New Issue

In the opinion of Gilmore & Bell, P.C., Bond Counsel, under existing law and assuming continued compliance with certain requirements of the Internal Revenue Code of 1986, as amended, the interest on the 2020B Bonds is excludable from gross income for federal income tax purposes, and is not an item of tax preference for purposes of the federal alternative minimum tax. Bond Counsel is also of the opinion that the interest on the 2020B Bonds is exempt from State of Utah individual income taxes. See "TAX MATTERS" herein.

\$447,315,000

State of Utah

General Obligation Bonds, Series 2020B

The \$447,315,000 General Obligation Bonds, Series 2020B, are issuable by the State as fully–registered bonds and will be initially issued in book–entry form through The Depository Trust Company, New York, New York, as securities depository for the 2020B Bonds. See "APPENDIX F—BOOK–ENTRY SYSTEM."

Principal of and interest on the 2020B Bonds (interest payable January 1 and July 1 of each year, commencing January 1, 2021) are payable by the Utah State Treasurer, Salt Lake City, Utah, as Paying Agent, to the registered owners thereof. See "THE 2020B BONDS—Book–Entry System" herein.

The 2020B Bonds are subject to optional redemption prior to maturity. See "THE 2020B BONDS—Redemption Provisions" herein.

The 2020B Bonds are general obligations of the State, for which the full faith, credit and resources of the State are pledged for the payment of principal and interest, and for which payment a tax may be levied, without limitation as to rate or amount, on all property in the State subject to taxation for State purposes. See "SECURITY FOR THE 2020B BONDS" herein.

This OFFICIAL STATEMENT does not constitute an offer to sell, or the solicitation of an offer to buy, nor shall there be any sale of, the 2020B Bonds, by any person in any jurisdiction in which it is unlawful for such person to make such offer, solicitation or sale. No dealer, broker, salesman or other person has been authorized to give any information or to make any representations other than those contained herein, and if given or made, such other information or representations must not be relied upon as having been authorized by any of the State; Zions Public Finance, Inc., Salt Lake City, Utah (as Municipal Advisor); the State Treasurer of the State, Salt Lake City, Utah (as Registrar and Paying Agent); BofA Securities, Inc. New York, New York; Goldman Sachs & Co. LLC, New York, New York; Citigroup Global Markets Inc., New York, New York; Stifel Nicolaus & Company, Incorporated, St. Louis, Missouri; and Wells Fargo Bank, National Association, New York, New York (collectively, the "Underwriters"); or any other entity. All information contained herein has been obtained from the State, The Depository Trust Company, and from other sources which are believed to be reliable. The information and expressions of opinion herein are subject to change without notice and neither the delivery of this OFFICIAL STATEMENT nor the issuance, sale, delivery or exchange of the 2020B Bonds, shall under any circumstance create any implication that there has been no change in the affairs of the State since the date hereof.

The 2020B Bonds have not been registered under the Securities Act of 1933, as amended, or any state securities laws in reliance upon exemptions contained in such act and laws. Any registration or qualification of the 2020B Bonds in accordance with applicable provisions of the securities laws of the states in which the 2020B Bonds have been registered or qualified and the exemption from registration or qualification in other states cannot be regarded as a recommendation thereof. Neither the Securities and Exchange Commission nor any state securities commission has passed upon the accuracy or adequacy of this OFFICIAL STATEMENT. Any representation to the contrary is unlawful.

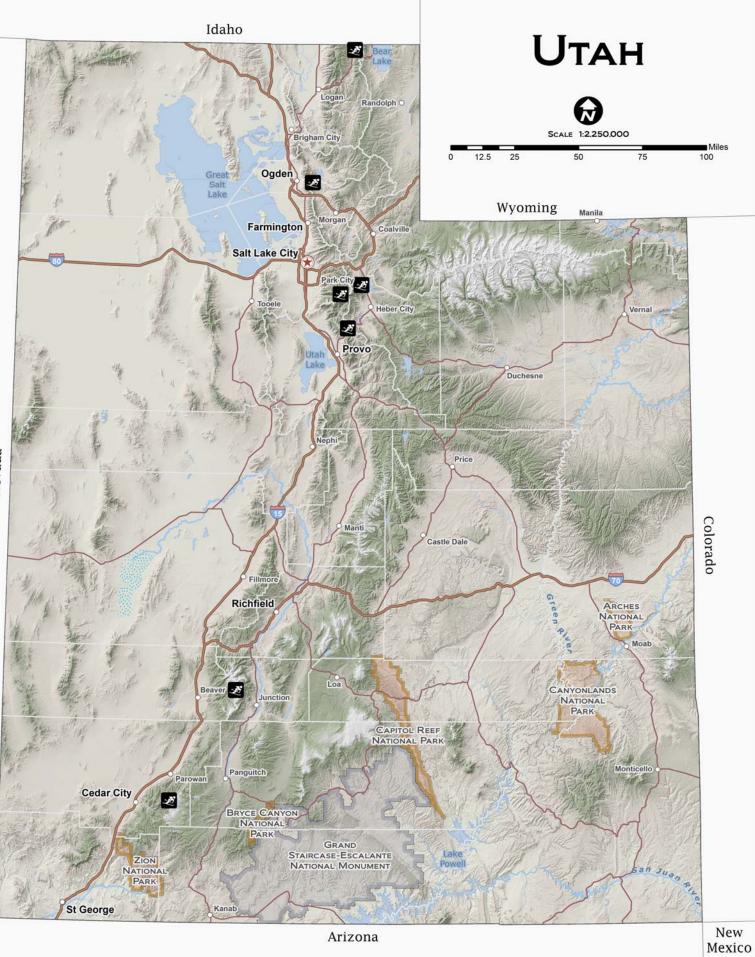

The yields/prices at which the 2020B Bonds are offered to the public may vary from the initial reoffering yields/prices on the inside cover page of this OFFICIAL STATEMENT. In addition, the Underwriters may allow concessions or discounts from the initial offering prices of the 2020B Bonds to dealers and others. In connection with the offering of the 2020B Bonds, the Underwriters may engage in transactions that stabilize, maintain, or otherwise affect the price of the 2020B Bonds. Such transactions may include overallotments in connection with the purchase of 2020B Bonds, the purchase of 2020B Bonds to stabilize their market price and the purchase of 2020B Bonds to cover the Underwriter's short positions. Such transactions, if commenced, may be discontinued at any time.

Forward-Looking Statements. Certain statements included or incorporated by reference in this OFFICIAL STATEMENT constitute "forward-looking statements" within the meaning of the United States Private Securities Litigation Reform Act of 1995, Section 21E of the Securities Exchange Act of 1934, as amended, and Section 27A of the Securities Act of 1933, as amended. Such statements are generally identifiable by the terminology used, such as "plan," "project," "forecast," "expect," "estimate," "budget" or other similar words. The achievement of certain results or other expectations contained in such forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause actual results, performance or achievements described to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements if or when such expectations change, or events, conditions or circumstances on which such statements are based, occur. See "FINANCIAL INFORMATION REGARDING THE STATE OF UTAH—COVID–19 World Pandemic Crisis" "—State Revenues And Collections And State Economy" "—Operating And Capital Budget And Related Appropriations" herein.

The CUSIP[®] (the Committee on Uniform Securities Identification Procedures) identification numbers are provided on the inside cover page of this OFFICIAL STATEMENT and are being provided solely for the convenience of bondholders, and the State does not make any representation with respect to such numbers or undertake any responsibility for their accuracy. The CUSIP[®] numbers are subject to change after the issuance of the 2020B Bonds because of subsequent actions including, but not limited to, a refunding in whole or in part of the 2020B Bonds.

The information available at web sites referenced in this OFFICIAL STATEMENT has not been reviewed for accuracy and completeness. Such information has not been provided in connection with the offering of the 2020B Bonds and is not a part of this OFFICIAL STATEMENT.

OFFICIAL STATEMENT RELATED TO

\$447,315,000

State of Utah

General Obligation Bonds, Series 2020B

INTRODUCTION

This OFFICIAL STATEMENT provides information about the issuance and sale by the State of Utah (the "State" or "Utah") of its \$447,315,000 General Obligation Bonds, Series 2020B (the "2020B Bonds" or "2020B Bond").

This introduction is only a brief description of the 2020B Bonds and the security and source of payment for the 2020B Bonds and is qualified by more complete and detailed information contained in the entire OFFICIAL STATEMENT, including the cover page and appendices hereto, and the documents summarized or described herein. Accordingly, the OFFICIAL STATEMENT should be read in its entirety. The offering of the 2020B Bonds to potential investors is made only by means of the entire OFFICIAL STATEMENT.

When used herein, the terms "Fiscal Year[s] 20YY," and "Fiscal Year[s] End[ed][ing] June 30, 20YY" refer to the year ended or ending on June 30 of the year indicated and beginning on July 1 of the preceding year and the terms "Calendar Year[s] 20YY" or "Calendar Year[s] End[ed][ing] December 31, 20YY" refer to the year beginning on January 1 and ending on December 31 of the year indicated.

Impact Of Coronavirus (COVID-19)

In December 2019, a novel strain of coronavirus known as COVID-19 ("COVID-19") began spreading throughout the world and has been characterized by the World Health Organization as a pandemic disease.

COVID-19 is currently affecting State, local, national and global economic activity (including increasing public and private health emergency response costs and reducing sources of State and local revenues) and consequently is expected to materially adversely impact the financial condition of the State. Because the OFFICIAL STATEMENT relies on future budgets and historical data for financial information about the State, such information may not necessarily predict future trends accurately.

As of the date of this OFFICIAL STATEMENT, for a discussion of the State's response to manage the economic recovery and all current and future State revenues, expenditures and budgets, see "FINANCIAL IN-FORMATION REGARDING THE STATE OF UTAH—COVID–19 World Pandemic Crisis" below.

Significant developments regarding COVID-19 continue to occur daily and the extent to which COVID-19 will impact the State in the future is highly uncertain and cannot be predicted. *However, the State does not expect the various aspects of COVID-19 to negatively impact the State's ability to pay the principal of and interest on the 2020B Bonds. See "SECURITY FOR THE 2020B BONDS" below.*

The State Of Utah

On January 4, 1896, the State became the 45th state of the United States of America (the "U.S."). Ranking 13th largest among the states in total area, the State contains approximately 84,900 square miles. It ranges in elevation from a low of 2,200 feet above sea level in the south, to a high of 13,500 feet above sea level in the northern mountains. The State is in an arid region (precipitation ranks as the second lowest in the nation, behind Nevada). Home to deserts, plateaus, the Great Basin and the Rocky Mountains, the State is known for its scenic beauty and the diversi-

ty of its outdoor recreation areas. The State was the host of the 2002 Winter Olympic Games and continues to be a major tourist destination, with world class skiing and five national parks.

The State's 2019 population estimate by the U.S. Census Bureau was 3,205,958 people (ranked as the 30th most populous state).

The State's economy is knowledge-based, entrepreneurial, and information technology-driven and encompasses a variety of industries, including but not limited to: agriculture, construction, energy, minerals, tourism, technology, communications, healthcare, financial services, higher education, defense, transportation and government services.

The State maintains a web site at <u>https://www.utah.gov/</u> (the State Treasurer's web site is at <u>https://www.treasurer.utah.gov/</u>). In addition, the Treasurer's office has provided additional information for investors at <u>https://treasurer.utah.gov/for-investors/</u>. The Utah Department of Transportation ("UDOT") maintains a web site at <u>https://www.udot.utah.gov/</u>.

For additional information regarding the State see "APPENDIX C—DEMOGRAPHIC AND ECONOMIC IN-FORMATION REGARDING THE STATE OF UTAH."

Authority For And Purpose Of The 2020B Bonds

The 2020B Bonds are authorized pursuant to resolutions adopted by the State Bonding Commission (the "Commission") on April 9, 2020 (the "Parameters Resolution") and on May 14, 2020 (the "Bond Resolution," and together with the Parameters Resolution, the "Resolutions") and pursuant to the General Obligation Bond Authorization Acts (as hereinafter defined): (i) to provide funds to the State and its agencies to pay all or part of the costs of acquiring and constructing (a) a prison project and (b) certain transportation (highway) projects and (ii) to pay all or part of any cost incident to the issuance and sale of the 2020B Bonds.

The 2020B Bonds financing: (i) the prison project is being issued pursuant to the provisions of Section 63B–25–101 (as amended) of the Utah Code Annotated 1953, as amended (the "Utah Code") (the "Prison Project Act") and (ii) the highway projects are being issued pursuant to Section 63B–27–101 of the Utah Code (as amended); Section 63B–30–101 of the Utah Code (collectively, the "Highway Project Acts" and together with the Prison Project Act, the "General Obligation Bond Authorization Acts").

Security

The 2020B Bonds are general obligations of the State, for which the full faith, credit and resources of the State are pledged for the payment of principal and interest, and for which payment a direct annual tax is levied, without limitation as to rate or amount, on all property in the State subject to State taxation. The proceeds of all taxes levied for this purpose are appropriated to the sinking fund established for the 2020B Bonds. The direct annual tax is abated to the extent money is available from other sources in the sinking fund to pay debt service on the 2020B Bonds. *The State expects that moneys will be available from sources other than property taxes in amounts sufficient to pay principal of and interest on the 2020B Bonds when due, thereby enabling the State to abate the property taxes otherwise required to be levied for that purpose.* The State has not levied a property tax for its bond payments or other State purposes since 1974. See "SECURITY FOR THE 2020B BONDS" below.

Redemption Provisions

The 2020B Bonds are subject to optional redemption prior to maturity. See "THE 2020B BONDS— Redemption Provisions" below.

Tax Matters Regarding The 2020B Bonds

In the opinion of Gilmore & Bell, P.C., under existing law and assuming continued compliance with certain requirements of the Internal Revenue Code of 1986, as amended (the "Code"), the interest on the 2020B Bonds is excludable from gross income for federal income tax purposes, and is not an item of tax preference for purposes of the federal alternative minimum tax. Bond Counsel is also of the opinion that the interest on the 2020B Bonds is exempt from State of Utah individual income taxes. See "TAX MATTERS" below. Bond Counsel expresses no opinion regarding any other tax consequences relating to ownership or disposition of or the accrual or receipt of interest on the 2020B Bonds.

Professional Services

As of the date of this OFFICIAL STATEMENT, the following have served the State in the capacity indicated regarding the issuance of the 2020B Bonds.

Registrar and Paying Agent Utah State Treasurer's Office Utah State Capitol Complex 350 N State St Ste C180 (PO Box 142315) Salt Lake City UT 84114–2315 801.538.1042 | f 801.538.1465 ddamschen@utah.gov Bond Counsel Gilmore & Bell PC 15 W S Temple Ste 1450 Salt Lake City UT 84101 801.364.5080 | f 801.364.5032 <u>rlarsen@gilmorebell.com</u>

Conditions Of Delivery, Anticipated Date, Manner, And Place Of Delivery

The 2020B Bonds are offered, subject to prior sale, when, as, and if issued and received by BofA Securities, Inc. New York, New York and Goldman Sachs & Co. LLC, New York, New York; as Co–Senior Managers for the 2020B Bonds and representative of Citigroup Global Markets Inc., New York, New York; Stifel Nicolaus & Company, Incorporated, St. Louis, Missouri; and Wells Fargo Bank, National Association, New York, New York; as Co–Managers (collectively, the "Underwriters"), subject to the approval of legality by Gilmore & Bell, P.C., Bond Counsel to the State, and certain other conditions. Certain legal matters will be passed on for the State by its Attorney General. Certain matters will be passed on for the Underwriters by their counsel Chapman and Cutler LLP. It is expected that the 2020B Bonds, in book–entry form, will be available for delivery to The Depository Trust Company, New York, New York

Continuing Disclosure Undertaking

The State will enter a continuing disclosure undertaking for the benefit of the Beneficial Owners of the 2020B Bonds. For a detailed discussion of this disclosure undertaking, previous undertakings and timing of submissions see "CONTINUING DISCLOSURE UNDERTAKING" below and "APPENDIX E—FORM OF CONTINU-ING DISCLOSURE UNDERTAKING."

Basic Documentation

This OFFICIAL STATEMENT speaks only as of its date, and the information contained herein is subject to change. Brief descriptions of the State, the 2020B Bonds, and the Resolutions are included in this OFFICIAL STATEMENT. Such descriptions do not purport to be comprehensive or definitive. All references herein to the Resolutions are qualified in their entirety by reference to such documents, and references herein to the 2020B Bonds are qualified in their entirety by reference to the form thereof included in the Bond Resolution. The "basic documentation" which includes the Resolutions, the closing documents and other documentation, authorizing the issuance of the 2020B Bonds and establishing the rights and responsibilities of the State and other parties to the transaction may be obtained from the "contact persons" as indicated below.

Contact Persons

As of the date of this OFFICIAL STATEMENT, additional requests for information may be directed to Zions Public Finance, Inc., Salt Lake City, Utah, the Municipal Advisor to the State (the "Municipal Advisor"):

Jon Bronson, Senior Vice President, Director of Public Finance, <u>jon.bronson@zionsbancorp.com</u> Johnathan Ward, Senior Vice President, <u>johnathan.ward@zionsbancorp.com</u> Eric Pehrson, Senior Vice President, <u>eric.pehrson@zionsbancorp.com</u>

> Zions Public Finance Inc One S Main St 18th Fl Salt Lake City UT 84133–1109 801.844.7373 | f 801.844.4484

As of the date of this OFFICIAL STATEMENT, the chief contact person for the State concerning the 2020B Bonds is:

David Damschen, Utah State Treasurer, <u>ddamschen@utah.gov</u> Utah State Treasurer's Office Utah State Capitol Complex 350 N State St Ste C180 (PO Box 142315) Salt Lake City UT 84114–2315 801.538.1042 | f 801.538.1465

SECURITY FOR THE 2020B BONDS

The 2020B Bonds are general obligations of the State, for which the full faith, credit and resources of the State are pledged for the payment of principal and interest, and for which payment a direct annual tax is levied, without limitation as to rate or amount, on all property in the State subject to State taxation. The General Obligation Bond Authorization Acts provide that each year after issuance of the 2020B Bonds and until all outstanding 2020B Bonds are retired, there is levied a direct annual tax on all real and personal property within the State subject to State taxation, sufficient to pay applicable bond redemption premiums, if any, interest on the 2020B Bonds as it becomes due, and principal of the 2020B Bonds as it becomes due. The proceeds of all taxes levied for this purpose are appropriated to the sinking fund established for the 2020B Bonds. The General Obligation Bond Authorization Acts further provide that the direct annual tax imposed under the General Obligation Bond Authorization Acts is abated to the extent money is available from sources other than ad valorem taxes in the sinking fund created by the General Obligation Bond Authorization Acts for the payment of bond interest, principal, and redemption premiums, if any.

To avoid levying a property tax for the payment of principal of and interest on the 2020B Bonds, the State must set aside in the sinking fund for the 2020B Bonds an amount sufficient for such payments in advance of the time necessary to levy the tax. For a description of the process for levying a property tax, see "FINANCIAL INFOR-MATION REGARDING THE STATE OF UTAH—Property Tax Matters" below. *The State expects that moneys will be available from sources other than ad valorem taxes for deposit into the sinking fund created by the General Obligation Bond Authorization Acts and the Bond Resolution in amounts sufficient to pay principal of and interest on the 2020B Bonds when due, thereby enabling the State to abate the ad valorem taxes levied for that purpose.*

The State has not levied a property tax for its bond payments or other State purposes since 1974.

CONTINUING DISCLOSURE UNDERTAKING

The State will enter into a continuing disclosure undertaking (the "Disclosure Undertaking") for the benefit of the Beneficial Owners of the 2020B Bonds to send certain information annually and to provide notice of certain events to the Municipal Securities Rulemaking Board ("MSRB") through its Electronic Municipal Market Access system ("EMMA") pursuant to the requirements of paragraph (b)(5) of Rule 15c2–12 (the "Rule") adopted by the Securities and Exchange Commission under the Securities Exchange Act of 1934, as amended. No person, other than the State, has undertaken, or is otherwise expected, to provide continuing disclosure with respect to the 2020B Bonds. The information to be provided on an annual basis, the events which will be noticed on an occurrence basis and other terms of the Disclosure Undertaking, including termination, amendment and remedies, are set forth in the proposed form of Disclosure Undertaking in "APPENDIX E—FORM OF CONTINUING DISCLOSURE UNDERTAKING."

Based on prior disclosure undertakings, the State submits its comprehensive annual financial report (the "CAFR") (Fiscal Year Ending June 30) and other operating and financial information on or before January 15 (on or

before 199 days from the end of the Fiscal Year) of each year. The State will submit the Fiscal Year 2020 CAFR and other operating and financial information for the 2020B Bonds on or before January 15, 2021, and annually thereafter on or before each January 15.

A failure by the State to comply with the Disclosure Undertaking will not constitute a default under the Resolutions, and Beneficial Owners of the 2020B Bonds are limited to the remedies provided in the Disclosure Undertaking. See "APPENDIX E—FORM OF CONTINUING DISCLOSURE UNDERTAKING–Section 6. Consequences of Failure of the State to Provide Information." A failure by the State to comply with the Disclosure Undertaking must be reported in accordance with the Rule and must be considered by any broker, dealer or municipal securities dealer before recommending the purchase or sale of the 2020B Bonds in the secondary market. Any such failure may adversely affect the marketability of the 2020B Bonds.

State's Failure To Provide Certain Operating Information

- (i) The State failed to provide certain operating information related to the State's Recapitalization Revenue Bonds, Series 2010A, Series 2010B and Series 2010C (CUSIP[®]917535, dated February 23, 2010), for the filing periods January 15, 2016 and January 15, 2017. The State submitted the required information to EMMA on June 12, 2017.
- (ii) The State failed to provide certain tables of appropriation revenues and capital expenditures authorizations related to the State's general obligation bond (CUSIP®917542; Series 2013, dated July 30, 2013) for the filing periods January 15, 2016 and January 15, 2017. Also, the State failed to provide certain tables of appropriation revenues, budget revenue collections and capital expenditures authorizations related to the State's general obligation bond (CUSIP®917542; Series 2015, dated April 29, 2015) and the Authority's lease revenue bonds (CUSIP®917547; Series 2016, dated April 5, 2016; and Series 2015, dated April 29, 2015) for the filing periods January 15, 2016 and January 15, 2017. The State and the Authority submitted the required information to EMMA on June 9, 2017.
- (iii) The State failed to provide a table on capital expenditures authorizations related to: (a) all bond issues of outstanding general obligation bonds of the State and (b) all bond issues of outstanding lease revenue bonds of the Authority (excluding those bond issues identified in paragraph (ii) above) for the filing periods January 15, 2016 and January 15, 2017. The State and the Authority submitted the required information to EMMA on June 9, 2017. Additionally, the State missed filing the capital expenditures table for the Authority's CUSIP®917547 XA4 and filed and corrected the information on February 27, 2018.
- (iv) The State also failed to provide tables on investment returns and funding ratios for the Utah State Retirement Systems related to the State's general obligation bonds (CUSIP®917542; Series 2015, dated April 29, 2015; Series 2013, dated July 30, 2013; and Series 2011A, dated July 6, 2011) and the Authority's lease revenue bonds (CUSIP®917547; Series 2015, dated April 29, 2015; Series 2012A and Series 2012B, dated November 20, 2012; and Series 2011, dated October 25, 2011) for the filing periods January 15, 2016 through January 15, 2018. The State and the Authority submitted the required information to EMMA on January 4, 2019.

The State continues to review its continuing disclosure practices and has implemented guidelines for future continuing disclosure filings.

THE 2020B BONDS

General

The 2020B Bonds will be dated the date of delivery¹ thereof (the "Dated Date") and will mature on July 1 of the years and in the amounts as set forth on the inside cover page of this OFFICIAL STATEMENT.

The 2020B Bonds shall bear interest from the Dated Date at the rates set forth on the inside cover page of this OFFICIAL STATEMENT. Interest on the 2020B Bonds is payable semiannually on each January 1 and July 1,

¹ The anticipated date of delivery is Wednesday, May 27, 2020.

commencing January 1, 2021. Interest on the 2020B Bonds shall be computed based on a 360-day year of 12, 30-day months. The Utah State Treasurer, Salt Lake City, Utah, is the initial Paying Agent and Registrar with respect to the 2020B Bonds.

The 2020B Bonds will be issued as fully-registered bonds, initially in book-entry form, in the denomination of \$5,000 or any whole multiple thereof, not exceeding the amount of each maturity.

Registration, Denominations, Manner Of Payment

The 2020B Bonds are issuable only as fully-registered bonds and, when initially issued, will be registered in the name of Cede & Co., as nominee for DTC. DTC will act as the securities depository of the 2020B Bonds. Purchases of 2020B Bonds will be made in book-entry form only, in the principal amount of \$5,000 or any whole multiple thereof, through brokers and dealers who are, or who act through, DTC's Participants (as defined herein). Beneficial Owners (as defined herein) of the 2020B Bonds will not be entitled to receive physical delivery of bond certificates so long as DTC or a successor securities depository acts as the securities depository with respect to the 2020B Bonds. "Direct Participants," "Indirect Participants" and "Beneficial Owners" are defined under "APPEN-DIX F—BOOK–ENTRY SYSTEM."

Principal of and interest on the 2020B Bonds are payable by the Utah State Treasurer, as paying agent (the "Paying Agent") for the 2020B Bonds, to the registered owners of the 2020B Bonds. So long as Cede & Co. is the sole registered owner, it will, in turn, remit such principal and interest to its Direct Participants, for subsequent disbursements to the Beneficial Owners of the 2020B Bonds, as described under "APPENDIX F—BOOK–ENTRY SYSTEM."

So long as DTC or its nominee is the sole registered owner of the 2020B Bonds, none of the State, the Underwriters, nor the Paying Agent will have any responsibility or obligation to any Direct or Indirect Participants of DTC, or the persons for whom they act as nominees, with respect to the payments to or the providing of notice for the Direct Participants, Indirect Participants or the Beneficial Owners of the 2020B Bonds. Under these same circumstances, references herein and in the Bond Resolution to the "Bondowners" or "Registered Owners" of the 2020B Bonds shall mean Cede & Co. and shall not mean the Beneficial Owners of the 2020B Bonds.

Regular Record Date; Transfer Or Exchange Of The 2020B Bonds

Record Date means the Registrar's close of business on the 15th day of the month next preceding each interest payment date or, if such day is not a regular business day of the Registrar, the next preceding day which is a regular business day of the Registrar. No transfer or exchange of any 2020B Bond shall be required to be made with respect to any interest payment date after the Record Date to and including such interest payment date.

Estimated Sources And Uses Of Funds

The proceeds from the sale of the 2020B Bonds are estimated to be applied as set forth below:

Sources of Funds:	
Par amount of the 2020B Bonds	\$447,315,000.00
Original issue premium on the 2020B Bonds	<u>81,417,719.20</u>
Total	\$ <u>528,732,719.20</u>
Uses of Funds:	
Deposit to Project Account (prison)	\$350,015,161.00
Deposit to Project Account (highway)	177,301,286.00
Underwriters' discount on the 2020B Bonds	986,973.50
Costs of issuance (1)	429,298.70
Total	\$ <u>528,732,719.20</u>

(1) Costs of issuance include legal fees, Municipal Advisor fees, rating fees, other miscellaneous expenses and rounding amounts.

(Source: Municipal Advisor.)

Redemption Provisions

Optional Redemption. The 2020B Bonds maturing on or after July 1, 2029, are subject to redemption at the option of the State on January 1, 2029, and on any date thereafter prior to maturity, in whole or in part, from such maturities or parts thereof as may be selected by the State, and at random within each maturity if less than the full amount of any maturity is to be redeemed at a redemption price equal to 100% of the principal amount of the 2020B Bonds to be redeemed, plus accrued interest thereon to the redemption date.

Selection for Redemption. If less than all 2020B Bonds of any maturity are to be redeemed, the 2020B Bonds or portion of 2020B Bonds of such maturity to be redeemed will be selected at random by the Registrar in such manner as the Registrar in its discretion may deem fair and appropriate. The portion of any registered 2020B Bond of a denomination of more than \$5,000 to be redeemed will be in the principal amount of \$5,000 or a whole multiple thereof, and in selecting portions of such 2020B Bonds for redemption, the Registrar will treat each such 2020B Bond as representing that number of 2020B Bonds of \$5,000 denomination that is obtained by dividing the principal amount of such 2020B Bond by \$5,000.

Notice of Redemption. Notice of redemption will be given by the Registrar by first class mail, postage prepaid, not less than 30 nor more than 60 days prior to the redemption date, to the owner, as of the record date, of each 2020B Bond that is subject to redemption, at the address of such owner as it appears on the registration books of the State kept by the Registrar, or at such other address as is furnished to the Registrar in writing by such owner on or prior to the record date. Each notice of redemption will state, among other things, the record date, the redemption date, the place of redemption, the redemption price and, if less than all of the 2020B Bonds are to be redeemed, the distinctive numbers of the 2020B Bonds or portions of 2020B Bonds to be redeemed, and will also state that the interest on the 2020B Bonds in such notice designated for redemption will cease to accrue from and after such redemption date and that on the redemption date there will become due and payable on each of the 2020B Bonds to be redeemed the principal thereof and interest accrued thereon to the redemption date. Any such notice mailed will be conclusively presumed to have been duly given, whether the Bondowner receives such notice. Failure to give such notice or any defect therein with respect to any 2020B Bond will not affect the validity of the proceedings for redemption with respect to any other 2020B Bond.

If at the time of mailing of any notice of optional redemption there is not on deposit with the Paying Agent moneys sufficient to redeem all the 2020B Bonds called for redemption, such notice may state that such redemption is subject to the deposit of the redemption moneys with the Paying Agent not later than the opening of business on the redemption date and that such notice shall be of no effect unless such moneys are so deposited. If such notice of redemption contains such a condition and the moneys are not received, the redemption will not be made, and the Registrar will within a reasonable time thereafter give notice, in the way the notice of redemption was given, that such moneys were not so received.

For so long as a book–entry system is in effect with respect to the 2020B Bonds, the Registrar will mail notices of redemption to DTC or its successor. Any failure of DTC to convey such notice to any Direct Participants (as defined herein) or any failure of the Direct Participants or Indirect Participants (as defined herein) to convey such notice to any Beneficial Owner will not affect the sufficiency of the notice or the validity of the redemption of 2020B Bonds. See "THE 2020B BONDS—Book–Entry System" below.

Book–Entry System

DTC will act as securities depository for the 2020B Bonds. The 2020B Bonds will be issued as fully-registered securities registered in the name of Cede & Co. (DTC's nominee) or such other name as may be requested by an authorized representative of DTC. One fully-registered 2020B Bond certificate will be issued for each maturity of the 2020B Bonds, each in the aggregate principal amount of such maturity, and will be deposited with DTC or a "fast agent" of DTC. See "APPENDIX F—BOOK–ENTRY SYSTEM" for a more detailed discussion of the book– entry system and DTC.

In the event the book–entry system is discontinued, interest on the 2020B Bonds will be payable by check or draft of the Paying Agent, mailed to the registered owners thereof at the addresses shown on the registration books of the State kept for that purpose by the Registrar. The principal of all 2020B Bonds will be payable by check or draft at the principal office of the Paying Agent.

(Source: Municipal Advisor.)

STATE OF UTAH GOVERNMENTAL ORGANIZATION

The following description of State government emphasizes those functions of government related to finance, administration and planning of State government, and is not intended as a detailed description of all functions of the State's government.

Constitutional Departments

The Constitution of the State (the "State Constitution") divides the powers of government among the legislative department, the executive department and the judicial department.

Legislative Department. The legislative department is composed of the Senate and the House, which constitutes the State of Utah Legislature (the "Legislature"). The Legislature exercises the legislative power of the State and meets in regular session annually beginning in January. Among other things, the Legislature imposes taxes to provide revenues and makes appropriations to carry out all the activities of State government.

Executive Department. The elected constitutional officers of the executive department are the Governor, Lieutenant Governor, State Auditor, State Treasurer (the "State Treasurer"), and Attorney General. The Governor is the chief executive officer of the State (the "Governor").

Judicial Department. The State Constitution vests the judicial power of the State "in a supreme court, in a trial court of general jurisdiction known as the district court, and in such other courts as the Legislature by statute may

establish." Under such authority, the Legislature has established the Court of Appeals, juvenile courts and justice courts.

Certain Other Administrative Bodies

Utah State Tax Commission. The Utah State Tax Commission (the "State Tax Commission") is responsible for, among other things, administering and enforcing the tax laws of the State, formulating State tax policy, assessing certain properties, and collecting various State taxes.

Department of Administrative Services. The Department of Administrative Services coordinates the agencies that provide administrative support to State government and is presently composed of various divisions including, but not limited to, the Division of Finance and the Division of Facilities Construction and Management ("DFCM").

Division of Finance. Among other things, the Division of Finance maintains financial accounts for State agencies, maintains a central accounting system, approves accounting systems of State agencies, approves proposed expenditures for the purchase of supplies and services requested by most State agencies, and issues financial reports of the State.

Division of Facilities Construction and Management. DFCM is responsible for the design and construction of the facilities used by all State agencies and institutions with some exceptions. DFCM is also responsible for the leasing of all facilities for State agencies with some exceptions. DFCM also manages and maintains many State facilities and allocates space among State agencies.

State Building Board. The State Building Board acts as a policy–making board for DFCM. The board is responsible for preparing and maintaining a five–year building plan for the State, establishing design and construction standards for State facilities, and establishing procurement rules relating to State facilities.

Governor's Office of Management and Budget. The Governor's Office of Management and Budget ("GOMB") prepares the Governor's budget recommendations, monitors state agency expenditures, forecasts and monitors revenues, coordinates state planning activities, and oversees the management of state agency business practices.

State Bonding Commission. The Lieutenant Governor (as designee of the Governor), the State Treasurer, and a third person appointed by the Governor constitute the Commission. The Commission, following authorization by the Legislature, is responsible for the issuance of the State's general obligation and revenue bonds.

DEBT STRUCTURE OF THE STATE OF UTAH

Outstanding General Obligation Indebtedness

The State has issued general obligation bonds for general administrative buildings, higher education buildings, highways (transportation), prisons, water and wastewater facilities, flood control facilities, technology, and refunding purposes. As of May 27, 2020, the State expects to have the following principal amounts of general obligation debt outstanding:

(The remainder of this page has been intentionally left blank.)

		Original		Current
		Principal	Final	Principal
Series (1)	Purpose	Amount	Maturity Date	Outstanding
2020B (2)	Prison/highways	\$447,315,000	July 1, 2034	\$ 447,315,000
2020	Highways	448,430,000	July 1, 2034	448,430,000
2019	Highways	127,715,000	July 1, 2033	121,290,000
2018 (3)	Prison/highways	343,155,000	July 1, 2032	302,010,000
2017 (4)	Refunding/highways	118,700,000	July 1, 2028	116,300,000
2017 (5)	Prison/highways	142,070,000	July 1, 2032	124,855,000
2015 (6)	Refunding	220,980,000	July 1, 2024 (10)	117,785,000
2013 (7)	Highways	226,175,000	July 1, 2022 (11)	44,850,000
2011A (8)	Building/highways	609,920,000	July 1, 2021 (12)	87,980,000
2010B (9)	Highways (BABs)	621,980,000	July 1, 2025	592,510,000
2009D (9)	Highways (BABs)	491,760,000	July 1, 2024	417,615,000
Total principal amou	nt of outstanding general of	obligation debt (13).		\$ <u>2,820,940,000</u>

(1) Each series of bonds has been rated "AAA" by Fitch Ratings ("Fitch"); "Aaa" by Moody's Investors Service, Inc. ("Moody's"); and "AAA" by S&P Global Ratings ("S&P"), as of the date of this OFFICIAL STATEMENT. Additionally, all the outstanding general obligation bonds are exempt from the Statutory Appropriations General Obligation Debt Limit (as defined herein) calculation unless otherwise indicated.

(2) \$295,690,000 of these bonds is included in Statutory Appropriations General Obligation Debt Limit calculations.

(3) \$73,275,000 of these bonds is included in Statutory Appropriations General Obligation Debt Limit calculations.

(4) Issued as a direct purchase.

(5) \$86,830,000 of these bonds is included in Statutory Appropriations General Obligation Debt Limit calculations.

