funds) where any unused vacation leave is paid to employees upon

termination. The ongoing termination payments from the Trust Fund are provided by charges to agency budgets as benefits are earned. Vacation leave taken as time off is paid from current budgets when used.

Prior to January 1, 2014, employees had the option under certain circumstances to “convert” sick leave. Employees may use converted sick leave in place of vacation leave. Any unused converted sick is paid to employees upon termination.

Most employees earn sick leave at a rate of four hours for each two-week period, with no limit to the amount that can be accumulated. The State does not reimburse employees for unused sick leave upon termination unless the leave was earned prior to January 4, 2014, and the employees are eligible for retirement or the sick leave was “converted”. Sick leave is expended when used.

At retirement, for participating agencies, an employee receives 25 percent of the value of all unused accumulated sick leave, earned prior to January 4, 2014, as a mandatory employer contribution into a 401(k) account. Each day of remaining sick leave earned prior to January 1, 2006, may be used to participate in the State Employee Other Postemployment Benefit Plan (State Employee OPEB Plan), a single-employer defined benefit healthcare plan to purchase health and life insurance coverage or Medicare supplemental insurance. The Annual Required Contribution (ARC) is funded by charges to agency budgets. The ARC is deposited and payments of postemployment health and life insurance benefits to retirees are made from the State Post-Retirement Benefits Trust Fund. See Note 18 for additional information about the State Employee OPEB Plan administered as an irrevocable trust.

Any remaining sick leave earned on or after January 1, 2006, but before January 4, 2014, is converted to a value (based on the higher of the employee’s rate of pay at retirement or the average pay rate of retirees in the previous year) and placed in a Health Reimbursement Arrangement administered by Utah Retirement Systems. Any payouts by the State of converted sick leave upon termination, contributions into a 401(k) account or Health Reimbursement Arrangement upon retirement, are paid from the Other Employee Benefits Trust Fund. The ongoing termination payments from the Trust Fund are provided by charges to agency budgets.

Proprietary funds, Utah Schools for the Deaf and the Blind, and private purpose trust funds of the primary government also participate in the compensated absences and the State Employee OPEB Plan; and have no liability for leave or postemployment benefits once their contributions have been made. The total liability of the governmental activities for compensated absences is recorded in the government-wide Statement of Net Position as part of long-term liabilities. However, in accordance with GAAP, the liability is not recorded in the governmental fund financial statements. See Note 10 for additional information about the liability.

The State of Utah also administers the Elected Official OPEB Plan, a single-employer defined benefit healthcare plan as an irrevocable trust. Only governors and legislators who retire after January 1, 1998 and have four or more years of service can elect to receive and apply for this benefit. To qualify for health coverage, an elected official must be between 62 and 65 years of age and either be an active member at the time of retirement or have continued health coverage with the program until the date of eligibility. In addition, to qualify for health coverage, an elected official must

have service prior to January 1, 2012. To qualify for Medicare supplemental coverage an elected official must be at least 65 years of age. In addition, the elected official must retire under Chapter 19, *Utah Governors’ and Legislators’ Retirement Act*, and have service prior to July 1, 2013. The State will pay a portion or all the health benefit costs for the elected official and spouse based on years of service. See Note 18 for additional information.

Compensatory time for overtime worked may be earned up to a maximum of 80 hours. Any overtime exceeding 80 hours is paid when earned. In accordance with GAAP, compensatory time is expended when the leave is taken in governmental funds, but is expensed when earned for budgetary purposes.

Vacation earnings, sick leave earnings, and termination policies vary among discrete component units and from the primary government’s policies, but usually vacation leave is expended when earned and sick leave is expended when used.

Pensions

For purposes of measuring the net pension liability and deferred outflows/inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the Utah Retirement Systems Pension Plan (URS) and additions to/deductions from URS’s fiduciary net position have been determined on the same basis as they are reported by URS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. The primary government’s proportionate share of pension amounts were further allocated to proprietary funds (business-type activities) based on the amount of employer contributions paid by each proprietary fund. Pension investments are reported at fair value.

Deferred Inflows of Resources

Deferred inflows of resources represent an acquisition of net position that applies to a future period, and so will not be recognized as an inflow of resources (revenue) until that time. Deferred inflows of resources are reported in the applicable governmental or business-type activities columns or in the component units column on the government-wide Statement of Net Position. See Note 11 for a disaggregation of deferred inflows. Deferred inflows of resources of governmental funds, proprietary funds, and discrete component units are reported in detail in their respective fund statements.

Net Position/Fund Balances

The difference between assets, deferred outflows of resources, liabilities, and deferred inflows of resources is “Net Position” on the government-wide, proprietary fund, and fiduciary fund financial statements and “Fund Balance” on the governmental fund financial statements.

In the governmental fund financial statements, fund balances are classified as nonspendable, restricted, or unrestricted (committed, assigned, or unassigned). Restricted balances represent those portions of fund balance where constraints placed on the resources are either externally imposed or imposed by law through constitutional provisions or enabling legislation. Committed fund balance represents amounts that can only be used for specific

purposes pursuant to constraints imposed by formal action of the Legislature, such as dedicated revenues or legislation. Assigned fund balance is constrained by the Legislature's intent to be used for specific purposes, by directive of the Executive Appropriations Committee of the Legislature or in some cases by legislation. See Note 12 for additional information about fund balances.

The State maintains three stabilization accounts: (1) the General Fund Budget Reserve Account in the General Fund (the "Rainy Day Fund") reported as committed fund balance; (2) the Medicaid Growth Reduction and Budget Stabilization Restricted Account in the General Fund ("the Medicaid Budget Stabilization Account") reported as committed fund balance; and (3) the Education Budget Reserve Account in the Education Fund (the "Education Reserve") reported as restricted fund balance. The resources of these accounts may only be expended when specific non-routine budget shortfalls occur and upon appropriation by the Legislature.

Statutorily, the State established a minimum fund balance policy for the Disaster Recovery Restricted Account and the Local Government Emergency Response Loan Fund. Both these funds may issue loans for specific emergencies as long as a minimum fund balance is maintained in the funds. See Note 12 for additional information about the stabilization accounts and funds with a statutory minimum fund balance requirement.

F. Restricted and Unrestricted Resources

When an expenditure/expense is incurred for purposes for which both restricted and unrestricted resources are available, it is the State's general policy to use restricted resources first. When expenditures/expenses are incurred for purposes for which unrestricted (committed, assigned, and unassigned) resources are available, and amounts in any of these unrestricted classifications could be used, it is the State's general policy to spend committed resources first. However, the State has some programs that are funded by appropriations from both unrestricted resources and resources required by law to be deposited in a specific subfund for a specific purpose (which may include restricted resources and unrestricted-committed resources). In those instances, it is the State's policy to expend those resources proportionally based on the amounts appropriated from each source.

Grants

Federal grants and assistance awards made on the basis of entitlement periods are recorded as revenues when entitlement occurs. All federal reimbursement-type grants are recorded as revenues when the related allowable expenditures are incurred and all applicable eligibility requirements are met.

Federal grants include nonmonetary transactions for food and vaccine commodities. Commodity revenues and expenditures are valued at their federally reported value. Commodity inventories at yearend are immaterial. For the fiscal year ended June 30, 2016, the State reported revenues and expenditures of \$25.512 million for commodities in the General Fund, and \$17.746 million for commodities in the Education Fund (special revenue fund).

Investment Income

Investment income includes interest, dividends and other earnings, and the change in fair value of investments. Negative investment

income is reported where the decrease in the fair value of investments due to market conditions exceeded the other components of investment income.

In accordance with state law, interest and dividend income from investments in the Trust Lands Fund (permanent fund) and the State Endowment Fund (nonmajor governmental fund) is assigned to and reported directly in the Education Fund and the General Fund, respectively. A portion of the applicable income reported in the General Fund is then transferred into the State Endowment Fund to increase the principal in the fund as required by state law. The Trust Lands Fund generated \$49.935 million of cash investment earnings that was reported directly in the Education Fund. The State Endowment Fund generated \$3.871 million of cash investment earnings, of which \$2.342 million was reported in the General Fund and \$1.529 million was reported in the State Endowment Fund.

G. Interfund Transactions

Government-wide Financial Statements

Interfund Activity — In general, eliminations have been made to minimize the double counting of internal activity, including internal service fund type activity. However, interfund services, provided and used between different functional categories, have not been eliminated in order to avoid distorting the direct costs and program revenues of the applicable functions. Transfers between governmental and business-type activities are reported at the net amount.

Interfund Balances — Interfund receivables and payables have been eliminated from the government-wide Statement of Net Position, except for the residual amounts due between governmental and business-type activities.

Governmental Fund Financial Statements

Interfund Activity — Interfund transactions for goods sold or services rendered for a price approximating their external exchange value, and employee benefit contributions are accounted for as revenues and expenditures/expenses in the funds involved.

Transfers are used to report flows of cash (or other assets) between funds without equivalent flows of assets in return or a requirement for repayment. The State's transfers are based on legislative appropriations or other legal authority. Transfers are presented in Note 14.

H. Future Changes in Accounting Standards

The governmental Accounting Standards Board (GASB) issued Statements No. 74, *Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans*, and No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*. These new accounting and reporting standards will require additional reporting requirements and will impact the State's measurement and recognition of liabilities, deferred outflows of resources, deferred inflows of resources, and expense/expenditures in government-wide and fund financial statements. GASB Statement No. 75 will require the State to record a liability in the government-wide statements equal to the State's

other postemployment benefits (OPEB), less the amount of the OPEB plan's fiduciary net position (NPL).

The State administers two single-employer OPEB plans, the State Employee OPEB Plan and the Elected Official OPEB Plan. The total NPL for both Plans will reduce the State's unrestricted net position in the government-wide statements by less than \$200 million. The State intends to implement both Statements for fiscal year 2017. See Note 18 for additional information about the Plans.

NOTE 2. BEGINNING NET POSITION ADJUSTMENTS AND OTHER CHANGES

For the fiscal year ended June 30, 2016, the State implemented the following new accounting standards issued by the Governmental Accounting Standards Board (GASB):

GASB Statement 72, *Fair Value Measurement and Application*.

GASB Statement 82, *Pension Issues*.

GASB Statement 72 – This Statement addresses accounting and financial reporting issues related to fair value measurements. It provides guidance for determining a fair value measurement and requires disclosures to be made about fair value measurements, the level of fair value hierarchy, and valuation techniques. There was no impact to beginning net position as a result of implementing this Statement.

See Notes 3 and 4 for further information on fair value measurement reporting.

GASB Statement 82 – This Statement clarifies that the measure of payroll that is required to be presented in pension-related schedules of Required Supplementary Information (RSI) should be *covered payroll*. *Covered payroll* is the payroll on which contributions to a pension plan are based. In addition, this Statement clarifies that payments made by the employer to satisfy contribution requirements that are identified by the pension plan terms as plan member contributions should be classified as plan member contributions. As a result of implementing the Statement changes were made to RSI and other disclosures that reflect the new requirements of this Statement.

In addition, GASB Statement 68, *Accounting and Financial Reporting for Pensions*, and Statement 71, *Pension Transition for Contributions Made Subsequent to the Measurement Date*, were implemented for Utah Dairy Commission (nonmajor enterprise fund), Public Employees Health Program (major discrete component unit) and Utah State Fair Corporation (nonmajor discrete component unit). These entities have fiscal years ending December 31. Other than noted above, the State of Utah's reporting entity implemented these Statements in the prior fiscal year.

As a result of implementing GASB Statements 68 and 71 for Utah Dairy Commission, beginning net position for business-type activities on the Statement of Activities was reduced by \$367 thousand. This reduction is also reported on the Statement of Revenues, Expenses, And Changes in Fund Net Position – Proprietary Funds (Utah Dairy Commission – nonmajor enterprise fund). This reduction reflects a \$467 thousand share of the beginning net pension liability and \$100 thousand of contributions made to URS between January 1 and December 31, 2014.

As a result of implementing GASB Statement 68 and 71 for Public Employees Health Plan and Utah State Fair Corporation, the beginning net position for discrete component units was reduced by \$10.061 million on the Statement of Activities. This reduction is also reported on the Combining Statement of Activities – Component Units. This reduction reflects the component units' share of the beginning net pension liability of \$12.92 million and \$2.859 million of contributions made to URS between January 1 and December 31, 2014.

See Note 17 for further information on pension reporting.

Other Adjustments and Changes

During the 2015 General Session, the Legislature passed Senate Bill 247, *State Employees' Annual Leave Trust Fund Amendments*. This statute creates the *State Employees' Annual Leave Trust Fund* (other employee benefit trust funds) and allows for the cost of annual leave to be paid from the Trust Fund upon an employees' termination or retirement. As a result of this statute and direction from the trust fund board, *all* leave benefits (annual leave, converted sick leave, and sick leave vested upon retirement), are now paid from either the Other Employee Benefits Trust Fund or from the State Employees' Annual Leave Trust Fund depending on the type of benefit being paid. These benefits were previously paid from termination pool accounts operated out of the General Fund, Education Fund, and Transportation Fund. A prior period adjustment was made on the Statement of Revenues, Expenditures, and Changes in Fund Balances to adjust beginning fund balance in the General Fund (major governmental fund) by \$3.472 million, Education Fund (major governmental fund) by \$506 thousand, and Transportation Fund (major governmental fund) by (\$2.952) million. The beginning net position of governmental activities increased \$1.026 million on the Statement of Activities. The beginning net position on the Combining Statement of Changes in Fiduciary Net Position for the Other Employee Benefits Trust Fund and for the State Employees' Annual Leave Trust Fund (other employee benefit trust funds) decreased \$459 thousand and \$567 thousand respectively.

During the 2015 General Session, the Legislature passed House Bill 258, *Employee Classification Amendments*, which in part reclassifies the Water Commissioner Fund from a fiduciary fund to a nonmajor special revenue fund. As a result of this change a prior period adjustment of \$914 thousand was made to increase beginning net position of governmental activities on the Statement of Activities. This increase is also reported on the Statement of Revenues, Expenditures, and Changes in Fund Balances – Nonmajor Governmental Funds (miscellaneous special revenue). A reclassification of \$914 thousand was made to reduce beginning net position on the Statement of Changes in Fiduciary Net Position – Private Purpose Trust Funds.

During the 2015 General Session, the Legislature passed Senate Bill 90, *Utah Navajo Royalties Amendments*. This statute created the Utah Navajo Trust Fund which replaces the Utah Navajo Royalties Fund. In addition, the statute created a board of trustees to administer the fund comprised of the State Treasurer, the Director of the Division of Finance, and the Director of the Governor's Office of Management and Budget, or the director's designee. Finally, Senate Bill 90 exempts the Navajo Trust Fund from the State Money Management Act.

NOTE 3. DEPOSITS AND INVESTMENTS

Deposits and investments for the primary government and its discrete component units are governed by the Utah Money Management Act (*Utah Code* Title 51, Chapter 7) and rules of the State Money Management Council. However, the Act also permits certain funds that have a long time horizon to make investments of a long-term nature, such as equities and bond mutual funds. In the primary government these are the State Endowment (special revenue fund), Trust Lands (permanent fund), Utah Educational Savings Plan Trust (private purpose trust), Employers' Reinsurance Trust (private purpose trust), Navajo Trust (private purpose trust), and Utah Retirement Systems and Other Benefits Trust Funds (fiduciary funds). The discrete component units exempt from the Act are Public Employees Health Program and the college and universities' endowment funds.

A. Primary Government**Custodial Credit Risk — Deposits**

The custodial credit risk for deposits is the risk that in the event of a bank failure, the State's deposits may not be recovered. The Money Management Act requires that deposits be in a qualified depository. The Act defines a qualified depository as any financial institution whose deposits are insured by an agency of the federal government and that has been certified by the State Commissioner of Financial Institutions as having met the requirements of the Act and adhering to the rules of the State Money Management Council.

Deposits with qualified depository institutions in excess of FDIC insurance limits are uninsured and uncollateralized. Deposits are neither collateralized nor are they required to be by State statute. The deposits for the primary government at June 30, 2016, including those of the Utah Retirement Systems (URS) (pension trust and defined contribution plans), were \$1.785 billion. These deposits are exposed to custodial credit risk as follows:

- \$641.318 million were exposed to custodial credit risk as uninsured and uncollateralized.
- Exposure to custodial credit risk cannot be determined for \$1.076 billion of the primary government deposits which are in FDIC-insured accounts that are held in trust by UESP at two banks. Funds in the FDIC-insured accounts are insured on a pass-through basis to each account owner at each bank up to \$250,000. The amount of FDIC insurance provided to an account owner is based on the total of (1) the value of an account owner's investment in the FDIC-insured account at each bank plus, (2) the value of other accounts held (if any) at each bank, as determined by the banks and by FDIC regulations. It is the account owner's responsibility to determine how investments in the FDIC-insured accounts would be aggregated with other investments at the banks for purposes of FDIC insurance coverage.

Investments

The Money Management Act defines the types of securities authorized as appropriate investments and the conditions for making investment transactions. Investment transactions may be conducted only through qualified depositories, certified dealers, or directly with issuers of the investment securities.

The Act authorizes investments in negotiable or nonnegotiable deposits of qualified depositories and permitted depositories; repurchase and reverse repurchase agreements; commercial paper that is classified as "first tier" by two nationally recognized statistical rating organizations; bankers' acceptances; obligations of the United States Treasury including bills, notes, and bonds; obligations, other than mortgage derivative products, issued by U.S. government-sponsored enterprises (U.S. Agencies) such as the Federal Home Loan Bank System, Federal Home Loan Mortgage Corporation (Freddie Mac), and Federal National Mortgage Association (Fannie Mae); bonds, notes, and other evidence of indebtedness of political subdivisions of the State; fixed-rate corporate obligations and variable rate securities rated "A" or higher, or the equivalent of "A" or higher, by two nationally recognized statistical rating organizations; shares or certificates in a money market mutual fund as defined in the Money Management Act; the Utah Public Treasurers' Investment Fund; and reciprocal deposits subject to rules of the State Money Management Council.

The Utah Educational Savings Plan Trust is permitted to invest in the Utah Public Treasurers' Investment Fund; mutual funds, securities, or other investments registered with the United States Securities and Exchange Commission; federally insured depository institutions; stable value products, including guaranteed investment contracts, guaranteed interest contracts, and guaranteed insurance contracts; and any investments that are determined by the board of directors of the Utah Educational Savings Plan to be appropriate and that would be authorized under the provisions of the Money Management Act or Rule 2 of the State Money Management Council.

The primary government's investments at June 30, 2016, are presented below except those of the Utah Retirement Systems (URS) (pension trust and defined contribution plans). The investments are presented at fair value and by investment type with debt securities presented by maturity.

Note 3.B. presents the investments of the Utah Retirement Systems (URS) (pension trust and defined contribution plans). URS investments are presented consistent with their separately issued financial statements by investment type.

Fair Value Measurements

The State categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. These guidelines recognize a three-tiered fair value hierarchy as follows:

- Level 1: Inputs are quoted prices for identical investments in active markets.
- Level 2: Observable inputs other than quoted market prices.
- Level 3: Unobservable inputs.

The following table presents the recurring fair value measurements at June 30, 2016, for the primary government, with the exception of URS.

(Table on next page.)

Primary Government
Investments and Derivative Instruments Measured at Fair Value
(except pension trust and defined contribution plans)
At June 30, 2016
(Expressed in Thousands)

	Fair Value	Fair Value Measurements Using		
		Level 1	Level 2	Level 3
<u>Investments by Fair Value Level</u>				
Debt Securities

Corporate Debt.....	9,392,341	—	9,392,341	—
Money Market Mutual Funds.....	1,050,000	1,050,000	—	—
Commercial Paper.....	983,950	—	983,950	—
Bond Mutual Funds.....	3,213,937	3,213,937	—	—
Total Debt Securities.....	14,641,191	\$ 4,264,900	10,376,291	0
Equity Securities				
Domestic Equity.....	5,767,320	5,767,320	—	—
International Equity.....	1,489,939	1,489,939	—	—
Equity Securities.....	147	147	—	—
Total Equity Securities.....	7,257,406	7,257,406	0	0
Total Investments by Fair Value Level.....	21,898,597	\$ 11,522,306	\$ 10,376,291	\$ 0
<u>Investments Measured at the Net Asset Value (NAV)</u>				
Real Estate.....	284,694			
Total Investments Measured at the NAV.....	284,694			
Total Investments Measured at Fair Value....	\$ 22,183,291			
<u>Investment Derivative Instruments</u>				
Interest Rate Exchange (swap).....	\$ 28,730	\$ 0	\$ 0	\$ 28,730

Debt and equity securities classified in Level 1 are valued using prices quoted in active markets for those securities. Other debt securities classified in Level 2 are valued using the following approaches:

- Corporate Bonds and Notes are valued using quoted prices for identical securities in markets that are not active;
- Commercial Paper is valued using quoted prices for identical or similar securities in markets that are not active.

Mutual funds classified in Level 1 are valued using prices provided by the fund company.

Investments Measured at the Net Asset Value (NAV)

Trust Lands Fund (permanent fund) has real estate investments measured at the net asset value (NAV). The Fund invests in commercial real estate, located in the United States, primarily through funds structured as limited partnerships or real estate investment trusts. The fair values of the investments in this type have been determined using the NAV per share (or its equivalent) of the Fund's ownership interest in partners' capital. The fair value of the ten real estate investments totals \$284.694 million. The Fund invests in both open-end and closed-end type structures as described below.

The two investments in the open-end real estate funds invest in high quality core assets, diversified by geographic region and property type. The investments in one fund are equity-oriented, while the other fund invests in participating mortgages. The open-end funds allow for quarterly purchases depending on the funds' cash needs and redemptions with sixty days written notice at the next quarterly valuation, subject to available cash. If redemption requests are greater than available cash, the redemptions are fulfilled on a pro rata basis each quarter, until all redemption requests have been fulfilled. The fair value of investments in open-end funds totals \$133.188 million.

The eight investments in closed-end real estate funds have a total fair value of \$151.506 million. There are four investments that have remaining commitments of \$41.9 million out of the original commitments totaling \$134.8 million. The predominant investment strategy is to invest in near core properties with short-term challenges and sell the properties to core funds when the challenges are addressed. A limited amount of the investments employ an opportunistic approach. These investments can never be redeemed with the funds. Distributions from each fund will be received as the underlying assets of the funds are liquidated. It is expected that the underlying assets will be liquidated between 2016 and 2024.

Investment Derivative Instruments

The Student Loan Purchase Program (major enterprise fund – student assistance programs) has an interest rate exchange (swap) investment derivative instrument. This investment fair value classification is Level 3. The fair value was calculated using

information obtained from generally recognized sources with respect to quotations, reporting of specific transactions and market conditions and based on accepted industry standards and methodologies.

Interest Rate Risk

The following table presents the investments at June 30, 2016, for the primary government, with the exception of URS.

Total Investments.....	<u>\$ 21,491,669</u>			

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment.

The primary government’s policy for managing interest rate risk, with the exception of URS, is to comply with the Money Management Act. Section 51–7–11 of the Act requires that the remaining term to maturity of investments may not exceed the period of availability of the funds to be invested. The Act further limits the remaining term to maturity on all investments in commercial paper, bankers’ acceptances, fixed-rate negotiable deposits, and fixed-rate corporate obligations to 270 days – 15 months or less. The Act further limits the remaining term to maturity on all investments in obligations of the United States Treasury; obligations issued by U.S. government-sponsored enterprises; and bonds, notes, and other evidence of indebtedness of political subdivisions of the State to five years. In addition, variable rate negotiable deposits and variable rate securities may not have a remaining term to final maturity exceeding three years.

The majority of the primary government’s corporate debt securities are variable-rate securities, which adjust periodically to the prevailing market interest rates. Because these securities frequently reprice, interest rate risk is substantially reduced at each periodic reset date. In the table above, variable-rate securities are

presented according to the length of time until the next reset date rather than the stated maturity.

In addition, significant funds with a long-term investment perspective have the following mix of investments (percentages are of the fund’s total investments):

- Utah Educational Savings Plan Trust (private purpose trust) – \$4.595 billion, 56.7 percent, in domestic equity mutual fund securities; \$2.346 billion, 28.9 percent, in bond mutual funds; \$1.09 billion, 13.5 percent, in international equity mutual fund securities; and \$74.923 million, 0.9 percent, in the Utah Public Treasurers’ Investment Fund.
- Trust Lands (permanent fund) – \$927.19 million, 43.6 percent, in domestic equity mutual fund securities; \$488.105 million, 23.0 percent, in bond mutual funds; \$366.27 million, 17.2 percent, in international equity mutual fund securities; \$284.694 million, 13.4 percent in real estate; and \$59.041 million, 2.8 percent, in the Utah Public Treasurers’ Investment Fund.
- State Post-Retirement Benefits Trusts for State Employee and Elected Official (pension and other employee benefit trust funds) – \$162.622 million, 66.3 percent, in bond mutual funds; \$50.088 million, 20.4 percent, in domestic equity mutual fund securities; \$24.973 million, 10.2 percent, in

international equity mutual fund securities; and \$7.582 million, 3.1 percent, in the Utah Public Treasurers' Investment Fund.