(6) Portions of this bond were refunded by a cash defeasance escrow on February 26, 2020.

(7) Portions of this bond issue were refunded by the 2017 GO Bonds (Refunding).

(8) Portions of this bond issue were refunded by the 2015 GO Bonds.

(9) Issued as federally taxable, originally 35% issuer subsidy, "Build America Bonds."

(10) Final maturity date after the refunding effected by a cash defeasance escrow on February 26, 2020.

(11) Final maturity date after the refunding effected by the 2017 GO Bonds (Refunding).

(12) Final maturity date after the refunding effected by the 2015 GO Bonds.

(13) For accounting purposes, the outstanding debt as shown above must be increased by the premium associated with debt issued that is reported in the long-term debt notes of the State's financial statements. For accounting purposes, the total unamortized bond premium is \$244,594,880 (as of May 27, 2020), together with current debt outstanding of \$2,820,940,000, results in total outstanding net direct debt of \$3,065,534,880.

(Source: Municipal Advisor.)

For the Fiscal Year 2019 presentation of the State's general obligation bonds see "APPENDIX A— COMPREHENSIVE ANNUAL FINANCIAL REPORT OF THE STATE OF UTAH FOR FISCAL YEAR 2019— Notes to the Financial Statements, Note 10. Long–Term Liabilities–B. General Obligation Bonds" (CAFR page 106).

Legal Borrowing Authority For General Obligation Bonds

Constitutional Debt Limit. Article XIV, Section 1 of the State Constitution limits the total general obligation indebtedness of the State to an amount equal to 1.5% of the fair market value of the total taxable property of the State, *as shown by the last assessment for State purposes before incurring such debt* (the "Constitutional Debt Limit").

Currently the State does not levy a specific ad valorem property tax rate for State revenue purposes. However, in calculating certain debt limit amounts, the State uses the fair market value of taxable property as determined by the State Tax Commission, which value is finalized and available in the Fall of each year. The last assessment for taxable property values occurred in November 2018 (which timing is in Calendar Year 2018 and in the State's Fiscal Year 2019). The November 2019 taxable property values will not be available until the Fall of 2020 (Calendar Year 2019/Fiscal Year 2020).

The application of the Constitutional Debt Limit and the additional debt incurring capacity of the State under the State Constitution are estimated to be on May 27, 2020 as follows:

Fair market value of ad valorem taxable property (1)	\$402,353,021,949
Fees in lieu of ad valorem taxable property (2)	13,297,245,336
Total fair market value of taxable property (1)	\$ <u>415,650,267,285</u>
Constitutional Debt Limit (1.5%)	\$6,234,754,009
Currently outstanding general obligation debt (net) (3)	(3,065,534,880)
Long-term contract liabilities (4)	<u>(100,062,000</u>)
Estimated additional Constitutional Debt Limit incurring capacity of the State (5)	\$ <u>3,069,157,129</u>

⁽¹⁾ Based on Calendar Year 2018 (Fiscal Year 2019) taxable values. See "FINANCIAL INFORMATION REGARDING THE STATE OF UTAH—Property Tax Matters–Taxable Value Compared with Fair Market Value of All Taxable Property in the State" below.

(Source: Municipal Advisor.)

Constitutional Debt Limit Estimate Using Calendar Year 2019 (Fiscal Year 2020) Estimated Taxable Valuation. As of the date of this OFFICIAL STATEMENT, based on estimated ad valorem property tax reports from the State Tax Commission, the Calendar Year 2019 (Fiscal Year 2020) estimated fair market value of ad valorem taxable property and valuation for fees in lieu property is approximately \$460.4 billion, leaving the State approximately \$3.74 billion of additional Constitutional Debt Limit incurring capacity taking into consideration the outstanding general obligation debt (including the 2020B Bonds and long-term contract liabilities). (Source: Municipal Advisor.)

See "FINANCIAL INFORMATION REGARDING THE STATE OF UTAH—Property Tax Matters–Taxable Value Compared with Fair Market Value of All Taxable Property in the State" below.

Statutory Appropriations General Obligation Debt Limit. Title 63J, Chapter 3, of the Utah Code (the "State Appropriations and Tax Limitation Act"), among other things, limits the maximum general obligation borrowing ability of the State. Under the State Appropriations and Tax Limitation Act, the outstanding general obligation debt of the State at any time may not exceed 45% of the maximum allowable State budget appropriations limit as provided in and subject to the exemption set forth in that act (the "Statutory Appropriations General Obligation Debt Limit"). The State Appropriations and Tax Limitation Act also limits State government appropriations based upon a formula that reflects changes in population and inflation.

On occasion, the Legislature has amended the State Appropriations and Tax Limitation Act to provide an exemption for certain general obligation highway bonds and bond anticipation notes from the limitations imposed by the State Appropriations and Tax Limitation Act. Of the State's current outstanding general obligation bonds of \$2,820,940,000, \$2,365,145,000 (including portions of the 2020B Bonds) is exempt from the State Appropriations and Tax Limitation Act. See "Outstanding General Obligation Indebtedness" above and "Authorized General Obligation Bonds and Future General Obligation Bonds Issuance" below.

Using the budget appropriations for Fiscal Year 2020, the Statutory Appropriations General Obligation Debt Limit under the State Appropriations and Tax Limitation Act and additional general obligation debt incurring capacity of the State under that act are as of May 27, 2020, as follows:

⁽²⁾ Based on Calendar Year 2018 (Fiscal Year 2019) "age based" values. For purposes of calculating debt incurring capacity only, the value of all motor vehicles and state–assessed commercial vehicles (which value is determined by dividing the uniform fee revenue by 1.5%) is added to the fair market value of the taxable property in the State.

⁽³⁾ Includes the 2020B Bonds and unamortized original issue bond premium that was treated as principal for purposes of calculating the applicable Constitutional Debt Limit; the Statutory Appropriations General Obligation Debt Limit (as defined herein).

⁽⁴⁾ In the opinion of the State Auditor, the State has other long-term contract liabilities consisting of unused vacation leave for employees of \$100,062,000, which financial obligations may be considered general obligation debt of the State. Although no final legal determination has been made, for purposes of this OFFICIAL STATEMENT, this amount will be applied against the State's Constitutional Debt Limit.

⁽⁵⁾ The State is further limited on its issuance of general obligation indebtedness by statute, see in this section "Statutory Appropriations General Obligation Debt Limit" below.

Statutory Appropriations General Obligation Debt Limit (1)	\$1,847,223,450
Statutorily applicable general obligation debt (net) (2)	
Long-term contract liabilities (3)	(100,062,000)
Remaining Statutory Appropriations General Obligation Debt Limit capacity	\$ <u>1,218,853,612</u>

^{(1) 45%} of the Fiscal Year 2020 appropriation limit of \$4,104,941,000 (as of the date of this OFFICIAL STATEMENT). (Source: GOMB.)

(3) In the opinion of the State Auditor, the State has other long-term contract liabilities consisting of unused vacation leave for employees of approximately \$100,062,000, which financial obligations may be considered general obligation debt of the State. Although no final legal determination has been made, for purposes of this OFFICIAL STATEMENT, this amount will be applied against the State's Statutory Appropriations General Obligation Debt Limit.

(Source: Municipal Advisor.)

For a 10-year Fiscal Year history of the State's Constitutional and Statutory Appropriations General Obligation Debt Limits see "APPENDIX A—COMPREHENSIVE ANNUAL FINANCIAL REPORT OF THE STATE OF UTAH FOR FISCAL YEAR 2019–Statistical Section–Schedule C–3 Legal Debt Margin" and "–Schedule C–4 Statutory Debt Limit" (CAFR page 226).

Authorized General Obligation Bonds And Future General Obligation Bonds Issuance

The State has the following authorized and unissued general obligation bonds, the proceeds of which bonds, when and if issued, will be used by DFCM and UDOT for various projects.

The authorizations consist of: \$1,165,228 for highway projects from the 2007 General Legislative Session (*the State does not currently intend to issue this remaining 2007 authorization, which may be repealed in future legislative sessions*) and \$124,408 for Salt Lake County, Utah highway projects from the 2018 General Legislative Session (*the State does not currently intend to issue this remaining 2018 authorization, which may be repealed in future legislative session*).

As of the date of this OFFICIAL STATEMENT, the State may authorize and issue additional general obligation bonds in the future depending on the needs of the State.

The Legislature may also authorize the issuance of additional general obligation building and highway bonds for other projects in future Fiscal Years, but such amounts and issuance dates are not known as of the date of this OF-FICIAL STATEMENT.

(The remainder of this page has been intentionally left blank.)

⁽²⁾ Includes unamortized original issue bond premium that is treated as principal for purposes of calculating the applicable Constitutional Debt Limit and Statutory Appropriations General Obligation Debt Limit.

Debt Service Schedule Of Outstanding General Obligation Bonds By Fiscal Year (a)

(a) This table reflects the State's debt service schedule for its outstanding general obligation bonds for the Fiscal Year shown. This information is based on payments (cash basis) falling due in that particular Fiscal Year. Does not reflect federal interest rate subsidy payments on Build America Bonds. The State anticipates that as a result of the federal sequestration, the subsidy paid by the federal government on these bonds will be reduced by \$816,883 for the federal fiscal year ending September 30, 2020.

(1) Mandatory sinking fund principal payments from a \$118,700,000 2.205% term bond due July 1, 2028.

(2) Principal and interest has been refunded by a cash defeance escrow on February 26, 2020.

(3) Principal and interest has been refunded by the 2017 (Refunding) GO Bonds.

(a) See prior page footnote (a).

(b) These bonds have been included in this table because final principal and interest payments occurred in Fiscal Year(s) 2019 and/or 2020.

(4) Principal and interest has been refunded by the 2015 GO Bonds.

(5) Mandatory sinking fund principal payments from a \$388,255,000, 3.539% term bond due July 1, 2025.

(6) Issued as federally taxable "Build America Bonds." Does not reflect originally 35% federal interest subsidy payments.

(7) Mandatory sinking fund principal payments from a \$417,615,000, 4.554% term bond due July 1, 2024.

(8) Principal and interest has been refunded by the 2015 GO Bonds.

(9) Principal and interest has been refunded by the 2010C GO Bonds.

(Sources: Division of Finance and the State's Fiscal Years 2015 through 2019 CAFRs.)

For a 10-year history of debt ratios of outstanding debt by Fiscal Year see "APPENDIX A— COMPREHENSIVE ANNUAL FINANCIAL REPORT OF THE STATE OF UTAH FOR FISCAL YEAR 2019– Statistical Section–Schedule C–1 Ratios of Outstanding Debt by Type" (CAFR page 222).

Revenue Bonds And Notes

State of Utah Recapitalization Revenue Bonds. The State Bonding Commission is authorized, with prior approval of the Legislature, to issue "recapitalization" revenue bonds of the State to provide funds for certain of the State's revolving loan funds. Such State revenue bonds are secured principally by the payments on certain bonds, notes and other obligations owned by the State through such funds and by debt service reserve funds, and constitute "State Moral Obligation Bonds," but are not applied against the general obligation borrowing capacity of the State. The State has issued the following recapitalization revenue bonds:

		Original		Current
		Principal	Final	Principal
Series	Purpose	Amount	Maturity Date	Outstanding
2010C (1)	Water resources (BABs)	\$31,225,000	July 1, 2022	\$ <u>19,565,000</u>

(1) Rated "Aa2" by Moody's and "AA" by S&P, as of the date of this OFFICIAL STATEMENT. No bond rating was requested from Fitch. Issued as federally taxable, originally 35% issuer subsidy, "Build America Bonds."

(Source: Municipal Advisor.)

Average annual principal and interest payments on the State's recapitalization revenue bonds are approximately \$6.99 million for each Fiscal Year extending through Fiscal Year 2023 (Source: Municipal Advisor). See also "AP-PENDIX A—COMPREHENSIVE ANNUAL FINANCIAL REPORT OF THE STATE OF UTAH FOR FISCAL YEAR 2019–Notes to the Financial Statements–Note 10. Long–term Liabilities. C. Revenue Bonds–Business–type Activities–Water Loan Programs" (CAFR page 108). See also "State Moral Obligation Bonds" below.

Other State-Related Entities' Revenue Debt. Various State-related entities have outstanding bonds and notes payable solely from certain specified revenues. None of these bonds or note issues are general obligations of the State and, therefore, such bonds or notes are not applied against the general obligation borrowing capacity of the State.

Most State-related entities' revenue bonds and notes are issued by the State Board of Regents (for student loans and various capital projects) and the State of Utah, State Building Ownership Authority (the "Authority").

Additional information. For a detailed report and description of the various revenue bonds, notes, conduit debt and contracts issued or entered into by State-related entities see "APPENDIX A—COMPREHENSIVE ANNUAL FINANCIAL REPORT OF THE STATE OF UTAH FOR FISCAL YEAR 2019—Notes to the Financial Statements, Note 10. Long-term Liabilities–C. Revenue Bonds" (CAFR page 107); and for the Authority see "APPEN-DIX B—ADDITIONAL DEBT AND FINANCIAL INFORMATION REGARDING THE STATE BUILDING OWNERSHIP AUTHORITY."

Lease Obligations

The State leases office buildings and office and computer equipment. Although the lease terms vary, most leases are subject to annual appropriations from the Legislature to continue the lease obligations. If a legislative appropriation is reasonably assured, leases are considered noncancelable for financial reporting purposes.

Operating Leases. Operating leases contain various renewal obligations as well as some purchase options. However, due to the nature of the leases, the related assets and liabilities are not recorded. Any escalation clauses, sublease rentals and contingent rents are considered immaterial to the future minimum lease payments and current rental expenditures. Operating lease payments are recorded as expenditures or expenses when paid or incurred.

Operating lease expenditures for Fiscal Year 2019 were \$45.844 million for primary government and \$43.21 million for discrete component units. The total future minimum lease payments for the State's non-cancellable operating leases for primary government totaled \$89.925 million (with commitments payments scheduled through Fiscal Year 2059). The total future minimum lease payments for the State's operating leases for discrete component units totaled \$312.105 million (with commitments payments scheduled through Fiscal Year 2059).

Capital Leases. Leases that in substance are purchases are reported as capital lease obligations in the government–wide financial statements and proprietary fund statements in the State's CAFR.

Primary government's total capital lease payments including principal and interest for Fiscal Year 2019 were approximately \$3.313 million. The present value of the minimum lease payments of the State's capital leases (including direct borrowings) for primary government totals approximately \$31.006 million (with annual payments scheduled through Fiscal Year 2044). The present value of the future minimum lease payments of capital leases for the State's discrete component units (which mostly are capital leases with certain colleges and universities and the Utah Transit Authority) as of Fiscal Year 2019 totaled approximately \$263.721 million (with annual payments scheduled through Fiscal Year 2039).

For detailed information on operating and capital leases see "APPENDIX A—COMPREHENSIVE ANNUAL FINANCIAL REPORT OF THE STATE OF UTAH FOR FISCAL YEAR 2019—Notes to the Financial Statements, Note 9. Lease Commitments" (CAFR page 103).

State Guaranty Of General Obligation School Bonds

Under the School District Bond Guaranty, Title 53G, Chapter 4, Part 8 of the Utah Code (the "Guaranty Act") which took effect on January 1, 1997, the full faith and credit, and unlimited taxing power of the State is pledged to guaranty full and timely payment of the principal of, and interest on general obligation bonds ("Guaranteed Bonds") issued by eligible boards of education of State school districts ("Eligible School Boards"). The Guaranty Act is intended to reduce borrowing costs for Eligible School Boards by providing credit enhancement for Guaranteed Bonds.

In the event an Eligible School Board was unable to make the scheduled debt service payments on its Guaranteed Bonds, the State would be required to make such payments in a timely manner. For this purpose, the State may use any of its available moneys, seek a short-term loan from the State School Fund or issue its short-term general obligation notes. The Eligible School Board remains liable to the State for any such payments on Guaranteed Bonds. The State may seek reimbursement for such payments (plus interest and penalties) by intercepting State financial aid intended for the Eligible School Board. The Guaranty Act also contains provisions to compel the Eligible School Board to levy a tax sufficient to reimburse the State for such payments.

The State Superintendent of Schools (the "State Superintendent") is responsible for monitoring the financial condition of each local school board in the State and reporting, at least annually, his or her conclusions to the Governor, the Legislature and the State Treasurer. The State Superintendent must report immediately to the Governor and the State Treasurer any circumstances suggesting that a local school board will be unable to pay when due its debt service obligations (a "Report") and recommend a course of remedial action. As of the date of this OFFICIAL STATEMENT (and since the inception in January 1997 of the Guaranteed Bonds program), the State has not been requested to make payments on any Guaranteed Bonds and has not received a Report from the State Super-intendent.

As of May 27, 2020, the State has approximately \$3,774,541,000 principal amount outstanding of Guaranteed Bonds. Currently, the Guaranteed Bond program's annual principal and interest payments are scheduled through Fiscal Year 2040 (for Fiscal Year 2020 the program's current annual principal and interest payments total approximately \$471.976 million (including any federal interest subsidy payments on Build America Bonds)) (Source: Municipal Advisor). The State cannot predict the amount of bonds that may be guaranteed in this year or in future years; no limitation is currently imposed by the Guaranty Act.

For additional information see "APPENDIX A—COMPREHENSIVE ANNUAL FINANCIAL REPORT OF THE STATE OF UTAH FOR FISCAL YEAR 2019—Notes to the Financial Statements, Note 16. Litigation, Contingencies, and Commitments–B. Contingencies. The Utah School Bond Guaranty Act..." (CAFR page 118).

State Moral Obligation Bonds

Bonds issued by the State Board of Regents, recapitalization revenue bonds issued by the State Bonding Commission and certain qualifying bonds of the Utah Charter School Finance Authority may be secured by a pledge pursuant to which a designated official will certify to the Governor on or before December 1 of each year the amount, if any, necessary to restore a capital reserve or debt service reserve fund to its required amount. In the case of revenue bonds issued to finance a capital project for an institution of higher education, if so pledged, the chairman of the State Board of Regents will certify to the Governor on or before December 1 of each year any projected shortfall in the revenues necessary to make debt service payments in the forthcoming calendar year. Upon receipt of such a certification, the Governor may, but is not required to, then request from the Legislature an appropriation of the amount so certified. In the case of revenue bonds issued to finance a capital project for a qualifying charter school, if so pledged, an officer of the Utah Charter School Finance Authority will certify to the Governor on or before December 1 of each year the amount, if any, required to restore the amount on deposit in the debt service reserve fund of such qualifying charter school to the debt service reserve fund requirement. Upon receipt of such a certification, the Governor shall then request from the Legislature an appropriation of the amount so certified. In all cases, the Legislature is under no legal obligation to make any appropriation requested by the Governor. *Bonds issued with such pledge are referred to herein as "State Moral Obligation Bonds."* The following State Moral Obligation Bonds are outstanding:

State Board of Regents. Student Loans. The State Board of Regents has \$1,108,442,663 principal amount outstanding of student loan revenue bonds (as of March 31, 2020) of which \$494,535,466 are State Moral Obligation Bonds.

Office Building. Additionally, the State Board of Regents has \$1,980,000 principal amount outstanding of other revenue bonds (for office space) (as of May 27, 2020), which are State Moral Obligation Bonds.

For additional information regarding this debt see "APPENDIX A—COMPREHENSIVE ANNUAL FI-NANCIAL REPORT OF THE STATE OF UTAH FOR FISCAL YEAR 2019—Notes to the Financial Statements, Note 10. Long–Term Liabilities–C. Revenue Bonds–Business–type Activities–The Utah State Board of Regents Student Loan Purchase Program..." and "–The Office Facility Bond..." (CAFR page 107).

Colleges and Universities. In addition, the State Board of Regents (through its colleges and universities) has outstanding approximately \$1.451 billion (as of May 27, 2020) of revenue bonds issued to finance capital projects at the State's institutions of higher education of which approximately \$1.43 billion are State Moral Obligation Bonds (Source: Municipal Advisor). For additional information see "APPENDIX A— COMPREHENSIVE ANNUAL FINANCIAL REPORT OF THE STATE OF UTAH FOR FISCAL YEAR 2019—Notes to the Financial Statements, Note 10. Long–Term Liabilities–C. Revenue Bonds–Business–type Activities–Discrete Component Units" (CAFR page 108) and "—Note 21. Subsequent Events" (CAFR page 134).

State of Utah Recapitalization Revenue Bonds. As of May 27, 2020, the State has \$19,565,000 principal amount outstanding of recapitalization water revenue bonds that mature through Fiscal Year 2023 that are State Moral Obligation Bonds. For additional information see "APPENDIX A—COMPREHENSIVE ANNUAL FI-NANCIAL REPORT OF THE STATE OF UTAH FOR FISCAL YEAR 2019—Notes to the Financial Statements, Note 10. Long–Term Liabilities–C. Revenue Bonds–Business–type Activities–The State's Water Loan Program..." (CAFR page 108).

Utah Charter School Finance Authority. Statutory authority for the Utah Charter School Finance Authority to issue bonds which qualify as State Moral Obligation Bonds was adopted in 2012. As of May 27, 2020, the Utah Charter School Finance Authority will have \$364.505 million principal amount outstanding of State Moral Obligation Bonds. (Source: Municipal Advisor.) Currently, the Utah Charter School Finance Authority's annual principal and interest bond payments are scheduled through Fiscal Year 2050 (for Fiscal Year 2020 the program's current annual principal and interest payments total approximately \$23.9 million). The State cannot predict the amount of bonds that may be enhanced in this Fiscal Year or in future Fiscal Years.

The Utah Charter School Finance Authority is limited under State law as to the total principal amount of bonds it can issue as State Moral Obligation Bonds. As of January 1, 2020, the Utah Charter School Finance Authority may not issue State Moral Obligation Bonds if total outstanding principal exceeds approximately \$545.67 million. Based on the anticipated principal amount of outstanding bonds, as of May 27, 2020, the Utah Charter School Finance Authority has available approximately \$181.16 million of bonds that could be issued as State Moral Obligation Bonds. (Source: Municipal Advisor). For additional information see "APPEN-DIX A—COMPREHENSIVE ANNUAL FINANCIAL REPORT OF THE STATE OF UTAH FOR FISCAL YEAR 2019—Notes to the Financial Statements, Note 10. Long–Term Liabilities–D. Conduit Debt Obligations" (CAFR page 110).

As of the date of this OFFICIAL STATEMENT, the Governor has not received any default certification with respect to the State Moral Obligation Bonds from any of these agencies.

State Building Ownership Authority

The Authority is empowered, among other things, to issue its bonds (with the prior approval of the Legislature) to finance the acquisition and construction of facilities to be leased to State agencies and their affiliated entities from rentals paid out of budget appropriations or other available funds for the lessee agencies, which in the aggregate will be sufficient to pay the principal of and interest on the Authority's bonds and to maintain, operate and insure the facilities. The Authority is comprised of three members: the Governor or designee, the State Treasurer and the Chair of the State Building Board. The State Building Ownership Authority Act (Title 63B, Chapter 1, Part 3, Utah Code

(the "Building Ownership Act")) directs DFCM to construct and maintain any facilities acquired or constructed for the Authority.

No Defaulted Authority Bonds or Failures by State to Renew Lease. As of the date of this OFFICIAL STATE-MENT, the Authority has \$273.41 million principal amount outstanding of lease revenue bonds and has never failed to pay, when due, the principal of and interest on its bonded indebtedness and other payment obligations related thereto. As of the date of this OFFICIAL STATEMENT, the State has never failed to renew an annually renewable lease with the Authority.

Additional Information. For financial information regarding outstanding lease revenue bonds, statutory debt limits and lease revenue bonds debt service payments due in each Fiscal Year payable by the Authority, see "APPEN-DIX B—ADDITIONAL DEBT AND FINANICAL INFORMATION REGARDING THE STATE BUILDING OWNERSHIP AUTHORITY."

No Defaulted State Bonds

The State has never failed to pay when due the principal of and interest on its bonded indebtedness and other payment obligations related thereto.

FINANCIAL INFORMATION REGARDING THE STATE OF UTAH

COVID-19 World Pandemic Crisis

Summary. The State's first confirmed case of COVID–19 was on March 6, 2020, hours after the Governor declared a state of emergency. Since then, the virus has spread throughout the State, although the number of confirmed COVID–19 cases and related deaths to date have been comparatively low. Public health data and other information related to the State's response is published at <u>https://coronavirus.utah.gov/</u>.

The economic effects have also spread across the State, with nearly 147,000 (about 9.5% of the employed labor force) traditionally eligible initial unemployment insurance claims filed over the seven weeks beginning March 15, 2020. Nationally, about 19.5% of the employed labor force filed a claim over the same time period. The leisure and hospitality sector has experienced the greatest impact, both in gross claim counts and relative to sector jobs.

State Actions. The State did not impose a mandatory statewide shelter in place order. However, the Governor did issue a "Stay Safe, Stay Home" directive, which directed Utahns to stay home whenever possible and follow specific social distancing instructions to slow the spread of the virus. The state enacted urgent public health measures such as school closure, restaurant dine–in option closure, the "Stay Home, Stay Safe" directive, limitations on gatherings and line formations, travel limitations, and a moratorium on residential evictions for tenants impacted by COVID–19. Some local governments issued more restrictive mandatory orders, such as the State's most populous county, Salt Lake County.

On March 24, 2020 the Governor, in coordination with the Legislature, local governments, public health experts, and business and community leaders, released a comprehensive plan for the State's health and economic recovery entitled "Utah Leads Together." This plan included three phases of response—urgent, stabilization, and recovery. This comprehensive plan, one of the first in the nation, created unique public–private partnerships to address the unprecedented challenges of COVID–19. Testing capability and contact tracing have been dramatically increased because of these partnerships.

On April 17, 2020, the Governor, in coordination with the Legislature, local governments, public health experts, and business and community leaders, released Version 2 of the Utah Leads Together plan, which is available at the web site listed above. Version 2 addresses transitioning to the stabilization phase, including a color–coded health guidance system for businesses to follow as the economy is reactivated, sources of support for businesses and households, and more detail on some of the tools the State has developed to respond to the virus.

The Legislature called itself into special session on April 16, 2020 to address various issues related to COVID– 19. Senate Bill 3004 of this special session, which has been signed by the Governor, establishes the Public Health and Economic Emergency Commission to advise and make recommendations to the Governor on the State's response to COVID-19, particularly with respect to safely reactivating the economy. After a recommendation from the Public Health and Economic Emergency Commission, on May 1, 2020, the Governor moved the State from a High Risk (Red) status to a Moderate Risk (Orange) status and began the stabilization phase of the Utah Leads Together plan. Many businesses are able to continue operating under specified guidelines to protect public health.

Federal and State Recovery Aid. The State is estimated to receive billions of COVID–19 related federal aid dollars: direct state aid (\$1.25 billion to the State and its counties from the Coronavirus Relief Fund which was created pursuant to the recently enacted federal Coronavirus Aid, Relief and Economic Security Act (the "CARES Act"), plus hundreds of millions in grants through State and local government agencies), direct payments to citizens (an estimated \$2.5–2.8 billion), aid to businesses (an estimated \$3.7 billion awarded under the federal government's Paycheck Protection Program's first funding tranche and \$1.7 billion through May 1 in the second funding tranche), and health care providers. At this time, the State cannot provide details on how all of the Coronavirus Relief Fund will be used within the State as these plans are still under development in light of recent U.S. Treasury guidance. However, to date a portion of the funds have been allocated to acquiring personal protective equipment and to assist businesses and household negatively impacted by COVID–19 and related public health measures. It is anticipated that the State will allocate Coronavirus Relief Funds for similar purposes in the future.

In addition to federal actions, the State acted quickly to create the Utah Leads Together Small Business Loan Program, which provides gap loans to small businesses, including non-profits.

The State has experienced and expects significantly increased costs relating to providing an emergency response through various programs and departments. The State does not yet have sufficient data to fully quantify or make predictions about the size or implications of the expenditure impact but is managing the situation through a variety of administrative and budget actions. The State will also continue to actively monitor the effects of COVID–19 on the State economy and adapt its responses as appropriate to facilitate a successful economic recovery. Future special legislative sessions are anticipated as the extent of the pandemic's public health and economic impacts become clearer.

Reserves and Legislative Changes. The State was in a strong fiscal and economic position as COVID–19 started. Between 2009 and 2020, the State and the nation experienced the longest, sustained economic expansion in modern history. The State created over 400,000 jobs, and unemployment dropped to historic lows. The State used this time to build up reserves that can support services during an economic downturn. As of Fiscal Year 2020, the State has a General Fund and Education Fund combined reserve balance of \$791 million. Additional reserve accounts, including Medicaid (\$75 million) and Disaster Relief (\$18 million), bring Fiscal Year 2020 total reserves to over \$884 million. In the enacted Fiscal Year 2021 budget, an additional \$26 million was appropriated to the General Fund and Education Fund reserve accounts. Also see, "Budget Reserve Accounts" below.

The State had also built up a strong Unemployment Compensation Fund balance of about \$1.2 billion in Fiscal Year 2020 prior to COVID-19. Also see, "APPENDIX A—COMPREHENSIVE ANNUAL FINANCIAL REPORT OF THE STATE OF UTAH FOR FISCAL YEAR 2019—Proprietary Funds–Unemployment Compensation Fund" (CAFR page 44 through 47).

The State is in the process of operationalizing its budget stress testing plan, including bonding for infrastructure previously anticipated to be cash-funded and expects to use other tools in its stress testing plan before dipping into its formal reserve funds. At the close of the 2020 General Legislative Session, the State had an estimated \$102 million technical budget surplus and \$765 million in ongoing "working rainy day funds" (pay-as-you-go capital spending) for Fiscal Year 2021.

Due to the federal government changing the federal income tax filing date from April 15, 2020 to July 15, 2020 (the "Federal/State Income Tax Shift") an estimated \$840 million in State income tax revenue is shifted from Fiscal Year 2020 into Fiscal Year 2021. A portion of this Fiscal Year 2020 budget impact is mitigated by the approximately \$290 million of Fiscal Year 2020 revenue that was appropriated during the 2020 Legislative General Session for spending in Fiscal Year 2021.

Although recent public reports show some revenue collections on target, COVID-19 related impacts will materialize in coming months. The State is developing estimates of the fiscal impact to the State budget. However, it will take time for the full impacts to be known. Even though consensus revenue estimates have not yet been updated, it is preliminarily estimated that General Fund and Education Fund revenues, separate from the Federal/State Income Tax Shift, may decline by between \$200 million and \$500 million in Fiscal Year 2020, and that Fiscal Year 2021 General Fund and Education Fund revenues may decline by \$600 million to \$1.3 billion in Fiscal Year 2021 relative to the February 2020 forecast.

Various bills enacted in the Legislature's April 2020 Third and Fourth Special Sessions (outlined below) address budget issues for Fiscal Year 2020 and Fiscal Year 2021. Additional budget changes are anticipated in the future as the State's revenue picture becomes clearer.

Senate Bill 3001 Pandemic Response Appropriations Adjustments. Adjusts Fiscal Year 2020 and Fiscal Year 2021 budgets for an extension of income tax payments due to the Federal/State Income Tax Shift, appropriates \$107.75 million in federal funds from the Coronavirus Relief Fund for Fiscal Year 2020, and makes budget adjustments to certain state agencies.

House Bill 3001 Bond Amendments. Allows the State to issue certain general obligation bonds that would result in the total current outstanding general obligation debt of the state exceeding 50% of the constitutional debt limit (which includes portions of the 2020B Bonds).

House Bill 3002 Appropriations Revisions. Allows additional budget flexibility for certain State agencies or funds, such as allowing funds to carry over between Fiscal Years and extending deadlines for state agencies to submit a budget execution plan.

House Bill 3003 Income Tax Revisions. Extends tax filing deadlines to match deadlines to file a federal income tax return and modifies the payment of the corporate estimated income tax due dates.

House Bill 4001 Pandemic Response Federal Funds Appropriations. The Legislature authorized spending authority of \$2.2 billion in Fiscal Year 2020 and \$2.3 billion in Fiscal Year 2021 from federal relief funding, including the CARES Act, enhanced unemployment benefits, enhanced Medicaid match, and other federal assistance programs.

Also see in this section "Operating And Capital Budget And Related Appropriations" below.

Significant developments regarding COVID–19 continue to occur daily and the extent to which COVID–19 will impact the State in the future is highly uncertain and cannot be predicted. However, the State does not expect the various aspects of COVID–19 to negatively impact the State's ability to pay the principal of and interest on the 2020B Bonds. See "SECURITY FOR THE 2020B BONDS" above.

Budgetary Procedures

Budgetary Procedures Act. The Budgetary Procedures Act, Title 63J, Chapter 1, Utah Code (the "Budget Act") establishes the process whereby the Governor's budget is prepared and prescribes the information to be included.

The Governor is required to submit a budget to the Legislature each year, including a plan of proposed changes to appropriations and estimated revenue for the next fiscal year.

The total appropriations requested for expenditures authorized by the budget must not exceed the estimated revenue from taxes, fees and all other sources for the next fiscal year.

The Budget Act applies to all moneys appropriated by the Legislature. No appropriation or any surplus of any appropriation may be diverted from the department, agency, institution or division for which it was appropriated. Appropriated moneys generally may not be transferred from one item of appropriation to any other item of appropriation without legislative approval.

Unexpended Balances. Except for certain funds detailed in the Budget Act or funds that may be exempted by the annual appropriations act, the Director of the Division of Finance must, at the end of each fiscal year, close out all balances to the proper fund or account.

Budgetary Controls. The Director of the Division of Finance is required to exercise accounting control over all State departments, institutions and agencies other than the Legislature and legislative committees. The Director of the Division of Finance must require the head of each department to submit, not later than May 15, a budget execution plan for the next fiscal year that does not exceed legislative appropriations or other estimated funding.

State Funds And Accounting

The Division of Finance maintains its accounting records in accordance with State law and in accordance with generally accepted accounting principles ("GAAP").

Funds are accounted for and reported in the following categories: governmental funds; proprietary funds; and fiduciary funds. Governmental funds include the General Fund, special revenue funds, capital projects funds, debt service funds, and permanent funds. Proprietary funds include enterprise and internal service funds. Fiduciary funds include pension trust funds, investment trust funds, private purpose trust funds, and agency funds.

Fund reporting in the financial statements for governmental funds focuses on major funds as defined by GAAP and promulgated by the Governmental Accounting Standards Board. The State reports the following major governmental funds: the General Fund, the Education Fund, the Transportation Fund and the Transportation Investment Fund.

The State's nonmajor governmental funds include other special revenue funds, capital projects funds, and debt service funds. The nonmajor special revenue funds account for specific revenue sources that are legally restricted or committed to expenditures for specific purposes. Examples include tobacco settlement moneys, environmental activities, crime victim reparations and rural development programs.

For further information on State funds and accounting, including a description of each of the major governmental funds, see "APPENDIX A—COMPREHENSIVE ANNUAL FINANCIAL REPORT OF THE STATE OF UTAH FOR FISCAL YEAR 2019—Notes to the Financial Statements—Note 1. Summary of Significant Accounting Policies" (CAFR page 59).

State Tax System

The State's tax revenues are derived primarily from sales and use taxes, individual income taxes, motor fuel taxes, corporate franchise (business income) taxes, and numerous smaller sources, including excise taxes on insurance premiums, beer, cigarettes and tobacco, severance taxes, state liquor store profits, and numerous court and business regulation fees. These fees and taxes are regulated by the Legislature.

In addition to the State's tax system, counties, cities and towns have authority to levy and collect sales and use taxes and property taxes. School districts, some special service areas, and some local districts have the authority to levy and collect property taxes.

Recent Tax Reform Efforts. In the Legislature's 2019 Second Special Session held in December 2019, the Legislature passed Senate Bill 2001 ("SB 2001"), which made various changes to the State's income tax for individuals and corporations and to various sales and excise taxes. However, following a citizen signature gathering effort for a voter referendum to nullify SB 2001, during the 2020 General Legislative Session, the Legislature passed House Bill 185, repealing SB 2001. The State cannot predict what, if any, additional new tax reforms may be considered by the Legislature or what impact such reforms may have on revenues received from the State. However, the Legislature has placed on the November 2020 general election ballot a proposal to amend the State Constitution to provide more flexibility in the use of income tax revenues. See "FINANCIAL INFORMATION REGARDING THE STATE OF UTAH—State Revenues and Collections and State Economy–2020 Tax Changes" below.

Individual Income Taxes. The State is one of 43 states that impose an individual income tax. Taxpayers' income is subject to a single rate of 4.95% of federal adjusted gross income. A tax credit based on federal deductions and a Utah personal exemption is available but phases out depending upon the taxpayer's income and filing status.

For additional information regarding certain Calendar Years income tax revenues see "APPENDIX A— COMPREHENSIVE ANNUAL FINANCIAL REPORT OF THE STATE OF UTAH FOR FISCAL YEAR 2019– Statistical Section–Schedule B–1, Revenue Base" (CAFR page 218); "–Schedule B–3, Revenue Payers–Personal Income Tax" (CAFR page 220) and "–Schedule B–4, Personal Income Tax Rates" (CAFR page 221).

Corporate Income Tax. A multi–state company's tax liability is determined by apportionment of federal taxable income by its payroll, property and sales values in the State compared to elsewhere. There are various types of apportionment that corporations are either legally bound to, or may choose, depending on industry type. The State's corporate income tax rate is 4.95%, subject to exceptions and credits with a minimum tax of \$100.

Sales and Use Tax. In general, State sales taxes are imposed based on retail sales or use of tangible personal property, admissions, meals, utility services, general services on tangible personal property, hotel and motel accommodations, and certain other items. Use tax also applies to goods shipped to the State for use, storage, or other consumption, goods purchased outside of the State for use, storage, or other consumption in the State, and services subject to tax but performed outside the State for use, storage, or other consumption in the State. The State sales and use tax rate on unprepared food items is 1.75%, residential fuels rate is 2% and the general sales tax rate is 4.85%.

The State requires its largest sales taxpayers (with annual liabilities of more than \$50,000) to remit monthly. This requirement has served to reduce the volatility of the State's cash flows, with over 90% of sales and use taxes now remitted monthly. All others remit the sales tax collected on a quarterly or annual basis. Monthly sales taxpayers can retain a 1.31% vendor discount on State and local sales taxes collected.

For additional information regarding sales tax information for Calendar Years 2009 and 2018 see "APPEN-DIX A—COMPREHENSIVE ANNUAL FINANCIAL REPORT OF THE STATE OF UTAH FOR FISCAL YEAR 2019–Statistical Section–Schedule B–2, Revenue Payers by Industry–Taxable Sales, Services and Use Tax Purchases" (CAFR page 220) and "APPENDIX C—DEMOGRAPHIC AND ECONOMIC INFORMATION RE-GARDING THE STATE OF UTAH–Taxable Sales" (page C–9).

Additional Taxes and Fees. The State collects several additional significant taxes and fees, including, but not limited to: an unemployment compensation tax (which is used to finance benefits paid to unemployed workers); a workers' compensation insurance premium tax (which is used to pay workers' compensation benefits); and various highway users' taxes (which are used for highway and road related purposes). Other taxes and fees collected by the State include excise taxes on insurance premiums, severance taxes, a cigarette and tobacco tax, an environmental surcharge, a waste tire fee, and fish and game license fees. Other State revenue sources include profits from state liquor stores, license fees and other fees collected by colleges, universities and State departments.

For additional information regarding tax collection results and forecasts for Fiscal Years 2019, 2020 and 2021 tax collections, see "State Revenues And Collections And State Economy" below.

Property Tax Matters

Ad Valorem Levy. Though authorized to do so under Part 9 of the Property Tax Act (defined below), the State does not presently levy ad valorem property taxes and has not done so since 1974. However, if the State does not have sufficient moneys available to pay principal of and interest on its general obligation bonds from sources other than ad valorem taxes, the ad valorem property taxes would no longer be abated, and the State Tax Commission would be required to collect ad valorem property taxes on all taxable property in the State to cover the shortfall.

To the extent not abated, the ad valorem property tax must be assessed within the time frame required by law. The State Tax Commission must assess all centrally–assessed property ("centrally–assessed property") by May 1 of each year. County assessors must assess all other taxable property ("locally–assessed property") before May 22 of each year. The State Tax Commission apportions the value of centrally–assessed property to various taxing entities within each county and reports such values to county auditors before June 8.

On or before July 22 of each year, the county auditors must mail to all owners of real estate shown on their assessment rolls notice of, among other things, the value of the property, itemized tax information for all taxing entities and the date their respective county boards of equalization will meet to hear complaints. Taxpayers owning property assessed by a county assessor may file an application within statutorily defined time limits based on the nature of the contest with the appropriate county board of equalization for contesting the assessed valuation of their property. The county board of equalization must render a decision on each appeal in the time frame prescribed by the Property Tax Act. Under certain circumstances, the county board of equalization must hold a hearing regarding the application, at which the taxpayer has the burden of proving that the property sustained a decrease in fair market value. Decisions of the county board of equalization may be appealed to the State Tax Commission, which must decide all appeals relating to real property by March 1 of the following year. Owners of centrally-assessed property or any county with a showing of reasonable cause, may, on or before the later of June 1 or a day within 30 days of the date the notice of assessment is mailed by the State Tax Commission, apply to the State Tax Commission for a hearing to appeal the assessment of centrally-assessed property. The State Tax Commission must render a written decision within 120 days after the hearing is completed and all post-hearing briefs are submitted. The county auditor makes a record of all changes, corrections and orders, and delivers before November 1 the corrected assessment rolls to the county treasurers. By November 1, each county treasurer furnishes each taxpayer a notice containing the kind

and value of the property assessed to the taxpayer, the street address of the property, where applicable, the amount of the tax levied on the property, and the date and year the property is subject to a detailed review.

Taxes are due November 30 (or if November 30 is a Saturday, Sunday or holiday, the next business day). Each county treasurer is responsible for collecting all taxes levied on real property within that county. There are no prior claims to such taxes. As taxes are collected, each county treasurer must pay to the State, if applicable, and each taxing entity within the county its proportionate share of the taxes, on or before the tenth day of each month. Delinquent taxes are subject to a penalty of 2.5% of the amount of the taxes or \$10, whichever is greater. Unless the delinquent taxes and penalty are paid before January 31 of the following year, the amount of delinquent taxes and penalty bears interest at the federal funds rate target established by the Federal Open Market Committee plus 6%, from the January 1 following the delinquency date until paid (provided that said interest may not be less than 7% or more than 10%). If delinquent taxes have not been paid by March 15 following the lapse of four years from the delinquency date, the affected county advertises and sells the property at a final tax sale held in May or June of the fifth year after assessment.

Property Tax Act. The State Constitution and Title 59, Chapter 2, Utah Code (the "Property Tax Act") provide that all taxable property is assessed and taxed at a uniform and equal rate based on 100% of its "fair market value" as of January 1 of each year, unless otherwise authorized by the State Constitution and provided by law. Section 3(2)(a)(iv) of Article XIII of the State Constitution provides that the Legislature may exempt from property tax up to 45% of the "fair market value" of residential property by 45%. No more than one acre of land per residential unit may qualify for the residential exemption. The residential exemption is limited to one acre of land per residential unit or to one primary residence per household, except that an owner of multiple residential properties may exempt his or her primary residence and each residential property that is the primary residence of a tenant.

The following table reflects the effect of the current 45% reduction from fair market value for assessment of ad valorem property tax. The table on the following page also shows the Centrally–Assessed Property compared with the Locally–Assessed Property.

		% Change		% Change
Tax Year/	Taxable	Over	Fair Market	Over
Fiscal Year	Value (2)	Prior Year	<u>Value (3)</u>	Prior Year
2019/2020 (1)	\$315,456,000,000	10.8%	\$445,636,000,000	10.8%
2018/2019	284,817,132,983	9.8	402,353,021,949	10.3
2017/2018	259,071,436,352	8.2	364,682,337,447	8.7
2016/2017	239,422,200,513	7.1	335,540,187,517	7.7
2015/2016	223,557,499,607	6.2	311,651,315,372	6.6
2014/2015	210,415,507,970	7.3	292,490,917,013	7.8
2013/2014	196,058,968,791	3.0	271,337,328,737	3.6

Taxable Value Compared with Fair Market Value of All Taxable Property in the State

(1) Preliminary; subject to change. (Source: Municipal Advisor.)

(2) Includes all state-wide redevelopment agencies' valuations. Does not include Uniform Fees (as defined below) or semiconductor manufacturing equipment.

(3) Estimated fair market values were calculated by dividing the taxable value of primary residential property by 55%, which eliminates the 45% exemption on primary residential property granted under the Property Tax Act. See "Property Tax Matters" above.

(Source: Property Tax Division, State Tax Commission.)

Uniform Fees. An annual statewide uniform fee is levied on certain tangible personal property in lieu of the ad valorem tax. Subject to certain exemptions, the current uniform fee on motor vehicles that weigh 12,001 pounds or more and certain watercraft is equal up to 1.5% of the market value. Motor vehicles weighing 12,000 pounds or less are subject to an "age based" fee that is due each time the vehicle is registered. Such fees range from \$5 to \$150. Various uniform fees are also levied against other types of tangible personal property required to be registered with the State, including recreational vehicles, in lieu of the ad valorem property tax. The revenues collected from the various uniform fees are distributed by the county of each taxing entity in which the property is located, in the same proportion in which revenue collected from ad valorem real property tax is distributed.

Budget Reserve Accounts

The State maintains various budget reserve accounts, including a General Fund Budget Reserve Account, an Education Fund Budget Reserve Account, a Medicaid Growth Reduction and Budget Stabilization Account, a Growth in Student Population Account, and natural disaster reserve accounts.

State law requires that 25% of any year–end General Fund revenue surplus be deposited into the General Fund Budget Reserve Account, not to exceed 9% of the General Fund appropriations for the Fiscal Year. Similarly, 25% of any year–end Education Fund revenue surplus is deposited into the Education Fund Budget Reserve Account, not to exceed 11% of the Education Fund appropriations for the Fiscal Year. Unless such reserve funds are drawn upon for their respective purposes, annual mandatory year–end surplus transfers are limited to the lesser of 25% of the applicable surplus or the amount necessary to reach the statutory limit of 9% for the General Fund and 11% for the Education Fund. Subject to the automatic transfer limits specified above, an additional 25% of a year–end revenue surplus may be allocated if funds have been drawn upon and not repaid.

The State has also established a Medicaid Growth Reduction and Budget Stabilization Account. If at the end of a fiscal year, there is a General Fund revenue surplus and Medicaid growth remains below specified levels, State law requires that a portion of any General Fund revenue surplus be transferred from the General Fund to the Medicaid Growth Reduction and Budget Stabilization Account. This transfer is before, and consequently reduces, the annual mandatory year–end surplus transfer to the General Fund Budget Reserve Account. See "FINANCIAL INFOR-MATION REGARDING THE STATE OF UTAH—Federal Funding–Medicaid Funding in the State" below.

The State has also created a Growth in Student Population Account to set aside funds to manage public education enrollment growth. In addition, the State maintains budget reserves for natural disasters through the Wildland Fire Suppression and Disaster Recovery accounts.

As of Fiscal Year 2020, including appropriations made during the 2020 General Legislative Session, the balance in the General Fund Budget Reserve Account was \$250 million; the balance in the Education Fund Budget Reserve Account was \$541 million; the balance in the Growth in Student Population Account was \$0.6 million; the balance in the Medicaid Growth Reduction and Budget Stabilization Account was \$75 million, and the combined balance in the Wildland Fire Suppression and Disaster Recovery accounts was \$18 million.

In addition to these budget reserves, the State ended Fiscal Year 2019 with \$85.6 million in available combined EF/GF resources after transfers. After the Legislature's 2020 Fourth Special Session, the State has a Fiscal Year 2021 structural surplus of \$102 million and \$765 million of ongoing revenues from sources other than fuel taxes allocated for pay-as-you-go capital expenditures.

State Stress Testing/Budget Model

During Calendar Year 2019, the GOMB and the Office of Legislative Fiscal Analyst of the State conducted a comprehensive budget stress testing exercise to formally assess the State's ability to respond to an economic down-turn. As part of this process, the State Tax Commission helped in analyzing the various sources of State revenues.

The stress testing exercise used two hypothetical economic scenarios, similar to the approach employed by the Federal Reserve banking system to assess the capital strength of banks. The stress test applied selected downturn scenarios to the State's budget by examining hypothetical recessionary impacts on (a) revenues, (b) expenditures, and (c) both formal and informal reserves.

The results show the State has a number of budget tools at its disposal, including both formal rainy-day funds at healthy levels and other informal reserves, including sizeable budget allocations for capital expenses that are not bonded against and unused bonding capacity.

Based on the stress testing models, GOMB believes the State has a number of strong reserves and contingencies allowing the State to navigate an economic downturn. *GOMB anticipates the State will be using various reserves and budget tools as it responds to the impacts of COVID–19, including shifting from pay–as–you–go to bonding for capital expenses.*

State Revenues And Collections And State Economy

The State receives revenues from three principal sources: taxes, including sales and use, individual income, corporate, motor and special fuel, and other miscellaneous taxes; federal grants-in-aid; and miscellaneous charges and receipts, including licenses, permits and fees, profits from State liquor stores, the State's share of federal mineral royalties, and other miscellaneous revenues.

Fiscal Year 2019 Revenue Collections. Fiscal Year 2019 ended with combined General Fund and Education Fund (collectively, the "GF/EF") revenue collections coming in over \$7.54 billion, creating a revenue surplus of \$97 million. Additional adjustments of about \$22 million, including budget savings and other adjustments, brought the total year–end GF/EF surplus to \$119 million before budget reserve account deposits. After a \$33.5 million transfer to the Education Budget Reserve Account, about \$85.6 million in revenue, all from the Education Fund, remained available from Fiscal Year 2019 for appropriation in the 2020 General Legislative Session.

Of the combined GF/EF year-end surplus amount, nearly \$141 million came from the Education Fund, including a revenue surplus of over \$134 million and budget savings and other adjustments of about \$7 million. After the \$33.5 million transfer to the Education Budget Reserve Account, the net Education Fund surplus is over \$107 million.

Unlike the surplus in the Education Fund, the General Fund closed Fiscal Year 2019 with a revenue shortfall of about \$38 million, which was partially offset by over \$16 million in budget savings and other adjustments, for a net shortfall of nearly \$22 million. The revenue shortfall did not require immediate budget action in Fiscal Year 2019 because about \$112 million in General Fund revenues projected to be collected in Fiscal Year 2019 were appropriated to be spent in Fiscal Year 2020.

2019 Remote Sales and Use Tax Revisions. The United States Supreme Court's South Dakota v. Wayfair decision held that states can require out-of-state vendors without physical nexus to collect and remit sales taxes if certain conditions are met. To ensure transactions on marketplace facilitator websites, such as Amazon.com and Ebay.com, are taxed similar to other transactions by out-of-state vendors, in 2019 the Legislature passed legislation which went into effect on October 1, 2019, requiring marketplace facilitators to collect and remit sales tax from third-party sellers. The State is currently collecting revenue under this legislation.

2020 Tax Changes. Other than House Bill 185 (which as previously mentioned repealed a tax reform bill), other notable legislation enacted during the 2020 General Legislative Session that impacts revenue includes: House Bill 200, which adjusts tax provisions related to firms related by common ownership claiming an income tax deduction for one firm without the corresponding tax paid being by the other firm (estimated to increase revenue by \$1 million annually); Senate Bill 37, which levies a tax on electronic cigarette substances, prefilled electronic cigarettes, alternative nicotine products, and similar products (estimated to increase revenue by \$24 million); Senate Bill 239, which extends the period that a refinery can obtain a sales tax exemption as long as it is making satisfactory progress toward producing Tier 3 fuel (estimated reduction of \$333,000); Senate Bill 95, which alters the non-profit contribution income tax credit, the recycling market development zone tax credit, and the enterprise zone tax credit (estimated to increase revenue by \$5.2 million); and Senate Bill 225, which increases revenues to the Universal Public Telecommunications Service Support Fund by approximately \$771,000 by allowing prepaid telecommunication charges to include the universal service surcharge.

Additionally, the Legislature passed Senate Joint Resolution 9, which proposes an amendment to the State Constitution that would allow income tax revenue, which is currently reserved only for public and higher education, to also be used "to support children and to support individuals with a disability." This proposed amendment will be on the November 2020 general election ballot and, if adopted by the majority of voters, would authorize the Legislature to expend income tax revenue on numerous programs that are currently funded with the sales tax–supported General Fund, thus increasing budget flexibility between the State's two main funds, the Education Fund and the General Fund.

Current State Economy. The State began Fiscal Year 2020 with a strong economy prior to the economic disruptions of COVID–19, having seen years of healthy growth. The U.S. Census Bureau estimates that the State added about 52,000 additional residents between 2018 and 2019, bringing the State's population to an estimated 3,205,958 persons (annual growth rate of about 1.7%). The U.S. Census Bureau also estimates that the State's population grew at a faster rate, at 16%, than any other state since 2010.

Over the past decade, the State has experienced broad-based economic growth in employment and wages. While 2019 data is still preliminary, the Bureau of Labor Statistics estimates the State employment gains led the nation at approximately 3%. Eight years of strong employment growth (together with a tight labor market within the State) further pushed down the unemployment rate to about 2.4% in December 2019—matching State record lows. *However, COVID-19 has negatively impacted employment. Unemployment insurance claims have increased significantly since the middle of March 2020, although claims have moderated from initial peaks. Also see, "COVID-19 World Pandemic Crisis-Reserves and Legislative Changes" above.*

In-migration has sustained the State's strong economic growth. Each year a sizeable number of State residents age into the labor force, yet that is estimated by itself to be insufficient to maintain the pace of labor force expansion. In recent years, in-migration has been sufficient to continue the State's strong employment growth.

Fiscal Year 2020 and 2021 Projections. The Governor and Legislature released the most recent GF/EF consensus revenue forecast in February 2020. At that time, Fiscal Year 2020 GF/EF unrestricted revenue was forecast to total \$7.97 billion (\$432 million above Fiscal Year 2019 actual collections) and to further increase in Fiscal Year 2021 to \$8.4 billion (an increase of \$423 million over the revised Fiscal Year 2020 projections and \$855 million over Fiscal Year 2019 actual collections). These estimates came primarily from strong growth in individual income tax collections (\$4.3 billion in Fiscal Year 2019; projected \$4.6 billion in Fiscal Year 2020; and projected \$4.9 billion in Fiscal Year 2021), as well as growth in the portion of sales and use tax deposited to the General Fund (\$2.12 billion in Fiscal Year 2019; projected \$2.26 billion in Fiscal Year 2020; and projected \$2.37 billion in Fiscal Year 2021). *However, these February 2020 revenue estimates do not incorporate the effects of COVID–19. The State expects COVID–19 will have a negative impact on State revenues but cannot currently predict the magnitude of that impact over time. Even though consensus revenue estimates have not yet been updated, it is preliminarily estimated that GF/EF revenues, separate from the Federal/State Income Tax Shift, may decline by between \$200 million and \$500 million in Fiscal Year 2020, and that Fiscal Year 2021 GF/EF revenues may decline by \$600 million to \$1.3 billion in Fiscal Year 2021 relative to the February 2020 forecast.*

The Federal/State Income Tax Shift moved an estimated \$840 million of income tax revenue from Fiscal Year 2020 into Fiscal Year 2021. As described above, the State already enacted budget changes to offset this shift, including through \$293 million of Fiscal Year 2020 revenue appropriated to be spent in Fiscal Year 2021 and through various one-time budget shifts totaling nearly \$600 million, and will continue to monitor actual revenue collections to determine impacts. As the State better understands revenue collection impacts based on actual data, updated GF/EF revenue estimates will be released in the future.

In addition to economic impacts, these revenue estimates are impacted by the effect of legislative policy changes made in recent years that increase earmarks of certain sales tax revenues, primarily for capital development projects for transportation and water. In addition, in the November 2018 general election the State's voters approved a citizen initiative enacting a sales tax increase (from 4.70% to 4.85%), which is ear-marked for Medicaid expansion costs. This earmarking restrains the growth of unrestricted revenue in the General Fund. Total sales tax earmarks grew from \$189 million in Fiscal Year 2011 to \$690 million in Fiscal Year 2019 and are projected to increase to \$795 million in Fiscal Year 2020 and \$824 million in Fiscal Year 2021, including increased sales taxes earmarked for Medicaid expansion.

(1) Percentage of total Governmental Fund revenue.

(Source: Division of Finance and the State's Fiscal Years 2015 through 2019 CAFRs.)

Most government services of the State are paid through one of its major governmental funds. In Fiscal Year 2019, the State's major governmental funds were the General Fund, Education Fund, Transportation Fund, and Transportation Investment Fund.

Revenue Summary. For Fiscal Year 2019, General Fund revenues from all sources totaled approximately \$6.51 billion. Of this amount, 47.7% came from federal contracts and grants; 33% came from sales taxes; 8.1% came from charges for services and licenses, permits and fees; 6% came from federal mineral leases, investment income and miscellaneous and other revenues; and 5.3% came from other tax sources.

In the Education Fund for Fiscal Year 2019, revenues from all sources totaled approximately \$5.44 billion. Of this amount, 79.7% came from individual income taxes; 7.9% came from federal contracts and grants; 9.8% came from corporate franchise taxes; 2.5% came from charges for services, licenses, permits and fees, miscellaneous other revenues, investment income and other taxes.

In the Transportation Fund for Fiscal Year 2019, revenues from all sources totaled approximately \$1.13 billion. Of this amount, 46% came from motor and special fuel taxes; 34.1% came from federal contracts and grants; 13.6% came from charges for services and licenses, permits, and fees; 6.4% came from other miscellaneous taxes and fees, sales and use taxes and investment income.

In the Transportation Investment Fund for Fiscal Year 2019, revenues from all sources totaled approximately \$744.9 million. Of this amount, 85.2% came from sales tax revenue and 12% came from motor vehicle registration fees and 2.8% came from investment income.

All Governmental Fund Types; General Fund. The following tables, which have been prepared by the State's Division of Finance, are based on audited financial information and have not been otherwise independently audited. These financial summaries are not presented in a form that can be easily recognized or extracted from the State's CAFR.

All Governmental Fund Types is defined as and includes the General Fund; Special Revenue—Education Fund and Transportation Fund; Capital Projects—Transportation Investment Fund; Nonmajor Governmental Funds; and excludes the Permanent—Trust Lands Fund.

Net change in fund balance	\$ <u>614,641</u>	\$ <u>894,573</u>	\$ <u>(8,143</u>)	\$ <u>34,948</u>	\$ <u>83,337</u>

(1) Includes all governmental fund types except Trust Lands.

(2) Includes sale of capital assets, bond proceeds, net of any refunding issues, plus financing provided from capital leasing and net fund transfers. In addition, beginning balances are not reflected in this table.

(3) Adjustments to beginning fund balances are the result of the following: (i) in Fiscal Year 2017 prior year tax accrual were adjusted resulting in an increased in the Education Fund balance of \$14.44 million and the Wildland Fire Suppression Fund was reclassified from a fiduciary fund to a nonmajor governmental fund, resulting in a \$13.666 million increase in fund balance; and (ii) in Fiscal Year 2016 the Annual Leave Trust Fund was created and required \$1.026 million in activity previously reporting in governmental funds to be accounted for in this fund and the Water Commissioner Fund was reclassified resulting in an increase of \$914,000 to fund balance.

(4) The Federal Health Insurance Pool Fund discontinued operations since enrollees in this temporary insurance program transitioned into the qualified health plans offered through the Utah Federal Facilitated Marketplace.

Operating And Capital Budget And Related Appropriations

Fiscal Year 2020

Statewide Summary. The currently enacted Fiscal Year 2020 GF/EF budget is based upon February 2020 revenue estimates that estimated nearly \$8 billion in discretionary GF/EF revenue in Fiscal Year 2020.

After adjustments made during the Legislature's 2020 Third and Fourth Special Sessions, \$597 million in spending was shifted from Fiscal Year 2020 to Fiscal Year 2021 because of the Federal/State Income Tax Shift. With this shift, the Legislature balanced the State's Fiscal Year 2020 GF/EF budget at approximately \$7.4 billion. After also appropriating an additional \$1.07 billion in federal funds from the CARES Act, the total operating and capital budget from all sources is \$20.4 billion.

Additional Fiscal Year 2020 and Fiscal Year 2021 budget modifications are possible in future legislative special sessions as the State continues to assess the ramifications of COVID–19.

Fiscal Year 2021

Statewide Summary. The enacted Fiscal Year 2021 GF/EF budget is based upon February 2020 revenue estimates that estimated nearly \$8.4 billion in discretionary GF/EF revenue in Fiscal Year 2021. After adjustments made during the Legislature's 2020 Third and Fourth Special Sessions, \$597 million in spending authority was shifted from Fiscal Year 2020 to Fiscal Year 2021 because of the Federal/State Income Tax Shift. The Legislature then balanced the State's Fiscal Year 2021 GF/EF budget at approximately \$9.2 billion. After also appropriating an additional \$927.6 million in federal funds from the CARES Act, the total operating and capital budget from all sources is \$21.2 billion.

Major categories of General Fund and Education Fund expenditures include public education (about \$4.1 billion), higher education (about \$1.5 billion), Medicaid and other social services (about \$1.3 billion), and corrections, public safety, and justice (about \$774 million). In addition, transportation expenditures from State– collected funds total about \$2 billion (including debt service payments for transportation projects). These expenditures are funded primarily through various transportation funds outside the General Fund.

Appropriations. Altogether, the Legislature made \$26.6 billion in appropriations from all sources for all purposes in Fiscal Year 2021, which includes some double counting as funds move between accounts. Adjusting for account deposits, loan and other enterprise funds, internal service funds, fiduciary funds, and capital projects appropriations, the operating and capital budget for Fiscal Year 2021 is \$21.2 billion. The Legislature appropriated about \$9 billion from the GF/EF in Fiscal Year 2021, an increase of 23.0% over the revised Fiscal Year 2020 budget. This large percentage increase is due to the shift of \$597 million of GF/EF spending authority from Fiscal Year 2020 to Fiscal Year 2021 because of the Federal/State Income Tax Shift. At the end of the Legislature's 2020 Fourth Special Session, \$114 million remains unappropriated.

Structural Balance. After the Legislature's 2020 Fourth Special Session, the State has a Fiscal Year 2021 structural surplus of \$102 million and \$765 million of ongoing revenues from sources other than fuel taxes allocated for pay–as–you–go capital expenditures.

Additional changes will likely be made to the Fiscal Year 2021 budget in future special sessions after the effects of COVID–19 on anticipated tax receipts are better understood.

Medicaid Funding in the State. See "Federal Funding-Medicaid Funding in the State" below.

*Other Summaries.* The following summaries were extracted from the State's audited financial statements for Fiscal Years 2015 through 2019. The summaries have not been audited. The financial information presented in the summaries is presented on a fund statement basis and not on a government–wide statement basis.

Five-year historical summaries have been prepared for the Combined Balance Sheet—All Governmental Fund Types Only; Statement of Revenues, Expenditures and Changes in Fund Balance—General Fund; and Statement of Revenues, Expenditures and Changes in Fund Balance—Major Special Revenue Funds and Major Capital Projects Fund.

The five-year summary of Statement of Revenues, Expenditures and Changes in Fund Balance—Major Special Revenue Funds and Major Capital Projects Fund has been included to show the State's sources of revenue for and expenditures on public education and transportation.

For additional 10-year financial history of various State funds see "APPENDIX A—COMPREHENSIVE AN-NUAL FINANCIAL REPORT OF THE STATE OF UTAH FOR FISCAL YEAR 2019–Statistical Section" at the indicated pages as set forth below.

- (i) Schedule A–1, Net Position by Component (CAFR page 208);

(1) The major special revenue funds include the Education Fund (which includes all the activity of the Uniform School Fund-previously a major special revenue fund-to be reported within the Education Fund) and Transportation Fund. The major capital project fund is the Transportation Investment Fund.

(2) During Fiscal Year 2017 prior year tax accrual were adjusted resulting in an increase in the Education Fund balance of \$14.44 million. During Fiscal Year 2016, a prior period adjustment was made to the Education Fund by \$506,000 and the Transportation Fund by (\$2.952 million).

(Source: Division of Finance. Except as otherwise noted, this summary of financial information has been taken from the State's audited financial statements for the indicated years. This summary itself has not been audited.)

#### **Discussion And Analysis Of Financial Statements For Fiscal Year 2019**

The State prepared a narrative discussion, overview, and analysis of the financial activities of the State for Fiscal Year 2019. For the complete discussion see "APPENDIX A—COMPREHENSIVE ANNUAL FINANCIAL REPORT OF THE STATE OF UTAH FOR FISCAL YEAR 2019–Management's Discussion and Analysis" (CAFR page 18).

#### **Capital Expenditure Authorizations**

The following table presents capital expenditures in the year authorized from all sources, excluding bond proceeds and other available funds. Included in these figures are capital outlay expenses and authorizations for the construction of new buildings and the improvement of existing buildings. These figures also include expenditures for the construction of buildings for higher education, water development or storage projects, flood control projects, the construction or improvement of roads and related transportation projects, State and some local recreation projects and local projects in energy–impacted areas funded with community impact moneys. These figures exclude debt service.

#### Capital Expenditure Authorizations (In Millions)

		Fiscal Year		
2020	2019	2018	2017	2016
\$1,897.9	\$1,821.7	\$1,664.9	\$1,432.3	\$1,216.5

(Source: GOMB.)

#### **Investment Of Funds**

Investment of Operating Funds; The State Money Management Act. The State Money Management Act, Title 51, Chapter 7, Utah Code (the "MM Act") governs the investment of all public funds held by public treasurers in the State.

The State is currently complying with all provisions of the MM Act for all State operating funds.

The Utah Public Treasurers' Investment Fund. A significant portion of State funds are invested in the Utah Public Treasurers Investment Fund ("PTIF"). The PTIF is a local government investment fund established in 1981 and managed by the State Treasurer. The PTIF invests to ensure safety of principal, liquidity and a competitive rate of return. All moneys transferred to the PTIF are promptly invested in securities authorized by the MM Act. Safekeeping and audit controls for all investments owned by the PTIF must comply with the MM Act.

See "APPENDIX A—COMPREHENSIVE ANNUAL FINANCIAL REPORT OF THE STATE OF UTAH FOR FISCAL YEAR 2019–Notes to the Financial Statements–Note 3. Deposits and Investments" (CAFR page 67) and "–Note 4. Investment Pool" (CAFR page 96).

#### State Employee Workforce; Public Retirement System

*State Employee Workforce.* The State is among the largest employers in the State, employing 20,691 people (full-time equivalents) in Fiscal Year 2019. For a 10-year history of the State's employment numbers, see "AP-PENDIX A—COMPREHENSIVE ANNUAL FINANCIAL REPORT OF THE STATE OF UTAH FOR FISCAL YEAR 2019–Statistical Section–Schedule E–1 Full-time Equivalent State Employees by Function" (CAFR page 236).

Public Retirement System. All full-time employees of the State are members of the Utah State Retirement System ("URS") and the State participates in various contribution systems and pension plans provided by URS. URS has separate accounting systems and prepares a separate financial report covering all retirement systems and deferred compensation plans it administers. URS's CAFR for Calendar Year 2018 is reported in the 2019 CAFR as a pension trust fund for URS within the fiduciary funds. See "APPENDIX A—COMPREHENSIVE ANNUAL FINANCIAL REPORT OF THE STATE OF UTAH FOR FISCAL YEAR 2019–Fiduciary Fund Financial Statements" (CAFR pages 50 and 51). Copies of URS's CAFR for Calendar Year 2018 may be found at https://www.urs.org/publications/members.

For Fiscal Year 2019, the State reported the following liability and related transactions equal to its proportionate share of the collective net pension liability of URS (measured as of December 31, 2018): \$1.170 billion in net pension liability, \$450.084 million in deferred outflows of resources and \$44.011 million in deferred inflows of resources for primary government. For Fiscal Year 2019, the State contributed approximately \$233.172 million to URS, which was 100% of its contractually and statutorily required contributions. For a detailed discussion regarding retirement benefits and contributions and information regarding the fiduciary net position, the total pension liability, and the net pension liability or asset of the URS systems providing benefits to employees of the State see "APPEN-DIX A—COMPREHENSIVE ANNUAL FINANCIAL REPORT OF THE STATE OF UTAH FOR FISCAL YEAR 2019–Notes to the Financial Statements–Note 18. Pension Plans" (CAFR page 119).

For the financial statements of the pension (and other employee benefit trust funds) see "APPENDIX A— COMPREHENSIVE ANNUAL FINANCIAL REPORT OF THE STATE OF UTAH FOR FISCAL YEAR 2019— Supplementary Information–Fiduciary Funds–Pension and Other Employee Benefits Trust Fund" (CAFR pages 186 through 192).

#### **Other Postemployment Benefits**

The State administers the State Employee Other Postemployment Benefit Plan ("State Employee OPEB Plan") through the State Post–Retirement Benefits Trust Fund. A separate Elected Official Other Postemployment Benefit Plan ("Elected Official OPEB Plan") is provided for governors and legislators and is administered through the Elected Official Post–Retirement Benefits Trust Fund. Both trust funds are irrevocable and legally protected from creditors. Both plans are single–employer defined benefit healthcare plans and are closed plans available to only employees and elected officials that meet certain eligibility criteria.

For Fiscal Year 2019, the net OPEB liability for both the State Employee OPEB Plan and the Elected Official OPEB Plan was \$70.088 million.

The Legislature is contributing amounts to each OPEB trust fund that, at a minimum, is sufficient to fully fund the Actuarially Determined Contribution ("ADC"). For Fiscal Year 2019, the State contributed \$26.510 million to the State Employee OPEB Plan and \$1.388 million to the Elected Official OPEB Plan, which were \$582,000 and \$362,000 more than the ADC, respectively. For the State Employee OPEB Plan and the Elected Official OPEB Plan, the fiduciary net position as a percentage of the total OPEB liability was 79.86% and 91.16%, respectively.

For additional detailed discussion of the State's postemployment benefits see "APPENDIX A— COMPREHENSIVE ANNUAL FINANCIAL REPORT OF THE STATE OF UTAH FOR FISCAL YEAR 2019— Notes to the Financial Statements—Note 19. Other Postemployment Benefits" (CAFR page 129).

For the financial statements of the other employee benefit trust funds (and pensions) see "APPENDIX A— COMPREHENSIVE ANNUAL FINANCIAL REPORT OF THE STATE OF UTAH FOR FISCAL YEAR 2019— Supplementary Information–Fiduciary Funds–Pension and Other Employee Benefits Trust Fund" (CAFR pages 186 through 192).

#### Risk Management And Insurance; Cybersecurity; Recent Earthquake

*Risk Management and Insurance.* The State is a member of a risk pool where the State self-insures portions of certain property and liability claims and purchases commercial insurance for claims above the self-insured retention amounts. This is done through the Administrative Services Risk Management Fund (the "Risk Management Fund"). The Risk Management Fund is maintained via premiums charged to its members—State agencies, institutions of higher education, Utah school districts and charter schools (the "Covered Members").

The State is self–insured for liability claims up to \$2 million and beyond the excess insurance policy limit of \$10 million. The State is self–insured for individual property and casualty claims up to \$1 million and up to \$3.5 million in aggregate claims and beyond the excess insurance policy limit of \$1 billion per occurrence. The Risk Management Fund has not had a liability loss that exceeded the State's self–insured claim limit of \$1 million for Fiscal Year 2019, the Risk Management Fund had losses that exceeded the State's self–insured claim limit of \$1 million (the amount was \$1.5 million related to a UDOT accident).

Earthquake Insurance. The Utah Division of Risk Management (the "DRM") annually procures excess property insurance with earthquake coverage for its Covered Members. This earthquake coverage has limits of \$525 million,

with a \$1 million self-insured retention, or deductible. Additionally, DRM recently procured a parametric earthquake policy from a private insurance company with limits of \$50 million. Payments under the parametric policy are based upon the severity and location of an earthquake, irrespective of actual property damage. As a result of a recent earthquake in the Salt Lake County, Utah area, the private insurance company will presently tender DRM the sum of \$963,750, which will cover most of the \$1 million deductible under the excess property policy. See "Recent Earthquakes" below.