- State Endowment Fund (special revenue fund) – \$107.714 million, 62.9 percent, in domestic equity mutual fund securities; \$57.051 million, 33.3 percent, in bond mutual funds; \$5.583 million, 3.3 percent, in international equity mutual fund securities; and \$904 thousand, 0.5 percent, in the Utah Public Treasurers' Investment Fund.
- Student Assistance Programs (major enterprise fund) – \$82.844 million, 40.9 percent, in domestic equity mutual fund securities; \$118.819 million, 58.6 percent, in the Utah Public Treasurers' Investment Fund; and \$963 thousand, 0.5 percent, in the U.S. Government securities.
- Employers' Reinsurance Trust (private purpose trust) – \$151.257 million, 85.7 percent, in bond mutual funds; \$4.316 million, 2.4 percent, in domestic equity mutual fund securities; \$3.051 million, 1.7 percent, in international equity

mutual fund securities; and \$17.885 million, 10.1 percent, in the Utah Public Treasurers' Investment Fund.

Credit Risk of Debt Securities

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. The primary government, with the exception of URS, follows the Money Management Act as previously discussed as its policy for reducing exposure to investment credit risk.

The primary government's rated debt investments as of June 30, 2016, with the exception of URS, were rated by Standard and Poor's and/or an equivalent nationally recognized statistical rating organization and the ratings are presented below using the Standard and Poor's rating scale. Securities rated less than "A" met the investment criteria at the time of purchase.

Custodial Credit Risk

Custodial credit risk for investments is the risk that, in the event of a failure of the counter party, the State will not be able to recover the value of the investment or collateral securities that are in the possession of an outside party. The primary government does not have a formal policy for custodial credit risk.

The primary government's investments at June 30, 2016, with the exception of URS, were held by the State or in the State's name by the State's custodial banks.

Concentration of Credit Risk

Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer.

Except for URS, the primary government's policy for reducing this risk of loss is to comply with the Rules of the State Money Management Council. Rule 17 of the State Money Management Council limits investments in a single issuer of commercial paper and corporate obligations to between 5 and 10 percent depending upon the total dollar amount held in the portfolio. Such limitations do not apply to securities issued by the U.S. government and its agencies.

The primary government had no debt securities investments at June 30, 2016, with more than 5 percent of the total investments in a single issuer.

Foreign Currency Risk

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or a deposit. The

primary government, with the exception of URS, does not have a formal policy to limit foreign currency risk.

The following funds have investments in international equity funds, and as such, no foreign currency risk is presented: Utah Educational Savings Plan Trust (private purpose trust) \$1.09 billion, Trust Lands (permanent fund) \$366.27 million, State Post-

Retirement Benefits Trusts for State Employee and Elected Official (pension and other employee benefit trust funds) \$24.973 million, State Endowment Fund (special revenue fund) \$5.583 million, and Employers' Reinsurance Trust (private purpose trust) \$3.051 million.

The Systems and Plans value these investments in good faith at the Systems' and Plans' pro-rata interest in the net assets of these investments based upon audited financial statements or other information provided to the Systems and Plans by the underlying investment managers. The estimated fair value of these investments may differ significantly from values that would have been used had a ready market existed.

Fair Value Measurements

The Systems and Plans categorize the fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset and give the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements).

Level 1 Unadjusted quoted prices for identical instruments in active markets.

Level 2 Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in

markets that are not active; and model-derived valuations in which all significant inputs are observable.

Level 3 Valuations derived from valuation techniques in which significant inputs are unobservable.

Investments that are measured at fair value using the net asset value per share (or its equivalent) as a practical expedient are not classified in the fair value hierarchy.

In instances where inputs used to measure fair value fall into different levels in the fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Systems and Plans assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset or liability. The following table shows the fair value leveling of the investments for the Systems and Plans.

Short-term securities generally include investments in money market-type securities reported at cost plus accrued interest, which approximates fair value.

Equity and derivative securities classified in Level 1 are valued using prices quoted in active markets for those securities.

Debt and debt derivative securities classified in Level 2 and Level 3 are valued using either a bid evaluation or a matrix pricing technique. Bid evaluations may include market quotations, yields, maturities, call features and ratings. Matrix pricing is used to value securities based on the securities relationship to benchmark quoted prices. Index-linked debt securities are valued by multiplying the external market price feed by the applicable day's Index Ratio. Level 2 debt securities have non-proprietary information that was readily available to market participants, from multiple independent sources, which are known to be actively involved in the market. Level 3 debt securities use proprietary information or single-source pricing. Equity and equity derivative securities classified in Level 2 are securities whose values are derived daily from

associated traded securities. Equity securities classified in Level 3 are valued with last trade data having limited trading volume.

Real assets classified in Level 1 are valued using prices quoted in active markets for those securities. Real assets classified in Level 3 are real estate investments generally valued using the income approach by internal manager reviews or independent external appraisers. The Systems and Plans policy is to obtain an external appraisal a minimum of every three years for properties or portfolios that the Systems and Plans have some degree of control or discretion. In practice, some investments are appraised annually. Appraisals are performed by an independent appraiser with preference for Member Appraisal Institute (MAI) designated appraisers. The appraisals are performed using generally accepted valuation approaches applicable to the property type.

The valuation method for investments measured at the net asset value (NAV) per share (or its equivalent) is presented on the table above and on the following page. Synthetic guaranteed investment contracts that are fully benefit-responsive are measured at contract value and do not participate in fair value changes.

Defined Benefit

- **Co-Mingled International Equity Fund and Co-Mingled Small Cap Fund.** This type consists of one institutional investment fund that invests in international equities diversified across all sectors and one fund that invests in U.S. small cap equities. The fair values of the investments in these types have been determined using the NAV per share of the investments.
- **Absolute Return Funds.** The fair values of the investments in this type have been determined using the NAV per share of the investments. *Directional funds* include investments in six funds whose investments are more directional in nature, although they can shift opportunistically between having a directional bias and a non-directional bias. One fund, which represents 3 percent of the portfolio, is restricted from redemption for 2.5 years. *Equity long/short funds* include

investments in four funds in which the equity securities maintain some level of market exposure (either net long or net short); however the level of market exposure may vary through time. *Event driven funds* include investments in 12 funds whose investments focus on identifying and analyzing securities that can benefit from the occurrence of an extraordinary corporate transaction or event (e.g., restructurings, takeovers, mergers, spin-offs, bankruptcy, etc.). Two funds are in the process of redemption totaling \$25.3 million or 3 percent over the next 2 to 10 years. *Multi-strategy funds* include investments in 10 funds. Investments in these funds represent a mix of the other absolute return strategies. *Relative value funds* include investments in 13 funds. These funds seek returns by capitalizing on the mispricing of related securities or financial instruments. It is anticipated five of these funds representing \$161.8 million or 15 percent will be redeemed over the next 1 to 10 years. One fund, which represents 4 percent of the value in this type, is restricted from redemption for 6 months as of December 31, 2015. All other funds currently have no redemption restrictions other than the restrictions noted above.

- Private Equity Partnerships.** This type includes investments in limited partnerships. Generally speaking, the types of partnership strategies included in this portfolio: venture capital, growth equity, buyouts, special situations, mezzanine, and distressed debt. These investments have an approximate life of 10 years and are considered illiquid. Redemptions are restricted over the life of the partnership. During the life of the partnerships, distributions are received as underlying partnership investments are realized. The majority of the private equity partnership investments are managed by two gatekeepers. Both gatekeepers manage discretionary accounts for URS. The gatekeepers are required to manage the private equity portfolio in accordance with guidelines established by URS. The Systems and Plans have no plans to liquidate the total portfolio. As of December 31, 2015, it is probable all of the investments in this type will be sold at an amount different from the NAV per share (or its equivalent) of the Systems and Plans ownership interest in partners' capital.
- Energy, Mineral, and Royalty Funds.** Investments in Energy funds consist of 16 private equity partnerships that invest primarily in oil and gas related investments. Mineral funds include four private equity partnerships that invest 74 percent equity securities related to mineral mining, 12 percent in commodities, and 14 percent in other mining investments. Royalty funds include one private equity partnership that invests primarily in drug royalties. These investments have an approximate life of 10 years and are considered illiquid. Redemption restrictions are in place over the life of the partnership. During the life of the partnerships distributions are received as underlying partnership

investments are realized. As of December 31, 2015, it is probable that all of the investments in this type will be sold at an amount different from the NAV per share (or its equivalent) of the Systems and Plans ownership interest in partners' capital. The fair values of these investments have been determined using estimates provided by the underlying partnerships using recent observable transactions information for similar investments.

- Real Estate and Timber Funds.** *Real estate funds* include 15 investments that are invested primarily in apartments and retail space in the United States. *Timber funds* include two funds that invest in timber related resources. Investments in these types can never be redeemed with the funds. Instead, the nature of these investments are that distributions from each investment will be received as the underlying investments are liquidated. Because it is probable that any individual investment will be sold, the fair value of each individual investment has been determined using the NAV per share (or its equivalent) of the Systems and Plans ownership interest in partners' capital.

Defined Contribution

- Co-Mingled Funds.** The fair values of the investments of this type have been determined using the NAV per share of the investments. The *co-mingled real estate equity fund* is comprised of institutional quality commercial real estate across a broad range of real estate asset types. The *co-mingled commodities fund* invests mainly in bulk goods and raw materials. The other funds invest in securities indicative of their name.

Interest Rate Risk

Utah Retirement Systems (URS) (pension trust and defined contribution plans) manage their exposure to fair value loss arising from increasing interest rates by complying with the following policy:

- For domestic debt securities managers, an individual debt securities investment manager's portfolio will have an effective duration between 75 and 125 percent of the effective duration of the appropriate index.
- The international debt securities investment managers will maintain an effective duration of their portfolio between 80 and 120 percent of the appropriate index.
- The global debt securities investment managers will maintain an effective duration of their portfolio between 75 and 125 percent of the appropriate index.
- The global debt inflation-linked debt securities investment managers will maintain an effective duration of their portfolio between 80 and 120 percent of the appropriate index.

Duration is a measure of a debt investment's exposure to fair value changes arising from changes in interest rates. It uses the present

value of cash flows, weighted for those cash flows as a percentage of the investment's full price.

URS compares an investment's effective duration against the Barclays Capital U.S. Aggregate Index for domestic debt securities, the Barclays Capital Global Aggregate Index (USD hedged) for global debt securities and the Barclays Capital World Government Inflation-Linked Investment Bond Index (USD hedged) for inflation-linked debt securities. The index range at December 31, 2015, was 4.26 – 7.10 for domestic debt securities, 4.92 – 8.20 for global debt securities, and 9.46 – 14.20 for inflation-linked debt securities. URS compares an investment's effective duration against the Barclays Capital U.S. Aggregate Index for domestic debt securities, the Barclays Capital Global Aggregate Index ex-U.S. (unhedged) for international debt securities and the Barclays Capital Global Inflation Linked Bond Index 1-10 Year (USD hedged) for inflation-linked debt securities. The index range as of December 31, 2015, was 4.26 – 7.10 for domestic debt securities, 6.12 – 9.18 for international debt securities and 3.89 – 5.83 for inflation-linked debt securities. At December 31, 2015, no individual debt security investment manager's portfolio was outside of the policy guidelines. At December 31, 2015, the following tables show the investments by investment type, amount, and the effective weighted duration.

Credit Risk of Debt Securities

URS expects their domestic debt securities investment managers to maintain diversified portfolios by sector and by issuer using the following guidelines:

- U.S. Government and Agency Securities — no restriction.
- Total portfolio quality will maintain a minimum overall rating of “A” (S&P) or equivalent rating.
- Securities with a quality rating of below BBB– are considered below investment grade. No more than 5 percent of an investment manager’s assets at market with a single issuer of 1 percent of the total portfolio can be below investment grade.
- Upon approval, a domestic debt securities investment manager may invest up to 10 percent of the portfolio in non-U.S. dollar-denominated bonds.

- The international debt securities investment managers may hold up to 25 percent of the market value of their portfolios in securities rated below investment grade (S&P index BBB– or Moody’s index Baa3). The remaining assets will have on average an investment grade rating.

The weighted quality rating average of the domestic debt securities, excluding pooled investments, at December 31, 2015, is AAA and the fair value of below grade investments is \$431.284 million or 7.29 percent.

The following table presents the URS credit risk ratings as of December 31, 2015:

Custodial Credit Risk

URS does not have an investment policy regarding custodial credit risk. At December 31, 2015, URS has \$54.338 million frictional cash and cash equivalents subject to custodial credit risk in foreign banks in URS's name. Because it is in foreign banks, it is subject to custodial risk. URS does not have an investment policy regarding custodial credit risk for frictional cash in foreign banks. URS also has other investments of \$130.149 million with exposure to custodial credit which has not been determined.

Concentration of Credit Risk

URS expects their investment managers to maintain diversified portfolios by sector and by issuer using the following guidelines:

- AAA/Aaa Debt Securities — no more than 5 percent of an investment manager's assets at market with a single issuer.
- AA-/Aa3 Debt Securities or higher — no more than 4 percent of an investment manager's assets at market with a single issuer.
- A-/A3 Debt Securities or higher — no more than 3 percent of an investment manager's assets at market with a single issuer.
- BBB-/Baa3 Debt Securities or higher — no more than 2 percent of an investment manager's assets at market with a single issuer.
- For Debt Securities — no individual holding shall constitute more than 10 percent of the market value of outstanding debt of a single issuer with the exception of the U.S. Government or its agencies, or collateralized mortgage obligations.
- For Domestic Equity Securities — no individual holdings shall constitute more than 4 percent of the securities of any single issuer. Also, no more than 8 percent of an investment manager's assets shall be invested in the equity or Real Estate Investment Trust (REIT) securities of any single issuer at

market; or if specifically authorized in the manager's contract, the exposure of the portfolio to any single issuer shall not exceed the greater of 5 percent of the portfolio value or 2 percent of the portfolio value plus the benchmark weight measured at the time of purchase.

- For International Equity Securities — no more than 8 percent of an investment manager's assets shall be invested in the equity or REIT securities of any single issuer at market; or if specifically authorized in the manager's contract, the exposure of the portfolio to any single issuer shall not exceed the greater of 5 percent of the portfolio value or 2 percent of the portfolio value plus the benchmark weight measured at the time of purchase.

As of December 31, 2015, URS had no single issuer investments that exceeded the above guidelines.

Foreign Currency Risk

URS expects the International Securities Investment Managers to maintain diversified portfolios by sector and by issuer using the following guidelines:

- International investment managers invest in fixed income instruments and equity instruments of corporations headquartered outside of the United States unless specifically authorized within the investment manager's contract.
- Domestic investment managers are allowed to invest in international corporations traded in American Depository Receipts (ADR).
- Portfolios should be adequately diversified to limit foreign currency and security risk.

Risk of loss arises from changes in currency exchange rates. URS' exposure to foreign currency risk is shown in the table below.

C. Discrete Component Units

Custodial Credit Risk — Deposits

The custodial credit risk for deposits is the risk that in the event of a bank failure, the discrete component unit's deposits may not be recovered.

The discrete component units follow the Utah Money Management Act by making deposits only in qualified depository institutions or in foreign depository institutions in accordance with rules of the State Money Management Council. Deposits with qualified depository institutions in excess of FDIC insurance limits amount are uninsured and uncollateralized. Deposits are neither collateralized nor are they required to be by state statute. The deposits for the discrete component units at June 30, 2016, were \$221.471 million. Of these, \$184.525 million were exposed to custodial credit risk as uninsured and uncollateralized and \$26.611 million were exposed to custodial credit risk as uninsured and collateralized with securities held by the pledging financial institution's trust department or agent but not in the discrete component units' names.

Investments

The discrete component units follow the applicable investing criteria described above for the primary government, with the exception of Public Employees Health Program which is exempt from the Money Management Act.

College and university funds from gifts, private grants, and the corpus of funds functioning as endowments are invested according to the requirements of the Uniform Prudent Management of Institutional Funds Act (UPMIFA) and State Board of Regents Rule 541, Management and Reporting of Institutional Investments

(Rule 541) or separate endowment investment policies which have been approved by their Board of Trustees and by the Board of Regents. The UPMIFA and Rule 541 allow the colleges and universities to invest endowment funds (including gifts, devises, or bequests of property of any kind from any source) in any investments allowed by the Money Management Act or any of the following subject to satisfying certain criteria: mutual funds registered with the Securities and Exchange Commission, investments sponsored by the Common Fund; any investment made in accordance with the donor's directions in a written instrument; investments in corporate stock listed on a major exchange (direct ownership); and any alternative investment funds that derive returns primarily from high yield and distressed debt (hedged or non-hedged), private capital (including venture capital and private equity), natural resources, and private real estate assets or absolute return and long/short hedge funds.

The discrete component units' investments at June 30, 2016, are presented below. The investments are presented at fair value and by investment type with debt securities presented by maturity.

Fair Value Measurements

The State categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. These guidelines recognize a three-tiered fair value hierarchy as follows:

- Level 1: Inputs are quoted prices for identical investments in active markets.
- Level 2: Observable inputs other than quoted market prices.
- Level 3: Unobservable inputs.

The following table presents the recurring fair value measurements at June 30, 2016, for the discrete component units.

(Table on next page.)

Debt and equity securities classified in Level 1 are valued using prices quoted in active markets for those securities. The Domestic

Equity securities in Level 1 are valued using prices provided by the fund company.

Other debt securities classified in Level 2 are valued using the following approaches:

- U.S. Treasuries are valued using quoted prices for identical securities in markets that are not active and using a matrix pricing technique that values securities based on their relationship to benchmark quoted prices.
- U.S. Agencies are valued using quoted prices for identical or similar securities in markets that are not active.
- Corporate Debt is valued using quoted prices for similar securities in markets that are not active.
- Negotiable Certificates of Deposit are valued using quoted prices for similar securities in active markets and using a matrix pricing technique that values securities based on their relationship to benchmark quoted prices.
- Money Market Mutual Funds are valued using published fair value per share (unit) for each fund.
- Municipal/Public Bonds are valued using quoted prices for similar securities in active markets, using quoted prices for similar securities in markets that are not active, and using various sources such as issuer, investment manager, client, etc. or default price if price is not provided.
- Asset Backed Securities are valued using quoted prices for similar securities in markets that are not active.
- Bond Mutual Funds are valued using published fair value per share (unit) for each fund.
- Foreign Government Bonds are valued using quoted prices for similar securities in markets that are not active.
- Utah Public Treasurers' Investment Fund is valued using the application of the June 30, 2016, fair value factor, as calculated by the Utah State Treasurer, to the average daily balance in the Fund.

Other debt securities classified in Level 3 are valued using the following approaches:

- U.S. Agencies are valued using various sources such as issuer, investment manager, client, etc. or default price if price is not provided.
- Corporate Debt is valued using various sources such as issuer, investment manager, client, etc. or default price if price is not provided.
- Asset Backed Securities are valued using consensus pricing.
- Bond Mutual Funds are valued using various sources such as issuer, investment manager, client, etc. or default price if price is not provided.
- Collateralized Debt Obligations are valued using consensus pricing.

Other equity securities classified in Level 2 are valued using the following approaches:

- Domestic Equity securities are valued using published fair value per share (unit) for each fund.
- Equity securities are valued using quoted prices for identical securities in markets that are not active.

Other equity securities classified in Level 3 are valued using the following approaches:

- Equity securities are valued using various sources such as issuer, investment manager, client, etc. or default price if price is not provided.

Alternative investments classified in Level 3 may include common and preferred equity securities, partnership interests and ownership in similar entities, and other privately issued securities. Many of these investments are considered "alternative investments" and, unlike more traditional investments, generally do not have readily obtainable fair values and may be limited partnerships. When observable prices are not available for these securities or identical assets, the discrete component unit and a third-party investment consultant use one or more valuation techniques, for which sufficient and reliable data is available. The selection of appropriate valuation techniques may be affected by the availability of relevant inputs, as well as the relative reliability of the inputs. In some cases, one valuation technique may provide the best indication of fair value, which in other circumstances multiple valuation techniques may be appropriate. The results provided by these various valuation methods may not be equally representative of fair value, due to changes in assumptions made during the valuation. When multiple valuation techniques are used, the discrete component unit evaluates the reasonableness of the range of possible values and uses a fair value measurement based on the discrete component unit's and the investment consultant's assessment of the most representative point within the range.

Debt Securities Lending Collateral classified in Level 2 are valued using quoted prices for similar securities in markets that are not active.

Investments Measured at the Net Asset Value (NAV)

The State's colleges and universities discrete component units administer endowment portfolios of a long-term nature. The strategy, within the constraints of the asset allocation model, is to add assets with higher return expectations in order to outweigh their short-term volatility risk. As a result, endowment investments will typically be invested in equity or equity-like securities, including real assets (real estate, natural resources, and infrastructure). Real assets also are expected to provide the added benefit of inflation protection. The fair values of these types of investments are measured at the net asset value (NAV) per share (or its equivalent) as they generally do not have readily obtainable fair values and take the form of limited partnerships. The NAV is based on the values provided by the partnerships as well as their audited financial statements. If June 30 statements are available, those values are used preferentially. However, some partnerships have fiscal years ending at other than June 30. If June 30 valuations are not available, the value is progressed from the most recently available valuation taking into account subsequent capital calls and distributions. The following table presents the unfunded commitments, redemption frequency (if currently eligible), and the redemption notice period for the alternative investments measured at NAV:

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment.

The discrete component units' policy for managing interest rate risk is the same as described above for the primary government and endowment funds complying with the State's Money Management Act or the UPMIFA and Rule 541, as applicable. For non-endowment funds, Section 51-7-11 of the Money Management Act requires that the remaining term to maturity of investments may not exceed the period of availability of the funds to be invested. The Act further limits the remaining term to maturity on all investments in commercial paper, bankers' acceptances, fixed-rate negotiable deposits, and fixed-rate corporate obligations to 270 days - 15 months or less. The Act further limits the remaining term to maturity on all investments in obligations of the United States Treasury; obligations issued by U.S. government-sponsored enterprises; and bonds, notes, and other evidence of indebtedness of political subdivisions of the State to 10 years for institutions of higher education. In addition, variable rate negotiable deposits and

variable rate securities may not have a remaining term to final maturity exceeding three years. For endowment funds, Rule 541 is more general, requiring only that investments be made as a prudent investor would, by considering the purposes, terms, distribution requirements, and other circumstances of the endowments and by exercising reasonable care, skill, and caution.

Credit Risk of Debt Securities

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. The discrete component units' policy for reducing its exposure to credit risk is to comply with the State's Money Management Act, the UPMIFA, and Rule 541, as previously discussed. The discrete component units' debt investments as of June 30, 2016, were rated by Standard and Poor's and/or an equivalent nationally recognized statistical rating organization and the ratings are presented below using the Standard and Poor's rating scale.

Custodial Credit Risk

Custodial credit risk for investments is the risk that, in the event of a failure of the counter party, the discrete component units will not be able to recover the value of the investment or collateral securities that are in the possession of an outside party. The discrete component units do not have a formal policy for custodial credit risk.

The various discrete component units' investments at June 30, 2016, were held by the discrete component unit or in the name of the discrete component unit by the discrete component unit's custodial bank or trustee, except the following which were uninsured, were not registered in the name of the discrete component unit, and were held by (expressed in thousands):

Municipal/Public Bonds.....	\$ 1,918

Concentration of Credit Risk

Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer. Except for Public Employees Health Program (PEHP) (major discrete component unit), the discrete component units' policy for reducing this risk of loss is the same as described above for the primary government funds complying with the State's Money Management Act or as applicable for endowments the UPMIFA, Rule 541, or separate endowment investment policies which have been approved by their boards of trustees and by the Board of Regents. Rule 17 of the Money Management Council limits non-endowment fund investments in a single issuer of commercial paper and corporate obligations to 5-10 percent depending upon the total dollar amount held in the portfolio. For endowment funds, Rule 541 requires that a minimum of 25 percent of the overall endowment portfolio be invested in fixed income or cash equivalents. Also, the overall endowment portfolio cannot consist of more than 75 percent equity investments. Rule 541 also limits investments in alternative investment funds to between 0 percent and 30 percent based on the size of the endowment fund.

PEHP's policy limits the amount that may be invested in any one issuer to between 2 and 5 percent, depending on the credit rating of the security. There is no limit to investments in U.S. Government Securities. All investments are within policy limits.

University of Utah held more than 5 percent of its total investments in the Federal Home Loan Bank, the Federal Farm Credit Bank, and the Federal Home Loan Mortgage Corporation. These investments represent 12.2, 16.4 and 6.0 percent, respectively, of the University's total investments.

Salt Lake Community College held more than 5 percent of its total investments in the Federal Farm Credit Bank, which represents 8.0 percent of the College's total investments.

Snow College held more than 5 percent of its total investments in Municipal/Public Bonds, which represents 5.5 percent of the College's total investments.

Foreign Currency Risk

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or a deposit. The discrete component units do not have a formal policy to limit foreign currency risk.