As of June 30, 2019, the Risk Management Fund contained approximately \$63.558 million in reserve available to pay for claims incurred. For the financial statements of the risk management fund see "APPENDIX A— COMPREHENSIVE ANNUAL FINANCIAL REPORT OF THE STATE OF UTAH FOR FISCAL YEAR 2019— Supplementary Information–Internal Service Funds–Risk Management" (CAFR pages 180 through 183).

Also see "APPENDIX A—COMPREHENSIVE ANNUAL FINANCIAL REPORT OF THE STATE OF UTAH FOR FISCAL YEAR 2019—Notes to the Financial Statements—Note 16. Litigation, Contingencies and Commitments–Litigation" (CAFR page 117) and "—Note 20. Risk Management And Insurance" (CAFR page 132).

*Cybersecurity*. Cybersecurity incidents could result from unintentional events, or from deliberate attacks by unauthorized entities or individuals attempting to gain access to the State's systems technology for the purposes of misappropriating assets or information or causing operational disruption and damage. To mitigate the risk of business operations impact and/or damage by cybersecurity incidents or cyberattacks, the State invests in multiple forms of cybersecurity and operational safeguards including: (i) \$7.8 million annual budget for security operations and security privacy and compliance; (ii) a Chief Information Security Officer reporting directly to the State's Chief Information Officer; (iii) a security team of 18 employees; (iv) a self–assessment every two years in cooperation with the Department of Homeland Security using National Institute of Standards and Technology standards; (v) compliance audits regularly performed by the Internal Revenue Service, Federal Bureau of Investigation, Medicaid and Medicare, and the Office of the Inspector General; and (vi) a Cyber Center that provides a central location for multiple agencies to share intelligence and tactics, and respond to events in a coordinated fashion. In addition, the State has a \$10 million liability insurance policy regarding cybersecurity. In 2012, the State experienced a cybersecurity breach in the Utah Department of Health related to individual personal information on Medicaid data. The State does not believe this breach had a material impact on overall State finances.

*Recent Earthquake.* On March 18, 2020 an earthquake occurred in the township of Magna, Salt Lake County, Utah (located approximately 15 miles west of Salt Lake City, Utah), which magnitude was recorded on the Richter scale at 5.7. As of April 20, 2020, DRM has received 83 earthquake claims from its Covered Members. Additional claims are expected as they are discovered in the coming weeks and months. Most of the damage occurred in the Salt Lake County, Utah area. The current preliminary estimate is that total losses from the earthquake will range from \$24 million to \$40 million. This projection is expected to change as adjusters, covered entities, and engineers complete their damage assessments and begin to receive repair bids. It currently appears that all earthquake–related property losses experienced by Covered Members will be covered by the Risk Management Fund and the insurance programs described above.

#### **Federal Funding**

*Medicaid Funding in the State.* The Legislature in the 2019 General Legislative Session amended state law related to Medicaid expansion, revising statutory language that was previously enacted through ballot initiative at the November 5, 2018 general election. Specifically, the new legislation removed mandatory provider rate increases and benefit floors as contemplated by the initiative, retained a 0.15% sales tax increase to cover program expenditures (the initiative increased the general state sales tax rate from 4.7% to 4.85%), and established a framework for a phased approach to Medicaid expansion in the State that is responsive to the federal Centers for Medicare and Medicaid Services ("CMS") waiver approval decisions.

The first phase of the new legislative law was Medicaid expansion implemented on April 1, 2019 and is known as the bridge program (the "Bridge Program"). The Bridge Program expanded coverage to all previously ineligible adults with income under 100% of the Federal Poverty Level (the "FPL"), but was financed at the traditional federal medical assistance percentage of roughly 70% federal funding with a roughly 30% State match requirement. The Bridge Program was designed to immediately address healthcare needs of the coverage gap population, that is, those who were ineligible for traditional Medicaid benefits and who also did not qualify for subsidized coverage on the federal healthcare exchange marketplace.

In July 2019, concurrent with the operation of the Bridge Program, the State submitted a waiver application to CMS seeking authority to proceed with phase two of the State's Medicaid expansion plan. Phase two waiver proposed that the State receive a 90/10 federal match rate for Bridge Program expenditures in like fashion with other states that have fully expanded Medicaid under the Affordable Care Act (the "ACA"). Along with the 90/10 federal match rate, the State would operate the Bridge Program under a per capita cap federal funding arrangement, where annual increases in the federal funding at the 90/10 match rate would be limited to a per enrollee cap. Key elements of this phase two per capita cap waiver were formally denied by CMS in August 2019, prompting the State to pursue the third phase of Medicaid expansion.

In November 2019, the State's phase three Fall Back Medicaid expansion waiver was submitted to CMS for a completeness review and subsequent federal 30–day public comment period. Through this waiver, the State requested program eligibility be expanded to people with income up to 138% FPL and that the corresponding 90/10 ACA federal match rate be made available for program expenditures. The Fall Back waiver also requested CMS approval of various other flexibilities, such as the ability to include community engagement requirements of enrollees, the ability for the State to leverage third party insurance of beneficiaries when available, and the ability to collect monthly premiums from individuals with income above 100% FPL. On December 23, 2019, the State received CMS approval of core elements of the Fall Back wavier, allowing for program implementation as of January 2020.

With the Fall Back waiver approval and corresponding 90/10 federal match rate, the State is currently able to fund its share of program expenditures. In the 2020 General Legislative Session, \$116.8 million in ongoing State funds were appropriated or expected to be collected by the Medicaid Expansion Fund and the fund contains a Fiscal Year 2020 beginning balance of \$62.7 million. These resources combine to provide nearly \$180 million in State funds to support an estimated 51,700 enrollees (as taken from the February 2020 Consensus estimate and not including material COVID–19 effects) at a State cost of approximately \$92 million in Fiscal Year 2020.

The State expects a significant increase in Medicaid enrollment due to the economic impacts of COVID–19, but has not yet adopted formal consensus enrollment and expenditure estimates for Fiscal Year 2020 and Fiscal Year 2021. Preliminarily, the State expects a net gain of about \$40 million in General Fund from the 6.2% Federal Assistance Match Percentage as provided through the Families First Coronavirus Response Act in Fiscal Year 2020. In Fiscal Year 2021, cost increase due to counter–cyclical enrollment inflows could approximate \$100 million in the General Fund.

The State's Non–Expansion Medicaid program participation rate is among the lowest in the nation, with average Fiscal Year 2019 enrollment approximating about 300,000 or about 9.4% of the State's total population (an estimated 3,205,958 as of July 2019). The State receives a higher than average Federal Medical Assistance Percentage at 67.69% ( in the State's Fiscal Year 2021, before considering the 6.2% increase provided for in the Families First Coronavirus Response Act); however, the State also has one of the lowest rates of spending per full–benefit Medicaid enrollee and has a history of State funding innovations such as imposing hospital assessments and moving to capitation payments for Medicaid provider networks.

*Federal Funding in the State Budget.* Approximately 83% of federal funds included in the Fiscal Year 2021 budget fund the following programs: Medicaid (\$3.180 billion); transportation (\$527 million); education, including special education, school lunch, and Title I for disadvantaged students (\$367 million); Supplemental Nutrition Assistance (\$268 million); Temporary Assistance for Needy Families (\$85 million); National Guard (\$59 million), Office of Rehabilitation (\$50 million); and Women Infants and Children (\$40 million). Not only do federal dollars fund a large portion of the State's major social service programs, federal dollars also play a key role in funding programs that provide care for elderly veterans, clean drinking water, and air pollution prevention. *These numbers do not reflect COVID–19 federal aid the State expects to receive in Fiscal Year 2021. Some of those federal relief funds have been allocated and others will be allocated in the future.* 

Although the State receives a large portion of its funding for social service programs from federal funds as discussed above, a recent Pew Charitable Trust report on federal spending ranked the State as ninth lowest in total federal spending relative to gross domestic product ("GDP") when all federal spending is accounted for. When measured on a per-capita basis, the State has the lowest total per capita federal spending. This is, in part, because the State's population is the youngest in the nation and consequently the State receives a much smaller portion of federal dollars than other states for programs such as Social Security and Medicare, two of the largest federal entitlement programs targeted to the elderly. As of 2017, the State is one of 14 states that receives less than 30% of total state revenue from federal funds. *While no comparison is yet available with other states, the State's percentage of federal* 

funds appropriated through the State budget is estimated at approximately 27% in Fiscal Year 2021 prior to COVID-19.

There can be no assurance that current levels of federal funding to the State will be maintained or that any potential federal budget cuts and potential decreases in flow through of funds to states would not have a material adverse financial impact on the State. The State cannot predict now what, if any, effect such decreases in federal spending would have on the State's budget.

*Federal Sequestration*. Pursuant to the Budget Control Act of 2011 (the "BCA"), cuts to federal programs necessary to reduce federal spending to levels specified in the BCA (known as "sequestration") were ordered in federal fiscal years ending September 30, 2013 through 2021 and were subsequently extended through September 30, 2029. These reductions include cuts to the subsidy payments to be made to issuers of Build America Bonds ("BABs") and various other federal expenditures.

The State anticipates that any future reductions of subsidy payments with respect to the State's and the Authority's \$1,102,790,000 in outstanding BABs (the State's \$1,010,125,000 of general obligation bonds and \$19,565,000 of water revenue bonds; and the Authority's \$73,100,000 of lease revenue bonds) or reductions in other federal grants because of sequestration would have no material impact on their operations or financial position. The State cannot predict whether Congress will act to avoid or extend sequestration in the future.

#### LEGAL MATTERS

#### General

The approving opinion of Gilmore & Bell, P.C., Bond Counsel to the State, concerning the validity of the 2020B Bonds, in substantially the form set out in "APPENDIX D—FORM OF OPINION OF BOND COUNSEL" to this OFFICIAL STATEMENT, will be provided at the time of delivery of the 2020B Bonds.

Bond Counsel has not assumed responsibility for the remaining material in the OFFICIAL STATEMENT and has not verified independently the information set out therein. In addition, Bond Counsel has not assumed responsibility for any agreement, representations, offering circulars, or other material of any kind not mentioned in this paragraph, relating to the offering of the 2020B Bonds for sale.

Certain legal matters will be passed upon for the State by the Office of the Attorney General of the State. Certain matters will be passed on for the Underwriters by their counsel Chapman and Cutler LLP.

#### **Absence Of Litigation Concerning The 2020B Bonds**

There is no litigation pending or threatened against the 2020B Bonds questioning or in any matter relating to or affecting the validity of the 2020B Bonds.

On the date of the execution and delivery of the 2020B Bonds, certificates will be delivered by the State to the effect that to the knowledge of the State, there is no action, suit, proceeding or litigation pending or threatened against the State, which in any way materially questions or affects the validity or enforceability of the 2020B Bonds or any proceedings or transactions relating to their authorization, execution, authentication, marketing, sale or delivery or which materially adversely affects the existence or powers of the State.

A non-litigation opinion issued by the State's Attorney General, dated the date of closing, will be provided stating, among other things, that there is not now pending, or to his knowledge threatened, any action, suit, proceeding, inquiry, or any other litigation or investigation, at law or in equity, before or by any court, public board or body, challenging the creation, organization or existence of the State, or the titles of its respective officers to their respective offices, or the ability of the State, or its respective officers to authenticate, execute or deliver the 2020B Bonds or such other documents as may be required in connection with the issuance and sale of the 2020B Bonds, or to comply therewith or perform its respective obligations thereunder, or seeking to restrain or enjoin the issuance, sale or delivery of the 2020B Bonds, or directly or indirectly contesting or affecting the proceedings or the authority by which the 2020B Bonds are issued, the legality of the purposes for which the 2020B Bonds are issued, or the validity of the 2020B Bonds or the issuance and sale thereof.

#### **Miscellaneous Legal Matters**

The State, its officers, agencies, and departments, are parties to numerous routine legal proceedings, many of which normally occur in governmental operations.

See "APPENDIX A—COMPREHENSIVE ANNUAL FINANCIAL REPORT OF THE STATE OF UTAH FOR FISCAL YEAR 2019—Notes to the Financial Statements—Note 16. Litigation, Contingencies, and Commitments–Litigation" (CAFR page 117).

#### Attorney General's Opinion Of Effect Of Legal Proceedings On State's Ability To Make Timely Payments On 2020B Bonds

Based on discussions with representatives of the State's executive and legislative departments, the Attorney General believes the miscellaneous legal proceedings against the State, individually or in the aggregate, are not likely to have a material adverse impact on the State's ability to make its payments of the principal of and interest on the 2020B Bonds as those payments come due.

#### TAX MATTERS

The following is a summary of the material federal and State of Utah income tax consequences of holding and disposing of the 2020B Bonds. This summary is based upon laws, regulations, rulings and judicial decisions now in effect, all of which are subject to change (possibly on a retroactive basis). This summary does not discuss all aspects of federal income taxation that may be relevant to investors in light of their personal investment circumstances or describe the tax consequences to certain types of owners subject to special treatment under the federal income tax laws (for example, dealers in securities or other persons who do not hold the 2020B Bonds as a capital asset, tax–exempt organizations, individual retirement accounts and other tax deferred accounts, and foreign taxpayers), and, except for the income tax laws of the State of Utah, does not discuss the consequences to an owner under any state, local or foreign tax laws. The summary does not deal with the tax treatment of persons who purchase the 2020B Bonds in the secondary market. Prospective investors are advised to consult their own tax advisors regarding federal, state, local and other tax considerations of holding and disposing of the 2020B Bonds.

#### **Opinion Of Bond Counsel**

In the opinion of Gilmore & Bell, P.C., under the law currently existing as of the issue date of the 2020B Bonds:

Federal Tax Exemption. The interest on the 2020B Bonds is excludable from gross income for federal income tax purposes.

Alternative Minimum Tax. The interest on the 2020B Bonds is not an item of tax preference for purposes of computing the federal alternative minimum tax.

Bond Counsel's opinions are provided as of the date of the original issue of the 2020B Bonds, subject to the condition that the State comply with all requirements of the Code that must be satisfied subsequent to the issuance of the 2020B Bonds in order that interest thereon be, or continue to be, excludable from gross income for federal income tax purposes. The State has covenanted to comply with all such requirements. Failure to comply with certain of such requirements may cause the inclusion of interest on the 2020B Bonds in gross income for federal income tax purposes retroactive to the date of issuance of the 2020B Bonds.

State of Utah Tax Exemption. The interest on the 2020B Bonds is exempt from State of Utah individual income taxes.

Bond Counsel is expressing no opinion regarding other federal, state or local tax consequences arising with respect to the 2020B Bonds but has reviewed the discussion under this heading "TAX MATTERS."

#### **Other Tax Consequences**

*Original Issue Premium.* For federal income tax purposes, premium is the excess of the issue price of a 2020B Bond over its stated redemption price at maturity. The issue price of a 2020B Bond is generally the first price at which a substantial amount of the 2020B Bonds of that maturity have been sold to the public. Under Section 171 of the Code, premium on tax–exempt bonds amortizes over the term of the 2020B Bond using constant yield principles, based on the purchaser's yield to maturity. As premium is amortized, the owner's basis in the 2020B Bond and the amount of tax–exempt interest received will be reduced by the amount of amortizable premium properly allocable to the owner, which will result in an increase in the gain (or decrease in the loss) to be recognized for federal income tax purposes on sale or disposition of the 2020B Bond prior to its maturity. Even though the owner's basis is reduced, no federal income tax deduction is allowed. Prospective investors should consult their own tax advisors concerning the calculation and accrual of bond premium.

Sale, Exchange or Retirement of 2020B Bonds. Upon the sale, exchange or retirement (including redemption) of a 2020B Bond, an owner of the 2020B Bond generally will recognize gain or loss in an amount equal to the difference between the amount of cash and the fair market value of any property received on the sale, exchange or retirement of the 2020B Bond (other than in respect of accrued and unpaid interest) and such owner's adjusted tax basis in the 2020B Bond. To the extent a 2020B Bond is held as a capital asset, such gain or loss will be capital gain or loss if the 2020B Bond has been held for more than 12 months at the time of sale, exchange or retirement.

*Reporting Requirements.* In general, information reporting requirements will apply to certain payments of principal, interest and premium paid on the 2020B Bonds, and to the proceeds paid on the sale of the 2020B Bonds, other than certain exempt recipients (such as corporations and foreign entities). A backup withholding tax will apply to such payments if the owner fails to provide a taxpayer identification number or certification of foreign or other exempt status or fails to report in full dividend and interest income. The amount of any backup withholding from a payment to an owner will be allowed as a credit against the owner's federal income tax liability.

*Collateral Federal Income Tax Consequences.* Prospective purchasers of the 2020B Bonds should be aware that ownership of the 2020B Bonds may result in collateral federal income tax consequences to certain taxpayers, including, without limitation, financial institutions, property and casualty insurance companies, individual recipients of Social Security or Railroad Retirement benefits, certain S corporations with "excess net passive income," foreign corporations subject to the branch profits tax, life insurance companies, and taxpayers who may be deemed to have incurred or continued indebtedness to purchase or carry or have paid or incurred certain expenses allocable to the 2020B Bonds. Bond Counsel expresses no opinion regarding these tax consequences. Purchasers of 2020B Bonds should consult their tax advisors as to the applicability of these tax consequences and other federal income tax consequences of the purchase, ownership and disposition of the 2020B Bonds, including the possible application of state, local, foreign and other tax laws.

#### MISCELLANEOUS

#### **Bond Ratings**

Fitch, Moody's and S&P have rated the 2020B Bonds "AAA," "Aaa," and "AAA," respectively, as of the date of this OFFICIAL STATEMENT.

Any explanation of the significance of these outstanding ratings may only be obtained from the rating service furnishing the same. The above ratings are not recommendations to buy, sell or hold the 2020B Bonds. There is no assurance that such ratings will be maintained for any period or that the ratings may not be lowered or withdrawn entirely by the rating agencies if, in their judgment, circumstances so warrant. Any such downward change or withdrawal of such rating may have an adverse effect on the market price of the 2020B Bonds.

#### **Municipal Advisor**

The State has entered an agreement with the Municipal Advisor where the Municipal Advisor provides financial recommendations and guidance to the State with respect to preparation for sale of the 2020B Bonds, timing of sale, tax–exempt bond market conditions, costs of issuance and other factors relating to the sale of the 2020B Bonds. The Municipal Advisor has read, participated in the drafting of and provided the information in certain provisions of this

OFFICIAL STATEMENT. The Municipal Advisor has not otherwise audited, authenticated or verified the information set forth in the OFFICIAL STATEMENT, or any other related information available to the State, with respect to accuracy and completeness of disclosure of such information, and no guaranty, warranty or other representation is made by the Municipal Advisor respecting accuracy and completeness of the OFFICIAL STATEMENT or any other matters related to the OFFICIAL STATEMENT. Municipal Advisor fees are contingent upon the sale and delivery of the 2020B Bonds.

#### Underwriters

The Underwriters have reviewed the information in this OFFICIAL STATEMENT in accordance with, and as a part of, their responsibilities to investors under the federal securities laws as applied to the facts and circumstances of this transaction, but the Underwriters do not guarantee the accuracy or completeness of such information.

The Underwriters have agreed, subject to certain conditions, to purchase all 2020B Bonds from the State at an aggregate price of \$527,745,745.70 (which consists of a principal amount of \$447,315,000.00, plus an original issue premium of \$81,417,719.20, less an Underwriter's discount of \$986,973.50), and to make a public offering of the 2020B Bonds.

The Underwriters have advised the State that the 2020B Bonds may be offered and sold to certain dealers (including dealers depositing the 2020B Bonds into investment trusts) at prices lower than the initial public offering prices set forth on the inside cover page of the OFFICIAL STATEMENT and that such public offering prices may be changed from time to time.

The Underwriters and their affiliates are full service financial institutions engaged in various activities, which may include securities trading, commercial and investment banking, investment management, principal investment, hedging, financing and brokerage activities. Certain of the Underwriters and their respective affiliates have, from time to time, performed, and may in the future perform, various investment banking services for the State for which they received or will receive customary fees and expenses.

In the ordinary course of their various business activities, the Underwriters and their affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own accounts and for the accounts of their customers and may at any time hold long and/or short positions in such securities and instruments. Such investment and securities activities may involve securities and instruments of the State.

*BofA Securities, Inc. (one of the Underwriters of the 2020B Bonds).* BofA Securities, Inc. has entered into a distribution agreement with its affiliate Merrill Lynch, Pierce, Fenner & Smith Incorporated ("MLPF&S"). As part of this arrangement, BofA Securities, Inc. may distribute securities to MLPF&S, which may in turn distribute such securities to investors through the financial advisor network of MLPF&S. As part of this arrangement, BofA Securities, Inc. may compensate MLPF&S as a dealer for their selling efforts with respect to the 2020B Bonds.

*Citigroup Global Markets Inc. (one of the Underwriters of the 2020B Bonds).* Citigroup Global Markets Inc. has entered into a retail distribution agreement with Fidelity Capital Markets, a division of National Financial Services LLC (together with its affiliates, "Fidelity"). Under this distribution agreement, Citigroup Global Markets Inc. may distribute municipal securities to retail investors at the original issue price through Fidelity. As part of this arrangement, Citigroup Global Markets Inc. will compensate Fidelity for its selling efforts.

Wells Fargo Bank, National Association (one of the Underwriters of the 2020B Bonds). Wells Fargo Securities is the trade name for certain securities-related capital markets and investment banking services of Wells Fargo & Company and its subsidiaries, including Wells Fargo Bank, National Association, which conducts its municipal securities sales, trading and underwriting operations through the Wells Fargo Bank, NA Municipal Finance Group, a separately identifiable department of Wells Fargo Bank, National Association, registered with the Securities and Exchange Commission as a municipal securities dealer pursuant to Section 15B(a) of the Securities Exchange Act of 1934. Wells Fargo Bank, National Association, acting through its Municipal Finance Group ("WFBNA"), has entered into an agreement (the "WFA Distribution Agreement") with its affiliate, Wells Fargo Clearing Services, LLC (which uses the trade name "Wells Fargo Advisors") ("WFA"), for the distribution of certain municipal securities offerings, including the 2020B Bonds. Pursuant to the WFA Distribution Agreement, WFBNA will share a portion of its underwriting or remarketing agent compensation, as applicable, with respect to the 2020B Bonds with WFA.

WFBNA has also entered into an agreement (the "WFSLLC Distribution Agreement") with its affiliate Wells Fargo Securities, LLC ("WFSLLC"), for the distribution of municipal securities offerings, including the 2020B Bonds. Pursuant to the WFSLLC Distribution Agreement, WFBNA pays a portion of WFSLLC's expenses based on its municipal securities transactions. WFBNA, WFSLLC, and WFA are each wholly–owned subsidiaries of Wells Fargo & Company.

#### **Independent Auditor**

The financial statements of the State as of June 30, 2019, and for the fiscal year then ended, are included as "APPENDIX A—COMPREHENSIVE ANNUAL FINANCIAL REPORT OF THE STATE OF UTAH FOR FIS-CAL YEAR 2019" to this OFFICIAL STATEMENT and have been audited by the office of the State Auditor, as indicated in its report thereon (CAFR page 14). The State has neither requested nor has been obligated to obtain the consent of the State Auditor to include its report in this OFFICIAL STATEMENT and therefore the State Auditor has not performed any procedures with respect to such financial statements after the date of its report.

#### **Additional Information**

The foregoing description of the 2020B Bonds does not purport to be complete and is expressly made subject to the exact provisions of the complete documents, copies of which are available for inspection at the offices of the Municipal Advisor during the offering of the 2020B Bonds, and subsequently, at the office of the Paying Agent in Salt Lake City, Utah.

Any statements in this OFFICIAL STATEMENT involving matters of opinion, whether expressly so stated, are intended as such and not as representations of fact.

The Appendices attached hereto are an integral part of this OFFICIAL STATEMENT and should be read in conjunction with the foregoing material.

This OFFICIAL STATEMENT and its distribution and use have been duly authorized by the State.

# State of Utah

#### APPENDIX A

#### COMPREHENSIVE ANNUAL FINANCIAL REPORT OF THE STATE OF UTAH FOR FISCAL YEAR 2019

The CAFR of the State for Fiscal Year 2019 is contained herein.

Utah Transit Authority. New to the State's CAFR for Fiscal Year 2019 is the inclusion of Utah Transit Authority ("UTA") as a major discrete component unit. UTA provides public mass transportation (commuter rail, light rail, bus, paratransit, rideshare and van services) for State communities within the major area known as the "Wasatch Front." During the 2018 General Legislative Session, the governance structure of the UTA was modified, creating a governing board appointed by the Governor. Effective November 1, 2018, UTA is now included as part of the State's reporting entity and the Statement of Activities—Component Units reflects a \$993.677 million increase in net position restricted for transit services (CAFR page 55). Separate comprehensive audited financial statements are also issued by UTA.

*Government Finance Officers Association*. The Government Finance Officers Association of the United States and Canada ("GFOA") have awarded a Certificate of Achievement for Excellence in Financial Reporting to the State for its CAFR for the 34th consecutive year, beginning with Fiscal Year 1985 through Fiscal Year 2018.

The State has submitted its Fiscal Year 2019 CAFR to GFOA to determine its eligibility for a Certificate of Achievement. The State believes that its Fiscal Year 2019 CAFR continues to meet the Certificate of Achievement program requirements.

To be awarded a Certificate of Achievement, a governmental unit must publish an easily readable and efficiently organized comprehensive annual financial report whose contents conform to program standards. Such reports must satisfy both generally accepted accounting principles and applicable legal requirements and be submitted within six months after the State's Fiscal Year end. A Certificate of Achievement is valid for a period of one year only.

# **Department of Administrative Services**

Tani Pack Downing Executive Director

**Division of Finance** 

John C. Reidhead, CPA

Director

GARY R. HERBERT Governor

State of Utah

SPENCER J. COX Lieutenant Governor

November 25, 2019

To the Citizens, Governor, and Members of the Legislature of the State of Utah:

It is our pleasure to present the 2019 Comprehensive Annual Financial Report of the State of Utah in accordance with Section 63A-3-204 of the *Utah Code*. Responsibility for the accuracy of the data and the completeness and fairness of the presentation, including all disclosures, rests with the State's management. To the best of our knowledge and belief, the enclosed data accurately presents the State's financial position and results of operations in all material respects in accordance with generally accepted accounting principles (GAAP). We believe that all disclosures necessary to enable the reader to gain an understanding of the State's financial activities are included.

**Internal Control** – The State's systems of internal control over assets recorded in the accounting system have been designed to provide reasonable, but not absolute, assurance of safeguarding assets against loss from unauthorized use or disposition and to ensure the reliability of financial records for preparing financial statements. The concept of reasonable assurance recognizes that the cost of a control should not exceed the benefits likely to be derived and that the evaluation of costs and benefits requires estimates and judgments by management.

**Independent Auditors** – In compliance with state statute, an annual financial audit of the "State Reporting Entity" is completed each year by the Office of the State Auditor in conjunction with other independent audit firms. Their audits were conducted in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States. The State Auditor's report and the opinion on the fair presentation of the Basic Financial Statements are included in the Financial Section of this report.

**Single Audit** – Federal regulations also require the State to undergo an annual "Single Audit" in conformance with the Title 2 U.S. Code of Federal Regulations (CFR) Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Information related to the Single Audit, including the Schedule of Expenditures of Federal Awards, Schedule of Findings and Questioned Costs, Summary Schedule of Prior Audit Findings, and the State Auditor's report, is issued in a separate report.

**Management's Discussion and Analysis** ( $\underline{MD\&A}$ ) – The discussion and analysis provides an overview and analysis of the State's Basic Financial Statements. This letter of transmittal is intended to complement the MD&A and should be read in conjunction with it.

## **PROFILE OF THE GOVERNMENT**

**Structure** – As shown in the <u>Organizational Chart</u>, state government is divided into three separate branches: legislative, executive, and judicial. The duties of each branch are outlined in the *Utah Constitution*, which can be amended only by vote of the Legislature and a majority vote of the State's citizens, and in the *Utah Code*, which can be amended by the Legislature or by citizen initiatives. State government provides various services to over 3,212,000 citizens. Services include building and maintaining roads; providing public safety, health, and environmental protection services to protect the general welfare of the State's citizens; helping adults, children, and families through difficult times such as abuse, divorce, illness, death, and unemployment; fostering an attractive business climate to encourage economic growth; and protecting public lands and natural resources for conservation

2110 STATE OFFICE BLDG, SALT LAKE CITY, UT 84114 • telephone 801 538-3082 • facsimile 801 538-3244 • finance.utah.gov

and recreational activities. The State also provides significant financial support to its higher education institutions, local governments, and school districts to help those entities meet the specific needs of their constituents.

**The State Reporting Entity** – The State Reporting Entity includes the *primary government* and its *discretely presented component units*. The *primary government* of the State of Utah includes all funds, departments, boards, and commissions that make up its legal entity. In addition to these *primary government* activities, this report includes information related to discretely presented component units for which the primary government is financially accountable. Although such information is provided in this report, the <u>MD&A</u> and <u>Basic Financial Statements</u> focus on the primary government and its activities. Separately issued financial statements are available from the significant discretely presented component units and should be read to obtain a better understanding of their financial conditions. Additional information on all discretely presented component units can be found in <u>Note 1. A.</u> to the financial statements.

**Budgetary Process and Control** – The *Utah Constitution* requires that budgeted expenditures not exceed estimated revenues and other sources of funding, including beginning fund balances. Annually, the Governor is required to submit a balanced budget for the governmental funds with an annual appropriated budget (General, Education, Transportation, Transportation Investment, and Debt Service Funds), by function (e.g., health), and activity (e.g., medical assistance) to the Legislature. The Legislature authorizes expenditures by line item in the annual *Appropriations Acts*. Line item is the legal level of budgetary control. The Acts also identify the sources of funding for budgeted expenditures. In the event actual revenues are insufficient to cover budgeted expenditures, the Governor must order budget reductions or call a special session of the Legislature to address budget issues. Adjustments to the budget may also be made throughout the year for changes in departmental or fund revenues so that line items and funds will not end the fiscal year in a deficit position. For additional information on the budgetary process and control, see the <u>Required Supplementary Information</u> and related notes.

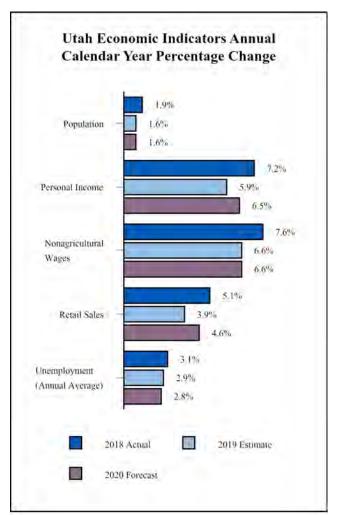

#### INFORMATION USEFUL IN ASSESSING A GOVERNMENT'S ECONOMIC CONDITION

**Local Economy** – The Utah economy continues to outperform national averages. Utah's economy is expected to grow moderately through 2020 on the strength of steady job and wage growth.

Utah's unemployment rate averaged 3.1 percent in calendar year 2018, and is expected to decrease to an average of 2.9 percent in 2019, and 2.8 percent in 2020. In 2018, personal income increased by 7.2 percent and nonagricultural wages increased by 7.6 percent. In 2019, personal income is expected to increase by 5.9 percent and nonagricultural wages are expected to increase by 6.6 percent. Taxable retail sales increased by 5.1 percent in 2018 and are expected to increase by 3.9 percent in 2019.

Total construction value was \$8.5 billion in 2018, a 3.7 percent increase from the prior year. In 2019, total construction value is expected to increase to \$9.2 billion, an 8.2 percent increase due to continued strength in residential and commercial construction. Residential construction was \$5.2 billion in 2018, a 10.6 percent increase from the prior year. Residential permit value is expected to increase 7.7 percent to \$5.6 billion in 2019. Nonresidential construction was \$2.2 billion in 2018, a 4.3 percent decrease from the prior year, but still well above the annual average since 2000 of \$1.7 billion (inflation adjusted). Nonresidential construction is expected to increase 4.5 percent in 2019.

In 2019, Utah's population is estimated at 3,212,000, which is an increase of 1.6 percent over the prior year. Utah had positive net migration of approximately 29,100 people in 2018 and is expected to grow by 22,900 in 2019. Utah has had positive net migration for the past 29 years and this trend is expected to continue in the coming years.

Source: State of Utah Revenue Assumptions Working Group, Moody's Economy.com, and IHS Global Insight.

**Industries** – Utah's job market has grown 32.6 percent since hitting a low point at the beginning of 2010. At the end of fiscal year 2019, Utah's unemployment rate was the fifth lowest in the nation. Utah's nonagricultural employment is expected to increase by 2.8 percent in 2019 and by 2.3 percent in 2020, which is below the Utah average yearly rate of 3.1 percent (1950 through June 2019). All industrial sectors added jobs to Utah's employment base. Professional and business added 10,200 jobs, with administration, waste management, and remediation contributing most of the gains. Education and health services added 10,000 jobs, with the largest increase in health services and social assistance. Manufacturing added 6,300 jobs, primarily in durable goods. Construction added 5,800 jobs, with specialty trade contractors adding the most jobs. The results for August 2018 to August 2019 are presented in the following table:

	Number of Jobs				Components of Labor Force
	August (p) 2019	August (r) 2018	Numerical Change	Percentage Change	August (p) 2019
Trade, Transportation, and Utilities	290.20	287.80	2.40	0.83%	18.56%
Professional and Business	229.00	218.80	10.20	4.66%	14.66 %
Education and Health Services	209.70	199.70	10.00	5.01%	13.42 %
Government (Local/Federal)	157.70	155.90	1.80	1.15%	10.09 %
Leisure and Hospitality	158.10	154.70	3.40	2.20%	10.12 %
Manufacturing	140.10	133.80	6.30	4.71%	8.97 %
Construction	113.50	107.70	5.80	5.39%	7.26 %
Financial Activities	91.20	88.80	2.40	2.70%	5.84 %
Government (State/Higher Ed.)	78.70	78.00	0.70	0.90%	5.04 %
Other Services	43.40	42.20	1.20	2.84%	2.78 %
Information	40.80	39.60	1.20	3.03%	2.61 %
Natural Resources and Mining	10.10	9.60	0.50	5.21%	0.65 %
Total	1,562.50	1,516.60	45.90		100.00%

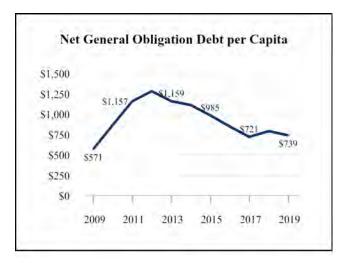

#### Jobs by Industry of Utah's Labor Force (expressed in thousands)

Source: Utah Department of Workforce Services and the U.S. Bureau of Labor Statistics, August 2019. (p) = preliminary (r) = revised

**Outlook** – The national economy is expected to continue to grow moderately in the last half of 2019 and decelerate in 2020. The Utah economy continues to grow more rapidly than the nation. Utah's young, educated workforce, diverse mix of industries, and appealing business climate continue to be advantages for the Utah economy. Despite this positive outlook, downside risks remain. Risks to the Utah economy include the supply of workers, housing affordability, interest rates, and air quality issues. Overall, Utah is expected to grow moderately barring any major disruptions to the national and global economies.

#### FINANCIAL PLANNING AND POLICIES

General Obligation Debt Administration - As part of long-term financial planning, the State has used a combination of bonding and pay-as-you-go methods to meet its infrastructure needs. In fiscal years 2009 through 2014, under budget constraints coupled with a low interest rate environment, the State elected to increase its debt by issuing bonds for highway and/or building projects that otherwise would have been funded from current resources. During the years debt was issued, the State continued to fund some projects with cash. In fiscal years 2015 and 2016, the State continued its prudent fiscal management by paying cash for most building, highway, and other projects. In fiscal year 2015, the State authorized \$474.7 million in general obligation debt for the new prison project. There were no general obligation bond issuances, authorizations, or refundings in fiscal year 2016.

In fiscal year 2017, the State authorized \$1.047 billion in general obligation bonds for highway construction projects and authorized an additional \$101 million for the prison project. In fiscal year 2018, the State authorized no new general obligation

bonds, but issued \$295.8 million for highway construction projects and \$189.4 million for the prison project from prior authorizations. The State also advance refunded \$118.7 million of general obligation bonds to take advantage of the low interest rate environment. In fiscal year 2019, the State issued \$127.7 million for highway construction projects from prior bond authorizations. As of June 30, 2019, the State's general obligation debt per capita was \$739. The State has an aggressive policy of repaying its general obligation debt within ten years for debt associated with capital facilities and fifteen years for highway construction projects. More information about the State's long-term debt is found in <u>Note 10</u> to the Basic Financial Statements.

**Revenue and Expenditure Forecasts** – Economists and budget analysts from the Executive and Legislative branches of government work with experts from the private sector and academia to develop the consensus revenue forecast used for establishing the State's annual budget. The final 2019 consensus revenue forecast projected an increase of 5.7 percent in fiscal year 2019 from 2018 actual revenue for the General and Education Funds combined. For fiscal year 2020, 4.8 percent growth is projected. The long-term average revenue growth rate, adjusted for inflation, was approximately 3.5 percent for fiscal periods 1971 through 2018. See the Budgetary Highlights – General Fund in the MD&A for a comparison of budgeted to actual results for fiscal year 2019.

**Budget Stabilization** – In accordance with Sections 63J-1-312 and 313 of the *Utah Code*, the State maintains the General Fund Budget Reserve Account in the General Fund (the "Rainy Day Fund") and an Education Fund Budget Reserve Account in the Education Fund (the "Education Reserve"). State law requires 25 percent of any revenue surplus in the General Fund to be deposited in the Rainy Day Fund after any required Medicaid growth savings transfer is made (see Medicaid Sustainability section below) and 25 percent of any revenue surplus in the Education Fund to be deposited in the Education Reserve, in each case up to a statutory limit. State law limits the totals of the Rainy Day Fund and Education Reserve based on the amount of appropriations from the General Fund and Education Fund, respectively, for the fiscal year in which the surplus occurred. For additional information on the State's budget stabilization accounts see <u>Note 12.B.</u>

**Medicaid Sustainability** – The State implemented reforms in the Medicaid program in an effort to bring Medicaid growth more in line with overall state revenue growth. The reforms align financial incentives in the health care system by replacing the fee-for-service model with one or more risk-based delivery models. When a General Fund revenue surplus occurs, an amount representing the Medicaid growth savings from the risk-based delivery models will be deposited into the "Medicaid Budget Stabilization Account." The account will then be used to meet the growing needs in the program in years when growth is expected to be at least 8 percent. For additional information on the State's budget stabilization accounts, see <u>Note 12.B.</u>

**Public Education Growth** – Projections indicate that an additional 6,800 new students will enroll in fall 2019. Due to the current and future enrollment growth, and the demands it places on state funding, public education continues to be a top priority for the Governor and the Legislature. The Office of the Legislative Fiscal Analyst has developed a public education distribution model that allows legislators to see how proposed education policy changes will impact funding.

**Federal Funding** – In an effort to prepare for potential future reductions in federal funding, Section 63J-1-219 of the *Utah Code* requires most state agencies including public education and higher education institutions to report specific federal funding information to the Legislature. Annually, these entities must report total federal receipts received the preceding fiscal year in addition to providing contingency plans in the event federal receipts are reduced by either 5 percent or 25 percent.

The Legislature created the Federalism Commission. One aspect of the Commission's responsibilities is to study and make recommendations on federal funding issues. The Commission is tasked with considering the financial stability of the federal government, the risk that the State will experience a reduction in the amount or value of federal funds, and methods to avoid or minimize the risk. Utah law requires economists and budget analysts from the Executive and Legislative branches of government to consider expected changes in federal funding when preparing the annual revenue volatility report and, if appropriate, recommend changes to amounts or limits of reserve funds. Utah law also requires the analyst to evaluate current and long-term trends relating to federal funds receipts and taxes, and prepare a three-year cycle of analysis on revenue volatility and budget matters.

In addition, all federal funds for state agencies must go through the annual appropriations process. To gain tighter control over federal grants that span several years, the Legislature also requires multiyear grants to go through an approval and summary requirements process, including approval in the annual *Appropriations Acts*.

**Spending Limitation** – The State has a statutory appropriations limit. The appropriations limit adjusts annually pursuant to a statutory formula based on population and inflation. The definition of appropriations includes only appropriations from General Fund and Education Fund sources (spending for public education and for transportation is exempt from the limitation). For the fiscal year ended June 30, 2019, the State was \$597.068 million below the appropriations limitation.

Adequate Funding for Ongoing Programs – The Legislature works to ensure all programs have adequate ongoing funding. Coming into the 2019 General Session of the Legislature, before accounting for growth in either costs or revenues, Utah had a small temporal surplus of \$14.5 million – meaning ongoing projected revenue exceeded ongoing commitments. A temporal balance is a short-term measure of structural balance. Legislators closed the 2019 General Session with a temporal surplus of \$427.4 million. However, more than \$300 million of this temporal surplus was from traditionally ongoing appropriations that were shifted to one-time due to uncertainty surrounding future General Fund revenue growth. A revenue restructuring task force will address this issue during the 2019 Interim, and the one-time appropriations may revert to ongoing before the 2020 General Session.

**Operating/Capital Expenditure Accountability** – During the 2014 General Session, the Legislature passed laws and rules to implement budget policy changes. These budget bills were, in part, aimed at smoothing revenue volatility by recognizing above trend growth, managing the volatility with rainy day deposit mechanisms, and treating windfalls as one-time revenue. The Legislature added in-depth budget reviews to the regular budget process. The legislation also required that the Office of the Legislative Fiscal Analyst prepare, before each annual general session of the Legislature, a summary showing the current status of the State's debt, long-term liabilities, contingent liabilities, General Fund borrowing, reserves, fund and nonlapsing balances, and cash-funded capital investments, as compared to the prior nine fiscal years. In addition, the Legislative Fiscal Analyst also implemented a "fiscal health dashboard" website where legislators and citizens can quickly and easily check Utah's fiscal health.

#### **MAJOR INITIATIVES**

During fiscal year 2019, the State of Utah continued to rank among the top states in private sector job growth and overall job growth. Due to continued economic expansion, the consensus revenue forecast adopted during the 2019 General Session anticipates that fiscal year 2020 will mark the tenth consecutive year of growth in unrestricted General Fund and Education Fund revenue collections.

Approximately \$1.1 billion in new unrestricted revenue was available for appropriation during the 2019 General Session from the fiscal year 2018 surplus and revenue growth forecast for fiscal years 2019 and 2020. Under the consensus forecast, \$670 million of this revenue was available for ongoing appropriations and \$429 million for one-time appropriations. An additional \$44 million was available due to a legal settlement, fiscal note bills and balance transfers, and future tax changes. Highlights of new appropriations for public and higher education, infrastructure, and other priorities are summarized below.

**Public Education** – The Legislature provided \$303 million in new ongoing state-directed funding for the K-12 education system. Among other things, this new funding will support enrollment growth, local decisions about increases in teachers' compensation, additional support for students at risk of academic failure, greater access to technology for instructional purposes, expansion of the Dual Language Immersion programs, student safety programs, and greater access to school counseling services.

**Higher Education** – The Legislature provided \$105 million in new ongoing state funding for the postsecondary-education systems. Among other things, this new funding will support enrollment growth, efforts to further align educational offerings with workforce demands and efforts to knock down barriers to graduation.

The Legislature provided \$150 million in new one-time state funding for the construction or renovation of three postsecondaryeducation facilities: Dixie State University Science Building, the Utah Valley University Business Building, and the Weber State University Engineering and Applied Science Building.

The 2019 General Session initiated several changes to higher education capital facilities funding mechanisms. The Legislature created two new higher education capital facilities funds, one for the Technical Colleges, and the other for Higher Education and shifted funding from the ongoing appropriation of \$87 million to the Capital Projects Fund. The Legislature also expressed intent to appropriate \$7 million one-time in fiscal year 2021 and \$14 million ongoing beginning in fiscal year 2022 to the Technical Colleges Capital Projects Fund and \$36.5 million one-time in fiscal year 2021 and \$73 million ongoing beginning in fiscal year 2022 to the Higher Education Capital Projects Fund.

**Social Services** – Social Services programs received \$61.4 million in new ongoing state general funds during the 2019 legislative session. These appropriations will address cost inflation and enrollment growth in current programs, but will also support new programs and the expansion of services associated with various pieces of legislation. The largest share of new state funds allocated to social service agencies went to the state Medicaid program. These dollars covered cost increases associated with programmatic changes, inflation and enrollment growth for individuals covered by Medicaid, and in-home waiver services.

Beyond the status quo, the 2019 General Session addressed the long-standing and much-debated issue of Medicaid expansion by expanding coverage to adults with income up to 100 percent of the Federal Poverty Level (FPL) with provisions in place to

expand to 138 percent FPL if certain Medicaid waivers are not approved by the federal government. As of this writing, the Federal Center for Medicare and Medicaid Services has denied Utah's request for 90 percent federal cost sharing to serve the State's expansion population up to 100 percent FPL as contemplated by Senate Bill 96, *Medicaid Expansion Adjustments*. Consequently, the State is currently developing its next-stage Medicaid expansion waiver request, which will include coverage for newly eligible adults up to 138 percent FPL, along with various other elements such as a self-sufficiency requirement for program beneficiaries and a lock-out period for program violations.

Another noteworthy item is the State's efforts to address air quality. The Legislature appropriated \$28.2 million for air quality related projects in the 2019 legislative session. That funding is for upgrades to equipment, incentives for private individuals and businesses, and messaging activities. This also includes just over \$6 million for state government telework initiatives.

**Transportation** – With Utah's population projected to increase more than 40 percent by 2040, the State faces significant transportation needs. The fiscal year 2020 budget contains approximately \$1.7 billion for the Department of Transportation (UDOT) to help ensure that Utah citizens continue to enjoy a high degree of mobility.

**Other Highlights** – During the 2019 General Session, the Legislature approved the equivalent of a 2.5 percent salary increase for state employees. Legislators appropriated \$24.8 million General Fund to the General Fund Budget Reserve Account and \$69.1 million Education Fund to the Education Fund Budget Reserve Account. The Capitol Preservation Board received \$110 million one-time to address space needs for the Department of Agriculture, Department of Heritage and Arts, and agencies residing on Capitol Hill. Additionally, during the 2018 Third Special Session, the legislature appropriated \$67 million in fiscal year 2019 and \$110 million ongoing (plus \$58 million one-time in fiscal year 2020) for cash funding of the remaining known costs of constructing a new state prison near the Great Salt Lake. The \$110 million ongoing appropriation was later switched to one-time as a component of the State's revenue restructuring process.

**State Employee Other Postemployment Benefit Plan** – The Actuarially Determined Contribution (ADC) for the State Employee Other Postemployment Benefit (OPEB) plan was \$25.9 million. The Legislature considered this ADC when establishing the OPEB budget for fiscal year 2020. The ADC represents a level of funding that, if paid on an ongoing basis, is actuarially projected to fund the unfunded liability over a period of five years.

#### AWARDS AND ACKNOWLEDGEMENTS

The Government Finance Officers Association (GFOA) awarded the *Certificate of Achievement for Excellence in Financial Reporting* to the State of Utah for its comprehensive annual financial report for the fiscal year ended June 30, 2018. This was the thirty-fourth consecutive year the State has achieved this prestigious award.

In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current comprehensive annual financial report continues to meet the Certificate of Achievement Program's requirements, and we are submitting it to GFOA to determine its eligibility for another certificate. We are committed to this effort, and we intend to maintain a highly qualified and professional staff to make this certification possible.

The preparation of this report would not have been possible without the efficient and dedicated service of the entire staff of the Division of Finance, Department of Administrative Services. We also express our gratitude to the budget and accounting officers throughout state government and the Office of the State Auditor for their assistance.

Sincerely,

John Reidhard

John C. Reidhead, CPA Director of Finance

# FINANCIAL SECTION

OFFICE OF THE STATE AUDITOR

# **INDEPENDENT STATE AUDITOR'S REPORT**

To Members of the Utah State Legislature and The Honorable Gary R. Herbert Governor, State of Utah

## **Report on the Financial Statements**

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Utah (State), as of and for the year ended June 30, 2019, and the related notes to the financial statements, which collectively comprise the State's basic financial statements as listed in the table of contents.

## Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

## Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We did not audit the financial statements of the following funds or entities:

- School and Institutional Trust Funds Office which represents 96 percent of the assets, 97 percent of the fund balances, and 53 percent of the revenues of the Permanent Trust Lands Fund.
- Student Assistance Programs which represent all of the assets, net position, and revenues of the Student Assistance Programs' major enterprise fund.
- Public Employees Health Program, Utah Transit Authority, University of Utah Hospitals and Clinics, the University of Utah's component units, and Utah State University Research Foundation which collectively represent 41 percent of the assets, 27 percent of the net position, and 48 percent of the revenues of the aggregate discretely presented component units.
- Utah Retirement Systems and Utah Educational Savings Plan dba my529 which represent 80 percent of the assets, 81 percent of the fund balance/net position, and 21 percent of the revenues/additions of the aggregate remaining fund information.

Those financial statements were audited by other auditors whose reports have been furnished to us, and our opinion, insofar as it relates to the amounts included for these entities, is based solely on the reports of the other auditors.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

#### **Opinions**

In our opinion, based on our audit and the reports of other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State as of June 30, 2019, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

#### Emphasis of Matter

During the 2018 General Session of the Utah State Legislature, the governance structure of the Utah Transit Authority was modified, creating a governing board appointed by the Governor. Due to this change in governance structure, the State can now impose its will on UTA, effective November 1, 2018. As a result, UTA is now included as part of the State of Utah's reporting entity as a major discrete component unit, and the Statement of Activities - Component Units reflects a \$993.677 million increase in net position restricted for transit services. See further discussion in Note 2. Our opinion is not modified with respect to this matter.

#### **Other Matters**

#### Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the following informationmanagement's discussion and analysis (pages 18-30), and the budgetary comparison schedules and information about the State's pension plans, other postemployment benefit plans, and infrastructure assets reported using the modified approach (pages 136-153) - be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

#### Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the State's basic financial statements. Supplementary information such as the combining and individual fund financial statements and schedules, and other information such as the introductory and statistical sections, are presented for purposes of additional analysis and are not a required part of the basic financial statements. The combining and individual fund financial statements and schedules (pages 158-203) are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, based on our audit, the procedures performed as described above, and the reports of other auditors, the combining and individual fund financial statements and schedules are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The introductory and statistical sections (pages 1-11 and 207-243) have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

#### Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report, dated November 25, 2019, on our consideration of the State's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the State's internal control over financial reporting and compliance.

Office of the State auditor

## Management's Discussion and Analysis

#### INTRODUCTION

The following is a discussion and analysis of the State of Utah's financial performance and condition, providing an overview of the State's activities for the fiscal year ended June 30, 2019. Please read this in conjunction with the transmittal letter in the Introductory Section of this report and with the State's financial statements that follow this section.

#### HIGHLIGHTS

#### Government-wide

- Total assets and deferred outflows of resources of the State exceeded liabilities and deferred inflows of resources by \$27.588 billion (reported as net position). Of this amount, \$3.167 billion (unrestricted net position) may be used to meet the government's ongoing obligations while \$24.421 billion is restricted for specific uses or invested in capital assets.
- The State's total net position increased \$1.278 billion or 4.86 percent over the prior year. Net position of governmental activities increased \$1.178 billion or 5.17 percent. Net position of business-type activities increased \$100.265 million or 2.83 percent.

#### Fund Level

- The governmental funds reported combined ending fund balances of \$7.317 billion, an increase of \$696.201 million in comparison with the prior year. Approximately 37.19 percent, or \$2.721 billion of the ending fund balance is considered unrestricted (committed, assigned, or unassigned) and is available for spending either at the government's discretion or upon legislative approval.
- The General Fund ended the fiscal year with a zero dollar surplus by using \$21.707 million of the \$112.180 million of General Fund budgeted revenues set aside for fiscal year 2020. Because there was no revenue surplus, there were no statutory transfers from the General Fund to any stabilization or reserve accounts.
- The Education Fund ended the fiscal year with a \$107.275 million surplus after a statutory transfer of \$33.510 million to the Education Budget Reserve Account.
- The State's stabilization accounts, the General Fund Budget Reserve Account (Rainy Day Fund), Medicaid Budget Stabilization Account, and Education Budget Reserve Account, ended the fiscal year with balances of \$225.121 million, \$74.819 million, and \$471.908 million, respectively.
- Sales tax revenues in the governmental funds increased \$158.622 million or 5.99 percent, compared to \$243.649 million or 10.14 percent increase in the prior year. Total tax revenues increased \$83.919 million or 3.49 percent in the General Fund and \$410.547 million or 9.15 percent in the Education Fund.

#### Long-term Debt

• The State's long-term bonded debt decreased by a net \$416.616 million or 9.54 percent. General obligation bonds for the primary government decreased \$123.801 million or 4.96 percent, while revenue bonds for the primary government decreased \$292.815 million or 15.80 percent.

#### **OVERVIEW OF THE FINANCIAL STATEMENTS**

This report includes the State's Basic Financial Statements, Required Supplementary Information, and Supplementary Information. The Basic Financial Statements include three components: government-wide financial statements, fund financial statements, and notes to the financial statements.

#### **Government-wide Statements – Reporting the State as a Whole**

The <u>Statement of Net Position</u> and the <u>Statement of Activities</u> together comprise the *government-wide financial statements*. These statements provide a broad overview of the State's finances as a whole with a long-term focus and are prepared using the *full-accrual* basis of accounting, similar to private-sector companies. This means all revenues and expenses are recognized regardless of when cash is received or spent, and all assets, deferred outflows of resources, liabilities, and deferred inflows of resources, including capital assets and long-term debt, are reported at the entity level. The government-wide statements report the State's *net position*—the difference between assets and deferred outflows of resources, compared to liabilities and deferred inflows of resources—and how it has changed from the prior year. Over time, increases and decreases in net position measure whether the State's overall financial condition is improving or deteriorating. In evaluating the State's overall condition, additional non-financial factors should

#### Management's Discussion and Analysis

be considered such as the State's economic outlook, changes in its demographics, and the condition of its capital assets and infrastructure. The government-wide statements report three activities:

- *Governmental Activities* Most of the State's basic services fall under this activity including education, transportation, public safety, courts, corrections, health, and human services. Taxes and federal grants are the major funding sources for these programs.
- *Business-type Activities* The State operates certain activities much like private-sector companies by charging fees to customers to cover all or most of the costs of providing the goods and services. Student loans, unemployment compensation, water loan programs, and liquor sales are examples of business-type activities.
- *Component Units* A number of entities are legally separate from the State, yet the State remains financially accountable for them. Colleges and Universities, Utah Communications Authority, and Utah State Fair Corporation are examples of discrete component units.

#### Fund Financial Statements - Reporting the State's Most Significant Funds

The <u>fund financial statements</u> provide detailed information about individual major funds, not the State as a whole. A fund is a group of related accounts that the State uses to keep track of specific resources that are segregated for a specific purpose. Some funds are required by law to exist, while others are established internally to maintain control over a particular activity. All of the State's funds are divided into three types, each of which uses a different accounting approach:

- *Governmental Funds* Most of the State's basic services are accounted for in governmental funds and are essentially the same functions reported as *governmental activities* in the government-wide statements. Governmental funds use the *modified accrual* basis of accounting, which measures the flow of current financial resources that can be converted to cash and the balances left at yearend that are available for future spending. This *short-term* view of the State's financial position helps determine whether the State has sufficient resources to cover expenditures for its basic services in the near future.
- *Proprietary Funds* Proprietary funds include enterprise funds and internal service funds and account for state activities that are operated much like private-sector companies. Like the government-wide statements, proprietary fund statements are presented using the *full-accrual* basis of accounting. Activities whose customers are mostly outside of state government (e.g., water loans to local governments) are accounted for in *enterprise funds* and are the same functions reported as *business-type activities*. Thus, the *enterprise fund* financial statements reinforce the information reported for *business-type* activities in the government-wide statements, but provide more detail and additional information, such as cash flows. Activities whose customers are mostly other state agencies (e.g., motor pool) are accounted for in *internal service funds*. The internal service fund activities are consolidated with the governmental activities in the government-wide statements because those services predominantly benefit governmental rather than business-type activities.
- *Fiduciary Funds* Fiduciary funds account for assets that, because of trust relationships, can be used only for trust beneficiaries. The State is responsible for ensuring these assets are used for their intended purposes. Fiduciary funds use the *full-accrual* basis of accounting, but are *not* included in the government-wide statements because their assets are not available to finance the State's own programs.

#### **Reconciliation between Government-wide and Fund Statements**

The financial statements include <u>reconciliation schedules</u> that explain the differences between the amounts reported for *governmental activities* on the government-wide statements (full accrual basis of accounting, long-term focus) with amounts reported on the *governmental* fund statements (modified accrual basis of accounting, short-term focus). The following are some of the major differences between the two statements:

- Capital assets and long-term debt are included on the government-wide statements, but are not reported on the governmental fund statements.
- Capital outlay expenses result in capital assets on the government-wide statements, but are reported as expenditures on the governmental fund statements.
- Bond proceeds result in liabilities on the government-wide statements, but are other financing sources on the governmental fund statements.
- Certain tax revenues that are earned but not yet available are reported as revenue on the government-wide statements,

#### Management's Discussion and Analysis

but are deferred inflows of resources (unavailable revenue) on the governmental fund statements.

#### Notes to the Financial Statements

The <u>notes</u> provide additional information and schedules that are essential to a complete understanding of the financial statements. The notes apply to both the government-wide financial statements and the governmental fund financial statements.

#### **Required Supplementary Information (RSI)**

Following the Basic Financial Statements are <u>budgetary comparison schedules</u> for major funds with legally adopted budgets. In addition, RSI includes up to ten years of information on the State's pension plans, including schedules on the changes in the net pension liability and employer contributions for all systems with up to ten years of information. RSI also includes schedules for the State's defined benefit Other Postemployment Benefit Plans and condition assessment data related to infrastructure. RSI further supports the information in the basic financial statements.

#### **Supplementary Information**

<u>Supplementary Information</u> includes combining statements for the State's nonmajor governmental, nonmajor enterprise, internal service funds, fiduciary funds, and nonmajor discretely presented component units. This section also includes schedules which compare budgeted expenditures to actual results at the legal level of control, which is generally the line item level of the *Appropriations Acts*.

#### **Statistical Section**

This section provides up to ten years of financial, economic, and demographic information.

#### Adjustments to Beginning Net Position and Other Significant Changes

As discussed in <u>Note 2</u> of the financial statements, governmental activities beginning net position decreased \$15.469 million to reflect the removal of land improvements associated with land that was sold in previous years within the Trust Lands Permanent Fund.

Also discussed in <u>Note 2</u>, as a result of legislation passed during the 2018 Legislative General Session, the Utah Transit Authority is now included as part of the reporting entity of the State of Utah as a major discrete component unit. This resulted in an increase of component unit net position restricted for transit services of \$993.677 million as reflected in the government-wide Statement of Activities - Component Units.

#### FINANCIAL ANALYSIS OF THE STATE AS A WHOLE

#### **Net Position**

The largest component of the State's net position, 62.28 percent, reflects investments in capital assets (e.g., land, buildings, equipment, intangible assets, roads, and other infrastructure) less the outstanding debt issued to finance those assets. These types of assets are not available for future spending, nor can they be readily liquidated to pay off their related liabilities. Resources needed to repay capital-related debt must be provided from other sources.

Restricted net position comprises 26.25 percent of total net position and is subject to constitutional, legal, or external constraints on use. Net position that is restricted by the *Utah Constitution* includes individual income and corporate income taxes that can be used only for public and higher education costs and proceeds from fees, taxes, charges related to motor vehicles that can be used only for transportation expenses, and earnings received from investment of the permanent State School Fund.

The remaining balance of unrestricted net position may be used to meet the State's ongoing obligations, though certain laws and internally imposed commitments or assignments of resources further limit the purposes for which much of the overall net position may be used.

(MD&A continues on next page.)

Percent change in total							
Net Position from prior year	5.17%		2.83%		4.86%		

* This schedule has been restated for prior period adjustments as described in Note 2.

The State's total net position increased \$1.278 billion or 4.86 percent in fiscal year 2019. In comparison, net position in the prior year increased \$1.525 billion or 6.15 percent. The increase in total net position reflects a growing economy and the active management of the State's resources. The change in net position is comprised of the following:

- *Net Investment in Capital Assets* Total net investment in capital assets increased slightly by 1.92 percent or \$323.325 million. The State's investment in highways and buildings exceeded depreciation and the net additional debt that was incurred to finance capital-related projects.
- *Restricted Net Position* Total restricted net position increased \$325.535 million or 4.71 percent over the prior year adjusted net position:

#### Restricted Net Position of Governmental Activities increased \$260.462 million or 5.55 percent, as follows:

Transportation net position increased \$93.750 million or 24.23 percent due to an increase in unspent restricted revenues. Public Education - Nonexpendable net position increased \$72.404 million or 4.46 percent, primarily due to revenues generated from land use and gains on sale of trust lands in the Trust Lands Permanent Fund. Public Education – Expendable net position increased \$68.893 million or 2.78 percent primarily due to an increase in individual and corporate income tax revenues from the continued economic expansion. The increase in corporate tax revenues was also due to recent federal tax changes, which created a temporary surge as corporations repatriated foreign corporate earnings.

<u>Restricted Net Position of Business-type Activities</u> increased \$65.073 million or 2.93 percent due in part to a \$41.020 million increase in the Unemployment Compensation and Insurance Program as unemployment compensation revenues exceeded related claims. Net position restricted for loan programs also increased \$26.551 million as a result of additional loan capital provided from federal contracts and grants for Water Loan Programs, Community and Economic Loan Programs, and Student Assistance Programs. These increases were offset by a \$2.498 million decrease in net position restricted for debt service.

• Unrestricted Net Position – Total unrestricted net position in governmental activities increased \$597.883 million or 47.84 percent primarily due to an increase in the amount unspent and carried forward in the General Fund and for transportation and capital projects. Unrestricted net position in business-type activities increased \$31.457 million or 2.44 percent due to dedicated sales tax revenues provided by the State as additional capital for the Water Loan Programs.

(Charts on next page)

This year the State received 56.38 percent of its revenues from state taxes and 28.41 percent of its revenues from grants and contributions, primarily from federal sources. In the prior year, state taxes accounted for 55.51 percent and grants and contributions were 29.22 percent of total revenues. Charges for goods and services such as licenses, permits, liquor sales, park fees, and court fees, combined with other miscellaneous collections, comprised 15.21 percent of total revenues in fiscal year 2019, compared to 15.27 percent in fiscal year 2018.

#### **Governmental Activities**

The State's total governmental revenues from all sources increased \$740.811 million or 5.41 percent. The majority of this increase was due to an increase in tax revenues of \$556.618 million or 6.92 percent due to continued growth in the economy. Significant changes in governmental activities' revenues and expenses at the government-wide level mirror the changes in the governmental funds, except for Transportation expenses as discussed below. However, due to differences in measurement focus and timing of collections, the increase at the government-wide level should not be used to predict future increases at the fund statement or budget level.

• *Transportation* – Expenses increased \$318.318 million or 32.80 percent, as compared to the prior year, primarily due to a decrease in the amount spent for capital outlay (i.e. land, roads, and bridges). The amount expended for capital outlay is not reported as expense, but as an asset on the government-wide statements.

The following table shows to what extent program revenues (charges for services and grants) covered program expenses. For fiscal year 2019, program revenues covered \$5.602 billion or 41.81 percent of \$13.398 billion in total program expenses. For the remaining \$7.796 billion or 58.19 percent of program expenses, the State relied on state taxes and other general revenues. For further discussion of changes, see the section here entitled "Financial Analysis of the State's Governmental Funds."

(Table on next page)

#### **Business-type Activities**

The State's business-type activities operate primarily from program revenues, except for the Water Loan Programs and Agriculture Loan Fund, that by law receive dedicated sales tax revenues. Accounting standards require unemployment taxes collected from employers and deposited in the Unemployment Compensation Fund be reported as charges for services rather than taxes. Therefore, taxes in the business-type activities are comprised entirely of sales tax revenues in the water and agriculture loan programs.

Overall, total revenues from the State's business-type activities decreased \$24.433 million or 2.69 percent from the prior year as follows: Dedicated sales and use tax decreased \$25.586 million or 42.74 percent as a result of a statutory reallocation. Operating grants and contributions decreased \$10.817 million or 24.37 percent due to a decreases in federal contracts and grants in the Water Loan Programs and Community and Economic Loan Programs. These decreases were offset by an increase in unrestricted investment income of \$11.601 million or 20.51 percent due to higher interest rates.

Total expenses for the State's business-type activities increased overall by \$7.302 million or 1.16 percent. The increase was due to an \$18.325 million or 6.26 percent increase in expenses related to liquor retail sales as a result of higher sales volume. This increase was offset by a \$6.082 million or 5.06 percent decrease in the student loan service expenses within the Student Loan Programs and a \$3.762 million or 2.41 percent decrease in the Unemployment Compensation Fund due to fewer claims paid.

Changes in the State's business-type activities at the government-wide level mirror the changes noted in the State's proprietary funds, except that the State's proprietary funds provide detail summarized by program or fund, while the business-type activity at the government-wide level is presented overall. The changes in the State's proprietary funds are detailed further in the section entitled "Financial Analysis of the State's Proprietary Funds."

#### FINANCIAL ANALYSIS OF THE STATE'S GOVERNMENTAL FUNDS

#### **Adjustment to Beginning Fund Balance**

As described in <u>Note 2</u> of the financial statements, the beginning fund balance was adjusted to reflect a decrease \$15.469 million in the Trust Lands Permanent Fund to remove land improvements associated with land that was sold in previous years.

#### **Fund Balances**

At June 30, 2019, the State's governmental funds reported combined ending fund balances of \$7.317 billion. Of this amount, \$1.818 billion or 24.85 percent is nonspendable, either due to its form or legal constraints, and \$2.775 billion or 37.92 percent is restricted for specific programs by external constraints, constitutional provisions, or contractual obligations. Unspent bond proceeds, revenue restricted for public education, revenue that derives from the operation of motor vehicles on public highways, mineral lease revenues, and earnings received from investment of the Trust Lands Permanent Fund are included in restricted fund balance. An additional \$1.835 billion or 25.08 percent of total fund balance has been committed to specific purposes. Committed amounts cannot be used for any other purpose unless approved by the Legislature. An additional \$889.037 million or 12.15 percent of total fund balance has been assigned to specific purposes, as expressed by legislative intent. There was no unassigned fund balance available for future appropriations at yearend.

#### Management's Discussion and Analysis

#### **General Fund**

The General Fund's total fund balance increased \$183.304 million or 17.37 percent in fiscal year 2019. The General Fund ended the year with a zero dollar surplus, or unassigned fund balance, by using \$21.707 million of the \$112.180 million of General Fund budgeted revenues set aside for fiscal year 2020. In the prior year, the General Fund ended the year with a \$7.966 million surplus, or unassigned fund balance. Because there was no surplus, no statutory transfers were made to the General Fund Budget Reserve Account in fiscal year 2019. The Account ended the year with a balance of \$225.121 million after the Legislature elected to appropriate \$73.313 million to the account during the year.

Specific changes in the General Fund balance include the following:

- Nonspendable fund balance increased \$1.975 million or 10.89 percent due to an increase in prepaid items of \$5.162 million as a result of an increase in Medicare premiums paid for dual eligible Medicaid members at yearend. This increase was offset by a \$2.887 million decrease in the long-term portion of loans receivable due to a reduction of loan balances within Internal Services Funds.
- Restricted fund balance increased \$4.263 million or 10.94 percent as a result of an increase in revenues set aside for specific purposes due to constraints that are imposed externally or by law.
- Committed fund balance increased overall by \$159.943 million or 23.69 percent due to an increase in monies set aside for specific purposes as follows: (1) Agency carry-forward balances increased \$81.481 million; (2) monies set aside for committed purposes in various restricted accounts increased \$5.149 million; and (3) the General Fund Budget Reserve Account balance increased \$73.313 million due to a legislative appropriation to the account.
- Assigned fund balance increased \$25.089 million or 7.97 percent. The increase was due in part to a \$13.708 million increase in the amount set aside for next year's budget by the Legislature. Assigned fund balance also increased \$13.355 million due to an increase in tax accruals assigned by law. These increases were offset by a \$1.975 million decrease in nonspendable items, as described above. Items classified as nonspendable reduce assigned fund balance.

Total tax revenues in the General Fund increased \$83.919 million or 3.49 percent, the largest of which was sales and use tax which increased \$83.352 million or 4.04 percent. Overall, sales tax revenue in all governmental funds increased \$158.622 million or 5.99 percent primarily due to growth in the Utah economy.

Total General Fund non-tax revenues increased \$146.172 million or 3.77 percent, explained as follows: (1) Federal contracts and grants increased \$125.530 million or 4.22 percent primarily due to an increase in federal funding for Medicaid programs and the National Guard. Additional increases in federal contracts and grants correspond to the increase in related expenditures as explained below; (2) Investment income increased \$19.456 million or 80.48 percent due to higher interest rates; (3) Charges for services increased \$10.224 million or 2.08 percent driven by demand for government services; and (4) Miscellaneous and other revenues decreased \$9.811 million or 3.53 percent primarily due to a one-time increase in tobacco settlement proceeds in the prior year.

Overall, total General Fund expenditures increased \$447.686 million or 6.45 percent as the State responded to a growing economy and an increase in the public's demand for government services. Significant changes in expenditures occurred in the following areas:

• *Health and Environmental Quality* – Total expenditures increased \$173.718 million or 6.16 percent primarily due to growth in the Medicaid program. These expenditures increased \$166.621 million as a result of: (1) implementation of the new Medicaid Expansion program; (2) an increase in payments to nursing homes for qualifying services; (3) increased utilization in the Community Supports Waiver program; (4) an increase in expenditures related to the replacement of the

Medicaid Management Information System; and (5) the full fiscal year impact of a 3.50 percent increase in funding authorized for Medicaid's accountable care organizations, which was effective January 2018.

- Higher Education Total expenditures increased \$101.636 million or 9.61 percent due to an increase in state appropriations. The State provided \$29.100 million for higher education employee compensation and benefit increases. Major new state-funded system-wide initiatives included: (1) \$9.200 million for programs to assist institutions in meeting regional workforce needs; (2) \$9.100 million for enrollment growth and to increase capacity; (3) \$4.800 million to implement programs that will reduce barrier to students' completing their degree; (4) \$3.300 million for the Board of Regents' Scholarship; and (5) \$3.300 million for market demand programs for the Utah System of Technical Colleges.
- *Human Services and Juvenile Justice Services* Total expenditures increased \$57.536 million or 6.76 percent due in part to a \$36.264 million funding increase within Services for People with Disabilities, as follows: (1) \$23.496 million for individuals receiving disability services and youth aging out of services; (2) \$6.634 million to provide services for people on the waiting list in the Medicaid Home and Community Based Waiver Services Program; and (3) \$5 million for salary increases for direct care service workers. Expenditures also increased \$5.020 million to address suicide prevention, crisis help lines, and children's center family support and \$2.270 million for children in family treatment, opioid crisis funding, and medication assisted treatments.
- Public Safety Total expenditures increased \$41.766 million or 16.12 percent. Significant increases included: (1) \$17.628 million for the Utah Communications Authority for the 800 and 150 MHz radio networks and management of the 911 program; (2) \$14.715 million for the National Guard due to additional federal funding provided for the Aaron Butler Special Forces Readiness Center at Camp Williams; and (3) \$4.391 million for the Utah Highway Patrol for the Operation Rio Grande program.
- *General Government* Total expenditures increased \$26.613 million or 6.76 percent due to \$26 million (\$9 million ongoing and \$17 million in one-time funds) provided to the firefighter retirement program as a result of changes in insurance premium allocation.
- *Natural Resources* Total expenditures increased \$24.875 million or 11.20 percent due to increases in funding provided for wildland fire suppression and prevention, watershed rehabilitation and habitat restoration projects, and state parks maintenance and improvements.

In addition to the significant changes in expenditures described above, the increase in overall expenditures is also due to a \$23.213 million increase as a result of a 2.50 percent salary increase for most state employees, increases in health insurance costs, and targeted compensation increases.