D. Securities Lending

The Utah Retirement Systems (URS) (pension trust and defined contribution plans) and the Public Employees Health Program (PEHP) (major discrete component unit) participate in security lending programs as authorized by their Boards. Under these programs, securities are transferred to an independent broker or dealer in exchange for collateral in the form of cash, government securities, and irrevocable bank letters of credit equal to approximately 103 percent of the market value of the domestic securities on loan and 107 percent of the market value of the international securities on loan for URS and 102 percent of the market value of the domestic securities on loan for PEHP, with a simultaneous agreement to return the collateral for the same securities in the future. For both state entities, their custodial bank is the agent for its securities lending program. Securities under loan are maintained in the financial records, and corresponding liabilities are recorded for market value of the collateral received.

At yearend, neither URS nor PEHP had any credit risk exposure to borrowers because the collateral exceeded the amount borrowed. The securities on loan at yearend for the entities were \$1.941 billion and \$17.973 million, and the collateral received for those securities on loan was \$2.018 billion and \$18.399 million, respectively for URS and PEHP. Under the terms of the lending agreement, both state entities are indemnified against loss should the lending agent be unable to recover borrowed securities and distributions due to borrower insolvency or failure of the lending agent to properly evaluate the creditworthiness of the borrower. In addition, they are indemnified against loss should the lending agent fail to demand adequate and appropriate collateral on a timely basis. All securities loaned can be terminated on demand by either the state entity or the borrower. Cash collateral is invested in the lending agent's short-term investment pool.

The short-term investment pool guidelines specify that a minimum of 20 percent of the invested cash collateral is to be available each business day and that the dollar-weighted average maturity of holdings should not exceed 60 days. The relationship between the maturities of the short-term investment pool and each of the state entities' loans is affected by the maturities of the securities loans made by other entities that use the agent's pool, which the state entities cannot determine. Since the securities lending collateral is in a pool maintained by the custodial bank, the state entities do not have the ability to pledge or sell the securities, and it is not necessary to report the total income and expenses of securities lending.

E. Derivative Financial Instruments**Utah Retirement Systems**

The Utah Retirement Systems (URS) (pension trust and defined contribution plans) invests in derivative financial investments as authorized by Board policy. Derivatives are financial arrangements between two parties whose payments are based on, or “derived” from, the performance of some agreed-upon benchmark. All derivatives are considered investments. The fair value of all derivative financial instruments is reported in the Statements of Fiduciary Net Position—Pension and Other Employee Benefit Trust Funds. Within the investment asset class, swaptions are recorded in debt securities. By policy, portfolio liabilities associated with investments shall be backed by cash equivalents or deliverable securities. URS does not have a policy regarding master netting

arrangements. At December 31, 2015, URS had five types of derivative financial instruments: futures, currency forwards, options, swaps, and Synthetic Guaranteed Investment Contracts (SGIC).

Futures represent commitments to purchase (asset) or sell (liability) securities at a future date and at a specified price. Futures contracts are traded on organized exchanges (exchange traded) thereby minimizing URS’ credit risk. The net change in the futures contracts value is settled daily in cash with the exchanges. Net gains or losses resulting from the daily settlements are included with trading account securities gains in the Statement of Changes in Fiduciary Net Position. At December 31, 2015, and December 31, 2014, URS’ investments had the following notional futures balances as shown in the table below.

Options represent or give buyers the right, but not the obligation, to buy (call) or sell (put) an asset at a preset price over a specified period. The option’s price is usually a small percentage of the underlying asset’s value. As a writer of financial options, URS receives a premium at the outset of the agreement and bears the risk of an unfavorable change in the price of the financial instrument underlying the option. As a purchaser of financial

options, URS pays a premium at the outset of the agreement and the counterparty bears the risk of an unfavorable change in the price of the financial instrument underlying the option. At December 31, 2015, and December 31, 2014, URS investments had the following option balances as shown in the table below.

(Table on next page.)

Currency forwards represent forward foreign exchange contracts that are entered into in order to hedge the exposure to changes in foreign currency exchange rates on the foreign currency dominated portfolio holdings. A forward foreign exchange contract is a commitment to purchase or sell a foreign currency at a future date at a negotiated forward rate. The gain or loss arising from the difference between the original contracts and the closing of such contracts is included in net realized gains or losses on foreign currency related transactions.

At December 31, 2015, and December 31, 2014, URS investments included the following currency forwards balances (expressed in thousands):

Currency Forwards	2015 Fair Value	2014 Fair Value
Forwards Subject to Foreign Currency Risk (pending foreign exchange sales):		
Defined Benefit Plans	\$ (1,807)	\$ 24,944
Defined Contribution Plans.....	(271)	2,451
Total Currency Forwards	<u>\$ (2,078)</u>	<u>\$ 27,395</u>

URS has entered into various inflation, credit default, and interest rate swap agreements in an attempt to manage their exposure to inflation, credit, and interest rate risk. Interest rate and inflation risk represents the exposure to fair value losses arising from the future changes in prevailing market interest rates. Credit risk is an investor's risk of loss arising from a borrower who does not make payments as promised. Swaps represent an agreement between two or more parties to exchange sequences of cash flows over a period in the future. In the most common type of interest rate swap arrangement, one party agrees to pay fixed interest payments on designated dates to a counter party who, in turn, agrees to make return interest payments that float with some reference rate. The real estate interest rate swaps allowed URS to effectively convert most of their long-term variable interest rate credit facility loans into fixed interest rate loans, thereby mitigating some of their interest rate risk. All swap instruments contain collateral clauses. As of December 31, 2015, Barclays Bank PLC swaps had collateral held for \$845 thousand, Goldman Sachs Bank had collateral held for \$2.116 million, Royal Bank of Canada had collateral held for \$942 thousand, and UBS Securities had collateral held for \$508 thousand. Gains and losses on swaps are determined based on fair values and are recorded in the Statement of Changes in Fiduciary Net Position. Swap fair values are determined by an independent third party. At December 31, 2015, and December 31, 2014, URS investments had the swap fair value balances as shown in the following table:

(Table on next page.)

^^^ The \$441.392 million includes \$67.909 million of Real Estate Portfolio Swaps that expired in 2015

Derivatives which are exchange traded are not subject to credit risk. No derivatives held are subject to custodial credit risk. The maximum loss that would be recognized as of December 31, 2015, if all counterparties fail to perform as contracted was \$15.487 million. The maximum exposure is reduced by \$19.969 million of

liabilities, resulting in no net exposure to credit risk. At December 31, 2015, the counterparties' credit ratings for currency forwards, options, and swaps are subject to credit risk. Credit ratings for the wrap contracts associated with the Synthetic Guaranteed Investment Contracts are shown in the table below.

In the URS Defined Contribution Plans, members are able to participate in Synthetic Guaranteed Investment Contracts (SGICs). The SGICs are fully benefit responsive which means that URS is prohibited from assigning and selling the contract or its proceeds to a third party without the consent of the issuer. Prospective interest crediting rate adjustments are provided to plan participants. The SGICs provide assurance that the probability of future rate adjustments resulting in an interest crediting rate less than zero is

remote. The underlying investments are high credit quality averaging AA- and therefore credit loss is remote. The terms of the SGICs require all plan participants to initiate transactions within the fund at contract value. The contract value is the fair value (cost plus accrued interest). The fair value of these contracts at December 31, 2015, is \$890 million and the market value is \$900 million. Credit ratings for the wrap contracts associated with the Synthetic Guaranteed Investment Contracts are also noted below.

E. Derivative Financial Instruments (continued)**Student Assistance Program**

The following are disclosures for derivative financial instruments held by Student Assistance Program (major enterprise fund).

Objective — In order to protect against the potential of rising interest rates on its variable rate debt, the Student Assistance

Program Board entered into an interest rate exchange (swap) agreement relating to the Board's student loan revenue bonds, Series 2010 EE ("Series 2010 Bonds") on December 21, 2010. The purpose of the swap is to create a variable rate cost of funds for the Series 2010 Bonds that will be lower than the variable rate cost achievable in the cash bond market. The Board accounts for the swap agreement as a fair value hedging derivative instrument and recognizes changes in fair values on the statement of Net Position as an asset or liability with a related deferred inflow or outflow of resources respectively. The terms of the swap agreement include:

Trade Date:	December 21, 2010
Effective Date	December 30, 2010
Termination Date	November 1, 2030
Initial Notional Amount	\$364,150,000
Board Pays Floating	3 Month LIBOR + 1.64905 %
Counterparty Pays Fixed	Stepped fixed-rates ranging from 4.664 % to 5.000 %
Payment Dates	The 1st day of May and November

Changes in the fair value of the swap agreement and the ending fair value of the swap agreement are summarized below:

Student Assistance Program
Change in Fair Value
For Fiscal Years Ending June 30
(Expressed in Thousands)

<u>Derivative</u>	<u>Fair Value at June 30, 2016</u>	<u>Fair Value at June 30, 2015</u>	<u>Change in Fair Value</u>
Interest Rate Exchange	\$ 28,730	\$ 18,068	\$ 10,662

The projected net cash flows of the swap agreement are summarized below (expressed in thousands):

<u>Fiscal Year</u>	<u>Counterparty Swap Payment</u>			<u>Interest Payments to Bondholders</u>	<u>Total Payments</u>
	<u>To</u>	<u>From</u>	<u>Net</u>		
2017	\$ (7,273)	\$ 15,426	\$ 8,153	\$ (15,426)	\$ (7,273)
2018	(5,196)	11,225	6,029	(11,225)	(5,196)
2019	(4,370)	9,466	5,096	(9,466)	(4,370)
2020	(3,621)	7,845	4,224	(7,845)	(3,621)
2021	(2,964)	6,422	3,458	(6,422)	(2,964)
2022–2025	(5,539)	12,001	6,462	(12,001)	(5,539)
Total	<u>\$ (28,963)</u>	<u>\$ 62,385</u>	<u>\$ 33,422</u>	<u>\$ (62,385)</u>	<u>\$ (28,963)</u>

Swaps are not normally valued through exchange-type markets with easily accessible quotation systems and procedures. The fair value was calculated using information obtained from generally recognized sources with respect to quotations, reporting of specific transactions and market conditions and based on accepted industry standards and methodologies. The swap agreement is considered to be Level 3 for GASB 72 purposes (the different levels are discussed in Note 3.A).

Credit Risk — The risk of a change in the credit quality or credit rating of the Board and/or its counterparty. The counterparty's long-term ratings are "Aa3/Aa2", "AA-" and "AA" by Moody's Investors Service, Standard & Poor's, and Fitch Ratings, respectively.

The Board is exposed to credit risk on hedging derivative instruments that are in asset positions. To minimize its exposure to loss related to credit risk, it is the Board's policy to require counterparty collateral posting provisions in its non-exchange-traded hedging derivative instruments. These terms require full collateralization of the fair value of hedging derivative instruments in asset positions (net of the effect of applicable netting arrangements) should the counterparties' short-term and long-term credit ratings fall below "A-1" and "A," respectively, as issued by Standard & Poor's or below "Prime-1" and "A2," respectively, as issued by Moody's Investors Service. Collateral posted is to be in the form of cash, U.S. Treasury securities or agency securities held by a third-party custodian. The Board has never failed to access collateral when required.

It is the Board's policy to enter into netting arrangements whenever it has entered into more than one derivative instrument transaction with a counterparty. Under the terms of these arrangements, should one party become insolvent or otherwise default on its obligations, close-out netting provisions permit the non-defaulting party to accelerate and terminate all outstanding transactions and net the transactions' fair values so that a single sum will be owed by, or owed to, the non-defaulting party.

Interest Rate Risk — The risk that the debt service costs associated with variable rate debt increases and negatively affects coverage ratios and cash flow margins. The Board is exposed to interest rate risk; as the 3-month LIBOR rate increases, the net payment on the swap agreement increases.

Basis Risk — The risk that arises when variable rates or prices of a swap agreement and a hedged item are based on different interest rate indexes. Because the swap agreement requires the Board to pay a variable rate to the counterparty and is receiving a fixed-rate payment in return, basis risk is not applicable.

Termination Risk — The risk that the swap must be terminated prior to its stated final cash flow date. Purposes for termination include the deterioration of the Board's own credit, and the inability of the Board to obtain a replacement transaction with substantially similar terms. In such a circumstance, the Board would owe, or be owed, a termination payment. No termination events related to the swap agreement have occurred as of June 30, 2016.

Rollover Risk — The risk that the maturity of the swap contract is not coterminous with the maturity of the related bonds. The swap agreement and the underlying bonds have a final maturity date of November 1, 2030.

NOTE 4. INVESTMENT POOL

The Utah State Treasurer's Office operates the Utah Public Treasurers' Investment Fund (PTIF) investment fund. The PTIF is available for investment of funds administered by any Utah public treasurer. Participation is not required and no minimum balance or

minimum/maximum transaction is required. State agencies and funds that are authorized to earn interest also invest in the PTIF as an internal investment pool. No separate report as an external investment pool has been issued for the PTIF.

The PTIF is not registered with the SEC as an investment company and is not rated. The PTIF is authorized and regulated by the Utah Money Management Act, (*Utah Code* Title 51, Chapter 7). The Act establishes the State Money Management Council, which oversees the activities of the State Treasurer and the PTIF. The Act lists the investments that are authorized which are high-grade securities and, therefore, minimizes credit risk except in the most unusual and unforeseen circumstances.

Deposits in the PTIF are neither insured nor otherwise guaranteed by the State of Utah, and participants share proportionally in any realized gains or losses on investments.

The PTIF operates and reports to participants on an amortized cost basis. The income, gains, and losses, net of administration fees, of the PTIF are allocated to participants monthly on the ratio of the participant's share to the total funds in the PTIF based on the participant's average daily balance. This method differs from the fair value method used to value investments in these financial statements because the amortized cost method is not designed to distribute to participants all unrealized gains and losses in the fair values of the pool's investments. The total difference between the fair values of the investments in the pool and the values distributed to the pool participants using the amortized cost method described above is reported in the net position section of the following table as unrealized gains/losses. The PTIF may maintain an interest reserve to stabilize the monthly apportionment of interest. Any balance maintained in the interest reserve is reflected in the fair value valuation factor discussed below. The PTIF allocates income and issues statements on a monthly basis. Twice a year, at June 30 and December 31, which are the accounting periods for public entities, the investments are valued at fair value and participants are informed of the fair value valuation factor that enables them to adjust their statement balances to fair value.

The PTIF condensed financial statements, inclusive of external and internal participants along with the portfolio statistics for the fiscal year ended June 30, 2016, are as follows:

Deposits and Investments

The following disclosure of deposits and investments is for the PTIF, which includes external and internal participants. These assets are also included in the Note 3 disclosures of deposits and investments for the primary government. To avoid duplication, some of the detailed information in Note 3 has not been repeated in this note.

Custodial Credit Risk — Deposits

The custodial credit risk for deposits is the risk that in the event of a bank failure, the PTIF's deposits may not be recovered. The PTIF follows the Money Management Act by making deposits only in qualified financial institutions in accordance with the Act.

The deposits in the bank in excess of the insured amount are uninsured and uncollateralized. Deposits are neither collateralized nor are they required to be by state statute. The deposits for the PTIF at June 30, 2016, were \$43.26 million. Of those, \$42.01 million were exposed to custodial credit risk as uninsured and uncollateralized.

Investments

Fair Value Measurements

The PTIF categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. These guidelines recognize a three-tiered fair value hierarchy as follows:

- Level 1: Inputs are quoted prices for identical investments in active markets.
- Level 2: Observable inputs other than quoted market prices.
- Level 3: Unobservable inputs.

The following table presents the recurring fair value measurements at June 30, 2016, for the PTIF.

**Utah Public Treasurers' Investment Fund
Investments Measured at Fair Value
At June 30, 2016
(Expressed in Thousands)**

Investments by Fair Value Level	Fair Value	Fair Value Measurements Using		
		Level 1	Level 2	Level 3
Debt Securities				
Corporate Bonds and Notes	\$ 9,392,341	\$ —	\$ 9,392,341	\$ —
Money Market Mutual Funds.....	1,050,000	1,050,000	—	—
Commercial Paper.....	983,950	—	983,950	—
Total Debt Securities.....	<u>11,426,291</u>	<u>\$ 1,050,000</u>	<u>\$ 10,376,291</u>	<u>\$ 0</u>

Debt and equity securities classified in Level 1 are valued using prices quoted in active markets for those securities. Other debt and securities classified in Level 2 are valued using the following approaches:

- Corporate Bonds and Notes are valued using quoted prices for identical securities in markets that are not active;
- Commercial Paper are valued using quoted prices for identical or similar securities in markets that are not active.

Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The PTIF's policy for managing interest rate risk is to comply with the State's Money Management Act. See Note 3 for information on requirements of the Act related to interest rate risk.

The majority of the PTIF's corporate debt securities are variable-rate securities, most of which reset every three months to the market interest rate. Because these securities frequently re-price to

prevailing market rates, interest rate risk is substantially reduced at each periodic reset date. In the table below, variable-rate securities are presented according to the length of time until the next reset date rather than the stated maturity.

The PTIF follows the Money Management Act by investing only in securities authorized in the Act. See Note 3 for information on authorized investments.

The PTIF investments at June 30, 2016, are presented below.

Utah Public Treasurers' Investment Fund
At June 30, 2016
(Expressed in Thousands)

Investment Type	Fair Value	Investment Maturities (in years) Less Than 1
Debt Securities		
Corporate Bonds and Notes	\$ 9,392,341	\$ 9,392,341
Money Market Mutual Funds	1,050,000	1,050,000
Commercial Paper.....	983,950	983,950
Total Debt Securities Investments.....	<u>\$ 11,426,291</u>	<u>\$ 11,426,291</u>

Credit Risk of Debt Securities

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. The PTIF follows the Money Management Act as its policy for reducing exposure to

investment credit risk. The PTIF's rated debt investments as of June 30, 2016, were rated by Standard and Poor's and/or an equivalent nationally recognized statistical rating organization and the ratings are presented below using the Standard and Poor's rating scale.

Utah Public Treasurers' Investment Fund

Money Market Mutual Funds	\$ —	\$ —	\$ 1,050,000
Commercial Paper	\$ 893,963	\$ 89,987	\$ —

* A1 and A2 are Commercial Paper ratings

Custodial Credit Risk

Custodial credit risk for investments is the risk that, in the event of a failure of the counter party, the PTIF will not be able to recover the value of the investment or collateral securities that are in the possession of an outside party. The PTIF does not have a formal policy for custodial credit risk.

The PTIF's investments at June 30, 2016, were held by the State or in the State's name by the State's custodial bank.

Concentration of Credit Risk

Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer. The PTIF's policy for reducing this risk of loss is to comply with the Rules of the State Money Management Council. Rule 17 of the State Money Management Council limits investments in a single issuer of commercial paper and corporate obligations to 5 percent of the total dollar amount held in the portfolio. The State Money Management Council limitations do not apply to securities issued by the U.S. government and its agencies. The PTIF had no debt securities investments at June 30, 2016, with more than 5 percent of the total investments in a single issuer.

NOTE 5. RECEIVABLES

Receivables as of June 30, 2016, consisted of the following (in thousands):

	Accounts Receivable			Interest	Taxes	Notes/

Accounts receivable balances are an aggregation of amounts due from the federal government, customers, and others. Receivables from customers include charges for services to local governments, fees and fines issued by the courts and corrections, employer contributions for unemployment benefits, and receivables as a result of overpayments to individuals receiving state assistance.

Receivables for fiduciary funds listed above represent amounts due from fiduciary funds that were reclassified as external receivables on the government-wide Statement of Net Position. Other

adjustments are due to differences in the presentation and the basis of accounting between the fund financial statements and the government-wide Statement of Net Position.

Aggregated receivables for major and nonmajor discrete component units at June 30, 2016, were \$574.224 million and \$124.1 million, respectively. These receivables are net of an allowance for doubtful accounts of \$279.157 million and \$12.999 million, respectively.

NOTE 6. ACCOUNTS PAYABLE AND ACCRUED LIABILITIES

Accounts payable and accrued liabilities as of June 30, 2016, consisted of the following (in thousands):

	Salaries/ Benefits	Service Providers	Vendors/ Other	Government	Tax Refunds/ Credits	Interest	Total
Governmental Activities:							
General Fund	\$ 91,203	\$ 201,337	\$ 38,441	\$ 92,098	\$ 14,182	\$ —	\$ 437,261
Education Fund	4,510	751	16,038	120,152	56,789	—	198,240
Transportation Fund	10,001	131	104,086	50,066	2,652	—	166,936

Total Governmental Activities	<u>\$ 113,162</u>	<u>\$ 202,238</u>	<u>\$ 245,115</u>	<u>\$ 263,334</u>	<u>\$ 73,810</u>	<u>\$ 56,993</u>	<u>\$ 954,652</u>
Business-type Activities:							
Student Assistance Programs	\$ 1,932	\$ —	\$ 4,124	\$ 25,202	\$ —	\$ 3,176	\$ 34,434
Unemployment Compensation	—	2,118	—	161	—	—	2,279
Water Loan Programs	—	—	965	—	—	—	965
Nonmajor Funds	2,574	—	11,465	—	45	438	14,522
Total Business-type Activities	<u>\$ 4,506</u>	<u>\$ 2,118</u>	<u>\$ 16,554</u>	<u>\$ 25,363</u>	<u>\$ 45</u>	<u>\$ 3,614</u>	<u>\$ 52,200</u>

Accounts payable and accrued liability balances are an aggregation of amounts due to: (1) state employees for salaries/benefits; (2) service providers for childcare, job services and health services; (3) vendors and miscellaneous suppliers; (4) local and federal governments for services; (5) individuals and others as a result of tax overpayments or credits issued; and (6) interest due on bonds and other obligations.

Adjustments for fiduciary funds listed above represent amounts due to fiduciary funds that were reclassified as external payables on the government-wide Statement of Net Position. Other adjustments are due to differences in the presentation and the basis of accounting between the fund financial statements and the government-wide Statement of Net Position.

(Notes continue on next page.)

NOTE 7. INTERFUND BALANCES AND LOANS

Interfund Balances

Interfund balances at June 30, 2016, consisted of the following (in thousands):

Due to General Fund from:	
Education Fund	\$ 550
Transportation Fund	1,247
Trust Lands Fund	8
Nonmajor Governmental Funds	1,577
Unemployment Compensation Fund	8,975
Water Loan Programs	11
Nonmajor Enterprise Funds	28,971
Internal Service Funds	1,560
Fiduciary Funds	82
Total due to General Fund from other funds	<u>\$ 42,981</u>
Due to Education Fund from:	
General Fund	\$ 579
Unemployment Compensation Fund	406
Nonmajor Enterprise Funds	1
Internal Service Funds	198
Total due to Education Fund from other funds	<u>\$ 1,184</u>
Due to Transportation Fund from:	
General Fund	\$ 150
Internal Service Funds	50
Fiduciary Funds	2
Total due to Transportation Fund from other funds	<u>\$ 202</u>
Due to Nonmajor Governmental Funds from:	
General Fund	\$ 2,000
Transportation Fund	117
Internal Service Funds	72
Total due to Nonmajor Governmental Funds from other funds	<u>\$ 2,189</u>
Due to Water Loan Programs from:	
General Fund	\$ 242
Trust Lands Fund	8
Nonmajor Governmental Funds	12,009
Total due to Water Loan Programs from other funds	<u>\$ 12,259</u>

Due to Nonmajor Enterprise Funds from:	
General Fund	\$ 132
Education Fund	7
Transportation Fund	94
Trust Lands Fund	271
Nonmajor Governmental Funds	9,524
Water Loan Programs	34
Internal Service Funds	14
Total due to Nonmajor Enterprise Funds from other funds	<u>\$ 10,076</u>
Due to Internal Service Funds from:	
General Fund	\$ 22,395
Education Fund	156
Transportation Fund	3,411
Nonmajor Governmental Funds	1,186
Nonmajor Enterprise Funds	565
Internal Service Funds	39
Fiduciary Funds	15
Total due to Internal Service Funds from other funds	<u>\$ 27,767</u>
Due to Fiduciary Funds from:	
General Fund	\$ 346
Nonmajor Governmental Funds	638
Total due to Fiduciary Funds from other funds	<u>\$ 984</u>
Total Due to/Due froms	<u>\$ 97,642</u>

These balances resulted from the time lags between the dates that: (1) interfund goods and services are provided or reimbursable expenditures occur; (2) transactions are recorded in the accounting system; and (3) payments between funds are made.

Interfund Loans

At June 30, 2016, interfund loans receivable/payable balances consist of \$54.258 million revolving loans payable to the General Fund from Internal Service Funds. The balance payable to the General Fund from Internal Service Funds of \$54.258 million includes \$26.747 million that is not expected to be repaid within one year and is classified as nonspendable fund balance.

(Notes continue on next page.)

NOTE 8. CAPITAL ASSETS

Capital asset activity for the year ended June 30, 2016, was as follows (in thousands):

	<u>Beginning Balance</u>	<u>Additions</u>	<u>Deletions</u>	<u>Ending Balance</u>
Governmental Activities:				
Capital Assets Not Depreciated/Amortized:

Construction in progress of governmental activities includes amounts for buildings the State is constructing for colleges and universities and other discrete component units that are funded by state appropriations or state bond proceeds. As the buildings are completed, the applicable amounts are deleted from construction in progress of governmental activities and “transferred” to the

colleges and universities and other discrete component units. For fiscal year 2016, \$142.31 million of buildings were completed for colleges and universities. On the government-wide statement of activities, the building “transfers” are reported as higher education expenses of governmental activities and as program revenues of discrete component units.

Depreciation expense of governmental activities was charged to functions as follows (in thousands):

General Government.....	\$	18,072
Human Services and Juvenile Justice Services		8,394
Corrections.....		6,015
Public Safety		18,154
Courts.....		6,952
Health and Environmental Quality.....		4,527
Employment and Family Services		12,109

NOTE 9. LEASE COMMITMENTS

The State leases office buildings along with office and computer equipment. Although the lease terms vary, most leases are subject to annual appropriations from the State Legislature to continue the lease obligations. If an appropriation is reasonably assured, leases are considered noncancellable for financial reporting purposes.

Leases, that in substance are purchases, are reported as capital lease obligations. In the government-wide financial statements and proprietary fund financial statements, assets and liabilities resulting from capital leases are recorded at the inception of the lease at either the lower of fair value or the present value of the future minimum lease payments. The principal portion of lease payments reduces the liability, and the interest portion is expensed.

On the governmental fund financial statements, both the principal and interest portions of capital lease payments are recorded as expenditures of the applicable governmental function.

The primary government's capital lease payments and adjustments were \$1.889 million in principal and \$892 thousand in interest for fiscal year 2016. As of June 30, 2016, the historical cost of the primary government's assets acquired through capital leases was \$42.128 million of which \$41.359 million was buildings and land and \$769 thousand was equipment and other depreciable assets. As of June 30, 2016, the accumulated depreciation of the primary government's assets acquired through capital leases was \$15.053 million of which \$14.284 million was buildings and \$769 thousand was equipment and other depreciable assets. Of the \$220.756 million in discrete component unit present value of future

minimum lease payments noted below, \$94.665 million relates to capital lease arrangements between the primary government and certain colleges and universities (discrete component units).

Operating leases contain various renewal options, as well as some purchase options. However, due to the nature of the leases, they do not qualify as capital leases and the related assets and liabilities are not recorded. Any escalation clauses, sublease rentals, and contingent rents were considered immaterial to the future minimum lease payments and current rental expenditures.

Operating lease payments are recorded as expenditures or expenses when paid or incurred.

Operating lease expenditures for fiscal year 2016 were \$27.673 million for the primary government and \$35.498 million for discrete component units. For fiscal year 2015, the operating lease expenditures were \$26.118 million for the primary government and \$28.302 million for discrete component units. Future minimum lease commitments for non-cancellable operating leases and capital leases as of June 30, 2016, were as follows:

Amounts in the beginning balance column for Business-type Activities and Discrete Component Units have been adjusted as follows: for Utah Dairy Commission (nonmajor enterprise fund) net pension liability increased \$467 thousand and; for Public Employees Health Program (major component unit) net pension liability increased by \$12.487 million and Utah State Fairpark Corporation (nonmajor component unit) net pension liability increased by \$433 thousand for a total of \$12.920 million. See Note 2 for further explanation.

* The net pension liability of governmental activities is liquidated in the General Fund, Education Fund, or Transportation Fund according to the applicable employing state agency. The net pension liability of business-type activities is liquidated in the specific funds that pay the employer contributions and includes Student Assistance Program, the Internal Service Funds, Alcoholic Beverage Control, Utah Correctional Industries, and State Trust Lands Administration. The changes in the liability are netted as additions for the governmental activities and business-type activities since that information is not readily available for inclusion. See Note 17 for additional pension information.

** Compensated absences of governmental activities are liquidated in the General Fund, Education Fund, or Transportation Fund according to the applicable employing state agency. Claims liabilities of governmental activities are liquidated in the Risk Management Internal Service Fund. Net OPEB obligation of governmental activities is liquidated in the General Fund.

Differences in Net Pension Liability

The Net Pension Liability (NPL) ending balances for governmental activities of \$992.495 million and for business-type activities of \$17.845 million differ from the NPL for the Primary Government of \$1.017 billion as reported in Note 17 due to the following: the NPL for Student Assistance Programs of \$3.236 million and Utah Dairy Commission of \$406 thousand are included in business-type activities, but are excluded from the Primary Government NPL reported in Note 17 and; the Utah Schools for the Deaf and Blind (nonmajor discrete component unit) of \$10.559 million is excluded from the business-type and governmental activities reported above, but is included in the NPL for the Primary Government in Note 17.

These differences are due to the way Utah Retirement Systems (pension trust and defined contribution plans) combine and report the State's retirement plans for Note 17 which is different than how the State reports the NPL by fund type in accordance with generally accepted accounting principles.

B. General Obligation Bonds

The State issues general obligation bonds to provide funds for acquisition, construction, and renovation of major capital facilities and for highway construction. In addition, general obligation bonds have been issued to refund general obligation bonds, revenue bonds, and capitalized leases. General obligation bonds are secured by the full faith and credit of the State. Debt service requirements are provided by legislative appropriation from the State's general tax revenues. As of June 30, 2016, the State had \$63.652 million of unissued general obligation highway bond authorizations remaining, and \$474.7 million of unissued general obligation building bond authorizations remaining.

During fiscal year 2016, no general obligation or general obligation refunding bonds were issued.

General obligation bonds payable information is presented below.

General Obligation Bonds Payable

C. Revenue Bonds

Revenue bonds payable consists of those issued by the Utah State Building Ownership Authority, the Utah State Board of Regents Student Loan Purchase Programs, the State's Water Loan Programs, and various colleges and universities. These bonds are not considered general obligations of the State.

Governmental Activities

The Utah State Building Ownership Authority (SBOA) has issued bonds for the purchase and construction of facilities to be leased to state agencies and other organizations. The bonds are secured by the facilities and repayment is made from lease income appropriated by the Legislature and is not considered pledged revenue of the State. The outstanding bonds payable at June 30, 2016, are reported as a long-term liability of the governmental

activities, except for \$77.291 million and \$1.442 million, which are reported in the Alcoholic Beverage Control Fund and the Utah Correctional Industries Fund (nonmajor enterprise funds), respectively. These portions are reported as liabilities of the business-type activities on the government-wide Statement of Net Position.

Business-type Activities

The Utah State Board of Regents Student Loan Purchase Programs' (Student Assistance Programs) bonds were issued to provide funds for student loans and are secured by all assets of the Board of Regents Revenue Bond Funds and by the revenues and receipts derived from such assets. The Board of Regents has also issued a revenue bond for an office facility secured by funds within the Board of Regents budget that would otherwise be expended for rent.

The Student Assistance Programs include \$299.15 million of fixed-rate bonds, \$125.5 million of bonds at a rate set at the 3-month LIBOR plus spread, and \$792.27 million of bonds at a rate set at the 1-month LIBOR plus rates from 0.55 - 1.5 percent. The Programs' bonds also include adjustable rate bonds that are set by an auction procedure every 28 days in the amount of \$39.1 million.

The Student Assistance Programs' bonds issued under the 1993 Trust Estate are limited obligations of the Board secured by and payable solely from the Trust Estate established by the indenture. The bonds and notes were issued to finance eligible student loans. The Trust Estate consists of student loans acquired under the indenture, all proceeds of the bonds and notes, and net revenues in the funds and accounts, and any other property pledged to the Trust Estate. The Board has pledged these assets and net revenues to repay \$459.012 million of outstanding student loan revenue bonds and student loan backed notes which are payable through 2046. Principal and interest paid for the current year and total net revenues before interest expense were \$74.041 million and \$4.914 million, respectively.

The Student Assistance Programs' notes issued under the 2012 Trust Estate are special limited obligations of the Board secured by the payable solely from the Trust Estate established by the indenture. The notes were issued to refinance eligible student loans and retire outstanding funding notes of the Board. The Trust Estate consists of student loans acquired under the indenture, all proceeds of the notes and net revenues in the funds and accounts, and any other property pledged to the Trust Estate. The Board has pledged these assets and net revenues to repay \$266.492 million of outstanding student loan backed notes which are payable through 2032. Principal and interest paid for the current year and total net revenue before interest expense were \$62.489 million and \$3.244 million, respectively.

The notes issued under the 2014 Trust Estate are special limited obligations of the Board secured by and payable solely from the Trust Estate established by the indenture. The notes were issued to retire outstanding student loan revenue bonds of the Board. The Trust Estate consists of student loans acquired under the indenture, all proceeds of the notes and net revenues in the funds and accounts, and any other property pledged to the Trust Estate. The Board has pledged these assets and net revenues to repay

\$197.286 million of outstanding student loan backed notes which are payable through 2039. Principal and interest paid for the current year and total net revenues before interest expense were \$43.251 million and \$3.857 million, respectively.

The notes issued under the 2015 Trust Estate are special limited obligations of the Board secured by and payable solely from the Trust Estate established by the indenture. The notes were issued to retire a portion of the outstanding advances from the Warehouse Facility to the Board. The Trust Estate consists of student loans acquired under the indenture, all proceeds of the notes and net revenues in the funds and accounts, and any other property pledged to the Trust Estate. The Board has pledged these assets and net revenues to repay \$328.486 million of outstanding student loan backed notes which are payable through 2043. Principal and interest paid for the current year and total net revenue before interest expense were \$90.72 million and \$2.923 million, respectively.

The bonds issued under the Office Facility Bond fund are limited obligations of the board secured solely by a pledge of the proceeds from the sale of the bonds and the monies and revenues in the fund and accounts held by the Trustee under the indenture. No other money, revenue or income of the Board is pledged to the repayment of the Office Facility Bonds. The bonds were issued to refund the Series 2002 and Series 2004 Bonds. The Board has pledged these assets and net revenues to repay \$4.75 million of outstanding Office Facility Bonds which are payable through 2024. Principal and interest paid for the current fiscal year and total net revenues before interest expense were \$807 thousand and \$466 thousand, respectively.

The State's Water Loan Programs have issued recapitalization revenue bonds to provide additional capital for the State's revolving water resources loan programs. The bonds are secured by and repayments are made from the pledged principal and interest payments (pledged revenues) of specific revolving water resources loan funds. These pledged revenues will not be available for other purposes until the end of fiscal year 2023 when the bonds are completely paid off. Pledged revenues were projected to produce 150 percent of debt service requirements over the life of the bonds. The total principal and interest remaining to be paid on the bonds is \$48.234 million. For the current year, principal and interest paid and total repayments from pledged revenues were \$6.876 million and \$9.982 million, respectively. Of the bonds payable outstanding at June 30, 2016, \$42.028 million are reported in the Water Loan Programs Fund (major enterprise fund). These portions are reported as liabilities of the business-type activities on the government-wide Statement of Net Position.

Discrete Component Units

The University of Utah, Utah State University and nonmajor discrete component units issued revenue bonds for various capital purposes including student housing, special events centers, student union centers, and hospital and research facilities. The bonds are secured by pledged student building fees and other income of certain college activities.

Information on pledged revenues for discrete component units for the fiscal year ended June 30, 2016, is presented below.

Pledged Revenue — Discrete Component Units
(Expressed in Thousands)

	University of Utah	Utah State University	Nonmajor Component Units
Type of Revenue Pledged *	A, B, C	A, B	A
Amount of Pledged Revenue	\$ 1,085,330	\$ 284,807	\$ 221,535
Term of Commitment	Thru 2043	Thru 2047	Thru 2046
Percent of Revenue Pledged	100.00 %	100.00 %	100.00 %
Current Year Pledged Revenue	\$ 268,356	\$ 45,087	\$ 15,942
Current Year Principal and Interest Paid	\$ 53,673	\$ 11,550	\$ 12,901

* Type of Revenue Pledged:

- A = Student and housing fees, auxiliary net revenues from bookstores, parking, stadium and event centers, and other campus generated charges and fees.
- B = Research net revenue generated from the recovery of allocated facilities and administrative rates to grants and contracts.
- C = Hospital and clinic net revenues from providing various health and psychiatric services to the community.

D. Conduit Debt Obligations

The Utah Charter School Finance Authority (nonmajor discrete component unit) issued conduit debt obligations on behalf of various charter schools. The debt is the responsibility of the charter schools, and neither the State nor any political subdivision of the State is obligated in any manner for repayment of the debt. Accordingly, this debt has not been reported in the accompanying financial statements. The outstanding balance at June 30, 2016, is \$230.321 million in tax-exempt conduit debt.

E. Defeased Bonds and Bond Refunding

In prior years, the State defeased certain general obligation and revenue bonds by placing the proceeds of new bonds and other monies available for debt service in irrevocable trusts to provide for all future debt service payments on the old bonds. Accordingly, the trust account assets and the liability for the defeased bonds are not included in the Statement of Net Position. At June 30, 2016, the total amount outstanding of defeased general obligation bonds was \$374.195 million. At June 30, 2016, the total amount outstanding of defeased revenue bonds was \$28.59 million.

During fiscal year 2016, the University of Utah (major discrete component unit) issued General Revenue Refunding Bonds Series 2016A during the fiscal year to partially refund \$21.2 million of the Auxiliary and Campus Facilities System Series 2012A bonds. The refunding activity had limited impact on the retirement period but did result in a decrease of aggregate debt service payments of \$3.5 million and a present value economic gain of approximately \$3.3 million.

In prior years, discrete component units defeased certain revenue bonds by placing the proceeds of new bonds and various bond reserves in irrevocable trusts to provide for all future debt service payments on the old bonds. Accordingly, the trust account assets and the liability for the defeased bonds are not included in the discrete component unit column on the Statement of Net Position.

At June 30, 2016, \$238.081 million of college and university bonds outstanding are considered defeased.

F. Contracts Payable

Discrete component units capital leases/contracts payable include \$5.91 million in life annuity contracts.

G. Pollution Remediation Obligations

Under the federal Superfund law, the State is responsible for sharing remediation costs at sites where the Environmental Protection Agency expends Superfund trust monies for cleanup. Currently there are six sites in various stages of cleanup, from initial assessment to cleanup activities. The pollution remediation liabilities associated with these sites were measured using the actual contract cost, where no changes in cost are expected, or the expected cash flow technique. Liability estimates are subject to change due to price increases or reductions, technology, or changes in applicable laws or regulations governing the remediation efforts. As of June 30, 2016, the liability is \$6.401 million. The State does not anticipate recovering reimbursements from the parties who caused the pollution.

H. Notes Payable

The Student Assistance Programs has a line of credit under the Warehouse Loan, Security and Servicing Agreement. The line of credit is a limited obligation of the Board secured by and payable solely from the pledged collateral. The line of credit was issued to acquire federally guaranteed student loans. The fund consists of student loans acquired under the agreement, all proceeds of the line of credit and net revenues in the funds and accounts, and any other property pledged to the fund. The Board has pledged these assets and net revenues to repay \$921.995 million of outstanding principal which is payable through 2017. During fiscal year 2017,

\$921.995 million in principal and \$7.554 million in interest will be paid. Principal and interest paid for the current year and total net revenue before interest expense was \$241.076 million and \$7.26 million, respectively.

component units for the purchase of buildings and equipment. The notes bear various interest rates and will be repaid over the next 18 years. They are secured by the related assets.

Payment information on notes payable is presented below:

The notes payable balance consists of notes issued by discrete

I. Debt Service Requirements for Derivatives

Business-type Activities

As explained in Note 3.E., the Student Assistance Programs (major proprietary fund) Board had issued on December 30, 2010, the Series 2010 EE bonds for the purpose of refinancing

certain outstanding bonds in the 1993 indentures. As part of this issuance, the Board entered into an interest rate exchange (swap) agreement relating to the Board's student loan revenue bonds. The projected net cash flows of the swap agreement are summarized below.

Deferred Inflows:			
Unavailable Revenue	\$ 10,027	\$ —	\$ —
Deferred Amount on Refundings of Bonded Debt.....	—	10,146	211
Fair Value of Interest Rate Swap Agreements	—	28,730	—
Deferred Inflows Relating to Pensions.....	102,888	1,926	34,230
Total Deferred Inflows	\$ 112,915	\$ 40,802	\$ 34,441

Of the \$392.288 million deferred outflows of resources reported in the governmental activities column, \$364.98 million represent deferred outflows relating to pensions, of which \$24.526 million are reported in the Internal Service Funds. The remaining \$27.308 million represent deferred amount on refundings of bonded debt, of which \$9 thousand are reported in the Internal Service Funds.

Of the \$112.915 million deferred inflows of resources reported in the governmental activities column, \$102.888 million represent deferred inflows relating to pensions, of which \$7.011 million are reported in the Internal Service Funds. The remaining \$10.027 million in unavailable revenue represent imposed fees received before the period when those resources are permitted to be used.

Deferred outflows and inflows of resources for governmental funds, proprietary funds, and discrete component units are reported in detail in their respective fund statements.

Under the modified accrual basis of accounting, governmental funds reported \$655.879 million in unavailable revenue consisting of \$480.968 million from various taxes and \$174.911 million from other sources.

The deferred outflows of resources relating to pensions for governmental activities of \$364.98 million and for business-type activities of \$7.226 million differ from the deferred outflows of resources for the Primary Government of \$375.668 million as reported in Note 17 due to the following: Student Assistance Programs of \$1.035 million and Utah Dairy Commission of \$110

thousand are included in business-type activities, but are excluded in the deferred outflows of resources reported for the Primary Government in Note 17; the Utah Schools for the Deaf and Blind (nonmajor discrete component unit) of \$4.607 million is excluded from presentation in the governmental and business-type activities reported above, but is included in the deferred outflows of resources reported for the Primary Government in Note 17.

The deferred inflows of resources relating to pensions for governmental activities of \$102.888 million and for business-type activities of \$1.926 million differ from the deferred inflows of resources for the Primary Government of \$105.501 million in Note 17 due to the following: Student Assistance Programs of \$418 thousand and Utah Dairy Commission of \$38 thousand are included in business-type activities, but are excluded in the deferred inflows of resources reported for the Primary Government in Note 17; the Utah Schools for the Deaf and Blind (nonmajor discrete component unit) of \$1.143 million is excluded from presentation in the governmental and business-type activities reported above, but is included in the deferred inflows of resources reported for the Primary Government reported in Note 17.

These differences are due to the way Utah Retirement Systems (pension trust and defined contribution plans) combine and report the State's retirement plans for Note 17 which is different than how the State reports the deferred outflows and inflows of resources by fund type in accordance with generally accepted accounting principles.

NOTE 12. GOVERNMENTAL FUND BALANCES, BUDGET STABILIZATION ACCOUNTS, AND NET POSITION RESTRICTED BY ENABLING LEGISLATION**A. Governmental Fund Balances – Restricted, Committed and Assigned**

The State's fund balances represent: (1) **Restricted Purposes**, which include balances that are legally restricted for specific purposes due to constraints that are imposed by law through constitutional provisions or are externally imposed by creditors, grantors, contributors, or laws or regulations of other

governments; (2) **Committed Purposes**, which include balances that can only be used for specific purposes pursuant to constraints imposed by formal action of the Legislature; (3) **Assigned Purposes**, which includes balances that are constrained by the government's intent to be used for specific purposes, but are neither restricted nor committed. A summary of the nature and purpose of these reserves by fund type at June 30, 2016, follows:

Governmental Fund Balances

* Resources restricted through constitutional provisions.

B. Budget Stabilization Accounts

In accordance with Sections 63J-1-312 and 313 of the *Utah Code*, the State maintains the General Fund Budget Reserve Account in the General Fund (the “Rainy Day Fund”) and an Education Fund Budget Reserve Account in the Education Fund (the “Education Reserve”). These stabilization balances can only be used to cover budget shortfalls when appropriated by the Legislature. State law requires 25 percent of any revenue surplus in the General Fund to be deposited in the Rainy Day Fund after any required Medicaid growth savings transfer is made (see Medicaid Budget Sustainability Account discussion below) and 25 percent of any revenue surplus in the Education Fund to be deposited in the Education Reserve, in each case up to a statutory limit. State law limits the totals of the Rainy Day Fund and Education Reserve to 9 percent and 11 percent of appropriations from the General Fund and Education Fund, respectively, for the fiscal year in which the surplus occurred.

Historically, resources from the Rainy Day Fund or Education Reserve have only been expended during recessionary periods to cover overall budget shortfalls after other budgetary measures have been exhausted. Section 63J-1-217 of the *Utah Code* requires the State to maintain a balanced budget. If a revenue shortfall is expected, the Governor is required to direct state agencies to reduce commitments and expenditures by an amount proportionate to any revenue shortfall until the Legislature takes action to rectify the deficit. The Rainy Day Fund and the Education Reserve ended the year with balances of \$143.614 million and \$349.465 million, respectively. For the fiscal year ended June 30, 2016, \$2.443 million was transferred into the Rainy Day Fund. There was no transfer into the Education Reserve because there was no revenue surplus, as defined by law.

In accordance with Section 63J-1-315 of the *Utah Code*, the State maintains the Medicaid Growth Reduction and Budget Stabilization Restricted Account (“Medicaid Budget Stabilization Account”). The Legislature may appropriate money from the

account only if Medicaid program expenditures are estimated to be 108 percent or more of Medicaid program expenditures for the previous year. The account is funded in a fiscal year when there are savings in the Medicaid Program and a General Fund revenue surplus. For the fiscal year ended June 30, 2016, \$8.761 million was transferred into the Medicaid Budget Stabilization Account.

C. Minimum Fund Balance Policies

Statutorily, the State established a minimum fund balance policy for two funds, the Disaster Recovery Restricted Account and the Local Government Emergency Response Loan Fund. In accordance with Section 53-2a-603 of the *Utah Code*, under certain circumstances, the Disaster Recovery Restricted Account may be used to provide short-term loans to a member state of the Emergency Management Assistance Compact. Loans may be issued from the account as long as the fund maintains a minimum fund balance of \$10 million. Section 53-2a-607 of the *Utah Code*, requires the Local Government Emergency Response Loan Fund to provide short-term, low-interest loans to local government entities. The amount loaned may not be more than 50 percent of the total fund balance available, or an amount that will leave the fund balance at less than \$10 million.

D. Net Position Restricted by Enabling Legislation

The State’s net position restricted by enabling legislation represents resources which a party external to a government—such as citizens, public interest groups, or the judiciary—can compel the government to use only for the purpose specified by the legislation. The government-wide Statement of Net Position reports \$5.915 billion of restricted net position, of which \$15.4 million is restricted by enabling legislation.

NOTE 13. DEFICIT NET POSITION AND FUND BALANCE

Funds reporting a deficit total net position at June 30, 2016, are (in thousands):

Private Purpose Trust Funds:	
Employers' Reinsurance	\$ (6,130)
Petroleum Storage Tank	\$ (3,474)
Internal Service Funds:	
Technology Services	\$ (25,400)
Human Resource Management.....	\$ (2,729)
Enterprise Funds:	
State Trust Lands Administration.....	\$ (764)

The deficit in the Employers' Reinsurance Trust represents the unfunded portion of the actuarial estimate of claims incurred. The Employers' Reinsurance Trust claims are funded from assessments on all workers' compensation insurance issued to employers within the State. The Utah Labor Commission sets the rate up to the maximum established by the Legislature to keep current revenues at a level sufficient to cover current cash disbursements. State law limits the State's liability to the cash or assets in the Employers' Reinsurance Trust only. State law also limits the Trust's liability to claims resulting from industrial accidents or occupational diseases occurring on or before June 30, 1994. For claims resulting from accidents or diseases on or after July 1, 1994, the employer or its insurance carrier is liable for resulting liabilities. Unfunded future claims are payable solely from future trust revenues.

The Petroleum Storage Tank Trust covers the cleanup costs of leaks from state-approved underground petroleum storage tanks. The assets in the fund are more than adequate to pay current claims. Unfunded future claims will be funded solely by future trust revenues.

The deficit net positions in the Technology Services Fund and in the Human Resource Management Fund are the result of implementing GASB Statement 68, *Accounting and Financial Reporting for Pensions*. This Statement requires the recognition and reporting of the net pension liability and related transactions, including a restatement of beginning net position, resulting in a deficit net position. The Technology Services Fund also reported a \$35.934 million deficit in the unrestricted portion of their net position at June 30, 2016, primarily as a result of implementing this Statement. See Note 2 for additional information.

The Enterprise Fund deficit net position in State Trust Lands Administration is a result of a decrease in the royalty accruals because of general market conditions.

Other than noted above, funds reporting a deficit position in the unrestricted portion of their net position at June 30, 2016, are (in thousands):

Internal Service Funds:	
Fleet Operations	\$ (30,394)
General Services	\$ (1,552)
Enterprise Funds:	
Alcoholic Beverage Control.....	\$ (5,779)
Utah Correctional Industries	\$ (694)
State Trust Lands Administration.....	\$ (1,341)

The Internal Service Fund deficit in Fleet Operations is mainly due to the significant investment in capital assets required for these operations. The deficit will be covered by future charges for services. Management may also seek rate increases to help reduce this deficit.

The Internal Service Fund deficit in General Services and the Enterprise Fund deficits in Alcoholic Beverage Control and Utah Correctional Industries are primarily the result of implementing GASB Statement 68. The Enterprise Fund deficit in State Trust Lands Administration is the result of changes in accruals due to general market condition changes.