#### **Budgetary Highlights – General Fund**

The Legislature adopted the initial fiscal year 2019 budget during the 2018 General Session (January to March 2018). The original consensus revenue estimates in the General Fund budget at the start of fiscal year 2019, excluding department-specific revenue sources such as federal grants and departmental collections, and miscellaneous transfers, were 5.35 percent higher than the final fiscal year 2018 budget. The increase was primarily due to growth in the sales and use tax due to the strong Utah economy. Budgeted expenditures were 10.30 percent higher than the final fiscal year 2018 budget. The Governor and Legislature were able to balance the original fiscal year 2019 budget using revenue growth, prior year reserves, and fund balances.

The fiscal year 2019 budget was again addressed during the 2019 General Session of the Legislature (January to March 2019). General revenue estimates had increased \$41.098 million from the original consensus estimates adopted during the 2018 General Session due to projected increases in sales and use tax and investment income. Revenue estimates and base budget resources allowed the Legislature to set aside \$112.180 million for fiscal year 2020 appropriations. In the end, taxes and other general revenues ended the year \$55.205 million below final budgeted amounts. Various statutory transfers and adjustments that occurred at yearend covered the shortfall in the final budgeted amounts. This included agencies lapsing \$8.707 million of unspent budgeted dollars back to the General Fund and reducing amounts set aside for fiscal year 2020 appropriations by \$21.707 million. Final budgets of department-specific revenues increased slightly from final budgets primarily due to an increase in the state mineral lease revenue. Final budgets for many of the departmental-specific revenue sources and related expenditures such as federal grants, departmental collections, and miscellaneous revenues are generally revised based on actual collections. The difference between final budgeted expenditures and actual expenditures is primarily due to nonlapsing and unspent restricted funds that will be carried forward to the next year.

#### **Education Fund**

The fund balance in the Education Fund increased overall by \$58.958 million or 5.15 percent from the prior year as revenues and transfers in exceeded expenditures and transfers out. The amount unspent and carried forward for education increased \$25.583 million. Education funds set aside for specific purposes increased \$13.477 million. Amounts set aside for fiscal year 2020 appropriations increased \$11.720 million. Tax accruals restricted by law for education increased \$5.264 million.

In addition to these changes, the Education Fund ended the year with a \$107.275 million surplus after a \$6.181 million property tax recapture and a \$33.510 million transfer to the Education Budget Reserve Account from an original revenue surplus of \$134.040 million. In the event of a "revenue surplus" in the Education Fund, state law requires that 25 percent of the surplus be transferred to the Education Budget Reserve Account. State law requires an additional 25 percent be transferred to repay prior year transfers out of the account, but limits these transfers to 11 percent of Education Fund appropriations. The Education Budget Reserve Account ended the year with a balance of \$471.908 million.

Overall, total revenue in the Education Fund increased \$377.509 million or 7.46 percent. Individual income tax increased \$303.117 million or 7.52 percent. Corporate income tax increased \$111.958 million or 26.47 percent. These increases were primarily due to continued economic expansion. The increase in corporate tax revenues was also due to recent federal tax changes, which created a temporary surge as corporations repatriated foreign corporate earnings. Investment income also increased \$9.379 million or 114.70 percent due to rising interest rates and an increase in funds available for investment. These increases were offset by decreases in other revenue sources. Federal contracts and grants expenditures and corresponding revenue decreased \$39.753 million or 8.48 percent due to the timing of federal funding utilized by the local school districts. Other taxes decreased \$4.528 million or 14.36 percent primarily due to a decrease in the Charter School Levy, a property tax imposed by the State to support Charter Schools. Miscellaneous and other revenues decreased \$3.625 million or 8.68 percent due to one-time settlement proceeds received in the prior year.

Overall, expenditures increased \$157.253 million or 3.95 percent in the Education Fund. The increase was primarily due to a \$176.811 million increase in the Minimum School Program to provide for student enrollment growth and 2.5 percent increase in the weighted pupil unit value, which is the primary funding mechanism for public education.

Net other financing uses increased \$424.814 million or 52.05 percent. This change resulted from a \$408.071 million increase in transfers out due to an increase in transfers for higher education and capital projects and a \$16.743 million decrease in transfers in from the Trust Lands Permanent Fund for the School Land Program.

#### **Transportation Fund**

Total fund balance in the Transportation Fund increased \$103.953 million or 25.50 percent from the prior year. Restricted fund balance increased \$101.862 million or 25.98 percent as restricted revenues and transfers in exceeded expenditures and transfers out. Assigned fund balance increased \$3.335 million or 292.54 percent due to an increase in unspent general revenues appropriated to the Transportation Fund. Nonspendable inventory decreased \$619 thousand or 4.50 percent.

Overall, transportation revenues increased \$20.418 million or 1.83 percent. The increase resulted from the following changes in revenue as compared to the prior year:

- Motor and special fuels tax increased \$21.150 million or 4.23 percent due in part to a six-tenths of a penny per gallon gas tax increase that became effective January 1, 2019, and also the result of higher fuel consumption.
- License, permits, and fees increased \$7.004 million or 7.64 percent primarily due to an increase in registration fees and new fees for alternative fuel vehicles.
- Charges for services increased \$5.259 million or 10.53 percent due to an increase in driver's license fees.
- Investment income increased \$4.415 million or 85.30 percent due to rising interest rates.
- Federal contracts and grants decreased \$15.602 million or 3.88 percent as a result of timing differences related to highway construction projects.

Expenditures within the Transportation Fund decreased \$25.079 million million or 2.46 percent due to a decrease in state and federal funding provided for highway construction projects. Net other financing uses decreased \$6.772 million or 16.12 percent due in part to an \$11.713 million increase in the sale of capital assets, which was offset by a \$4.941 million increase in net transfers out of the fund for various purposes.

Authorized federal funding for highway construction remains relatively stable from year to year. However, the spending of state and federal revenue reflects the timing of highway construction projects, which is impacted by a variety of circumstances such as environmental studies or existing weather conditions. In addition, the Department of Transportation has discretion on allocating federal funds among projects, which impacts the amount of federal revenue reported in the Transportation Fund.

#### **Transportation Investment Fund**

Total fund balance in the Transportation Investment Fund increased \$15.476 million or 2.36 percent from the prior year. Restricted fund balance decreased \$54.770 million or 100 percent as general obligation bond proceeds were used for highway projects. Committed fund balance increased \$70.246 million or 11.71 percent due to unspent dedicated sales and use tax revenue at yearend.

Overall, revenues increased \$74.353 million or 11.09 percent. Sales and use tax revenues, statutorily reallocated from use in the General Fund to use for highway projects, increased \$59.212 million or 10.29 percent due to growth in the economy. Investment income increased \$13.291 million or 176.23 percent due to rising interest rates and an increase in funds available for investment. Expenditures increased \$100.593 million or 19.65 percent from the prior year due to increased spending on highway construction projects. Net other financing uses increased \$179.130 million or 288.38 percent, due to a \$181.142 million decrease in bond issuance and related premiums in the current compared to the prior year.

#### **Trust Lands Permanent Fund**

The fund balance of the Trust Lands Permanent Fund increased \$81.560 million or 3.16 percent from the prior year adjusted fund balance largely due to a \$77.735 million or 4.55 percent increase in nonspendable fund balance. This increase was attributable to revenues generated from land use and gains on sale of trust lands. As a result of a constitutional amendment that became effective July 1, 2017, the *Utah Constitution* allows all investment earnings of the of the Trust Lands Fund Permanent Fund to be distributed to beneficiaries, limited to annual distributions not to exceed four percent of the fund (based on a calculation described in statute).

Revenues decreased \$38.762 million or 20.71 percent. The decrease was largely attributable to a \$37.189 million or 27.57 percent decrease in investment income due to a change in investment strategies. Investment fund managers shifted from a heavy equity allocation to private market investments which take much longer to deploy and are slower to return capital. In the long-run, fund managers expect these strategies to have lower volatility and higher returns. Expenditures and transfers out decreased \$15.012 million or 12.93 percent due to a decrease in the amount available for distribution to beneficiaries. Sale of capital assets increased \$13.624 million or 66.24 percent due to an increase of surface and developed land sales. Overall, revenues and transfers in exceeded expenditures and transfers out resulting in a increase in assets of \$182.577 million or 6.99 percent, offset by an increase of liabilities of \$115.609 million or 1447.10 percent. Liabilities increased due to timing of distributions to beneficiaries.

#### FINANCIAL ANALYSIS OF THE STATE'S PROPRIETARY FUNDS

#### **Student Assistance Programs**

The net position of the Student Assistance Programs increased slightly by \$5.482 million or 1.47 percent from the prior year. The majority of this change is attributable to a decrease in assets of \$237.891 million or 12.50 percent mainly due to a decrease in student loans receivable and a decrease in total liabilities of \$248.873 million or 16.40 percent primarily due to payments on principal on student loan revenue bonds and notes payable. Operating revenues decreased \$7.436 million or 6.09 percent mainly due to a combination of a decrease in interest on student loans of \$9.420 million and a decrease of \$3.325 million in Federal Reinsurance payments, offset by a \$5.254 million increase in federal loans servicing revenue. Operating expenses decreased \$6.332 million or 5.27 percent primarily due to decreases of \$7.940 in student loan servicing expenses and \$3.328 million in payments to lenders for guaranteed claims, offset by an increase of \$5.678 million of interest expense. Of total net position of \$378.245 million, \$303.845 million is restricted for use within the programs by bond covenants or federal law.

#### **Unemployment Compensation Fund**

The State's average unemployment rate for the fiscal year 2019 decreased slightly from the prior year. Employer tax revenue decreased \$18.249 million or 9.74 percent due to an overall contribution rate decrease from the prior year. Expenses decreased \$3.762 million or 2.41 percent due to fewer claims paid. Overall, employer taxes and other revenues exceeded benefit payments and transfers out, resulting in an increase of net position of \$41.020 million or 3.57 percent. The entire net position of \$1.189 billion is restricted for use within the program by state and federal law.

#### Water Loan Programs

Revenues and expenses of the Water Loan Programs remained relatively unchanged from the prior year. Net position increased \$38.741 million or 3.77 percent primarily due to \$33.753 million of additional capital for loans provided from dedicated sales tax revenue. This increase is reflected in a corresponding increase of loans receivable of \$37.858 million. Of the total net position of \$1.067 billion, \$472.661 million is restricted for use within the Water Loan Programs by Federal grant requirements and \$152.882 million is restricted pursuant to bond agreements within the programs.

#### **Community Impact Loan Fund**

The net position of the Community Impact Loan fund decreased slightly by \$4.574 million or 0.65 percent from the prior year as transfers out and expense exceeded nonoperating revenues. Fund expenses remained mostly unchanged, but nonoperating revenues decreased \$29.291 million largely due to a \$27 million reduction in statutorily appropriated mineral lease revenue. This resulted in less funding available for future loan programs. There is no restriction on the Fund's net position of \$703.885 million.

#### CAPITAL ASSET AND LONG-TERM DEBT ADMINISTRATION

#### **Capital Assets**

The State's capital assets increased by a net \$365.884 million during the year. The change consisted of net increases in: infrastructure (i.e., state roads and bridges) of \$147.099 million; land and related assets of \$144.066 million; buildings and improvements of \$76.358 million; construction in progress of \$6.708 million; and machinery and equipment of \$4.630 million. Software decreased \$12.977 million due to current year amortization exceeding software additions. Significant projects included:

- Completion of the SR-108 widening project in Davis and Weber Counties
- Completion of the Provo District Courthouse
- Completion of the Fairpark Days of 47 Arena
- Purchase of the Taylorsville State Office Building and surrounding land

Several buildings financed by the State are actually owned by the colleges and universities, which are discrete component units of the State. Therefore, while the capital assets are on the discrete component unit's financial statements, any outstanding debt issued by the State to finance construction of those assets is reported as a liability of the State's governmental activities. This in turn reduces unrestricted net position. As of June 30, 2019, the State had \$59.671 million of outstanding debt related to capital assets of discretely presented component units.

At June 30, 2019, the State had commitments in capital projects funds of \$646.941 million for building projects and \$733.845 million for highway construction and improvement projects. The State also had commitments of \$424.166 million for road construction and other contract commitments in the Transportation Fund. Funding for the commitments will come from existing resources in these funds and from future appropriations and bond proceeds.

The State has adopted an allowable alternative to reporting depreciation for state roads and bridges (infrastructure assets) maintained by the Utah Department of Transportation (UDOT). Under this alternative method, referred to as the "modified approach," UDOT must maintain an asset management system and demonstrate that the infrastructure is being preserved at or above established condition levels. Infrastructure assets accounted for under the modified approach are not depreciated, and maintenance and preservation costs are expensed.

The State's established condition level for state roads is to maintain a certain percentage of mileage at a "fair" or better condition. The overall system has a target of 80 percent rated as "fair" or better. The most recent condition assessment completed in 2018 indicated that 91.40 percent of roads were in "fair" or better condition. These results reflect maintaining roads above target percentages and are consistent with calendar year 2017, when 90.36 percent of roads were assessed as "fair" or better condition.

The State's established condition level for bridges is to maintain 50 percent with a rating of "good" and no more than 10 percent of bridges with a "poor" rating. The most recent condition assessment, completed in April 2019, indicated that 64.38 percent and 2.91 percent of bridges were in "good" and "poor" condition, respectively. These results reflect maintaining bridges at a consistent condition level as 2018 when 64.52 percent of the bridges were assessed as "good" and 2.76 percent assessed were in "poor" condition.

During fiscal year 2019, the State spent \$310.690 million and \$54.828 million to maintain and preserve roads and bridges, respectively. These combined amounts were 22.45 percent above the estimated amounts of \$253.728 million and \$44.775 million needed to maintain these roads and bridges at established condition levels, respectively.

More information about capital assets is included in <u>Note 8</u> and more detailed information on the State's modified approach for reporting infrastructure is presented in the <u>Required Supplementary Information – Information About Infrastructure Assets Reported</u> Using the Modified Approach.

#### Long-term Debt

The *Utah Constitution* allows the State to contract debts not exceeding 1.50 percent of the value of the total taxable property of the State (i.e., constitutional debt limit). The Legislature authorizes general obligation indebtedness within this limit. The *State Appropriation and Tax Limitation Act* (i.e., statutory debt limit) further limits the outstanding general obligation debt of the State

#### **Management's Discussion and Analysis**

to not exceed 45 percent of the maximum allowable state budget appropriation limit. As of June 30, 2019, the general obligation indebtedness of the State was \$3.861 billion below the constitutional debt limit and \$1.561 billion below the statutory debt limit.

Revenue bonds of the State Building Ownership Authority are not backed by the general taxing authority of the State, but are payable from revenue provided through appropriations of the Legislature or other operating revenues. Revenue bonds of the Student Assistance Programs and Water Loan Programs are not backed by the general taxing authority of the State, but are payable solely from specific fees or loan repayments as pledged in the bond indentures.

	N	et O	utstanding	Bon	of Utah ded Debt as in millions)	une 30			
	Govern Activ				Busine Activ		Total P Gover		Percentage Change
	 2019		2018		2019	2018	2019	2018	2018 to 2019
General Obligation Bonds	\$ 2,374	\$	2,498	\$	_	\$ _	\$ 2,374	\$ 2,498	(4.96)%
Revenue Bonds:									
State Building Ownership Authority	205		244		77	83	282	327	(13.76)%
Student Assistance Programs	_		_		1,254	1,495	1,254	1,495	(16.12)%
Water Loan Programs	_		_		26	31	26	31	(16.13)%
Total Bonds Payable	\$ 2,579	\$	2,742	\$	1,357	\$ 1,609	\$ 3,936	\$ 4,351	(9.54)%

Total general obligation bonds payable net of premiums and discounts decreased \$123.801 million. Revenue bonds payable net of premiums and discounts decreased \$292.815 million for an overall net decrease of \$416.616 million during the fiscal year. The State issued \$127.715 million of general obligation highway bonds during the fiscal year.

The State's active management of its resources has helped the State maintain its triple-A rating on general obligation bonds from all three national rating agencies, and double-A rating on lease revenue bonds from two national rating agencies from which ratings were sought. These ratings are the best available and save millions of dollars in interest costs each year because the State is able to obtain very favorable interest rates on new debt. Note 10 contains more information about the State's outstanding debt.

#### ECONOMIC OUTLOOK AND NEXT YEAR'S BUDGET

Original general revenue estimates of the General Fund for fiscal year 2020 are 6.51 percent higher than actual fiscal year 2019 revenues. Original revenue estimates of the Education Fund for fiscal year 2020 are 1.83 percent higher than actual fiscal year 2019 revenues. The Legislature balanced the 2020 budget using projected revenue growth, prior year reserves, and fund balances.

Preliminary data for fiscal year 2020 show tax revenues to be in line with estimates. The State's overall unemployment rate is expected to be 2.90 percent in 2019, a decrease from the average 2018 rate of 3.10 percent. Taxable retail sales are expected to increase 3.90 percent in 2019 and increase 4.60 percent in 2020. Personal income is expected to increase 5.90 percent in 2019, and 6.50 percent in 2020. Because these indicators are measured on a calendar year basis, the impact on the State budget will not be fully realized until well into fiscal year 2020. The Governor and Legislature will review the fiscal year 2020 budget again during the upcoming 2020 General Session and take action as necessary to ensure a balanced budget.

#### CONTACTING THE STATE'S DIVISION OF FINANCE

This financial report is designed to provide our citizens, taxpayers, customers, investors, and creditors with a general overview of the State's finances and to demonstrate the State's accountability for the money it receives. If you have questions about this report or need additional financial information, please contact the Department of Administrative Services: Division of Finance, Financial Reporting Section at P.O. Box 141031, Salt Lake City, UT, 84114, phone (801) 538-3082 or by email at utahcafr@utah.gov. You may also visit our website at finance.utah.gov.

The preceding discussion and analysis focuses on the State's primary government operations. With the exception of a few nonmajor discretely presented component units, the State's discrete component units each issue separate audited financial statements that include their respective management's discussion and analysis. Discrete component unit statements may be obtained from their respective administrative offices or from the Office of the State Auditor, Utah State Capitol Complex, East Office Building, Suite E310, Salt Lake City, UT 84114. You may also visit their website at auditor.utah.gov.

## General Fund

This fund is the principal operating fund of the State. It accounts for all financial resources not accounted for and reported in another fund.

## **Education Fund**

This fund accounts for all corporate and income taxes that support public and higher education in the State. This fund is also used to account for specific revenues and expenditures that support the public elementary and secondary schools.

## Transportation Fund

This fund is maintained to account for revenues and expenditures associated with highway construction and maintenance. Principal funding is provided from dedicated highway user taxes, fees, and federal funds.

## Transportation Investment Fund

This capital projects fund is used to account for revenues and expenditures associated with the construction and reconstruction of specific state and federal highways. Projects designated for the Transportation Investment Capacity program are accounted for within this fund. Funding is provided from highway general obligation bonds, federal funds, vehicle registration fees, sales and use taxes, and appropriations.

## Trust Lands Fund

This permanent fund accounts for the investment earnings, land grants, and the sale of lands received from the federal *Enabling Act*. The principal in the fund is perpetual with the earnings used primarily to support public education.

## Nonmajor Governmental Funds

Nonmajor governmental funds are presented in more detail by fund type within <u>Supplementary</u> <u>Information – Combining Statements and Individual Fund Statements and Schedules</u>.

#### Reconciliation of the Balance Sheet to the Statement of Net Position

**Governmental Funds** 

(expressed in thousands)

e 30, 2019		
Total Fund Balances – Governmental Funds		\$ 7,316,843
The total net position reported for governmental activities in the Statement of Net Position is different because:		
Capital assets used in governmental activities are not financial resources and therefore are not reported in the governmental funds: (See <u>Note 8</u> )		
Land and Related Non-depreciable Assets	\$ 2,187,779	
Infrastructure, Non-depreciable	14,520,394	
Construction in Progress	1,236,466	
Buildings, Equipment, and Other Depreciable Assets	3,061,497	
Accumulated Depreciation	(1,519,375)	19,486,761
Deferred inflows of resources are not reported in the governmental funds:		
Revenues are not available soon enough after yearend to pay for the current period's expenditures	\$ 680,399	
Related to Pensions	(39,355)	
Related to Other Postemployment Benefits	(33,629)	607,415
Internal service funds are used by management to charge the costs of certain activities, such as insurance, technology services, and fleet operations to individual governmental funds. The assets, deferred outflows of resources, liabilities, and deferred inflows of resources of the internal service funds are included in governmental activities in the Statement of Net Position		32,219
Deferred outflows of resources are not reported in the governmental funds:		
Amount on Refundings of Bonded Debt	\$ 15,517	
Related to Pensions	402,786	
Related to OPEB	28,889	447,192
Long-term liabilities and related accrued interest are not due and payable in the current period and therefore are not reported in the governmental funds: (See <u>Note 10</u> )		
General Obligation and Revenue Bonds Payable	\$(2,473,203)	
Unamortized Bond Premiums	(106,066)	
Accrued Interest on Bonds Payable	(1,098)	
Pollution Remediation Obligation	(5,324)	
Settlement Obligation	(227)	
Arbitrage Liability		
Compensated Absences		
Capital Leases		
Net Other Postemployment Benefits Liability		
Net Pension Liability		(3,941,616
Total Net Position – Governmental Activities		\$ 23,948,814

#### Reconciliation of the Statement of Revenues, Expenditures and Changes in Fund Balances to the Statement of Activities

**Governmental Funds** 

(expressed in thousands)

or the Fiscal Year Ended June 30, 2019			
Net Change in Fund Balances – Governmental Funds		\$	696,201
The change in net position reported for governmental activities in the Statement of Activities is different because:			
Governmental funds report capital outlays as expenditures. However, in the Statement of Activities the cost of those assets is allocated over their estimated useful lives as depreciation expense. The primary government also constructs buildings for discrete component units. When the buildings are completed they are "transferred" to the respective discrete component unit and reported as expenses in its Statement of Activities. This is the amount by which capital outlays of \$663,500 exceeded depreciation expense of \$(117,383) and buildings "transferred" to discrete component units of \$(140,747) in the current period. (See <u>Note 8</u> )			405,370
In the Statement of Activities only the gain/loss on the sale of assets is reported, whereas in the governmental funds, the proceeds from the sales increase financial resources. Thus the change in net position differs from the change in governmental fund balance by the cost of the assets sold			(38,709)
Net effect of revenues reported on the accrual basis in the Statement of Activities that are reported as deferred inflows of resources in the governmental funds, as they are unavailable and do not provide current financial resources.			2,959
Internal service funds are used by management to charge the costs of certain activities, such as insurance, technology services, and fleet operations to individual governmental funds. The net revenue (expense) of the internal service funds is reported with governmental activities.			(2,132)
Bond proceeds and capital leases provide current financial resources to governmental funds by issuing debt which increases long-term liabilities in the Statement of Net Position. Repayments of bond and capital lease principal are expenditures in the governmental funds, but reduce liabilities in the Statement of Net Position: (See <u>Note 10</u> )			
Bonds Issued	\$ (127,715)		
Premiums on Bonds Issued	(23,308)		
Defeasance on Bonds	27,770		
Payment of Bond Principal	260,949		
Capital Lease Payments	 2,126		139,822
Expenditures are recognized in the governmental funds when paid or due for: items not normally paid with available financial resources; and interest on long-term debt unless certain conditions are met. However, the Statement of Activities is presented on the accrual basis and expenses are reported when incurred, regardless of when financial resources are available or expenditures are paid or due. This adjustment combines the net changes of the following balances:			
Pollution Remediation Outlays	\$ 42		
Settlement Obligations	46		
Compensated Absences Expense	(26,633)		
Accrued Interest on Bonds Payable	246		
Amortization of Bond Premiums	25,357		
Amortization of Deferred Amount on Refundings of Bonded Debt	(4,305)		
Arbitrage Interest Expense	(544)		
Other Postemployment Benefits Expense	18,860		
Pension Expense	 (38,645)		(25,576)
Change in Net Position – Governmental Activities		ф	1,177,935

This page intentionally left blank.

## Student Assistance Programs

These programs are administered by the State Board of Regents and are comprised of the Utah Higher Education Assistance Authority Student Loan Guarantee Program and the Student Loan Purchase Program. The purpose of these programs is to guarantee the repayment of student loans made by participating lenders to eligible borrowers and service outstanding student loans. Funds are acquired from the sale of bonds, lines of credit, and funding notes.

## **Unemployment Compensation Fund**

This fund pays claims for unemployment to eligible recipients and is funded through employer contributions and reimbursements, and federal grants.

### Water Loan Programs

These programs provide loans to local governments, water districts, and other entities for the purpose of upgrading water storage facilities and other related structures. Capital for this fund was provided from the General Fund and from general obligation bonds that were repaid with general tax revenues. Additional funds have been generated by issuing water loan recapitalization revenue bonds that are secured by pledged principal and interest payments of specific revolving water resources loan funds.

## Community Impact Loan Fund

This fund provides loans to local governments to alleviate the social, economic, and public financial impacts resulting from the development of the State's natural resources. Working capital for this fund is provided from federal mineral lease funds transferred from the General Fund. This fund also administers loans and loan guarantees from federal funds to small businesses under the Small Business Credit Initiative.

## Nonmajor Enterprise Funds

Nonmajor enterprise funds are presented in more detail within <u>Supplementary Information – Combining Statements</u> and Individual Fund Statements and Schedules.

## Governmental Activities - Internal Service Funds

These funds are maintained to account for the operation of state agencies that provide goods or services to other state agencies and other governmental units on a cost-reimbursement basis. These funds are presented in more detail within <u>Supplementary Information – Combining Statements and Individual Fund Statements and Schedules</u>.

## Pension and Other Employee Benefit Trust Funds

These funds are used to account for the defined benefit pension plans and defined contribution plans administered by the Utah Retirement Systems, and the Post-Retirement Benefits Trust Funds, defined benefit other postemployment benefit plans (OPEB Plans), and other employee benefit plans administered by the State.

## Investment Trust Fund

This fund is used to account for the investments related to external participants in the Utah State Public Treasurers' Investment Fund.

## Private Purpose Trust Funds

These funds are used to report resources of all other trust arrangements under which principal and income benefit individuals, private organizations, or other governments.

## Agency Funds

Agency funds account for assets held by the State as an agent for other governmental units, other organizations, or individuals.

Individual funds are presented in more detail by fund type within <u>Supplementary Information</u> – <u>Combining Statements and Individual Fund Statements and Schedules</u>.

## Public Employees Health Program

This program provides employee medical and other insurance services predominantly for agencies of the State. It also provides claims processing and insurance services for local governments and other public entities within Utah.

## University of Utah and Utah State University

These universities are funded through state appropriations, tuition, federal grants, and private donations and grants. In addition to instruction, these universities provide research and other services. The operations of the University of Utah also include the University of Utah Health Insurance Plans, a legally separate non-profit corporation of which the University is the sole corporate member, and its hospitals and clinics.

## Utah Transit Authority

The Authority is an independent, nonprofit corporation whose purpose is to provide a public mass transportation system for Utah communities along the Wasatch Front and a small portion of Juab County. The Authority's operations include commuter rail service, light rail service, bus service, paratransist service for the transit disabled, rideshare and van pool programs system wide.

## Nonmajor Component Units

Nonmajor component units are presented in more detail within <u>Supplementary Information – Combining Statements</u> and Individual Fund Statements and Schedules.

## NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies of the State of Utah conform in all material respects with Generally Accepted Accounting Principles (GAAP) as prescribed by the Governmental Accounting Standards Board (GASB). Preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

## A. Reporting Entity

For financial reporting purposes, the State of Utah's reporting entity includes the "primary government" and its "discrete component units." The primary government includes all funds, organizations, institutions, agencies, boards, and commissions that make up its legal entity. The State's discrete component units are legally separate organizations for which the State's elected officials are financially accountable.

The GASB has set forth criteria to be considered in determining financial accountability. These criteria include appointing a voting majority of an organization's governing body and either: (1) the ability of the State to impose its will on that organization; or (2) the potential for the organization to provide specific financial benefits to, or impose specific financial burdens on the State.

Where the State does not appoint a voting majority of an organization's governing body, GASB standards require inclusion in the reporting entity if: (I) an organization is fiscally dependent on the State because its resources are held for the direct benefit of the State, or can be accessed by the State; and (2) the potential for the organization to provide specific financial benefits to, or impose specific financial burdens on the State. In addition, discrete component units can be other organizations for which the nature and significance of their relationship with the primary government are such that exclusion would cause the financial statements to be misleading.

Except where noted below, the State's discrete component units issue their own separately audited financial statements as specialpurpose governments engaged only in business-type activities. These financial statements can be obtained from their respective administrative offices or from the Office of the State Auditor, Utah State Capitol Complex, East Office Building, Suite E310, Salt Lake City, UT 84114, or online at auditor.utah.gov.

Entities such as the local school districts, charter schools, and other local authorities of various kinds that may only partially meet the criteria for inclusion in this report have not been included. The State's support of the public education system is reported in the Education Fund (special revenue fund).

## **Blended Component Units**

A component unit should be reported as part of the primary government and blended into the appropriate funds if : (I) services are provided entirely or almost entirely to the primary government; (2) the governing body is substantively the same as the governing body of the primary government and there is a financial benefit or burden relationship, or the primary government has operational responsibility; (3) the component unit's total debt outstanding is expected to be repaid entirely or almost entirely by the primary government; or (4) if it is organized as a not-for-profit corporation in which the primary government is the sole corporate member.

Utah State Building Ownership Authority (blended with the primary government's debt service and capital projects funds) – The Authority was created by the Legislature as a body politic and corporate for the sole purpose of financing, owning, leasing, and operating facilities to meet the needs of state government. In addition, any debt is paid entirely with resources of the State. The Board is comprised of three members: the Governor or designee, the State Treasurer, and the Chair of the State Building Board. Separate financial statements are not required or issued for the Authority.

## **Discrete Component Units**

Discretely presented component units are reported in a separate column and/or rows in each of the government-wide statements to emphasize that they are legally separate from the State.

Except for the Utah Schools for the Deaf and Blind and the Utah System of Technical Colleges, the State appoints at least a majority of the governing board members of each of the State's discrete component units, subject in most cases with consent from the Senate. The Utah Schools for the Deaf and Blind and the Utah System of Technical Colleges are included in the reporting entity because they meet both the fiscal dependency and financial benefit and burden relationship. The State approves and modifies the budgets and provides financial support for the Utah Schools for the Deaf and Blind and the Utah System of Technical Colleges.

The State has the ability to impose its will on the colleges and universities, the Utah Communications Authority, and the Public Employees Health Program, and the Utah State Fair Corporation, due to the level of budget oversight. The State appointed board members of the Utah Transit Authority, the Military Installation Development Authority, the Heber Valley Historic Railroad Authority, the Utah State Fair Corporation, and the Utah Inland Port Authority can be replaced at will by the State.

The determination that a discrete component unit is "major" is based on the nature and significance of its relationship to the primary government. The State's major discrete component units are:

Public Employees Health Program – This Program provides employee medical and other insurance services predominantly for agencies of the State. It also provides claims processing and insurance services for local governments and other public entities within Utah. The Program is administered by the Utah State Retirement Board.

University of Utah and Utah State University – These universities are funded primarily through state appropriations, tuition, federal grants, and private donations and grants. In addition to instruction, these universities provide research and other services. The operations of the University of Utah also include the University of of Utah Health Insurance Plans, a legally separate non-profit corporation of which the University is the sole corporate member, and its hospital and clinics.

Utah Transit Authority – During the 2018 General Session the Legislature passed Senate Bill 136, modifying the governance structure of the Authority, creating a governing board appointed by the Governor. This Authority is an independent, nonprofit corporation whose purpose is to provide a public mass transportation system for Utah communities in the Wasatch Front and a small portion of Juab County The Authority's operations include commuter rail service, light rail service, bus service, paratransit service for the transit disabled, rideshare and van pool programs system wide.

The State's nonmajor discrete component units are:

Utah Communications Authority – This Authority was established by the Utah State Legislature to provide public safety communication services and facilities on a regional or statewide basis for the benefit and use of all state and local governmental agencies.

Utah Schools for the Deaf and the Blind – These Schools provide practical education to individuals with hearing and/or vision impairments. Although not required, these Schools issue separate but unaudited financial statements.

Utah State Fair Corporation – This Corporation is a nonprofit public corporation that operates the State Fair Park and conducts the Utah State Fair and other various expositions and entertainment events.

Colleges and Universities – Weber State University, Southern Utah University, Salt Lake Community College, Utah Valley University, Dixie State University, Snow College, and the Utah System of Technical Colleges. These colleges and universities are funded primarily through state appropriations, tuition, federal grants, and private donations and grants. Separately audited financial statements are issued for the technical colleges within the Utah System of Technical Colleges.

Utah Charter School Finance Authority – This Authority was created to provide an efficient and cost-effective method of issuing conduit debt on behalf of charter schools to acquire or construct charter school facilities. The debt is the responsibility of the charter schools and neither the State nor any political subdivision of the State is obligated for repayment of the debt. Accordingly, this debt is not included as part of the State's reporting entity. No financial statements are required or issued.

Military Installation Development Authority – This Authority is an independent nonprofit entity whose purpose is to provide for the development and improvement of project areas near military installations throughout the State.

Heber Valley Historic Railroad Authority – This Authority is an independent state agency that maintains and operates a scenic and historic railroad in and around the Heber Valley. The Authority issues a separate publicly available compilation report.

Utah Inland Port Authority – This Authority is an independent, nonprofit corporation whose purpose is to facilitate the development of the authority jurisdictional land to maximize the long-term economic and other benefit for the State. The Authority does not issue separate financial statements.

## **Fiduciary Component Units**

Utah Retirement Systems (URS) (pension trust and defined contribution plans) – URS administers pension funds for various public employee retirement systems and plans of the State and its political subdivisions. URS is an independent state agency subject to legislative and executive department budgetary examination and comment. The Utah State Retirement Board, a seven-member board, is established by statute to administer the systems and plans, and to serve as investment trustees of the funds. Six members are appointed by the State with the advice and consent of the Senate, while the State Treasurer serves as the seventh member. Because of the State's trustee responsibilities for these systems and plans, GAAP requires

them to be reported as pension trust funds of the primary government rather than discrete component units.

Utah Educational Savings Plan Trust, dba my529 (Private Purpose Trust Fund) – This trust is a non-profit, self-supporting entity that was created as a means to encourage investment in a public trust to pay for future higher education costs. It is administered by the Utah State Board of Regents acting in its capacity as the Utah Higher Education Assistance Authority. Because of the State's trustee responsibilities for this plan, GAAP requires it to be reported as a private purpose trust fund of the primary government rather than a discrete component unit.

In accordance with GAAP, fiduciary funds and discretely presented component units that are fiduciary in nature are excluded from the government-wide financial statements.

Related Organization (Excluded from Financial Statements)

Utah Housing Corporation (UHC) – UHC is a statutorily created public corporation. UHC issues bonds to provide capital for housing and home mortgages, especially for low and moderate-income families. Although the Governor appoints eight of the nine members of the governing board, and the ninth member is the State Treasurer, the State does not have the ability to impose its will on UHC since board members can only be removed for cause. UHC does not provide specific financial benefits to, or impose specific financial burdens on the State.

## B. Government-wide and Fund Financial Statements

## **Government-wide Financial Statements**

The Statement of Net Position and Statement of Activities report information on all nonfiduciary activities of the primary government and its discrete component units. Primary government activities are distinguished between *governmental* and *business-type* activities. Governmental activities generally are financed through taxes, intergovernmental revenues, and other nonexchange revenues. Business-type activities are financed in whole or in part by fees charged to external parties for goods or services.

The Statement of Net Position presents the reporting entity's nonfiduciary assets, deferred outflows of resources, liabilities, and deferred inflows of resources, with the difference reported as net position. Net position is restricted when there are constraints either externally imposed or imposed by constitutional provisions or enabling legislation.

The Statement of Activities demonstrates the degree to which the direct expenses of a given activity or segment are offset by program revenues. Direct expenses are those that are clearly identifiable within a specific activity. The State does not allocate general government (indirect) expenses to other activities. Program revenues include: (1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given activity; and (2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular activity. Taxes and other revenues not meeting the definition of program revenues are reported as general revenues.