(Notes continue on next page.)

NOTE 14. INTERFUND TRANSFERS

Transfers between funds occur when one fund collects revenue and transfers the assets to another fund for expenditure or when

one fund provides working capital to another fund. All transfers must be legally authorized by the Legislature through statute or an *Appropriation Act*. Interfund transfers for the fiscal year ended June 30, 2016, are as follows (*in thousands*):

Transferred From	Transferred To					
	Governmental Funds					
	General Fund	Education Fund	Transportation Fund	Transportation Investment Fund	Trust Lands	Nonmajor Governmental Funds
General Fund	\$ —	\$ 7,861	\$ 29,767	\$ —	\$ 12	\$ 278,663
Education Fund.....	742,481	—	—	—	—	209,911
Transportation Fund.....	48,546	—	—	89,903	—	7,519
Transportation Investment Fund	—	—	33,104	—	—	348,420
Nonmajor Governmental Funds.....	70,216	—	—	—	—	225
Unemployment Compensation.....	2,454	—	—	—	—	—
Water Loan Programs	4,695	—	—	—	—	—
Community Impact Loan Fund.....	17,534	—	—	—	—	—
Nonmajor Enterprise Funds	104,867	2	—	—	1,839	—
Total	<u>\$ 990,793</u>	<u>\$ 7,863</u>	<u>\$ 62,871</u>	<u>\$ 89,903</u>	<u>\$ 1,851</u>	<u>\$ 844,738</u>

Continues Below

Transferred From	Transferred To		
	Enterprise Funds		
	Nonmajor Enterprise Funds	Internal Service Funds	Total
General Fund	\$ 3,243	\$ 6,594	\$ 326,140
Education Fund.....	—	—	952,392
Transportation Fund.....	—	—	145,968
Transportation Investment Fund	—	—	381,524
Nonmajor Governmental Funds.....	—	127	70,568
Unemployment Compensation.....	—	—	2,454
Water Loan Programs	—	—	4,695
Community Impact Loan Fund.....	—	—	17,534
Nonmajor Enterprise Funds	—	—	106,708
Total	<u>\$ 3,243</u>	<u>\$ 6,721</u>	<u>\$ 2,007,983</u>

Transfers from major governmental funds to nonmajor governmental funds are primarily for debt service expenditures and capital facility construction. Transfers from nonmajor enterprise funds to the General Fund are mostly liquor profits from the Alcoholic Beverage Control Fund that are required by statute to be deposited in the General Fund. All other transfers are made to finance various programs as authorized by the Legislature.

In addition, the Legislature authorized payments of \$970.263 million to discrete component units. Payments to discrete component units are reported as expenditures in both the General Fund governmental fund statements and the Governmental Activities column of the Statement of Activities. They are also reported as revenues in the Component Units column of the Statement of Activities.

NOTE 15. LITIGATION, CONTINGENCIES, AND COMMITMENTS

A. Litigation

- The State is involved in various legal actions arising in the ordinary course of business. The State is vigorously contesting all of these matters, but as of this date it is not possible to determine the outcome of these proceedings. In the opinion of the Attorney General and management, the ultimate disposition of these matters will not have a material adverse effect on the State’s financial position.

- A lawsuit was filed by the Tobacco Companies against the settling states participating in a master settlement agreement in an effort to recoup tobacco settlement payments made in prior years. The plaintiffs allege that they are entitled to a non-participating manufacturer (NPM) adjustment that will allow them to take a credit against future payment obligations. The dispute is currently in the early stages of arbitration for the tobacco settlement payment made to Utah in fiscal year 2005. An adverse ruling may impact future state tobacco receipts of up to approximately \$28 million plus interest.
- In addition to the items above, the State is contesting other legal actions totaling over \$14.497 million plus attorneys' fees and interest and other cases where the amount of potential loss is undeterminable. Some portions of the amounts sought have been paid by the State or placed in escrow.

B. Contingencies

- The State receives a significant amount of funding from the federal government. Funds flowing from the federal government to the State are subject to changes to federal laws and appropriations. Based on the financial position of the federal government it is reasonably possible that events will occur in the near term that will significantly affect the flow of federal funds to the State. The State is taking action to identify and address the impact a significant reduction of federal funds will have on the programs and operations of the State including requiring contingency plans from state agencies.
 - Financial and compliance audits (Single Audit) of federal grants, contracts, and agreements were conducted under the provisions of the Federal Office of Management and Budget's circulars. As a result of the audits, identified questioned costs are immaterial. In addition, program compliance audits by the federal government are conducted periodically; however, an estimate of any potential disallowances on these audits and findings on other audits on noncompliance cannot be estimated as to the potential liability. The Single Audit for the fiscal year ended June 30, 2016, will be available in December 2016.
 - Management's estimated liability for the Petroleum Storage Tank Trust (private purpose trust fund) is highly sensitive to change based on the short period of historical data and the uncertainty in estimating costs. Since it is not possible to determine the occurrence date of a leak in an underground storage tank, it is not possible to estimate the number or the associated costs of leaks that have not been detected.
 - The Utah Fund of Funds (UFOF – legally separate entity) was created by the passage of the Utah Venture Capital Enhancement Act in fiscal year 2003 to mobilize private investments and enhance the venture capital culture and infrastructure within the State. The State's involvement in this program is limited to public oversight of the UFOF primarily in the form of approving the issuance of contingent tax credit certificates, ensuring that the UFOF is achieving its statutory purposes of spurring economic development, and protecting against the redemption of contingent tax credits. The aggregate outstanding tax certificates available to the program cannot exceed: (1) \$130 million of contingent tax credits used as collateral or a guarantee on loans for the debt-based financing of investments initiated before July 1, 2014; or (2) \$120 million of contingent tax credits for a loan refinanced using debt-based or equity-based financing; and (3) \$100 million used as an incentive for equity investments in the UFOF. The tax certificates are structured so that not more than \$20 million of contingent tax credits for each \$100 million increment of contingent tax liability may be redeemable in any fiscal year. At December 31, 2015, \$89.999 million in loans were outstanding and invested in venture capital and private equity funds. The loans will mature in 2017. Under certain circumstances, the holder of a certificate is entitled to a refundable tax credit against tax liabilities imposed by *Utah Code* Section 59-7, "Corporate Franchise and Income Taxes," or Section 59-10, "Individual Income Tax Act." To date, the State has not had to place any contingent tax credits into the program and does not anticipate the use of tax credits anytime in the near future.
 - The State is self-insured for liability claims up to \$1 million and beyond the excess insurance policy limit of \$10 million. The State is self-insured for individual property and casualty claims up to \$1 million and up to \$3.5 million in aggregate claims and beyond the excess insurance policy limit of \$1 billion per occurrence. According to an actuarial study and other known factors, \$48.092 million exists as either incurred but unfiled or unpaid claims. This amount is reported as a liability of the Department of Administrative Services' Risk Management Fund (internal service fund).
 - The Utah School Bond Guaranty Act (*Utah Code* Sections 53A-28-101 to 402), which took effect on January 1, 1997, pledges the full faith, credit, and unlimited taxing power of the State to guaranty full and timely payment of the principal and interest on general obligation bonds issued by qualifying local school boards. The primary purpose of the Guaranty Act is to reduce borrowing costs for local school boards by providing credit enhancement for Guaranteed Bonds. The local school boards do not meet the criteria for inclusion as part of the State's reporting entity.
- In the event a school board is unable to make the scheduled debt service payments on its Guaranteed Bonds, the State is required to make such payments in a timely manner. For this purpose, the State may use any available monies, may use short-term borrowing from the State Permanent School Fund (part of the permanent Trust Lands Fund), or may issue short-term general obligation notes. The local school board remains liable to the State for any such payments on Guaranteed Bonds. Reimbursements to the State may be obtained by intercepting payment of state funds intended for the local school board. The State may also compel the local school board to levy a tax sufficient to reimburse the State for any guaranty payments.
- The State Superintendent of Public Instruction is charged with monitoring the financial condition of local school boards and reporting, at least annually, its conclusions to the Governor, the Legislature, and the State Treasurer. The State Superintendent must report immediately any circumstances which suggest a local school board may not be able to pay its debt service obligations when due. The State has not advanced any monies for the payment of debt service on Guaranteed Bonds and does not expect that it will be required to advance monies for any significant period of time.

Local school boards have \$2.917 billion principal amount of Guaranteed Bonds outstanding at June 30, 2016, with the last maturity date being 2036. The State cannot predict the amount of bonds that may be guaranteed in future years, but no limitation is currently imposed by the Guaranty Act.

- The Charter School Credit Enhancement Program (Program) (*Utah Code* Sections 53A–20b–201 to 204), was established to reduce borrowing costs for qualifying charter schools by providing credit enhancement on bonds issued on behalf of those schools. Bonds issued under this Program are not legal obligations of the State, and neither the State nor any political subdivision of the State is obligated in any manner for repayment of the bonds. If a charter school with bonds issued under the Program draws on its debt service reserve fund, state law requires the Governor to request an appropriation from the Legislature to restore the school's debt service reserve fund to its required level or to meet any principal or interest payment deficiency. However, the Legislature is not required to make any such appropriations. A charter school is required to repay the State any appropriations it receives to restore its debt service reserves at the time and in the manner required by the Utah Charter School Finance Authority (Authority) (nonmajor discrete component unit).

When bonds are issued under the Program, the qualifying school pays up-front and ongoing fees at rates determined by the Authority. These fees are deposited into a restricted reserve account that was funded initially with a \$3 million appropriation. These monies may be appropriated by the Legislature to replenish any deficiency in the debt service reserve fund of a charter school under the Program.

The Authority is the conduit issuer of Credit Enhancement Program bonds, and is responsible for developing criteria by which a charter school qualifies to participate in the Program. The Authority is also charged with monitoring the financial condition of qualifying charter schools and certifying, at least annually, the amount required to restore amounts on deposit in the debt service reserve funds of charter schools participating in the Program. The total amount of charter school debt enhanced by the Program is limited by formula. As of June 30, 2016, \$224.145 million of debt was outstanding under the Program.

- At June 30, 2016, the Utah Higher Education Assistance Authority Student Loan Guarantee Program (Student Assistance Programs, major enterprise fund) had guaranteed student loans outstanding with a current principal and interest balance of \$985.902 million.
- The Attorney General of the State sued the tobacco industry for medical costs related to smoking. The State of Utah has signed on to a master settlement agreement along with 45 other states. The major tobacco manufacturers and most of the smaller manufacturers have joined the agreement. The State received \$36.932 million from tobacco companies in fiscal year 2016 and expects to receive approximately \$36.923 million in fiscal year 2017. Annual payments will be adjusted for factors such as inflation, decreased sales volume, previously settled lawsuits, disputed payments, and legal fees.
- The Utah School Readiness Initiative (*Utah Code* Sections 53A-1b-101 to 111), created the School Readiness Board

(Board) and enabled the Board to provide grants and enter into contracts with private entities in order to improve early childhood education for at-risk students. Under the terms of the contract, private investors fund the program using a social impact bond. This bond offers the issuers a return on investment only if students in the program meet specific education benchmarks. The program was capped at 750 students for the first two years. Enrollment will increase in the 2016-2017 school year to 1,000 students and enrollment in the 2017-2018 school year will be 1,000 students. As of June 30, 2016, the State of Utah committed almost \$5 million that will cover student evaluations and any repayment of the social impact bond. It is anticipated the State of Utah will commit additional funds in future years.

C. Commitments

- At June 30, 2016, the Industrial Assistance Program of the General Fund had grant commitments of \$9.947 million, contingent on participating companies meeting certain performance criteria.
- At June 30, 2016, the Economic Development Tax Incentive Financing Incentive program (EDTIF) had outstanding long-term contract commitments for General Fund cash rebates of \$90.264 million and Education Fund tax credits of \$634.351 million. These cash rebates and tax credits are contingent on participating companies meeting certain economic development performance criteria.
- At June 30, 2016, the Motion Picture Incentive Program had outstanding contract commitments for General Fund cash rebates of \$43 thousand and Education Fund tax credits of \$19.557 million. These cash rebates and credits are contingent upon participating motion picture companies meeting certain within-the-state production criteria.
- At June 30, 2016, the Utah Department of Transportation had construction and other contract commitments of \$622.492 million, of which \$404.859 million is for Transportation Fund (major special revenue fund) and \$217.633 million is for projects within the Transportation Investment Fund (major capital projects fund) highway projects. These commitments will be funded with future appropriations in the Transportation Fund and through proceeds of general obligation bonds and future appropriations in the Transportation Investment Fund.
- At June 30, 2016, the permanent Trust Lands Fund (permanent fund) had real estate commitments of \$134.778 million, of which \$92.873 million have been called, leaving a remaining commitment of \$41.905 million.
- At June 30, 2016, the State's capital projects funds (nonmajor capital projects funds) had construction commitments of \$284.903 million. These commitments will be funded with legislative appropriations, intergovernmental revenues, and proceeds of general obligation and lease revenue bonds.
- At June 30, 2016, the enterprise funds had loan commitments of approximately \$208.699 million and grant commitments of approximately \$58.277 million.
- Utah Retirement Systems (pension trust and defined contribution plans) has at its yearend December 31, 2015, committed to fund certain private equity partnerships, absolute return, and real asset funds projects for an amount

of \$8.75 billion. Funding of \$6.27 billion has been provided by December 31, 2015, leaving an unfunded commitment of \$2.48 billion.

- Under the terms of various limited partnership agreements approved by the Board of Trustees or by the University of Utah (major discrete component unit) officers, the University is obligated to make periodic payments for advance commitments to venture capital and private equity investments. As of June 30, 2016, the University had committed, but not paid, a total of \$38.233 million in funding for these alternative investments.
- Under the terms of various limited partnership agreements approved by the Board of Trustees or by the Utah State University (major discrete component unit) officers, the University is obligated to make periodic payments for advance commitments to venture capital, natural resource, and private equity investments. As of June 30, 2016, the University had committed, but not paid, a total of \$13.679 million in funding for these alternative investments.
- At June 30, 2016, Utah State University (major discrete component unit) had outstanding commitments for the construction and remodeling of its buildings of appropriately \$87.7 million.

NOTE 16. JOINT VENTURES

Utah Education Network

The Utah Education Network (UEN) is a publicly funded consortium administered by the University of Utah supporting educational technology needs for Utah's public and higher education institutions, public libraries, and state agencies. UEN provides internet access for all Utah public middle schools, high schools, and higher education institutions. UEN also operates a fully interactive distance learning network interconnecting public schools and higher education institutions statewide. State appropriation support of UEN amounted to \$32.316 million for the year ended June 30, 2016. UEN is not separately audited, but is included in the audited financial statements of KUEN, a public broadcasting television station operated by the University. Copies of those statements can be obtained from KUEN's administrative offices.

NOTE 17. PENSION PLANS

Utah Retirement Systems (URS) (pension trust and defined contribution plans) was established by Title 49 of the *Utah Code*. URS administers the pension systems and plans under the direction of the URS Board whose members are appointed by the Governor. URS has a separate accounting system and prepares a separately issued financial report covering all retirement systems and deferred compensation plans it administers. URS maintains records and prepares financial statements using fund accounting principles and the accrual basis of accounting under which benefits and expenses are recognized when due and payable and revenues are recorded in the accounting period in which they are

earned and become measurable. URS reports on a calendar yearend. The December 31, 2015, financial report has been included in this Comprehensive Annual Financial Report as a pension trust fund for URS within the fiduciary funds. Copies of the separately issued financial report that include financial statements and required supplemental information may be obtained by writing to Utah Retirement Systems, 560 East 200 South, Salt Lake City, Utah 84102-2044, or visiting the website online at www.urs.org.

The URS operations are comprised of the following groups of systems/plans covering employees of the State and participating local government and public education entities:

- The Public Employees Noncontributory Retirement System (Noncontributory System); the Public Employees Contributory Retirement System (Contributory System); and the Firefighters Retirement System (Firefighters System), which are defined-benefit multiple-employer, cost-sharing, public employee retirement systems;
- The Public Safety Retirement System (Public Safety System), which is a defined-benefit mixed agent and cost-sharing, multiple-employer retirement system;
- The Judges Retirement System (Judges System) and the Utah Governors and Legislators Retirement Plan, which are single-employer service-employee retirement systems;
- The Tier 2 Public Employees Contributory Retirement System (Tier 2 Public Employees System); and the Tier 2 Public Safety and Firefighters Contributory System (Tier 2 Public Safety and Firefighters System), which are defined-benefit multiple-employer, cost-sharing, public employee retirement systems;
- Five defined contribution plans comprised of the 401(k) Plan, 457(b) Plan, Roth and Traditional IRAs, and Health Reimbursement Arrangement (HRA).

The Tier 2 Public Employees System became effective July 1, 2011. All eligible employees beginning on or after July 1, 2011, who have no previous service credit with any of the Utah Retirement Systems, are members of the Tier 2 Retirement System.

A. Defined Benefit Plans

Retirement benefits are specified by Title 49 of the *Utah Code*. The retirement systems are defined-benefit plans wherein the benefits are based on age and/or years of service and highest average salary. Various plan options within the systems may be selected by retiring members. Some of the options require actuarial reductions based on attained age, age of spouse, and similar actuarial factors. A brief summary of eligibility for and benefits of the systems is provided in the following table:

(Table on next page.)

Summary of Benefits by System

	<u>Noncontributory System</u>	<u>Contributory System</u>	<u>Public Safety System</u>	<u>Firefighters System</u>	<u>Judges System</u>	<u>Tier 2 Public Employees System</u>	<u>Tier 2 Public Safety and Firefighters System</u>
Final Average Salary....	Highest 3 Years	Highest 5 Years		Highest 3 Years	Highest 2 Years	Highest 5 Years	Highest 5 Years
Years of Service	30 years any age	30 years any age		20 years any age	25 years any age	35 years any age	25 years any age
Required and/or Age Eligible for Benefit....	25 years any age*	20 years age 60*		10 years age 60	20 years age 55*	20 years age 60*	20 years age 60*
	20 years age 60*	10 years age 62*		4 years age 65	10 years age 62	10 years age 62*	10 years age 62*
	10 years age 62*	4 years age 65			6 years age 70	4 years age 65	4 years age 65
	4 years age 65						
Benefit Percent per Year of Service**.....	2.00 % per year all years	1.25 % per year to June 1975 2.00 % per year July 1975 to present		2.50 % per year up to 20 years 2.00 % per year over 20 years	5.00 % first 10 years 2.25 % second 10 years 1.00 % over 20 years	1.50 % per year all years	1.50 % per year all years
COLA***.....	Up to 4.00 %	Up to 4.00 %		Up to 4.00 % depending on the employer	Up to 4.00 % compounded	Up to 2.50 %	Up to 2.50 %

Note: The Utah Governors and Legislators Retirement Plan benefits are explained below.

- * With actuarial reductions.
- ** For members and retirees in the systems, prior to January 1, 1989, there may be a 3 percent benefit enhancement
- *** All post-retirement cost-of-living adjustments are non-compounding and are based on the original benefit except for Judges, which is a compounding benefit. The cost-of-living adjustments are also limited to the actual Consumer Price Index (CPI) increase for the year, although unused CPI increases not met may be carried forward to subsequent years.

Former governors at age 65 receive \$1,340 per month per term. Legislators receive a benefit at age 65 with four or more years of service at the rate of \$29.20 per month per year of service. Retirement at age 62 with ten or more years of service will receive an actuarial reduction. Both the governors' and legislators' benefits are adjusted based on the Consumer Price Index (CPI), limited to 4 percent of the base benefit per year.

Death benefits for active and retired employees are in accordance with retirement statutes. Upon termination of employment,

members of the Systems may leave their retirement account intact for future benefits based on vesting qualification, or withdraw the accumulated funds in their individual member account and forfeit service credits and rights to future benefits upon which the contributions were based.

At December 31, 2015, the following number of employees were covered by the State's (primary government's) single-employer plans:

Single-employer Plans Covered Employees
December 31, 2015

	<u>Judges System</u>	<u>Governors and Legislators Retirement Plan</u>
Inactive Employees or Beneficiaries Currently Receiving Benefits.....	140	241
Inactive Employees Entitled to But Not Yet Receiving Benefits.....	4	81
Active Employees.....	112	93
Total Single-employer Plans Covered Employees.....	<u>256</u>	<u>415</u>

(Notes continue on next page.)

Contribution Rates

As a condition of participation in the Defined Benefit Systems, employers and/or employees are required to contribute certain percentages of salary and wages as authorized by statute and specified by the URS Board. Contributions are actuarially determined as an amount that, when combined with employee contributions (where applicable) is expected to finance the costs of benefits earned by employees during the year, with an

additional amount to finance any unfunded actuarial accrued liability. For the Utah Governors and Legislators plan, an annual appropriation is statutorily required to maintain this plan on a financially and actuarially sound basis. The State paid 100 percent of the contractually and statutorily required contributions. Contribution rates and contributions for the fiscal year ended June 30, 2016, are presented in the following table (*dollars expressed in thousands*):

Systems/Plan	Contributions				
	Employee Paid	Paid by Employer for Employee	Employer Paid	Primary Government	Discrete Component Units
Noncontributory Public Employees	—	—	22.19 %	\$ 136,246	\$ 56,990
Contributory					
Contributory Public Employees.....	—	6.00 %	17.70 %	\$ 1,623	\$ 1,496
Tier 2 Public Employees*.....	—	—	18.24 %	\$ 24,358	\$ 13,759
Public Safety					
Contributory Public Safety	—	12.29 %	29.70 %	\$ 1	\$ —
Noncontributory Public Safety	—	—	41.35 %	\$ 43,849	\$ 1,042
Tier 2 Public Safety*	—	—	29.21 %	\$ 5,325	\$ 112
Firefighters					
Contributory Firefighters.....	—	15.05 %	3.99 %	\$ 46	\$ —
Tier 2 Firefighters*.....	—	—	10.75 %	\$ 24	\$ —
Judges.....	—	—	41.58 %	\$ 7,154	\$ —
Utah Governors and Legislators.....		Annual Appropriation		\$ 421	\$ —

Note: * Tier 2 plans provide a statutory required contribution (.08 to 18.54 percent amortization rate) to finance the unfunded actuarial accrued liability of the non-Tier 2 plans.

In addition to the contributions noted above, the Primary government and discrete component units also paid \$726 thousand and \$507 thousand respectively to satisfy contribution requirements that are identified by the pension plan terms as plan member contribution requirements.

(Notes continue on next page.)

Below are the changes in net pension liability for the State's (primary government's) single-employer system and plan:

	Judges System	Utah Governors and Legislators Retirement Plan
Single-employer Plans Changes in Net Pension Liability Increases (Decreases) For the Year Ended December 31, 2015 (Expressed in Thousands)		
Total Pension Liability

Net Pension Liability as a Percentage of Covered Payroll	215.24 %	233.40 %

* These court fees were recognized as revenue for support provided by non-employer contributing entities.

(Notes continue on next page.)

Proportionate Share of Net Pension Asset and Liability

Utah Retirement Systems (URS) (pension trust and defined contribution plans) provides retirement benefits to employees of the primary government and its discrete component units as well as to public education and other political subdivisions of the State. At December 31, 2015, the net pension asset and the net

pension liability for all URS systems is \$3.491 billion and \$4.467 billion respectively. The plan's fiduciary net position as a percent of the total pension liability is 85.7 percent. At December 31, 2015, the primary government's net pension asset and net pension liability is \$487 thousand and \$1.017 billion, respectively. The following table summarizes the State's (primary government's) net pension asset and liability by plan.

**Primary Government
Net Pension Asset and Liability
December 31, 2015
(Dollars Expressed in Thousands)**

System	Net Pension Asset	Net Pension Liability	Proportionate Share		
			2015	2014	Change
Noncontributory System.....	\$ —	\$ 748,863	23.84 %	24.07 %	(0.23)%
Contributory System.....	—	20,378	32.52 %	34.02 %	(1.50)%
Public Safety System.....	—	210,570	97.81 %	98.11 %	(0.30)%
Firefighters System.....	71	—	3.90 %	2.59 %	1.31 %

Utah Governors and Legislators Retirement Plan.....	—	2,208	100.00 %	100.00 %	—
Tier 2 Public Employees System	39	—	17.66 %	17.95 %	(0.29)%
Tier 2 Public Safety and Firefighters System	377	—	25.84 %	26.64 %	(0.80)%
Total Net Pension Asset / Liability	<u>\$ 487</u>	<u>\$ 1,017,258</u>			

At December 31, 2015, the net pension asset and the net pension liability for the discrete component units is \$56 thousand and \$346.695 million respectively. The following table summarizes

the discrete component unit's net pension asset and liability by system.

**Discrete Component Units
Net Pension Asset and Liability
December 31, 2015
(Dollars Expressed in Thousands)**

System	Net Pension Asset	Net Pension Liability	Proportionate Share		
			2015	2014	Change
Noncontributory System.....	\$ —	\$ 325,134	10.67 %	9.70 %	0.97%
Contributory System.....	—	16,952	27.82 %	25.75 %	2.07%
Public Safety System.....	—	4,609	2.17 %	1.89 %	0.28%
Tier 2 Public Employees System	49	—	11.49 %	10.90 %	0.59%
Tier 2 Public Safety and Firefighters System	7	—	0.47 %	0.43 %	0.04%
Total Net Pension Asset / Liability	<u>\$ 56</u>	<u>\$ 346,695</u>			

Deferred Outflows and Inflows of Resources

The net pension asset and liability was measured as of December 31, 2015, and the total pension liability used to calculate the net pension asset and liability was determined by an actuarial valuation as of January 1, 2015, and rolled-forward using generally accepted actuarial procedures. The proportion of the net pension asset and liability is equal to the ratio of the employer's actual contributions to the Systems during the plan year over the total of all employer contributions to the System during the plan year.

At December 31, 2015, the State (primary government) recognized pension expense of \$194.251 million. The State's discrete component units recognized pension expense of \$71.102 million. Deferred outflows of resources and deferred inflows of resources related to the recognition of pension expense are from the following sources (*in thousands*):

(Table on next page.)

State of Utah
Deferred Outflows and Inflows of Resources *
Related to Pensions
December 31, 2015
(Expressed in Thousands)

Source	Primary Government		Discrete Component Units	
	Deferred Outflows of Resources	Deferred Inflows of Resources	Deferred Outflows of Resources	Deferred Inflows of Resources
Differences between Expected and Actual Experience	\$ 1,373	\$ 75,565	\$ 1	\$ 26,013
Changes in Assumptions	—	23,936	—	7,015
Net Differences between Projected and Actual Earnings on Pension Plan Investments	262,284	—	89,142	—
Changes in Proportion and Differences Between Contributions and Proportionate Share of Contributions.....	837	6,000	3,841	1,202
Contributions Subsequent to the Measurement Date	111,174	—	38,284	—
Total	<u>\$ 375,668</u>	<u>\$ 105,501</u>	<u>\$ 131,268</u>	<u>\$ 34,230</u>

* Before amounts allocated for financial statement presentation.

The \$111.174 million and \$38.284 million reported as deferred outflows of resources by the primary government and discrete component units are the result of contributions subsequent to the measurement date of December 31, 2015. These contributions will be recognized as a reduction of net pension liability in the upcoming fiscal year.

Other amounts reported above as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows (*in thousands*):

Recognition of Remaining Deferred Outflows and (Inflows) of Resources

Year Ended December 31	Primary Government	Discrete Component Units
2016.....	\$ 31,225	\$ 12,251
2017.....	\$ 30,995	\$ 12,251
2018.....	\$ 39,901	\$ 13,112
2019.....	\$ 57,457	\$ 18,050
2020.....	\$ (136)	\$ (68)
Thereafter	\$ (449)	\$ (304)

(Notes continue on next page.)

The total pension liability in the December 31, 2015, actuarial valuation was determined using the following actuarial

assumptions, applied to all periods included in the measurement:

Summary of Actuarial Assumptions

	Non-contributory System	Contributory System	Public Safety System	Firefighters System	Judges System	Utah Governors and Legislators Retirement Plan	Tier 2 Public Employees System	Tier 2 Public Safety and Firefighters System
Valuation Date	1/1/15	1/1/15	1/1/15	1/1/15	1/1/15	1/1/15	1/1/15	1/1/15
Measurement Date	12/31/15	12/31/15	12/31/15	12/31/15	12/31/15	12/31/15	12/31/15	12/31/15
Actuarial Cost Method...	Entry Age	Entry Age	Entry Age	Entry Age	Entry Age	Entry Age	Entry Age	Entry Age
Actuarial Assumptions:								
Investment Rate of Return	7.50 %	7.50 %	7.50 %	7.50 %	7.50 %	7.50 %	7.50 %	7.50 %
Projected Salary Increases.....	3.50–10.50 %	3.50–10.50 %	3.50–8.00 %	3.50–9.25 %	3.50 %	None	3.50–10.50 %	3.50–9.25 %
Inflation Rate	2.75 %	2.75 %	2.75 %	2.75 %	2.75 %	2.75 %	2.75 %	2.75 %
Post-retirement Cost-of-living Adjustment.....	2.75 %	2.75 %	2.50 % or 2.75 % Depending on employer	2.75 %	2.75 %	2.75 %	2.50 %	2.50 %

Note: All post-retirement cost-of-living adjustments are non-compounding and are based on the original benefit except for Judges, which is a compounding benefit. The cost-of-living adjustments are also limited to the actual CPI increase for the year, although unused CPI increases not met may be carried forward to subsequent years.

The actuarial assumptions used in the January 1, 2015, valuation were based on the results of an actuarial experience study for the five year period ending December 31, 2013.

Active member mortality rates are a function of the member’s gender, occupation, and age and are developed based upon plan experience. Retiree mortality assumptions are highlighted in the table below:

Retired Member Mortality

Class of Member	Men	Women
Educators	EDUM (90%)	EDUF (100%)
Public Safety and Firefighters.....	RP 2000mWC (100%)	EDUF (120%)
Local Government, Public Employees.....	RP 2000mWC (100%)	EDUF (120%)

EDUM = Constructed mortality table based on actual experience of male educators multiplied by given percentage.
 EDUF = Constructed mortality table based on actual experience of female educators multiplied by given percentage.
 RP 2000mWC = RP 2000 combined mortality table for males with white collar adjustments multiplied by given percentage.

Target Allocations

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best estimates ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by

weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the Systems target asset allocation as of December 31, 2015, are summarized in the table below:

(Table on next page.)

**Target Allocations
Expected Return Arithmetic Basis**

Asset Class	Target Asset Allocation	Real Return Arithmetic Basis	Long-term Expected Portfolio Real Rate of Return *
Equity Securities	40 %	7.06 %	2.82 %
Debt Securities	20 %	0.80 %	0.16 %
Real Assets	13 %	5.10 %	0.66 %
Private Equity.....	9 %	11.30 %	1.02 %
Absolute Return	18 %	3.15 %	0.57 %
Cash and Cash Equivalents	0 %	0.00 %	0.00 %
Total Asset Classes	<u>100 %</u>		5.23 %
Inflation.....			2.75 %
Expected Arithmetic Nominal Return			<u>7.98 %</u>

* The total URS Defined Benefit long-term expected rate of return is 7.5 percent. It is comprised of a 2.75 percent inflation rate, 0.35 percent for administrative and investment expenses, and a real long-term expected rate of return of 5.10 percent.

Discount Rate

The discount rate used to measure the total pension liability was 7.5 percent. The projection of cash flows used to determine the discount rate assumed that employee contributions will be made at the current contribution rate and that contributions from all participating employers will be made at contractually required rates that are actuarially determined and certified by the URS Board. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return on pension plan

investments was applied to all periods of projected benefit payments to determine the total pension liability.

Sensitivity of the proportionate share of the net pension asset and liability to changes in the discount rate: The following presents the proportionate share of the State's (primary government's) net pension liability calculated using the discount rate of 7.5 percent, as well as what the proportionate share of the net pension liability would be if it were calculated using a discount rate that is 1 percentage-point lower (6.5 percent) or 1 percentage-point higher (8.5 percent) than the current rate:

**Primary Government
Changes in Discount Rate
Net Pension Liability / (Asset)
(Expressed in Thousands)**

System	1 % Decrease (6.5 %)	Current Discount Rate (7.5 %)	1 % Increase (8.5 %)
Noncontributory System	\$ 1,355,415	\$ 748,863	\$ 240,269
Contributory System	46,075	20,378	(1,420)
Public Safety System	368,625	210,570	80,235
Firefighters System	962	(71)	(910)
Judges System.....	55,879	35,239	17,503
Utah Governors and Legislators Retirement Plan	3,434	2,208	1,256
Tier 2 Public Employees System.....	7,070	(39)	(5,426)
Tier 2 Public Safety and Firefighters System	642	(377)	(1,160)
Total Net Pension Liability / (Asset)	<u>\$ 1,838,102</u>	<u>\$ 1,016,771</u>	<u>\$ 330,347</u>

(Notes continue on next page.)

B. Defined Contribution Plans

The 401(k), 457(b), Roth and Traditional IRA Plans, and Health Reimbursement Arrangement (HRA) administered by URS, in which the State participates, are defined contribution plans. These plans are available as supplemental plans to the basic retirement benefits of the Retirement Systems and a primary retirement plan for some Tier 2 participants. Contributions may be made into the plans subject to plan and Internal Revenue Code limitations. Employer contributions may be made into the 401(k) and 457(b) plans at rates determined by the employers and according to *Utah Code* Title 49. There are 381 employers participating in the 401(k) Plan and 162 employers participating in the 457(b) Plan. There are 161,398 plan participants in the 401(k) Plan, 17,004 participants in the 457(b) Plan, 7,359 participants in the Roth IRA Plan, 1,584 participants in the Traditional IRA Plan, and 2,701 participants in the HRA.

After termination of employment, benefits are paid out to individuals in lump sum, or as periodic benefit payments, at the option of the participant based on individual account balances and plan provisions. The Defined Contribution Plans account balances are fully vested to the participants at the time of deposit except for Tier 2 required employer contributions and associated earnings during the first four years of employment. Investments in the vested portion of the Defined Contribution Plans are individually directed and controlled by plan participants. Investments of the plans are reported at fair value.

Employees of the State are eligible to participate in the defined contribution 401(k), 457(b), Roth and Traditional IRA Plans. Employees, who contribute to a 401(k), 457(b), or IRA will get a match from the State of up to \$26 per pay period. In addition, the State and participating employers are required to contribute 1.5 percent of an employee's salary into a 401(k) for those employees who participate in the noncontributory system. The amounts contributed to the 401(k) Plan during the year ended June 30, 2016, by employees and employers are as follows: for Primary Government, \$35.738 million and \$30.735 million; for Component Units, \$5.558 million and \$8.869 million. The amounts contributed by employees to the 457(b), Roth and Traditional IRA Plans (primary government and component units) are \$6.919 million, \$3.665 million, and \$192 thousand, respectively.

For the Tier 2 Public Employee System, Tier 2 Public Safety System, and the Tier 2 Firefighters System, the State and participating employers are required to contribute varying amounts into a 401(k). The amounts range from 1.33 to 1.78 percent of an employee's salary for the hybrid defined benefit systems and 10 to 12 percent of an employee's salary for the defined contribution systems. These contributions vest immediately, except for the Tier 2 401(k) required contributions that are subject to a 4-year vesting period. The primary government and discrete component units paid \$4.598 million and \$1.336 million, respectively, in 401(k) defined contributions required by statute. In addition to these contributions, the Tier 2 plans provide a statutory required contribution (.08 to 18.54 amortization rate) to finance the unfunded actuarial accrued liability of the non-Tier 2 (defined benefit) plans.

Teachers Insurance and Annuity Association—College Retirement Equities Fund

Teachers Insurance and Annuity Association—College Retirement Equities Fund (TIAA—CREF) and Fidelity Investments, privately administered defined-contribution retirement plans, provide individual retirement fund contracts for each eligible participating employee. Eligible employees are mainly state college/university faculty and staff. Benefits to retired employees are generally based on the value of the individual contracts and the estimated life expectancy of the employee at retirement and are fully vested from the date of employment. The total current year required contribution and the amount paid is 14.2 percent of the employee's annual salary. The State has no further liability once annual contributions are made.

The total contribution made by the colleges and universities (discrete component units) to the TIAA—CREF retirement system for June 30, 2016 and 2015, were \$204.78 million and \$188.29 million, respectively.

NOTE 18. OTHER POSTEMPLOYMENT BENEFITS

A. Other Postemployment Benefit Plans

The State administers the State Employee Other Postemployment Benefit Plan (State Employee OPEB Plan) through the State Post-Retirement Benefits Trust Fund as set forth in *Utah Code* Section 67–19d–201. A separate Elected Official Other Postemployment Benefit Plan (Elected Official OPEB Plan) is provided for governors and legislators, and this Plan is administered through the Elected Official Post-Retirement Benefits Trust Fund as set forth in *Utah Code* Section 67–19d–201.5. Both trust funds are irrevocable and legally protected from creditors. Both are also administered under the direction of a board of trustees, which consists of the State Treasurer, the Director of the Division of Finance, and the Director of the Governor's Office of Management and Budget or a designee.

Neither the State Post-Retirement Benefits Trust Fund, nor the Elected Official Post-Retirement Benefits Trust Fund issues a publicly available financial report, but are included in this report of the primary government using the economic resources measurement focus and the accrual basis of accounting under which expenses, including benefits and refunds, are recorded when the liability is incurred. Employer contributions are recorded in the accounting period in which they are earned and become measurable.

The State Legislature currently plans to contribute amounts to each trust fund that, at a minimum, is sufficient to fully fund the Annual Required Contribution (ARC), an actuarially determined rate in accordance with the parameters of GASB Statement 45, *Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions*. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and amortize any unfunded actuarial liabilities (or funding excess) over a period not to exceed 30 years. There are no long-term contracts for contributions to the plans.

B. State Employee Other Postemployment Benefit Plan

At the option of individual state agencies, employees may participate in the State Employee OPEB Plan, a single-employer defined benefit healthcare plan, as set forth in *Utah Code* Section 67-19-14.2. Only state employees entitled to receive retirement benefits are eligible to receive postemployment health and life insurance benefits, and in some situations dental coverage, from the State Employee OPEB Plan. Upon retirement, an employee receives up to 25 percent of the value of their unused accumulated sick leave as a mandatory employer contribution into a 401(k) account. The employee may exchange eight hours of remaining unused accumulated sick leave, earned prior to January 1, 2006, for one month of paid health and life insurance coverage up to age 65. After age 65, the employee may use any remaining unused accumulated sick leave, earned prior to January 1, 2006, to exchange for spouse health insurance to age 65, or Medicare supplemental insurance for the employee or spouse. In addition, any full-time employee of the Utah State Board of Education hired before July 1, 2012, who has attained at least five consecutive years of service with the agency, has the option of receiving postemployment health, dental, and life insurance coverage for up to five years or until the employee reaches age 65 regardless of their unused sick leave balance. Also, judges have their own retiree health coverage that is part of the State Employee OPEB Plan. As of December 31, 2014, the date of the latest actuarial valuation, approximately 5,843 retirees and their beneficiaries were receiving postemployment health and life insurance benefits, and an estimated 9,150 active state employees are eligible to receive future benefits under the State Employee OPEB Plan.

The contribution requirements of employees and the State are established and may be amended by the State Legislature. For retirees that participate in the State Employee OPEB Plan, health insurance premiums are paid 100 percent by the State for individuals that retired before July 1, 2000. Individuals retiring thereafter are required to contribute specified amounts monthly, ranging from 0 percent to 31.62 percent, toward the cost of health insurance premiums. For the fiscal year ended June 30, 2016, retirees contributed \$1.345 million, or approximately 3.63 percent of total premiums, through their required contributions of \$0 to \$708.91 per month depending on the coverage (single, double, or family) and health plan selected.

The Annual Required Contribution (ARC) of \$29.100 million, from the December 31, 2014, actuarial valuation, is 6.61 percent of annual covered payroll. Although the ARC is used to establish the annual budget for a fiscal year, in fiscal year 2016, the State Legislature contributed more than the ARC. This overfunding of the ARC contributed to a net OPEB asset of \$11.789 million. This net OPEB asset will be taken into consideration when the next actuarial valuation is performed. The net OPEB asset is

reported on the Statement of Net Position (governmental activities) within Other Assets.

C. Elected Official Other Postemployment Benefit Plan

The Elected Official Other Postemployment Benefit Plan (Elected Official OPEB Plan) is a single-employer defined benefit healthcare plan, as set forth in *Utah Code* Section 49-20-404. Only governors and legislators (elected officials) that retire after January 1, 1998 and have four or more years of service can elect to receive and apply for health coverage or Medicare supplemental coverage. The State will pay 40 percent of the benefit cost for four years of service and up to 100 percent for ten or more years of service, for elected officials, and their spouses.

To qualify for health coverage, an elected official must be between 62 and 65 years of age and either be an active member at the time of retirement or have continued coverage with the program until the date of eligibility. In addition, to qualify for health coverage an elected official must have service as a legislator or governor prior to January 1, 2012.

To qualify for Medicare supplemental coverage an elected official must be at least 65 years of age. In addition, the elected official must retire under Chapter 19, *Utah Governors' and Legislators' Retirement Act*, and have service as an elected official prior to July 1, 2013.

As of December 31, 2014, the date of the latest actuarial valuation, approximately 90 retirees and their beneficiaries were receiving health or Medicare supplemental coverage, and an estimated 206 active and former elected officials may receive future benefits for themselves and qualifying dependents under the Elected Official Other Postemployment Benefit Plan. For the fiscal year ended June 30, 2016, elected officials that participated in the Elected Official OPEB Plan contributed \$32 thousand, or approximately 10.17 percent of total premiums, through their required contributions of \$0 (for ten or more years of service) to \$790.94 per month (for four years of service) depending on the coverage (single or double) and health plan selected.

The Annual Required Contribution (ARC) of \$1.241 million, from the December 31, 2014, actuarial valuation and used to establish the annual budget for fiscal year 2016, is 70.87 percent of annual covered payroll. For the fiscal year 2016, the State Legislature decided to contribute \$1.388 million, \$147 thousand more than the ARC.

The following table shows the components of the annual OPEB cost for the year, amount actually contributed to the plan, and changes in the net OPEB obligation for both the State Employee and Elected Official OPEB plans for fiscal year 2016 (*in thousands*):

(Table on next page.)

	<u>State Employee OPEB Plan</u>	<u>Elected Official OPEB Plan</u>
Annual required contribution.....	\$ 29,100	\$ 1,241
Interest on net OPEB obligation	(255)	186
Adjustment to annual required contribution.....	717	(317)
Annual OPEB cost (expense).....	29,562	1,110
Contributions made.....	(35,683)	(1,388)
Increase (decrease) in net OPEB obligation.....	(6,121)	(278)
Net OPEB obligation (asset) – Beginning of year	(5,668)	4,126
Net OPEB obligation (asset) – End of year.....	<u>\$ (11,789)</u>	<u>\$ 3,848</u>

The annual OPEB cost, the percentage of annual OPEB cost contributed to the plan, and the net OPEB obligation (asset) for fiscal year 2016 and the two preceding years for both the State Employee and Elected Official OPEB plans were as follows (*dollar amount in thousands*):

	<u>Fiscal Year Ended</u>	<u>Annual OPEB Cost</u>	<u>Percentage of Annual OPEB Cost Contributed</u>	<u>Net OPEB Obligation (Asset)</u>
State Employee OPEB Plan.....	6/30/2014	\$ 30,535	99.37 %	\$ (5,854)
	6/30/2015	\$ 30,528	99.39 %	\$ (5,668)
	6/30/2016	\$ 29,562	120.71 %	\$ (11,789)
Elected Official OPEB Plan.....	6/30/2014	\$ 1,155	175.76 %	\$ 4,331
	6/30/2015	\$ 1,183	117.34 %	\$ 4,126
	6/30/2016	\$ 1,110	125.05 %	\$ 3,848

The funded status of both the State Employee and Elected Official OPEB plans as of December 31, 2014, was as follows (*dollar amount in thousands*):

	<u>State Employee OPEB Plan</u>	<u>Elected Official OPEB Plan</u>
Actuarial accrued liability.....	\$ 386,532	\$ 12,694
Actuarial value of plan assets	205,498	8,863
Unfunded actuarial accrued liability (funding excess).....	<u>\$ 181,034</u>	<u>\$ 3,831</u>
Funded ratio.....	53.2 %	69.8 %
Covered payroll	\$ 440,029	\$ 1,751
Unfunded actuarial accrued liability (funding excess) as a percentage of covered payroll.....	41.14 %	218.79 %

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of events far into the future. Examples include assumptions about future employment, mortality, and the healthcare cost trend. Actuarially determined amounts are subject to continual revisions as actual results are compared with past expectations and new estimates are made about the future. The Schedule of Funding Progress, presented as required supplementary information following the notes to the financial statements, is designed to present multi-year trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liabilities for benefits.

Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employer and the plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point. The projection of benefits for financial reporting purposes does not explicitly incorporate the potential effects of legal or contractual funding limitations on the pattern of cost-sharing between the employer and plan members in the future. The actuarial methods and assumptions used include techniques that are designed to reduce the effects of short-term volatility in actuarial accrued liabilities and the actuarial value of assets,

consistent with the long-term perspective of the calculations. The actuarial methods and assumptions of both the State Employee

and Elected Official OPEB plans as of December 31, 2014, were as follows:

	<u>State Employee OPEB Plan</u>	<u>Elected Official OPEB Plan</u>
Actuarial valuation date	12/31/2014	12/31/2014
Actuarial cost method	Entry Age Normal	
Amortization method	Level Dollar Amount; Open	
Remaining amortization period	10 years	20 years
Asset valuation method	Fair Value	Fair Value
Actuarial assumptions:		
Investment rate of return *	4.5 %	4.5 %
Healthcare inflation rate	5.2 % initial 4.2 % ultimate	

* Includes an inflation assumption of 2.5 percent.

NOTE 19. RISK MANAGEMENT AND INSURANCE

It is the policy of the State of Utah to periodically assess the proper combination of commercial insurance and self-insurance to cover the risk of losses to which it may be exposed. This is accomplished by the State through the Risk Management Fund (internal service fund) and the Public Employees Health Program (PEHP) (major discrete component unit). The State is a major participant in these programs. All funds, departments, component units, public schools, and public authorities of the State may also participate in these programs.

The Risk Management Fund manages the general property, auto/physical damage, and general liability risks of the State. PEHP manages the group health, dental, and life insurance and long-term disability programs of the State. The University of Utah, Utah State University, Southern Utah University, Salt Lake Community College, and Utah Valley University (major and nonmajor discrete component units) each maintain self-insurance funds to manage health/dental care. The University of Utah also maintains a self-insurance fund to manage medical malpractice liabilities.

The State has determined that the Risk Management Fund and PEHP can economically and effectively manage the State’s risks internally and have set aside assets for claim settlements through reserves. Risks are also covered through commercial insurance for excessive losses. The State is self-insured for liability claims up to \$1 million and beyond the excess insurance policy limit of \$10 million. The State is self-insured for individual property and casualty claims up to \$1 million and up to \$3.5 million in aggregate claims and beyond the excess insurance policy limit of \$1 billion per occurrence. The Risk Management Fund had a liability loss that exceeded the State’s self-insured claim limit of \$1 million for the fiscal year ended June 30, 2016. This claim for \$805 thousand has been submitted to the State’s commercial excess insurance carrier. Otherwise, the Risk Management Fund did not have any losses or settlements that exceeded the State’s self-insured aggregate claim limit or commercial excess insurance coverage for the fiscal years ended June 30, 2014 through June 30, 2016.

PEHP has reinsurance coverage for a life catastrophic occurrence in excess of \$7.5 million, not to exceed \$80 million per year. PEHP also has excess medical reinsurance for medical losses that exceed \$1.25 million on a person per year to a maximum of \$2 to \$5 million during the person’s lifetime, depending on the participating group’s lifetime maximum.

The Risk Management Fund and PEHP allocate the cost of providing claims servicing, claims payment, and commercial insurance by charging a “premium” to each participating public entity or employee, based on each organization’s estimated current year liability and property values. Public entities participating in PEHP’s medical and dental programs are grouped into various risk pools for purposes of establishing rates and retaining risk of loss. The primary government and the discrete component units of the State paid premiums to PEHP of \$278.744 million and \$38.743 million, respectively, for health and life insurance coverage in fiscal year 2016.

Risk Management and PEHP claims liabilities are reported when it is probable that a claim has occurred and the ultimate cost of settling that claim can be reasonably estimated and includes an amount for claims that have been incurred but not reported. Because actual claims liabilities are affected by complex factors including inflation, changes in legal doctrines and insurance benefits, and unanticipated damage awards, the process used in computing claims liabilities does not necessarily result in exact amounts. Claims liabilities are recomputed periodically by actuaries who take into consideration recently settled claims, the frequency of claims, and other economic and social factors. Inflation and other appropriate modifiers are included in this calculation because reliance is based on historical data. The Risk Management general liability reserves are reported using a discount rate of 1 percent. The PEHP long-term disability benefit reserves are reported using discount rates between 2 and 6.25 percent.

All employers who participate in the Utah Retirement Systems are eligible to participate in the Public Employees Long-term Disability Program per *Utah Code* Section 49–21–201.

Employees of those state departments who participate in the program and meet long-term disability eligibility receive benefits for the duration of their disability up to the time they are eligible for retirement or until age 65. Benefits begin after a three-month waiting period and are paid 100 percent by the program. As of June 30, 2016, there were 196 state employees receiving benefits. The program is funded by paying premiums to PEHP where assets are set aside for future payments. For the fiscal year ended June 30, 2016, the primary government and the discrete component units of the State paid premiums of \$5.645 million and \$264 thousand, respectively, for the Long-term Disability Program.