## **Fund Financial Statements**

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide statements. For governmental and proprietary fund financial statements, the emphasis is on major individual governmental and enterprise funds, with each displayed in a separate column. All remaining governmental and enterprise funds are aggregated and reported as nonmajor funds. Internal service funds are also aggregated and reported in a separate column on the proprietary fund financial statements.

## C. Measurement Focus, Basis of Accounting, and Financial Statement Presentation

## Government-wide Financial Statements

The government-wide financial statements are prepared using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when the related liability is incurred, regardless of the timing of the cash flows. Nonexchange transactions in which the State receives value without directly giving equal value in exchange include taxes, grants, and donations. Tax revenue is recognized in the fiscal year in which the related sales, wages, or activity being taxed occurred. Revenue from grants and donations is recognized in the fiscal year in which all eligibility requirements have been met.

## **Governmental Fund Financial Statements**

The governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collected within the current period or expected to be collected soon enough thereafter to pay liabilities of the current period. For this purpose, the State generally considers taxes and other revenues to be available if the revenues are collected within 45 days after yearend. An exception to this policy is federal grant revenues, which generally are considered to be available if collection is expected within 12 months after yearend.

Expenditures are generally recorded when the related liability is incurred, as under the accrual basis of accounting. However, expenditures for principal and interest on long-term debt are recorded when due or when amounts have been accumulated in the debt service fund for payment of interest to be made early in the following year. Also, expenditures and related liabilities for compensated absences and claims and judgments are recorded only to the extent they have matured (i.e., come due for payment).

**Major Governmental Funds** – The State reports the following major governmental funds:

- **General Fund**. This fund is the principal operating fund of the State. It accounts for all financial resources not accounted for and reported in another fund.
- Education Fund. This special revenue fund accounts for all corporate taxes, income taxes, and revenues from taxes on intangible property that support public and higher education. Specific revenues that support public elementary and secondary schools in the State are also reported in the Education Fund.
- **Transportation Fund**. This special revenue fund accounts for dedicated highway user taxes, fees, and federal funds associated with construction, maintenance, and repair of state highways and local roads.
- **Transportation Investment Fund**. This capital projects fund accounts for vehicle registration fees, sales and use taxes, bond proceeds, and federal funds used in the construction and reconstruction of specific highway projects. Projects designated for the Transportation Investment Capacity program are accounted for in this fund.
- **Trust Lands Fund**. This is a permanent fund that accounts for investment earnings, land grants, and the sale of lands received from the federal *Enabling Act*. The principal in the fund is perpetual, with the earnings used primarily to support public education. The Utah Constitution allows all investment

earnings of the permanent fund to be distributed, limited to four percent of the fund (calculation described in statute). The Utah School and Institutional Trust Lands Administration (SITLA) and the School and Institutional Trust Fund Office (SITFO) manage the assets of the Trust. SITFO issued separate audited statements for the investments they manage.

**Nonmajor Governmental Funds** – The State's nonmajor governmental funds include special revenue funds, capital projects funds, and debt service funds. The nonmajor special revenue funds account for specific revenue sources that are restricted or committed to expenditures for specific purposes. Examples include tobacco settlement monies, environmental activities, crime victim reparations, debt collections, and rural development programs. The capital projects funds account for resources used for capital outlays, including the acquisition, construction, or improvement of capital facilities other than those financed by the Transportation Investment Fund, proprietary funds, or assets held in trust. The debt service funds account for resources used for the payment of principal and interest on general long-term debt obligations.

## **Proprietary Fund Financial Statements**

The financial statements of the proprietary funds are reported using the economic resources measurement focus and the accrual basis of accounting, similar to the government-wide financial statements described previously. Proprietary funds include both enterprise and internal service fund types. Enterprise funds report the activities for which fees are charged to external users for goods or services. Internal service funds account for goods and services provided primarily to other agencies or funds of the State, rather than to the general public.

Proprietary funds distinguish operating revenues and expenses from non-operating. Operating revenues and expenses generally result from providing services, and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. Revenues and expenses not meeting this definition, such as subsidies and investment earnings, are reported as non-operating.

**Major Enterprise Funds** – The State reports the following major enterprise funds in its proprietary fund statements:

- **Student Assistance Programs**. These programs guarantee the repayment of student loans made by participating lenders to eligible borrowers and service outstanding student loans.
- **Unemployment Compensation Fund**. This fund pays claims for unemployment to eligible recipients.
- Water Loan Programs. These programs provide loans to local governments, water districts, and other entities for the purpose of upgrading water storage facilities and other related structures.
- **Community Impact Loan Fund**. This fund provides loans to local governments to alleviate the social, economic, and public financial impacts resulting from the development of the State's natural resources. This fund also provides oversight of loans and loan guarantees from federal funds to small businesses under the Small Business Credit Initiative.

**Nonmajor Enterprise Funds** – The State's nonmajor enterprise funds include loan programs for low-income housing, agricultural, energy efficiency, and local government; Alcoholic Beverage Control (state liquor stores); Utah Correctional Industries; State Trust Lands Administration; the Utah Dairy Commission; and Medical Cannabis funds.

**Internal Service Funds** – The State reports the internal service fund type in the proprietary funds statements. The activities accounted for in internal service funds include technology services, general services, fleet operations, risk management, property management, human resource management, and attorney general legal services. In the government-wide financial statements, internal service funds are included with governmental activities.

## **Fiduciary Fund Financial Statements**

The fiduciary funds account for assets held by the State in a trustee capacity, or as an agent for other individuals or organizations. The fiduciary fund financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. The following fiduciary fund types are reported:

**Pension and Other Employee Benefit Trust Funds** – These funds account for the plan assets, deferred outflows of resources, liabilities, deferred inflows of resources, net position, and changes in net position of: (*I*) defined benefit pension plans and defined contribution plans administered by Utah Retirement Systems; (*2*) the Post-Retirement Benefits Trust Funds, defined benefit other postemployment health care plans administered by the State for state employees and elected officials; and (*3*) Other Employee Benefits Trust Fund used to separately account and report assets dedicated for employee benefits other than postemployment healthcare benefits that are administered through the Post-Retirement Benefits Trust Funds.

**Investment Trust Fund** – This fund is used to account for the investments related to external participants in the Utah State Public Treasurers' Investment Fund.

**Private Purpose Trust Funds** – These funds report resources of all other trust arrangements in which principal and income benefit individuals, private organizations, or other governments. Examples include the Utah Navajo Trust Fund, Unclaimed Property Trust, Employers' Reinsurance Trust, Petroleum Storage Tank Trust, and the Utah Educational Savings Plan Trust.

**Agency Funds** – These funds account for assets held by the State as an agent for other governmental units, other organizations, or individuals. These funds include fines, forfeitures, tax collections, and withholding taxes for employees.

## **Discrete Component Unit Financial Statements**

The combining discrete component unit financial statements are presented in order to provide information on each of the major discrete component units included in the discrete component unit's column of the government-wide statements. The discrete component unit financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. The information is presented in order to be consistent with the government-wide statements and is less detailed than the presentation in each discrete component unit's separately issued financial statements.

## D. Fiscal Yearends

All funds and discretely presented component units are reported using fiscal years which end on June 30, except the defined benefit pension plans and defined contribution plans (fiduciary funds) administered by Utah Retirement Systems, and Public Employees Health Program (major discrete component unit), Utah Transit Authority (major discrete component unit), Utah State Fair Corporation (nonmajor discrete component unit), and Utah Dairy Commission (nonmajor enterprise fund), which have fiscal years ending December 31.

## E. Assets, Deferred Outflows of Resources, Liabilities, Deferred Inflows of Resources, and Net Position/Fund Balances

## **Cash and Cash Equivalents and Investments**

Cash equivalents are generally considered short-term, highly liquid investments with a maturity of three months or less from the purchase date. The Student Assistance Programs (major enterprise fund) use a trustee for their long-term investing needs, and they consider any cash and cash equivalents held by their trustee as investments.

All cash deposited with the State Treasurer by state entities is maintained by the Treasurer in various pooled investment funds. The State Treasurer invests the deposited cash, including the cash float, in short-term securities and other investments. All interest revenue is allocated to the General Fund unless state law or trust agreements require allocations of interest to other funds. Funds authorized to receive interest earnings are segregated into separate investment pools, and interest is allocated based on cash balances in the pool.

Investments (including cash equivalents) are under the control of the State Treasurer or other administrative bodies as determined by law. In certain instances, investments may be restricted by law or other legal instruments. Investments are presented at fair value. Accordingly, the change in fair value of investments is recognized as an increase or decrease to investment assets and investment income. The fair value measurements of investments is based on the hierarchy established by generally accepted accounting principles. The fair value hierarchy, which has three levels, is based on the valuation inputs used to measure an asset's fair value: Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs. Also certain investments that are measured at fair value using the net asset value per share (or its equivalent) as a practical expedient are not classified in the fair value hierarchy. The Trust Lands Fund (permanent fund) invests in both open and closed end real estate funds that issue quarterly account statements and the fair value of the investments is based upon the Fund's ownership interest in partners' capital.

The State's Unemployment Compensation Fund (major enterprise fund) monies are required by the Social Security Act to be invested in the U.S. Department of Treasury, Bureau of Public Debt Unemployment Trust Fund (BPDUTF), which is not registered with the SEC. The fair value of the position in the BPDUTF is the same as the value of the BPDUTF shares.

Utah Retirement Systems (pension trust and defined contribution plans) had five types of derivative instruments at yearend: futures, currency forwards, options, swaps, and Synthetic Guaranteed Investment Contracts. Futures contracts are traded on organized exchanges to minimize credit risk. Currency forwards are entered into in order to hedge the exposure to changes in foreign currency exchange rates on foreign currency denominated portfolio holdings. Options give the right, but not the obligation, to buy (call) or sell (put) an asset at a preset price over a specified period. Interest rate swap agreements are entered into in an attempt to manage their exposure to interest rate risk. Interest rate risk represents the exposure to fair value losses arising from the future changes in prevailing market interest rates. Synthetic Guaranteed Investment Contracts are available to members in the Utah Retirement Systems Defined Contribution Plans.

The Student Assistance Program (major enterprise fund) entered into an interest rate exchange (swap) agreement relating to some of its student loan revenue bonds. The Student Assistance Program accounts for the swap agreement as a fair value hedging derivative instrument to create a variable rate cost of funds that will be lower than the variable rate cost achievable in the cash bond market. See <u>Note 3</u> for additional information about derivative instruments.

#### Receivables

Accounts receivables in the governmental and business-type activities consist mainly of amounts due from the Federal Government, customers, and others. Receivables from the Federal Government are reasonably assured; accordingly, no allowance for uncollectible accounts has been established.

Notes/mortgages receivables in the governmental and business-type activities are primarily long-term loans for local governments and agricultural development, home mortgages, and individual student loans. The interest rates on the loans vary but are generally lower than market rates and, in some cases, are non-interest-bearing. Student loans in the Student Assistance Programs (business-type activities) are fixed and variable rate federally insured loans. Student loans are insured at 97 to 100 percent of their principal balance depending on the date disbursed.

Receivables for capital lease payments, as reported in the governmental activities, are direct financing capital lease arrangements between State Building Ownership Authority (blended component unit) and certain College and Universities (discrete component units). The capital lease receivable is reported net and represents the sum of the future minimum lease payments to be received, less any executor costs and any unearned interest revenue on the capital lease. Receivables from the discrete component unit are reasonably assured; accordingly, no allowance for uncollectible accounts has been established.

Accrued taxes include receivables for taxpayer-assessed taxes where the underlying exchange has occurred in the period ending June 30, or prior and is presented net of applicable estimated refunds and allowances.

<u>Note 5</u> provides a disaggregation of governmental and businesstype receivables, including a breakout of current/noncurrent balances and established allowances.

#### Inventories, Prepaid Items, and Other Assets

Proprietary funds' and discrete component units' inventories are valued at the lower of cost or market. Cost evaluation methods include first-in-first-out (FIFO), last-in-first-out (LIFO), average cost, weighted average, weighted moving average, and retail inventory method.

Governmental fund consumable items are recorded as expenditures when purchased except for General Fund state park merchandise inventories and Transportation Fund road material inventories. General Fund state park merchandise inventories held for resale are valued at lower of cost or market and Transportation Fund inventories used in road construction are valued using a weighted average cost.

Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items in both the government-wide and fund financial statements. The cost of prepaid items is recorded as expenditures/expenses when consumed rather than when purchased.

Other Assets, as reported on the Statement of Net Position, governmental activities column, include assets of the Trust Lands Fund (permanent fund) acquired under the *1894 Utah Enabling Act* that are not considered investments. The net pension asset and the net other postemployment benefit asset are also reported as other assets.

#### **Capital Assets**

Capital assets, which include land and related assets, buildings, equipment, intangible assets (software), and infrastructure (roads, bridges, drainage systems, lighting systems, and similar items), are reported in the applicable governmental or business-type activities columns, or in the component units column on the government-wide Statement of Net Position. Capital assets of proprietary funds and fiduciary funds are also recorded in their respective fund statements. Capital assets, with the exception of infrastructure and internally generated software (funded with nonfederal resources), are defined by the State as assets, which cost \$5 thousand or more when acquired and have an estimated useful life greater than one year. Infrastructure assets are capitalized if the cost is over \$1 million. Internally generated software, funded with nonfederal resources, is capitalized if the cost is over \$500 thousand. Purchased or constructed capital assets are recorded at cost or at estimated historical cost where historical cost is not available. Donated capital assets are reported at acquisition value as of their acquisition date.

Capital assets purchased by governmental funds are recorded as expenditures in the governmental fund financial statements. Interest expense for capital asset construction related to governmental activities is not capitalized. Interest expense incurred during construction of capital facilities related to business-type activities and discrete component units is immaterial and is not capitalized in all cases.

Buildings, equipment, and other assets are depreciated or amortized using the straight-line method over the following estimated useful lives:

Asset Class	Years
Equipment/Software	3-15
Aircraft and Heavy Equipment	5-30
Buildings and Improvements	30-40
Land Improvements	5-20
Infrastructure	15-80

As provided by GASB standards, the State has elected to use the "modified approach" to account for infrastructure assets (i.e., roads and bridges) maintained by the State's Department of Transportation. This includes infrastructure acquired prior to fiscal year 1981. Under this approach, depreciation expense is not recorded and only improvements that increase the capacity or efficiency of an infrastructure asset are capitalized. Using this approach requires the State to: (1) maintain an inventory of the assets and perform periodic condition assessments; (2) estimate each year the annual amount to maintain and preserve the assets are being preserved approximately at, or above the condition level set by the State. Other infrastructure, which is primarily maintained by the Department of Natural Resources, is capitalized and depreciated.

Most works of art and historical treasures of the primary government are not capitalized or depreciated. These assets are held for public exhibition, education, or research rather than financial gain. These assets are also protected, unencumbered, preserved, and subject to policies requiring the proceeds from sales of collection items to be used to acquire other collection items. The State's assets of this

nature include the State Fine Art Collection, photographs, prints, paintings, historical documents and artifacts, monuments, statues, and paleontological and archaeological collections. See <u>Note 8</u> for additional information about capital assets.

## **Deferred Outflows of Resources**

Deferred outflow of resources represents a consumption of net position by the government that applies to a future period(s) and so will not be recognized as an outflow of resources (expense/ expenditure) until then. Deferred outflows of resources are reported in the applicable governmental or business-type activities columns, or in the component units column on the government-wide Statement of Net Position. See <u>Note 11</u> for a disaggregation of deferred outflows. Deferred outflows of resources of governmental funds, proprietary funds, and discrete component units are reported in detail in their respective fund statements.

## **Accrued Liabilities**

Accrued liabilities include the liability for employee payrolls and liabilities accruing over time where demand for payment is due shortly after fiscal yearend. See <u>Note 6</u> for additional information about accrued liabilities.

## **Unearned Revenue**

In the government-wide statements, governmental fund statements, proprietary fund statements, and fiduciary fund statements, unearned revenue is recorded when cash or other assets are received prior to being earned.

## **Policy Claims Liabilities**

Policy claims liabilities are for insurance claims incurred prior to the reporting date and are based on actuarial estimates; however, policy claims liabilities for Unemployment Insurance are for claims filed as of the reporting date. A substantial portion of policy claims liabilities is long-term in nature. Therefore, claims liabilities are reported as long-term liabilities on the Statement of Net Position. See <u>Note 10</u> for additional information about policy claims liabilities.

## Long-term Debt

Long-term debt, such as the net pension liability (NPL), net OPEB liability (NOL), revenue bonds, claims, contracts and notes payable, directly related to and intended to be paid from proprietary funds or discretely presented component units is included in the accounts of such funds. All other long-term debt, such as the compensated absences, claim or settlement obligations, pollution remediation obligations, general obligation bonds, and lease revenue bonds (and remaining NPL and NOL liabilities not allocated to proprietary funds or discretely presented component units), is reported in the government-wide financial statements. Bond premiums and discounts are amortized over the life of the bonds using the bonds outstanding method or straight-line method, which approximates the effective interest method. Bonds payable are reported net of the applicable bond premium or discount. Bond issuance costs are recognized during the current period.

In the governmental fund financial statements, long-term debt is recognized when due or expected to be financed from current expendable available financial resources. Amortization of bond premiums and discounts, as well as bond issuance costs, are recognized during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources, while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

The Tax Reform Act of 1986 requires governmental entities issuing tax-exempt bonds to refund to the U.S. Treasury interest earnings on bond proceeds in excess of the yield on those bonds. Governmental entities must comply with arbitrage rebate requirements in order for their bonds to maintain tax-exempt status. Entities are required to remit arbitrage rebate payments for nonpurpose interest to the federal government at least once every five years over the life of the bonds. Federal regulations also require the Student Assistance Programs (major enterprise fund) to keep the yield on student loans within a designated percentage of the interest cost of the related tax-exempt borrowing. One method of reducing this yield is to make yield reduction payments to the United States Treasury. Estimated yield reduction payments may be made by the end of the tenth year and every fifth year thereafter during the life of the bonds. Some State of Utah bonds may be exempt from the rebate requirements if they meet certain statutory exceptions per the regulations. At June 30, 2019, there was no liability for yield reduction payments or for non-purpose interest arbitrage rebate in Student Assistance Programs'.

Arbitrage liability is treated as an expense in the government-wide Statement of Net Position and the proprietary fund financial statements when the liability is recognized. Arbitrage liability is recorded as an expenditure in the governmental fund financial statements when the liability is due. Other arbitrage liabilities are immaterial.

## **Compensated Absences**

For most employees vacation leave is accrued at a rate of four hours every two weeks for the first five years of employment, and grows to a rate of seven hours every two weeks after 20 years of employment. There is no requirement to use vacation leave, but a maximum of 320 hours may be carried forward at the beginning of each calendar year. The State established the State Employees' Annual Leave Trust Fund (other employee benefit trust funds) where any unused vacation leave is paid to employees upon termination. The ongoing termination payments from the Trust Fund are provided by charges to agency budgets as benefits are earned. Vacation leave taken as time off is paid from current budgets when used.

Most employees earn sick leave at a rate of four hours for each twoweek period, with no limit to the amount that can be accumulated. The State does not reimburse employees for unused sick leave upon termination unless the leave was earned prior to January 4, 2014, and employees had the option under certain circumstances to "convert" sick leave. Employees may use converted sick leave in place of vacation leave. Any unused converted sick is paid to employees upon termination. Sick leave is expended when used.

At retirement, for participating agencies, an employee receives 25 percent of the value of all unused accumulated sick leave, earned prior to January 4, 2014, as a mandatory employer contribution into a 401(k) account. Each day of remaining sick leave earned prior to January 1, 2006, may be used to participate in the State Employee Other Postemployment Benefit Plan (State Employee OPEB Plan), to purchase health and life insurance coverage or Medicare supplemental insurance. See <u>Note 19</u> for additional information about the State Employee OPEB Plan.

Any remaining sick leave earned on or after January 1, 2006, but before January 4, 2014, is converted to a value (based on the higher of the employee's rate of pay at retirement or the average pay rate of retirees in the previous year) and placed in a Health Reimbursement Arrangement administered by Public Employees Health Plan. Any payouts by the State of converted sick leave upon termination, contributions into a 401(k) account, or Health Reimbursement Arrangement upon retirement, are paid from the

## Notes to the Financial Statements

Other Employee Benefits Trust Fund. The ongoing termination payments from the Trust Fund are provided by charges to agency budgets.

Proprietary funds, Utah Schools for the Deaf and the Blind, and private purpose trust funds of the primary government also participate in the compensated absences and have no liability for leave benefits once their contributions have been made. The total liability of the governmental activities for compensated absences is recorded in the government-wide Statement of Net Position as part of long-term liabilities. However, in accordance with GAAP, the liability is not recorded in the governmental fund financial statements. See <u>Note 10</u> for additional information about the liability.

Compensatory time for overtime worked may be earned up to a maximum of 80 hours. Any overtime exceeding 80 hours is paid when earned. In accordance with GAAP, compensatory time is expended when the leave is taken in governmental funds, but is expensed when earned for budgetary purposes.

Vacation earnings, sick leave earnings, and termination policies vary among discrete component units and from the primary government's policies, but usually vacation leave is expended when earned and sick leave is expended when used.

## Pensions

For purposes of measuring the net pension liability and deferred outflows/inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the Utah Retirement Systems Pension Plan (URS) and additions to/ deductions from URS's fiduciary net position have been determined on the same basis as they are reported by URS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. The primary government's proportionate share of pension amounts were further allocated to proprietary funds (business-type activities) based on the amount of employer contributions paid by each proprietary fund. Pension investments are reported at fair value.

## **Postemployment Benefits Other than Pensions (OPEB)**

For purposes of measuring the net OPEB liability, deferred outflows/ inflows of resources and expenses, information about the fiduciary net positions of the State Employee Other Postemployment Benefit Plan and the Elected Official OPEB Plan (Plans) and additions to/ deductions from the Plans' fiduciary net positions have been determined on the same basis as they are reported by the Plans. For this purpose, the Plans recognize benefit payments when due and payable in accordance with the benefit terms. The Plans' proportionate share of OPEB amounts were further allocated to proprietary funds (business-type activities) based on the amount of employer contributions paid by each proprietary fund. OPEB investments for the Plans are reported at fair value.

## **Deferred Inflows of Resources**

Deferred inflows of resources represent an acquisition of net position that applies to a future period, and so will not be recognized as an inflow of resources (revenue) until that time. Deferred inflows of resources are reported in the applicable governmental or businesstype activities columns or in the component units column on the government-wide Statement of Net Position. See <u>Note 11</u> for a disaggregation of deferred inflows. Deferred inflows of resources of governmental funds, proprietary funds, and discrete component units are reported in detail in their respective fund statements.

## **Net Position/Fund Balances**

The difference between assets, deferred outflows of resources, liabilities, and deferred inflows of resources is "Net Position" on the government-wide, proprietary fund, and fiduciary fund financial statements and "Fund Balance" on the governmental fund financial statements.

In the governmental fund financial statements, fund balances are classified as nonspendable, restricted, or unrestricted (committed, assigned, or unassigned). Restricted balances represent those portions of fund balance where constraints placed on the resources are either externally imposed or imposed by law through constitutional provisions or enabling legislation. Committed fund balance represents amounts that can only be used for specific purposes pursuant to constraints imposed by formal action of the Legislature, such as dedicated revenues or legislation. Assigned fund balance is constrained by the Legislature's intent to be used for specific purposes, by directive of the Executive Appropriations Committee of the Legislature or in some cases by legislation. See <u>Note 12</u> for additional information about fund balances.

The State maintains three stabilization accounts: (1) the General Fund Budget Reserve Account in the General Fund (the "Rainy Day Fund") reported as committed fund balance; (2) the Medicaid Growth Reduction and Budget Stabilization Restricted Account in the General Fund ("the Medicaid Budget Stabilization Account") reported as committed fund balance; and (3) the Education Budget Reserve Account in the Education Fund (the "Education Reserve") reported as restricted fund balance. The resources of these accounts may only be expended when specific non-routine budget shortfalls occur and upon appropriation by the Legislature.

Statutorily, the State established a minimum fund balance policy for the Disaster Recovery Restricted Account and the Local Government Emergency Response Loan Fund. Both these funds may issue loans for specific emergencies as long as a minimum fund balance is maintained in the funds. See <u>Note 12</u> for additional information about the stabilization accounts and funds with a statutory minimum fund balance requirement.

## F. Restricted and Unrestricted Resources

When an expenditure/expense is incurred for purposes for which both restricted and unrestricted resources are available, it is the State's general policy to use restricted resources first. When expenditures/expenses are incurred for purposes for which unrestricted (committed, assigned, and unassigned) resources are available, and amounts in any of these unrestricted classifications could be used, it is the State's general policy to spend committed resources first. However, the State has some programs that are funded by appropriations from both unrestricted resources and resources required by law to be deposited in a specific subfund for a specific purpose (which may include restricted resources and unrestricted-committed resources). In those instances, it is the State's policy to expend those resources proportionally based on the amounts appropriated from each source.

## Grants

Federal grants and assistance awards made on the basis of entitlement periods are recorded as revenues when entitlement occurs. All federal reimbursement-type grants are recorded as revenues when the related allowable expenditures are incurred and all applicable eligibility requirements are met.

Federal grants include nonmonetary transactions for food and vaccine commodities. Commodity revenues and expenditures are valued at their federally reported value. Commodity inventories at

yearend are immaterial. For the fiscal year ended June 30, 2019, the State reported revenues and expenditures of \$26.108 million for commodities in the General Fund, and \$17.116 million for commodities in the Education Fund (special revenue fund).

#### **Investment Income**

Investment income includes interest, dividends and other earnings, and the change in fair value of investments. Negative investment income is reported where the decrease in the fair value of investments due to market conditions exceeded the other components of investment income.

In accordance with state law, interest and dividend income from the State Endowment Fund (nonmajor governmental fund) is assigned to and reported directly in the General Fund. A portion of the applicable income reported in the General Fund is then transferred into the State Endowment Fund to increase the principal in the fund as required by state law. The State Endowment Fund generated \$5.942 million of cash investment earnings, of which \$3.753 million was reported in the General Fund and \$2.189 million was reported in the State Endowment Fund.

## G. Interfund Transactions

## **Government-wide Financial Statements**

**Interfund Activity** – In general, eliminations have been made to minimize the double counting of internal activity, including internal service fund type activity. However, interfund services, provided and used between different functional categories, have not been eliminated in order to avoid distorting the direct costs and program revenues of the applicable functions. Transfers between governmental and business-type activities are reported at the net amount.

**Interfund Balances** – Interfund receivables and payables have been eliminated from the government-wide Statement of Net Position, except for the residual amounts due between governmental and business-type activities.

#### **Governmental Fund Financial Statements**

**Interfund Activity** – Interfund transactions for goods sold or services rendered for a price approximating their external exchange value, and employee benefit contributions are accounted for as revenues and expenditures/expenses in the funds involved.

Transfers are used to report flows of cash (or other assets) between funds without equivalent flows of assets in return or a requirement for repayment. The State's transfers are based on legislative appropriations or other legal authority. Transfers are presented in <u>Note 14</u>.

## NOTE 2. BEGINNING NET POSITION ADJUSTMENTS AND OTHER CHANGES

For the fiscal year ended June 30, 2019, the State implemented the following new accounting standards issued by the Governmental Accounting Standards Board (GASB):

GASB Statement 83, Certain Asset Retirement Obligations.

GASB Statement 88, Certain Disclosures Related to Debt, Including Direct Borrowings and Direct Placements.

**GASB Statement 83** – This Statement addresses accounting and financial reporting for certain asset retirement obligations. For the purposes of this statement, an asset retirement obligation is a legally enforceable liability associated with the future sale, abandonment

recycling, or disposal of a tangible capital asset. This Statement requires the recognition of a liability and a corresponding deferred outflows of resources when the obligation is both incurred and reasonably estimable. The measurement of the liability is based on the best estimate of the current value of outlays expected to be incurred to retire the asset. Neither the primary government nor its discrete component units had any significant asset retirement obligations in fiscal year 2019.

**GASB Statement 88** – This Statement defines debt for purposes of disclosure in notes to financial statements and clarifies which liabilities governments should include when disclosing information related to debt, including direct borrowings and direct placements. This Statement also requires a more comprehensive footnote disclosure related to debt, including that existing and additional information be provided separately for direct borrowings and direct placements of debt. Changes were made to debt disclosures presented in <u>Note 9</u> and <u>10.A</u> to reflect the new requirements of this Statement.

During the 2018 General Session the Legislature passed Senate Bill 136, modifying the governance structure of the Utah Transit Authority (UTA), creating a governing board appointed by the Governor. Members of the board serve at the will of the Governor. UTA was incorporated in 1970 as a Utah Public Transit District and is legally separate from the State of Utah. With the change in governance, and in accordance with GASB standards, since the State can impose its will on UTA through the organization of the governing board, UTA is now included as part of the reporting entity of the State of Utah as a major discrete component unit. This resulted in an increase of component unit net position restricted for transit services of \$993.677 million reflected in the government-wide Statement of Activities – Component Units.

During fiscal year 2019, it was discovered that land improvements associated with land sold in previous years from the Trust Lands Permanent Fund had not been removed from the State's financial records. As a result, the beginning fund balance of the Permanent Fund was reduced by \$15.469 million to reflect the sales of the land improvements as reflected in the Balance Sheet – Governmental Funds.

The Office of the Attorney General, included as part of the General Fund, began in fiscal year 2019 recording a portion of payroll costs and charges for its services in the the Attorney General Legal Services Fund, an Internal Service Fund established during the 2016 General Session. As a result, the Internal Service Fund was allocated a proportionate share of the State's Net Pension and OPEB liabilities in accordance with GASB Statements 68 and 75. This resulted in a reduction of the fund's beginning net position of \$11.046 million as reflected on the Statement of Revenues, Expenses, and Changes in Fund Net Position – Proprietary Funds.

For the year ended June 30, 2019, the University of Utah (major component unit) made adjustments which decreased beginning net position on the Combining Statement of Activities – University of Utah by a combined \$65.700 million. Certain construction projects totaling \$46.200 million were determined to be non-capital and removed from construction-in-progress. Additionally, a \$19.500 million pledge receivable from the prior fiscal year was removed due to contingencies identified in the pledge agreement.

## **Other Adjustments and Changes**

During calendar year 2018, the Utah Transit Authority (major component unit) evaluated its capital assets and the associated

accumulated depreciation of those assets which resulted in changes to the useful lives of all categories of assets. The new useful lives reflect the changing understanding of how long a transit asset is lasting after a decade of running service in the northern Utah environment. This change in accounting estimate resulted in a decrease in current year depreciation of \$68.876 million and a decrease of accumulated depreciation of \$57.256 million.

## NOTE 3. DEPOSITS AND INVESTMENTS

Deposits and investments for the primary government and its discrete component units are governed by the Utah Money Management Act (Title 51, Chapter 7 of the Utah Code) and rules of the State Money Management Council. However, the Act also exempts certain funds that have a long time horizon to make investments of a long-term nature, such as equities and bond mutual funds. In the primary government these are the Trust Lands (permanent fund), State Endowment (nonmajor special revenue fund), Utah Navajo Trust (private purpose trust), Employers' Reinsurance Trust (private purpose trust), Utah Educational Savings Plan Trust (private purpose trust), Pension Trust Funds (fiduciary funds), Post-Retirement Benefits Trust Funds (fiduciary funds), and Other Employee Benefits Trust Funds (fiduciary funds). The discrete component units exempt from the Act are Public Employees Health Program and the Colleges' and Universities' endowment funds.

## A. Primary Government

## Custodial Credit Risk - Deposits

The custodial credit risk for deposits is the risk that in the event of a bank failure, the State's deposits may not be recovered. The Money Management Act (Act) requires that deposits be in a qualified depository. The Act defines a qualified depository as any financial institution whose deposits are insured by an agency of the federal government and that has been certified by the State Commissioner of Financial Institutions as having met the requirements of the Act and adhering to the rules of the State Money Management Council.

Deposits with qualified depository institutions in excess of Federal Deposit Insurance Corporation (FDIC) insurance limits are uninsured and uncollateralized. Deposits are neither collateralized nor are they required to be by State statute. The deposits for the primary government at June 30, 2019, including those of Utah Retirement Systems (URS) (pension trust and defined contribution plans) and Trust Lands (permanent fund), were \$1.679 billion. These deposits are exposed to custodial credit risk as follows:

- \$150.286 million were exposed to custodial credit risk as uninsured and uncollateralized.
- Exposure to custodial credit risk cannot be determined for \$1.515 billion of the primary government deposits, which are in FDIC-insured accounts that are held in trust by Utah Educational Savings Plan Trust (private purpose trust fund) at two banks. Funds in the FDIC-insured accounts are insured on a pass-through basis to each account owner at each bank up to \$250 thousand. The amount of FDIC insurance provided to an account owner is based on the total of (1) the value of an account owner's investment in the FDIC-insured account at each bank plus, (2) the value of other accounts held (if any) at each bank, as determined by the banks and by FDIC regulations. It is the account owner's responsibility to determine how investments in the FDIC-insured accounts would be aggregated with other investments at the banks for purposes of FDIC insurance coverage.

## Investments

The Money Management Act defines the types of securities authorized as appropriate investments and the conditions for making investment transactions. Public treasurers conduct investment transactions through qualified depositories, certified dealers, or directly with issuers of the investment securities. The Utah State Treasurer is exempt from the requirement to conduct investment transactions through a certified dealer.

The Act authorizes investments in negotiable or nonnegotiable deposits of qualified depositories and permitted depositories; repurchase and reverse repurchase agreements; commercial paper that is classified as "first tier" by two nationally recognized statistical rating organizations; bankers' acceptances; obligations of the United States Treasury including bills, notes, and bonds; obligations, other than mortgage derivative instruments, issued by U.S. government-sponsored enterprises (U.S. Agencies), such as the Federal Home Loan Bank System, Federal Home Loan Mortgage Corporation (Freddie Mac), and Federal National Mortgage Association (Fannie Mae); bonds, notes, and other evidence of indebtedness of political subdivisions of the State; fixed-rate corporate obligations and variable rate securities rated "A" or higher, or the equivalent of "A" or higher, by two nationally recognized statistical rating organizations; shares or certificates in a money market mutual fund as defined in the Money Management Act; the Utah Public Treasurers' Investment Fund; negotiable brokered certificates of deposit and reciprocal deposits subject to rules of the State Money Management Council.

The Utah Educational Savings Plan Trust (private purpose trust) is permitted to invest in the Utah Public Treasurers' Investment Fund; mutual funds, securities, or other investments registered with the United States Securities and Exchange Commission; federally insured depository institutions; stable value products, including guaranteed investment contracts, guaranteed interest contracts, and guaranteed insurance contracts; and any investments that are determined by the board of directors of the Utah Educational Savings Plan to be appropriate and that would be authorized under the provisions of the Money Management Act or Rule 2 of the State Money Management Council.

The Pension Trust Funds (fiduciary funds) administered by Utah Retirement Systems are governed by a seven-member Utah State Retirement Board (Board). The Board has statutory authority to pool pension assets in the Utah Retirement Investment Fund (Fund). Statutes also establish that this Fund will be invested in accordance with the "prudent person rule."

The Trust Lands Fund (permanent fund) is governed by a fivemember School and Institutional Trust Fund Board of Trustees (Board). The Board has statutory authority to establish policies and investment philosophy for the management of the permanent fund assets consistent with the enabling act, the Utah Constitution, and other applicable state law. These are to optimize returns and increase the value of the permanent fund following the "prudent person rule."

The following funds are exempt from the Money Management Act where the State Treasurer is responsible for investing with the primary goal of providing for the stability, income, and growth of principal following the "prudent person rule": State Endowment Fund (nonmajor special revenue fund), Post-Retirement Benefits Trust Funds and Other Employee Benefits Trust Funds (fiduciary funds), and Utah Navajo Trust and Employers' Reinsurance Trust (private purpose trust funds).

The primary government's investments at June 30, 2019, are presented below except those of the Pension Trust Funds administered by Utah Retirement Systems (URS) (fiduciary funds) and the Trust Lands Fund (permanent fund). The investments are presented at fair value and by investment type with debt securities presented by maturity.