The State covers its workers' compensation risk by purchasing insurance from Workers' Compensation Fund (a related organization). The University of Utah, Utah State University, Southern Utah University, Salt Lake Community College, and

Utah Valley University report claims liabilities if it is probable that a liability has been incurred as of the date of the financial statements and the amount of the loss can be reasonably estimated. The University of Utah and the University of Utah Hospital and Clinics have a "claims made" umbrella malpractice insurance policy in an amount considered adequate by its respective administrations for catastrophic malpractice liabilities in excess of the trusts' fund balances. Amounts for the current year are included below.

The following table presents the changes in claims liabilities balances (short and long-term combined). The Risk Management and College and University Self-Insurance balances are for the fiscal years ended June 30, 2015 and June 30, 2016. The PEHP balances are for the calendar years ended December 31, 2014 and December 31, 2015:

Changes in Claims Liabilities
(Expressed in Thousands)

	Beginning Balance	Current Year Claims and Changes in Estimates	Claims Payments	Ending Balance
Risk Management:				
2015.....	\$ 48,585	\$ 11,144	\$ (12,798)	\$ 46,931
2016.....	\$ 46,931	\$ 17,003	\$ (15,842)	\$ 48,092
Public Employees Health Program:				
December 31, 2014.....	\$ 124,763	\$ 510,828	\$ (504,586)	\$ 131,005
December 31, 2015.....	\$ 131,005	\$ 554,729	\$ (547,942)	\$ 137,792
College and University Self-Insurance:				
2015.....	\$ 60,976	\$ 294,799	\$ (278,783)	\$ 76,992
2016.....	\$ 76,992	\$ 264,973	\$ (246,587)	\$ 95,378

NOTE 20. SUBSEQUENT EVENTS

Subsequent to June 30, 2016, the Governor's Office of Economic Development Board recommended and the director approved \$11.725 million of additional commitments to be credited over the next several years for the Economic Development Tax Increment Financing Incentive program (EDTIF) and the Motion Picture Incentive program. These commitments are contingent on participating companies meeting certain economic development performance criteria and within-the-state production criteria.

Subsequent to June 30, 2016, and during the 2016 Third Special Session, the Legislature appropriated \$10 million to the Utah State Fair Corporation (nonmajor discrete component unit) for the fiscal year ended June 30, 2017. The Legislature designated the \$10 million to be used for the design and construction of a new fair park arena.

In July 2016, ARUP (blended component unit) of the University of Utah (major discrete component unit) negotiated the purchase of its main facility for \$75.8 million with the settlement to be no later than January 15, 2017. The purchase of the property will eliminate future minimum lease payments and the related property tax obligation will cease due to ARUP's tax exempt status.

On July 6, 2016, Utah State University (major discrete component unit) issued 2 Series 2016 Bonds. The first was \$19.54 million of Student Fee and Housing System Revenue Bonds. Principal on the bonds is due annually commencing April 1, 2017 through April 1, 2046. Bond interest is due semiannually commencing October 1, 2016, at rates ranging from 2.5 percent to 5 percent. Proceeds from these bonds are to be used to finance the cost of acquisition of three, four-story modern apartment buildings and associated land within the main campus of the University. The second was \$10.135 million of Federally Taxable Research Revenue Bonds. Principal on the bonds is due annually commencing December 1, 2017 through December 1, 2046. Bond interest is due semiannually commencing December 1, 2016, at rates ranging from 1.025 percent to 4.049 percent. Proceeds from these bonds are to be used to finance the costs of construction and equipping of Phase II of a new Space Dynamics Laboratory facility at the Innovation campus of the University.

In August 2016, the Utah Retirement Board lowered the pension systems discount rate from 7.5 percent to 7.2 percent effective January 1, 2016. The effect of this change in assumption will be reflected at the Utah Retirement Systems (pension trust and defined contribution plans) next measurement date of December 31, 2016. This change in assumption does not change

the current required actuarial contribution rate or effect the State's proportionate share of the collective net pension liability.

In November 2016, the University of Utah intends to issue \$131.7 million of General Revenue and Refunding Bonds, Series 2016B. Principal on the bonds is due annually commencing August 1, 2017 through June 30, 2037. Bond interest is due semi-annually commencing February 1, 2017, at rates ranging from 2 percent to 5 percent. Proceeds from these bonds are to be used to construct an ambulatory care facility and a School of Business Executive Education building, to refund certain outstanding obligations of the University, and to pay costs of issuance.

On October 20, 2016, the Student Loan Purchase Program issued \$452.25 million of Student Loan Backed Notes, Series 2016-1. Principal on the notes is due monthly commencing December 26, 2016 through September 25, 2056. Interest is due monthly commencing December 26, 2016, at rates ranging from 30 day LIBOR + .75 percent to 30 day LIBOR + 1.50 percent. Proceeds from these notes are to be used to refinance a temporary warehouse line of credit.

On October 25, 2016, a Partial Consent Decree was signed in relation to the Volkswagen diesel emissions settlement which set in motion a process wherein the State will receive \$32 million beginning most likely in fiscal year 2018.

**Budgetary Comparison Schedule
Budget To GAAP Reconciliation**

For the Fiscal Year Ended June 30, 2016

(Expressed in Thousands)

	General Fund	Education Fund	Transportation Fund
Revenues			
Actual total revenues (budgetary basis)	\$ 6,830,864	\$ 4,338,718	\$ 1,003,116
Differences – Budget to GAAP:			
Intrafund revenues are budgetary revenues but are not revenues for financial reporting	(393,321)	(2,101)	(32,161)
Higher education and Utah Schools for the Deaf and the Blind collections are budgetary revenues but are not revenues for financial reporting	(761,276)	(8,223)	—
Change in revenue accrual for nonbudgetary Medicaid claims	3,687	—	—
Change in tax accruals designated by law and other liabilities are revenues for financial reporting but not for budgetary reporting	9,390	14,361	5,182
Change in estimated federal receivables recorded as revenues for financial reporting but not for budgetary reporting	—	2,263	—
Total revenues as reported on the Statement of Revenues, Expenditures, and Changes in Fund Balances – Governmental Funds	<u>\$ 5,689,344</u>	<u>\$ 4,345,018</u>	<u>\$ 976,137</u>
Expenditures			
Actual total expenditures (budgetary basis)	\$ 7,553,685	\$ 3,562,767	\$ 866,316
Differences – Budget to GAAP:			
Intrafund expenditures for reimbursements are budgetary expenditures but are not expenditures for financial reporting	(393,321)	(2,101)	(32,161)
Expenditures related to higher education and Utah Schools for the Deaf and the Blind collections are budgetary expenditures but are not expenditures for financial reporting	(761,276)	(8,223)	—
Certain budgetary transfers and other charges are reported as an increase or reduction of expenditures for financial reporting	(489)	—	—
Leave charges budgeted as expenditures when earned rather than when taken or due	(328)	9	(211)
Change in estimated federal liabilities recorded as expenditures for financial reporting but not for budgetary reporting	—	2,263	—
Change in accrual for Medicaid (incurred but not reported) claims excluded from the budget by statute	5,364	—	—
Change in accrual for Rehabilitation (incurred but not reported) claims excluded from the budget by statute	—	286	—
Taxpayer rebates budgeted as revenue offset but recorded as expenditures for financial reporting	5,965	—	—
Total expenditures as reported on the Statement of Revenues, Expenditures, and Changes in Fund Balances – Governmental Funds	<u>\$ 6,409,600</u>	<u>\$ 3,555,001</u>	<u>\$ 833,944</u>

The Information About Budgetary Reporting is an integral part of this schedule.

INFORMATION ABOUT BUDGETARY REPORTING

Budgetary Presentation

A Budgetary Comparison Schedule is presented for the General Fund and each of the State's major special revenue funds for which the Legislature enacts an annual budget. An annual budget is also adopted for the Transportation Investment Fund, a major capital projects fund, the Debt Service Fund, a nonmajor governmental fund, and the Alcoholic Beverage Control Fund, a nonmajor enterprise fund. The budgets are enacted through passage of *Appropriations Acts*. Budgets for specific general revenues are not adopted through an *Appropriations Act*, but are based on supporting estimates approved by the Executive Appropriations Committee of the Legislature. General revenues are those revenues available for appropriation for any program or purpose as allowed by law. Department-specific revenues are revenues dedicated by an *Appropriations Act* or restricted by other law or external grantor to a specific program or purpose.

Original budgets and related revenue estimates represent the spending authority enacted through *Appropriations Acts* as of June 30, 2016, and include nonlapsing carryforward balances from the prior fiscal year. Final budgets represent the original budget as amended by supplemental appropriations and related changes in revenue estimates, executive order reductions when applicable, and changes authorized or required by law when department-specific revenues either exceed or fall short of budgeted amounts.

Unexpended balances at yearend may: (1) lapse to unrestricted balances (committed, assigned, or unassigned) and be available for future appropriation; (2) lapse to restricted balances and be available for future appropriation restricted for specific purposes as defined by statute; or (3) be nonlapsing, which means balances are reported as either restricted or committed fund balance. The nonlapsing balances are considered automatically reappropriated as authorized by statute, by an *Appropriations Act*, or by limited encumbrances.

Budgetary Control

In September of each year, all agencies of the government submit requests for appropriations to the Governor's Office of Management and Budget so that a budget may be prepared. The budget is prepared by fund, function, and activity and includes information on the past year, current year estimates, and requested appropriations for the next fiscal year.

In January, the Governor recommends a budget to the Legislature. The Legislature considers those recommendations and prepares a series of *Appropriations Acts* that modify the State budget for the current year and constitute the State budget for the following year. The Legislature passes the *Appropriations Acts* by a simple majority vote. The *Appropriations Acts* becomes the State's authorized operating budget upon the Governor's signature. The *Constitution of Utah* requires that budgeted expenditures not exceed estimated revenues and other sources of funding, including beginning balances.

Budgetary control is maintained at the functional or organizational level, as identified by numbered line items in the *Appropriations Acts*. Budgets may be modified if federal funding or revenue specifically dedicated for a line item exceeds original estimates in the *Appropriations Acts*. If funding sources are not sufficient to cover the appropriation, the Governor is required to reduce the budget by the amount of the deficiency. Any other changes to the budget must be approved by the Legislature in a supplemental *Appropriations Act*.

Any department that spends more than the authorized amount must submit a report explaining the overspending to the State Board of Examiners. The Board will recommend corrective action, which may include a request to the Legislature for a supplemental appropriation to cover the deficit. If a supplemental appropriation is not approved, the department must cover the overspending with the subsequent year's budget. In the General Fund, the State Courts Administrator's budget for juror and witness fees was over expended by \$911 thousand. This deficit is allowed by statute and will be funded with future appropriations. All other appropriated budgets of the State were within their authorized spending levels.

Spending Limitation

The State also has an appropriation limitation statute that limits the growth in state appropriations. The total of the amount appropriated from unrestricted General Fund sources plus the income tax revenues appropriated for higher education is limited to the growth in population and inflation. The appropriations limitation can be exceeded only if a fiscal emergency is declared and approved by more than two-thirds of both houses of the Legislature, or if approved by a vote of the people. However, the appropriations limitation statute may be amended by a majority of both houses of the Legislature. Appropriations for debt service, emergency expenditures, amounts from other than unrestricted revenue sources, transfers to the Budgetary Reserve Account (Rainy Day Fund), Education Budget Reserve Account and the Transportation Investment Fund; or capital developments meeting certain criteria are exempt from the appropriations limitation. For the fiscal year ended June 30, 2016, the State was \$510.756 million below the appropriations limitation.

INFORMATION ABOUT THE STATE'S PENSION PLANS**A. Single-employer Plans**

The State's defined benefit pension systems/plan is administered by the Utah Retirement Systems and is included in this Comprehensive Annual Financial Report as a pension trust fund within the fiduciary funds. The Judges System and the Utah Governors and Legislators Retirement Plan are single-employer service retirement plans.

The following schedules present for the State's (primary government's) single-employer retirement plans the proportionate share of the net pension liability and the changes in net pension liability.

(Schedules on following pages.)

Notes to Single-employer Plans Schedule of Contributions

Methods and Assumptions Used to Determine Contribution Rates:

- Actuarial Cost Method.....Entry Age Normal
- Amortization MethodLevel Percentage of Payroll
- Amortization Period – Judges System ...Open Group 20-year Open Period
- Amortization Period – Utah Governors and Legislators Retirement PlanOpen Group 20-year Closed Period
- Asset Valuation Method.....5-year smoothed market
- Investment Rate of Return.....7.5 %
- Inflation2.75 %
- Salary IncreasesComposed of 2.75 percent inflation, plus 0.75 percent productivity increase rate, plus step-rate promotional increases for members with less than 25 years of service.
- MortalityMale: RP-2000 with white collar adjustments, projected with Scale AA from the year 2000.
Female: 120 percent of constructed mortality table based on actual experience of male educators, projected with Scale AA from the year 2000.

Other Information:

The actuarially determined contribution rates are calculated as of January 1 and become effective on July 1 of the following year, which is 18 months after the valuation date. The Utah Retirement Systems' Board certifies the contribution rates that employers are contractually required to contribute to the Retirement System. According to Section 49-11-301(5) of the *Utah Code*, if the funded ratio of the plan is less than 110 percent, then the Board is permitted to maintain the prior year's contribution rate if the actuarially determined contribution is lower. The Board has historically followed this policy.

Significant Changes to Methods and Assumptions Used to Determine Contribution Rates:

- Investment Rate of Return
In 2008, the actuarial assumed rate of return (the discount rate) was modified from 8.0 to 7.75 percent, and then again in 2011 down to 7.5 percent. This rate is used in establishing retirement contribution rates and in determining current benefit reserve requirements.
- Amortization
Changes implemented in 2009 include: losses in 2008 were amortized over the next 5 years (20 percent per year), and the unfunded actuarial accrued liability (UAAL) amortization period was modified from 20 to 25 years.

¹ Complete information not available prior to fiscal year 2011.

B. Multiple-employer Systems

The State's defined benefit pension systems are administered by the Utah Retirement Systems and are included in this Comprehensive Annual Financial Report as a pension trust fund within the fiduciary funds. The Noncontributory System, Contributory System, Public Safety System, Firefighters System, Tier 2 Public Employees System, and Tier 2 Public Safety and Firefighters System are defined-benefit multiple-employer, cost-sharing, public employee retirement systems.

The following schedule presents the State's (primary government's) proportionate share of the net pension liability for its multiple-employer, cost-sharing public employee employer retirement systems:

Notes to Multiple-employer Systems Schedule of Contributions

This schedule reflects the legislative authorized rates and contributions for these systems. Tier 2 rates include a statutory required contribution (.08 to 18.54 percent amortization rate) to finance the unfunded actuarial accrued liability of the non-Tier 2 plans.

Significant Changes to Methods and Assumptions Used to Determine Contribution Rates:

• **Investment Rate of Return**

In 2008, the actuarial assumed rate of return (the discount rate) was modified from 8.0 to 7.75 percent, and then again in 2011 down to 7.5 percent. This rate is used in establishing retirement contribution rates and in determining current benefit reserve requirements.

• **Amortization**

Changes implemented in 2009 include: losses in 2008 were amortized over the next 5 years (20 percent per year), and the unfunded actuarial accrued liability (UAAL) amortization period was modified from 20 to 25 years.

New Retirement Plans:

During the 2010 General Session, the Legislature passed Senate Bill 63, *New Public Employees' Tier 2 Contributory Retirement Act*. All eligible employees beginning on or after July 1, 2011, who have no previous service credit with any of the Utah Retirement Systems, are members of the Tier 2 Retirement Systems.

Restatement:

As a result of implementing GASB Statement 82, Pension Issues, payments made by the employer to satisfy contribution requirements that are identified by the pension plan terms as plan member contribution requirements are no longer reflected in this schedule.

INFORMATION ABOUT THE STATE'S OTHER POSTEMPLOYMENT BENEFIT PLANS

The State Employee Other Postemployment Benefit Plan (State Employee OPEB Plan) is administered through the State Post-Retirement Benefits Trust Fund as an irrevocable trust. Assets of the trust fund are dedicated to providing postemployment health and life insurance coverage to current and eligible future state retirees. Only state employees entitled to receive retirement benefits and meeting other specific eligibility criteria are eligible to receive postemployment benefits.

The following factors contributed to changes in the elements presented below in the Schedule of Funding Progress for the State Employee OPEB Plan from December 31, 2010 to December 31, 2012: (1) funding at least the Annual Required Contribution (ARC) over the last two years; (2) changing the amortization period from 25 years to 20 years; (3) healthcare trend assumptions decreased from a beginning rate of 9.5 percent to 8.5 percent; (4) average per capita claims costs are lower; and (5) active headcounts decreased 8.5 percent while retiree headcounts increased less than 2 percent.

The following factors contributed to changes in the elements presented below in the Schedule of Funding Progress for the State Employee OPEB Plan from December 31, 2012 to December 31, 2014: (1) changing the actuarial cost method from Projected Unit Credit to Entry Age Normal; (2) changing the medical trend assumptions to the Society of Actuaries Long-Run Medical Cost Trend Getzen Model; and (3) active headcounts decreased 15.8 percent while retiree headcounts increased less than 2.5 percent.

The following schedules present the State of Utah's funding progress and required employer contributions for the State Post-Retirement Benefits Trust Fund from the most recent actuarial valuation and the two preceding valuations:

State Employee OPEB Plan Schedule of Funding Progress By Valuation Date (Expressed in Thousands)

Valuation Date	Actuarial Value of Assets	Actuarial Accrued Liability (AAL)	Unfunded Actuarial Accrued Liability (UAAL)	Funded Ratio	Annual Covered Payroll	UAAL as a Percentage of Covered Payroll
December 31, 2010.....	\$ 106,605	\$ 481,393	\$ 374,788	22.15 %	\$ 589,817	63.54 %
December 31, 2012.....	\$ 150,107	\$ 408,661	\$ 258,554	36.73 %	\$ 496,491	52.08 %
December 31, 2014.....	\$ 205,498	\$ 386,532	\$ 181,034	53.16 %	\$ 440,029	41.14 %

State Employee OPEB Plan Schedule of Employer Contributions (Expressed in Thousands)

Year Ended	Annual Required Contributions	Percentage Contributed
June 30, 2008	\$ 53,491	98.71 %
June 30, 2009	\$ 53,491	100.00 %
June 30, 2010	\$ 43,819	100.00 %
June 30, 2011.....	\$ 43,819	100.00 %
June 30, 2012	\$ 37,594	115.16 %
June 30, 2013	\$ 37,594	101.27 %
June 30, 2014	\$ 30,342	100.00 %
June 30, 2015	\$ 30,342	100.00 %
June 30, 2016	\$ 29,100	122.62 %

The Elected Official Other Postemployment Benefit Plan (Elected Official OPEB Plan) is administered through the Elected Official Post-Retirement Benefits Trust Fund. Only governors and legislators that retire after January 1, 1998 and meet other specific eligibility criteria are eligible for this benefit.

The following factors contributed to the changes in the elements presented below in the Schedule of Funding Progress for the Elected Official OPEB Plan from December 31, 2010 to December 31, 2012: (1) creation of a trust and funding more than the Annual Required Contribution (ARC) over the last two years; (2) changing the amortization period from 30 years to 20 years; (3) changing the discount rate to 4.5 percent from 4 percent; (4) healthcare trend assumptions decreased from a beginning rate of 9.5 percent to 8.5 percent; and (5) average per capita claims costs are lower.

The following factors contributed to the changes in the elements presented below in the Schedule of Funding Progress for the Elected Official OPEB Plan from December 31, 2012 to December 31, 2014: (1) funding more than the Annual Required Contribution (ARC) over the last two years; (2) changing the actuarial cost method from Projected Unit Credit to Entry Age Normal; and (3) changing the medical trend assumptions to the Society of Actuaries Long-Run Medical Cost Trend Getzen Model.

The following schedules present the State of Utah's funding progress and required contributions for the Elected Official Post-Retirement Benefits Trust Fund from the most recent actuarial valuation and the two preceding valuations (using the projected unit credit method):

INFORMATION ABOUT INFRASTRUCTURE ASSETS REPORTED USING THE MODIFIED APPROACH

As allowed by GASB Statement No. 34, *Basic Financial Statements—and Management’s Discussion and Analysis—for State and Local Governments*, the State has adopted an alternative to reporting depreciation on roads and bridges (infrastructure assets) maintained by the Utah Department of Transportation (UDOT). This includes infrastructure acquired prior to fiscal year 1981. Under this alternative method, referred to as the “modified approach,” infrastructure assets are not depreciated, and maintenance and preservation costs are expensed.

In order to utilize the modified approach, the State is required to:

- Maintain an asset management system that includes an up-to-date inventory of eligible infrastructure assets.
- Perform and document replicable condition assessments of the eligible infrastructure assets and summarize the results using a measurement scale.
- Estimate each year the annual amount to maintain and preserve the eligible infrastructure assets at the condition level established and disclosed by the State.
- Document that infrastructure assets are being preserved approximately at, or above the condition level established by the State.

Roads

UDOT uses the Pavement Management System to determine the condition of 5,825 centerline miles of state roads. The assessment is based on Ride Quality, using the International Roughness Index (IRI) data. This data is also reported to the Federal Highways Administration (FHWA) and used for the National Condition Assessment reported to Congress. Ranges for Good, Fair and Poor condition were established to correlate with the national FHWA ranges. Additional condition measures for age, wheel path rutting and surface cracking are considered in project recommendations.

Category	IRI Range	Description
Good	< 95	Pavements that provide a smooth ride and typically exhibit few signs of visible distress suitable for surface seals and preservation.
Fair	95 to 170	Pavements with noticeable deterioration beginning to affect the ride in need of resurfacing.
Poor	> 170	Pavements with an unacceptable ride that have deteriorated to such an extent that they are in need of major rehabilitation.

Condition Level – Roads

UDOT performs pavement condition assessments at a minimum of every other calendar year. The State has established a three System Level priority (Interstate, Level 1 and Level 2) with individual condition targets for each system. The condition target is to maintain a certain percentage of the mileage at a “fair” or better rating. The Interstate target is 95 percent, Level 1 (with over 1,000 Average Annual Daily Traffic) is 90 percent, and Level 2 (with less than 1,000 Average Annual Daily Traffic) is 80 percent. In 2013 Level 1 and Level 2 roads were redefined to a 1,000 Average Annual Daily Traffic threshold (previously 2,000), resulting in the Level 2 percentage being below target in 2014. The State has corrective processes in place to meet the Level 2 condition target by the next assessment. The 2015 assessment shows that significant progress has been made.

The following table reports the percentage of pavements with ratings of “fair” or better for the last three assessments for each system:

<u>System</u>	<u>2015</u>	<u>2014</u>	<u>2012</u>
Interstate System...	99.5 %	99.7 %	99.5 %
Level 1 System.....	92.7 %	91.7 %	93.5 %
Level 2 System.....	79.2 %	75.3 %	82.1 %

The following table presents the State’s estimated amounts needed to maintain and preserve roads at or above the established condition levels addressed above, and the amounts actually spent for each of the past five reporting periods (in thousands):

FISCAL YEAR	ESTIMATED SPENDING	ACTUAL SPENDING
2016	\$ 202,516	\$ 291,847
2015	\$ 198,526	\$ 279,878
2014	\$ 193,282	\$ 298,484
2013	\$ 194,720	\$ 328,137
2012	\$ 204,647	\$ 371,133

Bridges

UDOT uses the Structures Inventory System to monitor the condition of the 1,931 state-owned bridges. A number, ranging from 1 to 100, is calculated based on condition, geometry, functional use, safety, and other factors. Three categories of condition are established in relation to the number range as follows:

Category	Range	Description
Good	80 – 100	Preventive maintenance requirements include repair leaking deck joints, apply deck overlays and seals, place concrete sealers to splash zones, paint steel surfaces, and minor beam repairs.
Fair	50 – 79	Corrective repairs include deck, beam, and substructure repairs, fixing settled approaches, and repairing collision damage.
Poor	1 – 49	Major rehabilitation and replacement includes deck, beam, or substructure replacements or replacement of the entire bridge.

Condition Level – Bridges

The State performs assessments on 50 percent of bridges on an annual basis, each bridge being assessed every other year. The established condition level is to maintain 50 percent of the bridges with a rating of “good” and no more than 10 percent with a rating of “poor.” The following table reports the results of the bridges assessed for the past three years:

Rating	2016	2015	2014
Good.....	70.9 %	73.0 %	73.4 %
Poor.....	1.4 %	1.0 %	1.0 %

The following table presents the State’s estimated amounts needed to maintain and preserve bridges at or above the established condition levels addressed above, and the amounts actually spent for each of the past five reporting periods (in thousands):

FISCAL YEAR	ESTIMATED SPENDING	ACTUAL SPENDING
2016	\$ 35,738	\$ 51,502
2015	\$ 35,034	\$ 49,390
2014	\$ 34,109	\$ 52,674
2013	\$ 34,362	\$ 57,907
2012	\$ 36,114	\$ 65,494

SUPPLEMENTARY INFORMATION

This page intentionally left blank.

Nonmajor Governmental Funds

State Endowment Fund

This fund accounts for a portion of proceeds relating to the State's settlement agreement with major tobacco manufacturers, severance tax revenue in excess of statutory base amounts, and money or other assets authorized under any provision of law. The principal of the fund cannot be appropriated except by a three-fourths vote of both houses of the Legislature and with the concurrence of the Governor. One-half of all interest and dividends earned on tobacco settlement proceeds in this fund is deposited in the General Fund.

Environmental Reclamation

This fund consists of various programs aimed at preserving open land, improving irrigation in the State, funding recycling programs, and funding cleanup and reclamation projects. Funds received are from state appropriations, fees and fines, recovered liens and costs, and voluntary contributions.

Crime Victim Reparation

This fund accounts for court-ordered restitution and a surcharge on criminal fines, penalties, and forfeitures. Monies deposited in this fund are for victim reparations, other victim services, and, as appropriated, costs of administering the fund.

Universal Telephone Services

This fund is designed to preserve and promote universal telephone service throughout the State by ensuring that all citizens have access to affordable basic telephone service. Revenues come from surcharges on customers' phone bills and from fines and penalties levied against telephone service providers by the Public Service Commission.

Consumer Education Fund

This fund accounts for revenues and expenditures associated with educating and training Utah residents in various consumer matters. Funding is provided through the assessment and collection of fines and penalties from various regulated professions.

Rural Development Fund

This fund promotes various programs in rural areas of the State including construction of communications systems and economic development grants to Native American tribes. Funding comes from oil and gas severance taxes and from royalties on mineral extractions on federal land within the State.

State Capitol Fund

This fund was created to account for the funding and operations of the State Capitol Preservation Board. Funds are used in part to pay for repairs and maintenance of Capitol Hill facilities and grounds. Funding is provided through fees and private donations.

Miscellaneous Special Revenue

This fund is made up of individual small funds set up to account for various revenue sources that are legally restricted to expenditures for specific purposes.

Capital Projects – General Government

This fund accounts for resources used for capital outlays including the acquisition or construction of major capital facilities for use by the State and its component units. The fund receives financial resources from the proceeds of general obligation bonds, legislative appropriations, and intergovernmental revenues.

Capital Projects – State Building Ownership Authority (*Blended Component Unit*)

This fund accounts for resources used for capital outlays including the acquisition or construction of major capital facilities for use by various state agencies. The fund receives financial resources from the proceeds of lease revenue bonds issued by the Authority and the interest earned on the proceeds of the bonds.

Debt Service – General Government

This fund accounts for the payment of principal and interest on the State's general obligation bonds. The fund receives most of its financial resources from appropriations made by the Legislature.

Debt Service – State Building Ownership Authority (*Blended Component Unit*)

This fund accounts for the payment of principal and interest on lease revenue bonds issued by the Authority. The fund receives financial resources from rent payments made by various state agencies occupying the facilities owned by the Authority. The fund also receives capital lease payments from certain college and university component units.

Nonmajor Enterprise Funds

Housing Loan Programs

These programs provide loans or grants to low income or special needs individuals for construction, rehabilitation, or purchase of single or multi-family housing. Funds are provided from federal programs, loan repayments, appropriations, and interest earnings.

Agriculture Loan Fund

This fund is comprised of two separate revolving loan programs: the Agriculture Resource Development Fund and the Rural Rehabilitation Fund. Both programs issue farm loans for soil and water conservation projects and the rehabilitation of rural areas within the State.

Energy Efficiency Fund

This fund provides revolving loans to assist in the conversion of government and private fleet vehicles to clean fuel and for energy efficiency projects in political subdivisions and state facilities. Funds are provided from public and private contributions, appropriations, and interest earnings on loans and invested funds.

Transportation Infrastructure Loan Fund

This fund was created as a revolving loan fund to provide infrastructure assistance to local governments to expedite construction projects. The fund was capitalized with federal grants and state matching appropriations.

Alcoholic Beverage Control

The Alcoholic Beverage Control Commission was established to conduct, license, and regulate the sale of alcoholic beverages. Funding is provided through the sale of products. The net profit from the fund is transferred to the State's General Fund and is used for general government purposes.

Utah Correctional Industries

Utah Correctional Industries (UCI) was established to provide work training opportunities for inmates of the Utah State Prison. UCI manufactures and sells such items as license plates, furniture, highway signs, dairy and meat products, and provides printing and other miscellaneous products and services. Funding comes from charges for products and services.

State Trust Lands Administration

This agency manages the assets of the Trust Lands permanent fund. Its objective is to maximize the growth of principal and income production for the beneficiaries.

Utah Dairy Commission

The purpose of the Commission is to promote the use of dairy products. Its operations are comprised of promotion, advertising, research, and nutritional education regarding dairy products. Funding consists primarily of fees from milk producers.

Internal Service Funds

Technology Services

This fund is responsible for providing data processing and various other computer services along with voice and data communication services to state agencies.

General Services

This fund manages cooperative purchasing contracts and provides purchasing card, printing and mailing services, and surplus property services to state agencies. This fund also provides central accounting services for the Department of Administrative Services and warehouse services for the Department of Natural Resources.

Fleet Operations

This fund provides motor pool, fuel network, and travel services to state agencies.

Risk Management

This fund provides insurance coverage and loss prevention services to state agencies, institutions of higher education, and participating local school districts. Coverage is provided using a combination of self-insurance and private excess insurance.

Property Management

This fund is responsible for the operation and maintenance of facilities used by state agencies. This fund is also used to account for the State's facility energy efficiency program.

Human Resource Management

This fund provides human resource and payroll services to state agencies.

Fiduciary Funds

PENSION AND OTHER EMPLOYEE BENEFIT TRUST FUNDS

Defined Benefit Pension Plans and Defined Contribution Plans

These funds are used to account for the various pension trust funds and defined contribution plans administered by the Utah Retirement Systems. Funding comes from employee and employer contributions and investment earnings. Contributions in some systems are augmented by fees, insurance premium taxes, or legislative appropriations.

Post-Retirement Benefits Trust Funds

The State administers the State Employee and the Elected Official Other Postemployment Benefit Plans as irrevocable trusts. These trust funds account for the assets accumulated and the payments made for other postemployment benefits provided to current and future state employee and elected official retirees. Funding comes from employer contributions and investment earnings.

Other Employee Benefits Trust Funds

These trust funds are used to pay other employee benefits upon retirement or termination.

PRIVATE PURPOSE TRUST FUNDS

Utah Navajo Trust

This fund receives oil royalties, operating, and other trust revenues. Funds received are used for the health, education, and general welfare of Navajo residents of San Juan County, Utah.

Unclaimed Property Trust

This fund is used to account for unclaimed property escheated to the State. Proceeds of the fund pay the administrative costs to operate the fund and any claims. The remaining proceeds are deposited in the Education Fund and can only be used to help fund public education.

Employers' Reinsurance Trust

This fund primarily provides compensation to individuals injured from industrial accidents or occupational diseases occurring on or before June 30, 1994, where the injury is of a permanent nature and workers' compensation benefits

have expired. Revenues come from assessments on insurance premiums and court-ordered penalties. The net position of the fund is held in trust for injured workers and cannot be used for any other purpose.

Petroleum Storage Tank Trust

This fund is used to pay the costs of damage caused by petroleum storage tank releases and provide revolving loan capital. Sources of funding include fees from participating companies, recovered costs and settlements from responsible parties, and investment income. The net position of this fund is held in trust for the benefit of participants and cannot be used for any other purpose.

Utah Educational Savings Plan Trust

This fund was created as a means to encourage investment in a public trust to pay for future higher education costs. Participant contributions are used to pay for future college expenses.

Miscellaneous Restricted Trust

This is made up of various small individual funds created to receive and disburse funds in accordance with applicable laws and trust agreements.

AGENCY FUNDS

Taxes and Social Security

This fund is used to account for federal withholding and social security taxes on the State's payroll.

County and Local Collections

This fund receives and disburses various taxes collected by the State on behalf of county and local governments.

State Courts

This fund receives and disburses various fines and forfeitures collected by the state courts on behalf of state and local agencies.

Deposits, Suspense, and Miscellaneous

This fund is made up of small individual funds established to account for various receipts and disbursements.

Nonmajor Component Units

Utah Communications Authority

The Utah Communications Authority (UCA) provides public safety communications services and facilities on a statewide basis for the benefit and use of state, local, and federal agencies. UCA supports statewide interoperability of emergency communications throughout the State, and manages the 911 funds collected by the State for the benefit of the Public Safety Answering Points within the State. UCA operations are funded through service charges supplemented with federal grants and state fees and appropriations.

Utah Schools for the Deaf and the Blind

The Schools were created to provide education to individuals with hearing and/or vision impairments, through direct and indirect education services, as well as consultation to their families and service providers.

Military Installation Development Authority

This Authority is an independent, nonprofit entity whose purpose is to provide for the development and improvement of project areas near military installations throughout the State. Operations are funded through service charges, project revenue, and state appropriations.

Heber Valley Historic Railroad Authority

The Authority was created to operate, maintain, improve, and provide for a scenic and historic railway in and around the Heber Valley in Wasatch County. Operations are funded primarily through user charges.

Utah State Fair Corporation

The Corporation was created to operate the State Fair Park and conduct the Utah State Fair and other expositions and entertainment events. Operations are funded by admissions, rentals, donations, and state appropriations.

Colleges and Universities

The colleges and universities are the State's public institutions of higher education. The nonmajor institutions of higher education are:

*Weber State University | Southern Utah University | Salt Lake Community College | Utah Valley University
Dixie State University | Snow College | Utah College of Applied Technology*

State of Utah

STATISTICAL SECTION

Fiscal Year Ended June 30, 2016

This section of the State of Utah’s comprehensive annual financial report presents detailed information as a context for understanding what the information in the financial statements, notes to the financial statements, and required supplementary information says about the State’s overall financial health.

Financial Trends Information

These schedules present trend information to help the reader understand how the State’s financial performance and fiscal health have changed over time.

Schedule A–1	Net Position by Component	238
Schedule A–2	Changes in Net Position	240
Schedule A–3	Fund Balances — Governmental Funds	244
Schedule A–4	Changes in Fund Balances — Governmental Funds	246

Revenue Capacity Information

These schedules contain information to help the reader understand the State’s capacity to raise revenues and the sources of those revenues.

Schedule B–1	Revenue Base	248
Schedule B–2	Revenue Payers by Industry — Taxable Sales, Services, and Use Tax Purchases	250
Schedule B–3	Revenue Payers — Personal Income Tax	251
Schedule B–4	Personal Income Tax Rates	252

Debt Capacity Information

These schedules present information to help the reader understand and assess the State’s levels of outstanding debt and the State’s ability to issue additional debt in the future.

Schedule C–1	Ratios of Outstanding Debt by Type	254
Schedule C–2	Other Long-Term Liabilities	256
Schedule C–3	Legal Debt Margin	258
Schedule C–4	Statutory Debt Limit	258
Schedule C–5	Pledged Revenue Bond Coverage	260

Demographic and Economic Information

These schedules contain demographic and economic indicators to help the reader understand the environment within which the State’s financial activities take place.

Schedule D–1	Demographic and Economic Indicators	261
Schedule D–2	Principal Employers	262
Schedule D–3	Composition of Labor Force	264
Schedule D–4	Public Education Student Enrollment (K–12)	266
Schedule D–5	Public Higher Education Enrollment	266

Operating Information

These schedules offer operating data to help the reader understand how the information in the State’s financial report relates to the services it provides and the activities it performs.

Schedule E–1	Full-Time Equivalent State Employees by Function	268
Schedule E–2	Operating Indicators by Function	270
Schedule E–3	Capital Asset Statistics by Function	272

Other Information

These graphs and schedules offer a historical view of expenditures in constant dollars.

Schedule F–1	Expenditures — Historical and Constant Dollars	274
Schedule F–2	Per Capita Expenditures — Historical and Constant Dollars	275

Sources: Unless otherwise noted, the information in the following schedules is derived from the State of Utah Comprehensive Annual Financial Report.

Notes: This schedule has been restated for prior period adjustments, if practical, which were made to the fiscal year and preceding fiscal year in which the prior period adjustment was identified.

¹ In fiscal years 2008 to 2010, governmental activities' restricted net position decreased as the economy slowed and tax revenues declined. In fiscal years 2011 to 2013 restricted net position increased due to slightly higher revenues from a strengthening economy. In fiscal year 2014 restricted net position increased primarily due to an increase in investment values because of general market conditions. In fiscal year 2014, governmental activities' unrestricted net position increased due to an increase in carry-forward balances. In fiscal year 2015, governmental activities' restricted net position increased due to higher tax revenues from an improving economy and an increase in investment values because of general market conditions. In fiscal year 2015, unrestricted net position decreased due to the implementation of Governmental Accounting Standards Board Statement 68, *Accounting and Financial Reporting for Pensions* that required the measurement and recognition of the State's net pension liability.

² From fiscal years 2007 to 2008, business-type activities' restricted net position increased due to unemployment revenues exceeding related claims. In fiscal year 2009, the weak economy caused an increase in unemployment claims, which in turn caused a decrease in the restricted net position of business-type activities. From 2010 to 2016, restricted net position has continued to steadily increase due to unemployment revenues exceeding related claims.

³ In fiscal years 2007 to 2009, and again in 2012 to 2014, business-type activities' unrestricted net position increased primarily due to the State providing additional capital to the loan funds from mineral lease revenue and dedicated sales tax revenues.

Notes: This schedule also has been restated for prior period adjustments, if practical, which were made to the fiscal year and preceding fiscal year in which the prior period adjustment was identified.

¹ Expenses for health and environmental quality have increased over the last ten fiscal years due to rising Medicaid program costs.

² In fiscal year 2013, Legislative action moved the Housing and Community Development Division from Heritage and Arts to Employment and Family Services.

³ Public education expenses continue to increase for both enrollment growth and benefit-related costs for educators.

⁴ In fiscal years 2008 to 2010, general tax revenues declined due to the recessionary economy. In fiscal years 2011 to 2016, general tax revenues increased due to slightly higher revenues from a strengthening economy.

⁵ Beginning in fiscal year 2008 and continuing in fiscal year 2010, unemployment compensation expenses increased significantly as the economy continued to weaken at a faster pace than in prior years. In fiscal years 2011 to 2015, expenses decreased reflecting Utah's improving economy and employment.

⁶ In fiscal years 2010 and 2011, operating grants and contributions increased overall from the preceding and subsequent years, primarily due to increased federal programs funded in part by the *American Recovery and Reinvestment Act* in the Unemployment Compensation Fund and additional operating grants issued for loan related programs.

⁷ In fiscal year 2016, investment income for business-type activities was reclassified to other general revenues from operating grants and contributions. This change was made to comply with applicable accounting standards. Prior years have been restated.

Notes: Beginning fiscal year 2010, the fund balance categories were reclassified as a result of implementing Governmental Accounting Standards Board (GASB) Statement 54, *Fund Balance Reporting and Governmental Fund Type Definitions*. Fund balance has not been restated for prior years.

This schedule has been restated for prior period adjustments, if practical, which were made to the fiscal year and preceding fiscal year in which the prior period adjustment was identified.

¹ Beginning in fiscal year 2013, the nonspendable fund balance within the General Fund increased due to prepaid items. Additionally, nonspendable fund balance within the General Fund also increased in fiscal year 2013 due to an increase in the long-term portion of revolving loans within the Internal Service Funds.

² In fiscal year 2016, the assigned fund balance within the General Fund decreased due to a reduction in the amount set aside for next year's budget.

³ In fiscal years 2013 to 2015, the nonspendable fund balance within other governmental funds increased primarily due to a change in investment values as a result of the rebounding economy.

⁴ In fiscal years 2012 to 2014, the committed fund balance within other governmental funds increased as a result of sales and use tax diversions for transportation projects. In fiscal year 2016, the committed fund balance decreased as expenditures for transportation projects utilizing sales and use tax revenue increased.

⁵ The assigned fund balance within other governmental funds increased in fiscal year 2011, then decreased in fiscal years 2012 and 2013 as less funding was assigned for capital projects. In fiscal years 2014 to 2016, the assigned fund balance increased again as more funding was used for capital projects.

⁶ In fiscal year 2009, General Fund reserved fund balance decreased due to less reserves available as a result of the slowing economy.

⁷ In fiscal years 2008 and 2009, General Fund unreserved fund balance decreased as the State's economy slowed. Sales and use tax diversions along with reductions in the sales tax rate also contributed to the decrease in tax revenues in the General Fund.

⁸ In fiscal year 2007, and again in fiscal year 2009, unreserved fund balance for capital projects reported a deficit balance as a result of outstanding encumbrances on various capital related projects. Appropriations and bond proceeds available in subsequent fiscal years will fund these deficits.

Notes: This schedule also has been restated for prior period adjustments, if practical, which were made to the fiscal year and preceding fiscal year in which the prior period adjustment was identified.

¹ In fiscal years 2009 to 2010, tax revenues decreased significantly as the economy slowed. Sales and use tax diversions along with a reduction in the sales tax rate also contributed to this decrease. In fiscal years 2011 to 2016, tax revenues increased due to a rebounding economy.

² In fiscal year 2016, motor and special fuels tax increased due, in part, to a tax increase and also as a result of higher fuel consumption.

³ In fiscal years 2009 and 2010, federal contracts and grants increased in part due to funding provided by the *American Recovery and Reinvestment Act*.

⁴ In fiscal year 2016, federal mineral lease revenue decreased due to lower energy prices and a decline in production.

⁵ In fiscal year 2009, the decrease in the fair value of investments for the permanent fund created a negative revenue. In fiscal years 2013 and 2014, investment income increased due to an increase in the fair value of investments as the result of a rebounding economy. In fiscal years 2015 and 2016, investment income decreased due to a change in the fair value of investments.

⁶ Expenditures for Health and Environmental Quality have increased over the last ten fiscal years due to rising Medicaid program costs.

⁷ In fiscal year 2013, Legislative action moved the Housing and Community Development Division from Heritage and Arts to Employment and Family Services.

⁸ Public education expenditures continue to increase for both enrollment growth and benefit-related costs for educators.

⁹ In fiscal year 2012, the Transportation Investment Fund was reclassified as a capital projects fund. Expenditures relating to this fund have been reclassified from transportation expenditures to capital outlay for prior years.

¹⁰ Expenditures for transportation increased in fiscal years 2007 to 2010 as existing fund balances and federal resources were used to address the State's transportation infrastructure needs.

¹¹ Expenditures for capital outlay increased in fiscal years 2010 to 2011 as additional funding through bond proceeds were used to address the State's transportation infrastructure needs.

¹² In fiscal year 2015, the Comprehensive Health Insurance Pool (discrete component unit) was dissolved and the remaining cash balance was transferred to the State's general fund.

Note: The Utah State Legislature can raise the income tax rates by legislation, no vote of the populace is required; *Utah Constitution*, Article XIII, Section 5.

¹ The Legislature passed an option for the taxpayer to use the single rate of 5.35 percent or the tax tables for calendar year 2007.

² The Legislature passed a single tax rate for all taxpayers beginning with calendar year 2008.

Sources: Utah Department of Administrative Services, Division of Finance; Utah State Tax Commission – Property Tax; and Utah Governor's Office of Management and Budget – Demographics.

Note: Net general obligation and revenue bonded debt includes principal, premiums, discounts, and deferred amount on refundings of bonded debt for years prior to 2014. Beginning in 2014, deferred amounts on refunding of bonded debt is no longer reported as part of long-term liabilities, but now as Deferred Outflows or Inflows of Resources per the implementation of Governmental Accounting Standards Board (GASB) Statement 65, *Items Previously Reported as Assets and Liabilities*.

¹ In 2015 the Student Assistance Programs issued a line of credit to acquire federally guaranteed student loans.

² Ratios are calculated using personal income and population data. See Schedule D–1 for personal income and population data. During 2010 to 2012, the State issued just under \$1 billion in General Obligation bonds to take advantage of historically low interest rates and ease budget constraints for highway and building construction projects.

³ The percentage of Net General Obligation Bonded Debt based upon taxable property value is presented for comparative purposes. The State does not presently levy ad valorem property taxes for General Obligation Bonded Debt, but is authorized to do so in accordance with Title 59, Chapter 2, Part 901 of the *Utah Code*. See Schedule C–3 for taxable property value.

Note: Details regarding the liabilities listed above can be found in Note 10. Long-term Liabilities in the financial statements.

¹ During 2010 to 2012, the State issued just under \$1 billion in General Obligation bonds to take advantage of historically low interest rates and ease budget constraints for highway and building construction projects.

² Beginning in 2014, deferred amount on refundings are no longer reported in the financial statements as part of other long-term liabilities under Governmental and Business-type Activities. This obligation is now being reported as Deferred Outflows or Inflows of Resources per the implementation of Governmental Accounting Standards Board (GASB) Statement 65, *Items Previously Reported as Assets and Liabilities*.

³ Beginning in 2008, the Pollution Remediation Obligation is no longer reported in the financial statements as part of Contracts Payable under Governmental Activities. This obligation is now being reported separately as Pollution Remediation Obligation per the implementation of GASB Statement 49, *Accounting and Financial Reporting for Pollution Remediation Obligations*.

⁴ During 2009, a new actuary valuation was performed for GASB Statement 16, *Accounting for Compensated Absences* and as a result the total liability decreased.

⁵ During 2012, the Student Assistance Programs advance refunded certain outstanding student loan revenue bonds to manage its interest costs.

⁶ During 2010, the Student Assistance Programs began participating in the U.S. Department of Education Loan Participation Purchase Program. The program was created to assist lenders in obtaining financing for student loans during 2008–2010 academic years. In 2015 the Student Assistance Programs issued a line of credit to acquire federally guaranteed student loans.

Source: Utah State Tax Commission and the Utah Department of Administrative Services, Division of Finance.

Note: Article XIV, Section 1 of the *Utah Constitution* allows the State to contract debts not exceeding 1.5 percent of the total taxable property in the State. The Legislature authorizes general obligation indebtedness within this limit. The State uses outstanding general obligation bond debt to comply within the constitutional debt limit. The State has other long-term contract liabilities consisting of unused vacation and other vested leave for employees of \$102.729 million as of fiscal yearend. These contract liabilities do not affect the State's compliance with the constitutional debt limit.

¹ Taxable property is assessed January 1 of each year. The value used for the fiscal year limitation is from the prior calendar year; assessed values as of January 1, 2015, are used for fiscal year 2016.

Source: Utah Governor's Office of Management and Budget and the Utah Department of Administrative Services, Division of Finance.

Note: Article XIV, Section 5 of the *Utah Constitution* limits any funds borrowed to be used solely for purposes as authorized by law. In addition, Title 63J-3-402 of the *Utah Code* limits outstanding state general obligation debt to not exceed the applicable percentage (unless approved by more than two-thirds of both houses of the Legislature) of that fiscal year's appropriations limit. The State uses outstanding general obligation bond debt to comply within the constitutional debt limit. The State has other long-term contract liabilities consisting of unused vacation and other vested leave for employees of \$102.729 million as of 2016 fiscal yearend. These contract liabilities do not affect the State's compliance with the constitutional debt limit.

Note: Details regarding the State's outstanding bonds can be found in Note 10. Long-term Liabilities in the financial statements.

¹ Revenues for Water Loan Programs are primarily interest on revolving loan receivables; principal repayments are not included in gross revenues, but are pledged to cover debt service payments. Revenues for Student Assistance Programs are primarily interest on student loans and federal allowances.

² Operating Expenses do not include interest, depreciation, or amortization expenses.

³ Coverage equals net available revenue divided by debt service.

⁴ Between years 2007 and 2009, the State did not issue any water loan recapitalization bonds.

⁵ Prior to 2015, only Student Loan Purchase Program bonds were presented. During February 2015, the Warehouse Facility Fund line of credit was issued for \$1.6 billion in order to acquire federally guaranteed student loans.

⁶ During 2011, the Student Assistance Programs had a substantial decrease in its provision for interest arbitrage rebate of \$37.2 million on its 1988 and 1993 revenue bonds.

Expenditures — Historical and Constant Dollars
All Governmental Fund Types
 Last Five Fiscal Years

Fiscal Year	Historical Dollars		Constant Dollars	
	(in Millions)	Change	(in Millions)	Change
2012	\$ 11,114	0.4 %	\$ 4,884	(2.4)%
2013	\$ 10,827	(2.6)%	\$ 4,680	(4.2)%
2014	\$ 10,986	1.5 %	\$ 4,676	(0.1)%
2015	\$ 11,482	4.5 %	\$ 4,851	3.7 %
2016	\$ 11,923	3.8 %	\$ 5,004	3.2 %

Source: Constant Dollars are derived using the Consumer Price Index for all urban consumers, base year 1982-84 = 100.

Per Capita Expenditures — Historical and Constant Dollars
All Governmental Fund Types
 Last Five Fiscal Years

Fiscal Year	Per Capita Expenditures			
	Historical Dollars		Constant Dollars	
		Change		Change
2012	\$ 3,893	(1.0)%	\$ 1,711	(3.8)%
2013	\$ 3,732	(4.1)%	\$ 1,613	(5.7)%
2014	\$ 3,730	(0.1)%	\$ 1,588	(1.5)%
2015	\$ 3,832	2.7 %	\$ 1,619	2.0 %
2016	\$ 3,913	2.1 %	\$ 1,642	1.4 %