<u>Note 3.B.</u> presents the investments of the Pension Trust Funds (fiduciary funds) administered by Utah Retirement Systems (URS). URS investments are presented consistent with their separately issued financial statements by investment type.

<u>Note 3.C.</u> presents the investments of the Trust Lands Fund (permanent fund). Trust Lands investments are presented consistent with their separately issued financial statements by investment type.

## Fair Value Measurements

The State categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. These guidelines recognize a three-tiered fair value hierarchy as follows:

- Level 1: Inputs are quoted prices for identical investments in active markets.
- Level 2: Observable inputs other than quoted market prices.
- Level 3: Unobservable inputs.

The following table presents the recurring fair value measurements at June 30, 2019, for the primary government, with the exception of URS and Trust Lands.

(except Utah Retirem	•	Trust Lands)		
	une 30, 2019 ed in thousands)			
( <i>express</i>	ea in inousanas)		ue Measuremen	ts Using
Investment Type	Fair Value	Level 1	Level 2	Level 3
Investments by Fair Value Level				
Debt Securities				
U.S. Agencies	\$ 823	\$ 823	\$	\$
Corporate Debt	15,028,926	_	15,028,926	
Money Market Mutual Funds	533,529	533,529		—
Commercial Paper	391,740	_	391,740	_
Bond Mutual Funds	3,472,616	3,472,616	_	_
Stable Value Funds	693,883	693,883		
Total Debt Securities	20,121,517	4,700,851	15,420,666	0
Equity Securities				
Domestic Equity	7,114,343	7,114,343		
International Equity	2,093,895	2,093,895		—
Equity Securities	174	174		
Total Equity Securities	9,208,412	9,208,412	0	0
Total Investments by Fair Value Level	29,329,929	\$ 13,909,263	\$ 15,420,666	\$ 0
Investments Measured at the Net Asset Value (NAV)				
Private Real Estate	14,866			
Total Investments Measured at Fair Value	\$ 29,344,795			
Investment Derivative Instruments				
Interest Rate Exchange (swap)	\$ 10,293	\$ 0	\$ 0	\$ 10,293

#### Primary Government Investments and Derivative Instruments Measured at Fair Value (except Utah Retirement Systems and Trust Lands)

Debt and equity securities classified in Level 1 are valued using prices quoted in active markets for those securities. Other debt securities classified in Level 2 are valued using the following approaches:

- Corporate Bonds and Notes are valued using quoted prices for identical securities in markets that are not active.
- Commercial Paper are valued using quoted prices for identical or similar securities in markets that are not active.

Mutual funds classified in Level 1 are valued using prices provided by the fund company.

The Student Loan Purchase Program (major enterprise fund – student assistance programs) has an interest rate exchange (swap) investment derivative instrument. This investment fair value classification is Level 3. The fair value was calculated using information obtained from generally recognized sources with respect to quotations, reporting of specific transactions and market conditions and based on accepted industry standards and methodologies.

## Investments Measured at the Net Asset Value (NAV)

The State Endowment (nonmajor governmental fund) and Post-

Retirement Benefits Trust (fiduciary funds-pension and other employee benefit trust funds) have an investment in an open-end real estate fund measured at the NAV, with fair values of \$7.394 million and \$7.473 million, respectively. The fair values of the investments have been determined using the NAV per share (or its equivalent) of the fund's ownership interest in partners' capital.

The real estate fund is structured as a limited partnership and invests in commercial real estate located in the United States. The fund invests in income producing properties as well as properties that are near core properties with short-term challenges with the intent to sell to the properties to core funds when the challenges have been addressed. The State Endowment and Post-Retirement Benefits Trust original combined capital commitment of \$15 million was fulfilled during fiscal year 2019. The fund allows for quarterly redemptions with 90 days' notice subject to the discretion of the general partner based upon the funds liquidity position and other factors. If redemption requests are greater than available cash, the redemptions are fulfilled on a pro rata basis each quarter, until all redemption requests have been fulfilled.

## **Interest Rate Risk**

The following table presents the debt investments and maturities at June 30, 2019, for the primary government, with the exception of URS and Trust Lands.

Primary Government (except Utah Retirement Systems and Trust Lands) Debt Investments at Fair Value At June 30, 2019 (expressed in thousands)									
<b>T</b>					turi	ties (in years	/

Total Debt Investments	\$ 19,316,623								

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment.

The primary government's policy for managing interest rate risk, with the exception of URS and Trust Lands, is to comply with the Money Management Act. Section 51-7-11 of the Act requires that the remaining term to maturity of investments may not exceed the period of availability of the funds to be invested. The Act further limits the remaining term to maturity on all investments in commercial paper, bankers' acceptances, fixed-rate negotiable deposits, and fixed-rate corporate obligations to 270 days - 15 months or less. The Act further limits the remaining term to maturity on all investments in obligations of the United States Treasury; obligations issued by U.S. government-sponsored enterprises; and bonds, notes, and other evidence of indebtedness of political subdivisions of the State to five years. In addition, variable rate negotiable deposits and variable rate securities may not have a remaining term to final maturity exceeding three years.

The majority of the primary government's corporate debt securities are variable-rate securities, which adjust periodically to the prevailing market interest rates. Because these securities frequently reprice, interest rate risk is substantially reduced at each periodic reset date. In the table above, variable-rate securities are presented according to the length of time until the next reset date rather than the stated maturity.

In addition, significant funds with a long-term investment perspective have the following mix of investments (percentages are of the fund's total investments):

- Utah Educational Savings Plan Trust (private purpose trust) - \$6.948 billion, 54.65 percent, in domestic equity mutual fund securities; \$2.931 billion, 23.06 percent, in bond mutual funds; \$2.065 billion, 16.24 percent, in international equity mutual fund securities; \$693.883 million, 5.46 percent, in stable value funds; and \$74.681 million, 0.59 percent, in the Utah Public Treasurers' Investment Fund.
- Post-Retirement Benefits Trust Funds (fiduciary funds), and Other Employee Benefits Trust Funds (fiduciary

funds) - \$253.138 million, 76.29 percent, in bond mutual funds; \$4.627 million, 1.39 percent, in domestic equity mutual fund securities; \$4.021 million, 1.21 percent, in international equity mutual fund securities; \$7.473 million, 2.25 percent, in private real estate; and \$62.605 million, 18.86 percent, in the Utah Public Treasurers' Investment Fund.

- State Endowment Fund (special revenue fund) \$110.684 million, 47.01 percent, in bond mutual funds; \$91.609 million, 38.91 percent, in domestic equity mutual fund securities; \$16.517 million, 7.02 percent, in international equity mutual fund securities; \$7.393 million, 3.14 percent, in private real estate; and \$9.230 million, 3.92 percent, in the Utah Public Treasurers' Investment Fund.
- Student Assistance Programs (major enterprise fund) -\$56.939 million, 31.04 percent, in domestic equity mutual fund securities; \$125.658 million, 68.51 percent, in the Utah Public Treasurers' Investment Fund; and \$823 thousand, 0.45 percent, in the U.S. Government agency securities.
- Employers' Reinsurance Trust (private purpose trust) -\$149.872 million, 74.01 percent, in bond mutual funds; \$7.845 million, 3.87 percent, in domestic equity mutual fund securities; \$5.083 million, 2.51 percent, in international equity mutual fund securities; and \$39.713 million, 19.61 percent, in the Utah Public Treasurers' Investment Fund.

## **Credit Risk of Debt Securities**

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. The primary government, with the exception of URS and Trust Lands, follows the Money Management Act as previously discussed as its policy for reducing exposure to investment credit risk.

The primary government's rated debt investments as of June 30, 2019, with the exception of URS and Trust Lands, were rated by Standard and Poor's and/or an equivalent nationally recognized statistical rating organization and the ratings are presented below using the Standard and Poor's rating scale. Securities rated less than "A" met the investment criteria at the time of purchase.

## Notes to the Financial Statements

Primary Government (except Utah Retirement Systems and Trust Lands) Debt Investments Quality Ratings

*A1 is Commercial Paper rating

#### **Custodial Credit Risk**

Custodial credit risk for investments is the risk that, in the event of a failure of the counter party, the State will not be able to recover the value of the investment or collateral securities that are in the possession of an outside party. The primary government does not have a formal policy for custodial credit risk.

The primary government's investments at June 30, 2019, with the exception of URS and Trust Lands, were held by the State or in the State's name by the State's custodial banks.

#### **Concentration of Credit Risk**

Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer.

Except for URS and Trust Lands, the primary government's policy for reducing this risk of loss is to comply with the Rules of the State Money Management Council. Rule 17 of the State Money Management Council limits investments in a single issuer of commercial paper and corporate obligations to between 5 and 10

## B. Primary Government - Utah Retirement Systems

#### Investments

The Utah Retirement Systems' and Plans' (URS) (pension trust and defined contribution plans) investments by type are presented below.

#### Utah Retirement Systems (pension trust and defined contribution plans) Investments at Fair Value At December 31, 2018 (expressed in thousands)

Investment Type	Defined Benefit	Defined Contribution	Total All Systems and Plans
Short-term Securities Pools	\$ 1,590,727	\$ —	\$ 1,590,727
Debt Securities	4,925,751	1,994,543	6,920,294
Equity Securities	10,400,703	3,304,974	13,705,677
Absolute Return	4,598,396	_	4,598,396
Private Equity	3,661,356	_	3,661,356
Real Assets	5,206,229	231,384	5,437,613
Investments Held by Broker-dealers under Securities Lending Program:			
Equity Securities	605,947	_	605,947
Debt Securities	387,281	_	387,281
Total	31,376,390	5,530,901	36,907,291
Securities Lending Collateral Pool	1,058,056		1,058,056
Total Investments	\$32,434,446	\$5,530,901	\$37,965,347

URS values these investments in good faith at URS's pro-rata interest in the net assets of these investments based upon audited financial statements or other information provided to URS by the underlying investment managers. The estimated fair value of these investments may differ significantly from values that would have been used had a ready market existed.

percent depending upon the total dollar amount held in the portfolio. Such limitations do not apply to securities issued by the U.S. government and its agencies. The primary government had no debt securities investments at June 30, 2019, with more than 5 percent of the total investments in a single issuer.

#### **Foreign Currency Risk**

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or a deposit. The primary government, with the exception of URS and Trust Lands, does not have a formal policy to limit foreign currency risk. The following funds have investments in international equity funds, and as such, no foreign currency risk is presented: Utah Educational Savings Plan Trust (private purpose trust) \$2.065 billion, Post-Retirement Benefits Trust Funds (fiduciary funds), and Other Employee Benefits Trust Funds (fiduciary funds) \$4.021 million, State Endowment Fund (special revenue fund) \$16.517 million, Employers' Reinsurance Trust (private purpose trust) \$5.083 million, Utah Navajo Trust (private purpose trust fund) \$2.253 million, and General Fund \$906 thousand.

## **Fair Value Measurements**

URS categorizes the fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset and give the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements).

- Level 1: Unadjusted quoted prices for identical instruments in active markets.
- Level 2: Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs are observable.
- Level 3: Valuations derived from valuation techniques in which significant inputs are unobservable.

Investments that are measured at fair value using the net asset value per share (or its equivalent) as a practical expedient are not classified in the fair value hierarchy.

In instances where inputs used to measure fair value fall into different levels in the fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. URS's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset or liability. The following table shows the fair value leveling of the investments for URS.

Debt, equity, and derivative instruments classified in Level 1 are valued using prices quoted in active markets for those securities. Debt and debt derivative instruments classified in Level 2 and Level3 are valued using either a bid evaluation or a matrix pricing technique. Bid evaluations may include market quotations, yields, maturities, call features and ratings. Matrix pricing is used to value securities based on the securities relationship to benchmark quoted prices. Index-linked debt securities are valued by multiplying the external market price feed by the applicable day's Index Ratio. Level 2 debt securities have non-proprietary information that was readily available to market participants, from multiple independent sources which are known to be actively involved in the market. Level 3 debt securities use proprietary information or single source pricing. Equity and equity derivative instruments classified in Level 2 are securities whose values are derived daily from associated traded securities. Equity securities classified in Level 3 are valued with last trade data having limited trading volume.

Real assets classified in Level 1 are valued using prices quoted in active markets for those securities. Real assets classified in Level 3 are real estate investment generally valued using the income approach by internal manager reviews or independent external appraisers. URS's policy is to obtain an external appraisal a minimum of every three years for properties or portfolios that URS has some degree of control or discretion. In practice, some investments are appraised annually. Appraisals are performed by an independent appraiser with preference for Member Appraisal Institute (MAI) designated appraisers. The appraisals are performed using generally accepted valuation approaches applicable to the property type.

*See redemption descriptions for these investments under Real Estate and Timber Funds.

The valuation method for investments measured at the NAV per share (or its equivalent) is presented on the table above and on the table below. Synthetic guaranteed investment contracts that are fully benefit-responsive are measured at contract value and do not participate in fair value changes.

## **Defined Benefit**

- Short-term Beta/Overlays This type consists of one pooled investment fund that invests in exchange traded short-term options and futures referencing equity indexes used for portfolio rebalancing. The fair values have been determined using the NAV per share of the investments.
- Co-mingled International Equity Fund and Co-mingled Small Cap Fund – This type consists of three institutional investment funds that invest in international equities diversified across all sectors and one fund that invests in U.S. small cap equities. The fair values of the investments in these types have been determined using the NAV per share of the investments.
- Absolute Return Funds The fair values of the investments in this type have been determined using the NAV per share of the investments. *Directional funds* include investments in eleven funds whose investments are more directional in nature although they can shift opportunistically between having a directional bias and a non-directional bias. *Equity long/short funds* includes investments in nine funds in which the equity securities maintain some level of market exposure (either net long or net short); however the level of market exposure may vary through time. *Event driven funds* include investments in nineteen funds whose investments focus on identifying and analyzing securities that can benefit from the occurrence of an extraordinary corporate transaction or event (e.g., restructurings, takeovers, mergers, spin-offs, bankruptcy, etc).

One fund is in the process of redemption totaling \$23 thousand over the next two to ten years. *Multi-strategy funds* include investments in ten funds. Investments in these funds represent a mix of the other absolute return strategies. Five funds are in the process of redemption totaling \$23 million over the next 1-5 years. *Relative value funds* include investments in twentyone funds. These funds seek returns by capitalizing on the mispricing of related securities or financial instruments. One new fund with a value of \$154 million has a redemption restriction of two years. All other funds currently have no redemption restrictions.

- Private Equity Partnerships This type includes investments in limited partnerships. Generally speaking, the types of partnership strategies included in this portfolio are venture capital, growth equity, buyouts, special situations, mezzanine, and distressed debt. These investments have an approximate life of ten years and are considered illiquid. Redemptions are restricted over the life of the partnership. During the life of the partnerships distributions are received as underlying partnership investments are realized. The majority of the private equity partnership investments are managed by two gatekeepers. Both gatekeepers manage discretionary accounts for URS. The gatekeepers are required to manage the private equity portfolio in accordance with guidelines established by URS. URS has no plans to liquidate the total portfolio. As of December 31, 2018, it is probable that all the investments in this type will be sold at an amount different from the NAV per share (or its equivalent) of URS's ownership interest in partners' capital.
- Energy, Mineral, and Royalty Funds Investments in *Energy* consist of 29 private equity partnerships, which invest primarily in oil and gas related investments. *Mineral funds* include seven private equity partnerships, which invest in

mineral mining equity securities, commodities and other mining investments. *Royalty funds* include two private equity partnerships, which invest primarily in drug royalties. These investments have an approximate life of 10 years and are considered illiquid. Redemption restrictions are in place over the life of the partnership. During the life of the partnerships, distributions are received as underlying partnership investments are realized. As of December 31, 2018, it is probable that all the investments in this type will be sold at an amount different from the NAV per share (or its equivalent) of URS's ownership interest in partners' capital. The fair values of these investments have been determined using estimates provided by the underlying partnerships using recent observable transactions information for similar investments.

**Real Estate and Timber Funds** – This type includes 38 investments, which are invested primarily in apartments and retail space in the United States. *Timber includes* three funds, which invest in timber-related resources. *Agriculture* includes four investments which operate in the production, processing, and distribution of high-value foods. Investments in these types can never be redeemed with the funds. Instead, the nature of these investments are that distributions from each investment will be received as the underlying investments are liquidated. Because it is probable that any individual investment will be sold, the fair value of each individual investment has been determined using the NAV per share (or its equivalent) of URS's ownership interest in partners' capital.

## **Defined Contribution**

• **Co-Mingled Funds** – The fair values of the investments of this type have been determined using the NAV per share of the investments. The *co-mingled real estate equity fund* is comprised of institutional-quality commercial real estate across a broad range of real estate asset types. The *co-mingled commodities fund* invests mainly in bulk goods and raw materials. The other funds invest in securities indicative of their name.

## **Interest Rate Risk**

Utah Retirement Systems (URS) (pension trust and defined contribution plans) manages its exposure to fair value loss arising from increasing interest rates by complying with the following policy:

- For domestic debt securities managers, an individual debt securities investment manager's portfolio will have an effective duration between 75 and 125 percent of the effective duration of the appropriate index.
- The international debt securities investment managers will maintain an effective duration of their portfolio between 80 and 120 percent of the appropriate index.
- The global debt securities investment managers will maintain an effective duration of their portfolio between 75 and 125 percent of the appropriate index.
- The global debt inflation-linked debt securities investment managers will maintain an effective duration of their portfolio between 80 and 120 percent of the appropriate index.
- Duration is a measure of a debt investment's exposure to fair

value changes arising from changes in interest rates. It uses the present value of cash flows, weighted for those cash flows as a percentage of the investment's full price.

URS compares an investment's effective duration against the Bloomberg Barclays US Aggregate Bond Index for domestic debt securities, the Bloomberg Barclays Global Aggregate Index (USD hedged) for global debt securities, and the Bloomberg Barclays World Government Inflation-Linked Investment Bond Index (USD hedged) for inflation-linked debt securities. The index duration range as of December 31, 2018, was 4.40 to 7.34 for domestic debt securities, 5.22 to 8.70 for global debt securities, and 9.65 to 14.47 for inflation-linked debt securities.

URS compares an investment's effective duration against the Bloomberg Barclays US Intermediate Aggregate Bond Index for domestic debt securities, the Bloomberg Barclays Global Aggregate ex-US Bond Index (USD hedged) for international debt securities, and the Bloomberg Barclays Global Inflation-Linked Bond Index 1-10 Year (USD hedged) for inflation-linked debt securities. The index duration range as of December 31, 2018, was 4.40 to 7.34 for domestic debt securities, 6.34 to 9.50 for international debt securities, and 4.02 to 6.04 for inflation-linked debt securities.

As of December 31, 2018, no individual debt securities investment manager's portfolio was outside of the policy guidelines, except one manager that was 0.02 below its index duration range. This manager brought its portfolio back into range on the next business day.

74

As of December 31, 2018, the following table shows the investments by investment type, amount, and the effective weighted duration.

## **Custodial Credit Risk**

Custodial credit risk for investments is the risk that, in the event of a failure of the counterparty, URS will not be able to recover the value of the investment or collateral securities that are in the possession of an outside party. URS does not have an investment policy regarding custodial credit risk. As of December 31, 2018, there is \$41.820 million of cash and cash equivalents exposed to custodial credit risk and \$518.972 million of other assets where exposure to custodial credit risk is not determined. The \$41.820 million frictional cash and cash equivalents subject to custodial credit risk are in foreign banks in URS's name. Because it is in foreign banks, it is subject to custodial credit risk. URS does not have an investment policy regarding custodial credit risk for frictional cash in foreign banks.

## **Concentration of Credit Risk**

URS expects investment managers to maintain diversified portfolios by sector and by issuer using the following guidelines:

- AAA/Aaa Debt Securities No more than 5 percent of an investment manager's assets at market with a single issuer.
- AA-/Aa3 Debt Securities or higher No more than 4 percent of an investment manager's assets at market with a single issuer.
- A-/A3 Debt Securities or higher No more than 3 percent of an investment manager's assets at market with a single issuer.
- **BBB-/Baa3 Debt Securities or higher** No more than 2 percent of an investment manager's assets at market with a single issuer.
- **Debt Securities** No individual holding will constitute more than 10 percent of the fair value of outstanding debt of a single issuer with the exception of the U.S. Government or its agencies, or collateralized mortgage obligations.

As of December 31, 2018, URS had no single issuer investments that exceeded the above guidelines.

## **Credit Risk of Debt Securities**

URS expects its domestic debt securities investment managers to maintain diversified portfolios by sector and by issuer using the following guidelines:

- U.S. Government and Agency Securities no restriction.
- Total portfolio quality will maintain a minimum overall rating of "A".
- Securities with a quality rating of below BBB- are considered below investment grade. No more than 5 percent of an investment manager's assets can be below investment grade and no more than 1 percent of an investment manager's assets can be with a single below investment grade issuer. No more than 15 percent of an investment manger's assets can be below investment grade.
- Upon approval, a domestic debt securities investment manager may invest up to 10 percent of the portfolio in non-U.S. dollardenominated bonds.

The global debt securities investment managers may hold up to 25 percent of the fair value of their portfolios in securities rated below investment grade (below BBB-/Baa3). The remaining assets will have on average an investment grade rating. International debt securities investment managers may hold up to 20 percent of the fair value of their portfolios in securities rated below investment grade (below BBB-/Baa3). The remaining assets will have an investment grade rating.

URS's weighted quality rating average of the global debt securities, excluding pooled investments, as of December 31, 2018, was A+, and the fair value of below grade investments was \$99.411 million or 1.87 percent.

The government mortgage-backed securities in URS that are not rated include \$250 thousand Federal Home Loan Mortgage Corporation and \$632 thousand of Federal National Mortgage Association securities, which are implicitly guaranteed by the U.S. government.

(Notes continue on next page.)

## Notes to the Financial Statements

## **Foreign Currency Risk**

URS expects the International Securities Investment Managers to maintain diversified portfolios by sector and by issuer using the following guidelines:

International investment managers invest in fixed income • instruments and equity instruments of corporations

headquartered outside of the United States unless specifically authorized within the investment managers' contract.

- Domestic investment managers are allowed to invest in international corporations traded in American Depository Receipts (ADRs).
- Portfolios should be adequately diversified to limit foreign currency and security risk.

Risk of loss arises from changes in currency exchange rates. URS's exposure to foreign currency risk is shown in the table below.

Growth	\$	1,010,106
Real Assets		439,354
Income		796,627
Defensive		324,621
Total Investments	\$	2,570,708

Trust Lands investment securities are stated at fair value, which is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between two market participants at the measurement date. Purchase and sale transactions are recorded on the trade date.

## **Fair Value Measurements**

Trust Lands measures and records investments using fair value measurement guidelines established by generally accepted accounting principles. These guidelines recognize a three-tiered fair value hierarchy, as follows:

- Level 1: Quoted Prices in Active Markets for Identical Assets.
- Level 2: Significant Other Observable Inputs.
- Level 3: Significant Unobservable Inputs.

In instances where inputs used to measure fair value fall into different levels in the fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset or liability. Securities (cash, debt and equity securities, including registered investment companies/mutual funds with daily liquidity holding such securities) in the Investment Thematic categories classified in Level 1 are valued using prices quoted in active markets for those securities.

Securities (debt and equity securities, including derivative instruments and Trust Lands' proportionate share of securities held in commingled vehicles with regular liquidity which hold such securities) in the Investment Thematic categories classified in Level 2 are valued using the following approaches: Mid Evaluation, Bid Evaluation and Theory (a theoretical price calculated by applying a standardized formula to derive a price from a related security).

Securities (debt and equity securities, including derivative securities and the Trust Lands' proportionate share of securities held in commingled vehicles with regular liquidity holding such securities) in the Investment Thematic categories classified in Level 3 are valued using the following approaches: Bid Evaluation and other pricing indications which may be unobservable or with limited volume. Bid evaluations may include market quotations, yields, maturities, call features and ratings. Debt securities classified in Level 3 are valued and priced using proprietary information, single source pricing and/or may have nominal value. Equity securities classified in Level 3 are valued with last trade data having limited trading volume.

Investments that are measured at fair value using the net asset value (NAV) per share (or its equivalent) as a practical expedient are not classified in the fair value hierarchy. Trust Lands has determined the fair value of these investments using the NAV per share of the investments (or its equivalent) as reported in current period audited statements of the manager, prior period audited statements of the manager adjusted for subsequent calls and distributions, current period unaudited statements or estimates provided by the underlying investments using recent observable transaction information for similar investments. The objectives and valuation approach for investments that are measured at fair value using the NAV per share (or its equivalent) as a practical expedient are more fully described below.

At June 30, 2019, Trust Lands had the following recurring fair value measurements:

Total Investments Measured at NAV	\$	1,179,507	\$	327,466							

The description of underlying holdings and valuation methodologies for investments measured at the NAV, detailed above, are described further as follows:

Growth–International Equity: Consists of one investment in a limited partnership with equity investments and one investment in units of a pooled investment fund. The fair values of the investments in this type have been determined using the NAV per share (or its equivalent) of Trust Lands' investments held or ownership interest in partners' capital. Growth–Private Equity: Consists of eight investments in private equity limited partnerships. Generally speaking, the types of strategies included in this portfolio include venture capital, growth equity, opportunistic real estate equity, buyouts and special situations. These investment commitments were made in 2016 onward and have an approximate life in excess of 10 years and are considered illiquid. Redemptions are restricted over the life of the partnership. During the life of the partnership, distributions are received as underlying partnership investments are realized. Trust Lands has no plans to liquidate the total portfolio. As of June 30, 2019, it is probable that all the investments in this type would be sold at an amount different from the NAV per share (or its equivalent) of Trust Lands' ownership interest in partners' capital.

Real Assets–Public Real Assets: consists of one investment in a preferred equity investment in a Master Limited Partnership (MLP) and associated investment strategies. The fair value of the investment in this type has been determined using the NAV per share (or its equivalent) of Trust Lands' ownership interest in partners' capital.

Real Assets - Private Real Estate: Consists of eleven investments in private real estate limited partnerships. Generally speaking, the types of strategies included in this portfolio include core and valueadded property interests. These investment commitments were made over a period ranging from 2008 onward and have an approximate life in excess of 10 years and are therefore considered illiquid. Redemptions are restricted over the life of the partnership. During the life of the partnership, distributions are received as underlying partnership investments are realized. Trust Lands has no plans to liquidate the total portfolio. As of June 30, 2019, it is probable that all the investments in this type would be sold at an amount different from the NAV per share (or its equivalent) of Trust Lands' ownership interest in partners' capital. This category also includes one investment in pooled investment funds with a focus on real estate property and property income. The fair value of the investment in this type have been determined using the NAV per share (or its equivalent) of Trust Lands' investments ownership interest in partners' capital.

Real Assets – Private Real Assets: Consists of four investments in limited partnerships. Generally speaking, the types of strategies included in this portfolio include infrastructure/power generation and opportunistic natural resource investments, including coinvestments. These investment commitments were made over a period ranging from 2016 onward and have an approximate life in excess of 10 years and are therefore considered illiquid. Redemptions are restricted over the life of the partnership. During the life of the partnerships distributions are received as underlying partnership investments are realized or co-investment holdings are sold. Trust Lands has no plans to liquidate the total portfolio. As of June 30, 2019, it is probable that all the investments in this type would be sold at an amount different from the NAV per share (or its equivalent) of the Trust Lands' ownership interest in partners' capital.

Income – Credit: Consists of two investments in limited partnerships with underlying credit/securitized fixed income investments and associated investments. The fair value of the investment in this type has been determined using the NAV per share (or its equivalent) of the Trust Lands' ownership interest in partners' capital.

Income – Securitized: Consists of four investments in limited partnerships with underlying lower-quality credit/securitized fixed income investments and associated strategies. The fair value of the investment in this type has been determined using the NAV per share (or its equivalent) of Trust Lands' ownership interest in partners' capital.

Income – Non US: Consists of one investment in a limited partnership with underlying global derivative instruments and associated strategies. The fair value of the investment in this type

has been determined using the NAV per share (or its equivalent) of Trust Lands' ownership interest in partners' capital.

Income – Insurance-Linked Securities: Consists of four investments in limited partnerships with underlying insurance-linked securities investments and associated strategies. The fair value of the investments in this type have been determined using the NAV per share (or its equivalent) of the Trust Lands' ownership interest in partners' capital.

Income – Private Debt: Consists of five investments in limited partnerships. Generally speaking, the types of strategies included in this portfolio include securitized credit, asset-backed/ collateralized loan obligation, mezzanine debt and equity, distressed debt/special situations, co-investments and related investments. These investment commitments were made over a period ranging from 2016 onwards and have an approximate life, including lock-ups of three to nearly 10 years and are therefore considered illiquid. Trust Lands has no plans to liquidate the total portfolio. As of June 30, 2019, it is probable that all the investments in this type would be sold at an amount different from the NAV per share (or its equivalent) of Trust Lands' ownership interest in partners' capital.

Defensive – Systematic Convexity: Consists of one investment in a limited partnership with underlying investments in Commodity Trading Advisor/Systematic and associated investment strategies. The fair value of the investment in this type has been determined using the NAV per share (or its equivalent) of Trust Lands' investments held or ownership interest in partners' capital.

## **Interest Rate Risk**

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. Trust Lands manages the exposure to fair value loss arising from increasing interest rates through prudent deployment, management, and oversight of investments with exposure to interest rate sensitivity. Trust Lands does not have a formal policy for interest rate risk.

As of June 30, 2019, Trust Lands' debt security investments (including the underlying portfolios of indirectly held investments, where available) had the following weighted average maturities:

## Trust Lands (permanent fund) Debt Securities Investments June 30, 2019

Weighted

(dollars expressed in thousands)

Investment Category	Fair Value	Average Maturity (Years)

Total Debt Securities Investments .	\$ 397,325	10.64

As of June 30, 2019, Trust Lands held \$418.856 million in seven investments with a fixed income (or related) investment emphasis

for which Weighted Average Maturity details were unavailable and not evaluated. These investments included Bank Loan investment funds with other assets held, and hedge fund strategies.

## **Credit Risk of Debt Securities**

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. Trust Lands manages the exposure to fair value loss arising from credit risk through prudent deployment, management, and oversight of investments. Trust Lands does not have a formal policy for credit risk.

As of June 30, 2019, the fair value of Trust Lands' debt security investments with exposure to credit risk had the following credit quality ratings (S&P rating is primary, if not available or not rated by S&P, corresponding Moody's rating is substituted).

Total Debt Securities Investments \$ 397,325

As of June 30, 2019, the Trust Funds held \$37.872 million in the Northern Trust Institutional Funds Treasury Portfolio - Premier Class, an AAA-rated money market fund.

## **Custodial Credit Risk**

For an investment, custodial credit risk is the risk that, in the event of the failure of the counterparty, Trust Lands will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. Trust Lands does not have a formal policy for custodial credit risk. Investments are registered investments or held by Trust Lands, or by Trust Land's agent in Trust Land's name. The State Treasurer is the custodian of investments of Trust Lands, and the investments are held under a custodial safekeeping agreement with the Northern Trust Company.

As of June 30, 2019, the following investments, including accrued income/expense, have custodial credit risk:

- Cash and Cash Equivalents The \$1.732 million frictional cash and cash equivalents subject to custodial credit risk are in foreign banks in the Trust Lands' name. Because it is in foreign banks, it is subject to custodial credit risk. Trust Lands does not have an investment policy regarding custodial credit risk for frictional cash in foreign banks.
- Other Assets The \$625.417 million other assets represent

the investments, including accrued income/expense, that have custodial credit risk which has not been determined.

## **Concentration of Credit Risk**

Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer. Trust Lands manages exposure to fair value loss arising from concentrations of credit risk through prudent deployment, management, and oversight of investments. Trust Lands does not have a formal policy for concentrations of credit risk.

As of June 30, 2019, Trust Lands does not hold any credit positions exceeding 5 percent of the total portfolio.

## **Foreign Currency Risk**

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or a deposit. Trust Lands manages exposure to fair value loss arising from foreign currency risk through prudent deployment, management, and oversight of investments. The Trust Lands does not have a formal policy for foreign currency risk. Trust Lands' exposure to foreign currency (inclusive of pending foreign exchange purchases and sales) as of June 30, 2019, is as follows:

	Trust La	nds

## D. Discrete Component Units

## **Custodial Credit Risk – Deposits**

The custodial credit risk for deposits is the risk that, in the event of a bank failure, the discrete component units' deposits may not be recovered.

The discrete component units follow the Utah Money Management Act by making deposits only in qualified depository institutions or in foreign depository institutions in accordance with rules of the State Money Management Council. Deposits with qualified depository institutions in excess of FDIC insurance limits amount are uninsured and uncollateralized. Deposits are neither collateralized nor are they required to be by state statute. The deposits for the discrete component units at June 30, 2019, were \$312.874 million. Of these, \$251.124 million were exposed to custodial credit risk as uninsured and uncollateralized and \$52.717 million were exposed to custodial credit risk as uninsured and collateralized with securities held by the pledging financial institution's trust department or agent but not in the discrete component units' names.

## Investments

The discrete component units follow the applicable investing criteria described above for the primary government, with the exception of the Public Employees Health Program, which is exempt from the Money Management Act.

The Public Employees Health Program is administered by the Utah State Retirement Board (Board). Investments are in accordance with the "prudent person rule."

College and university funds from gifts, private grants, and the corpus of funds functioning as endowments are invested according to the requirements of the Uniform Prudent Management of Institutional Funds Act (UPMIFA) and State Board of Regents

Management and Reporting of Institutional Investments (Rule 541), or separate endowment investment policies, which have been approved by their Board of Trustees and by the Board of Regents. The UPMIFA and Rule 541 allow the colleges and universities to invest endowment funds (including gifts, devises, or bequests of property of any kind from any source) in any investments allowed by the Money Management Act or any of the following subject to satisfying certain criteria: mutual funds registered with the Securities and Exchange Commission; investments sponsored by the Common Fund; any investment made in accordance with the donor's directions in a written instrument; investments in corporate stock listed on a major exchange (direct ownership); and any alternative investment funds that derive returns primarily from high yield and distressed debt (hedged or non-hedged), private capital (including venture capital and private equity), natural resources, and private real estate assets or absolute return and long/short hedge funds.

The discrete component units' investments at June 30, 2019, are presented on the next page. The investments are presented at fair value and by investment type with debt securities presented by maturity.

#### **Fair Value Measurements**

The State categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. These guidelines recognize a three-tiered fair value hierarchy as follows:

- Level 1: Inputs are quoted prices for identical investments in active markets.
- Level 2: Observable inputs other than quoted market prices.
- Level 3: Unobservable inputs.

The following table presents the recurring fair value measurements at June 30, 2019, for the discrete component units.

(Table on next page)

Debt securities and Equity securities classified in Level 1 are valued using prices quoted in active markets for those securities. The Domestic Equity securities in Level 1 are valued using prices provided by the fund company.

Securities classified in Level 2 are valued using the following approaches:

U.S. Treasuries, U.S. Agencies, and International Equity:

Valued using quoted prices for identical securities in markets that are not active or using a matrix pricing technique that values securities based on their relationship to benchmark quoted prices.

Corporate Debt, Municipal/Public Bonds, Negotiable Certificates of Deposit, and Equity Securities:

Valued using quoted prices for similar securities in active markets or using a matrix pricing technique that values securities based on their relationship to benchmark quoted prices.

Repurchase Agreement–U.S. Agency:

Valued at cost due to very short-term maturity.

Asset-backed Securities:

Valued using a matrix pricing technique that values securities based on their relationship to benchmark quoted prices.

Money Market Mutual Funds, Bond Mutual Funds, and Domestic Equity:

- Valued using published fair value per share (unit) for each fund. Government Mortgage-backed and Asset-backed:
- Valued using a matrix pricing technique that values securities ٠ based on their relationship to benchmark quoted prices.

## Notes to the Financial Statements

Unit Investment Trusts:

- Valued using average published fair value of investments included in the UIT.
- Utah Public Treasurers' Investment Fund:
- Valued using the application of the June 30, 2019, fair value factor, as calculated by the Utah State Treasurer, to the June 30, 2019 balance.

Securities classified in Level 3 are valued using the following approaches:

U.S. Agencies, Corporate Debt, and Government Mortgage-backed:

• Valued using discounted cash flow techniques.

Asset-backed Securities and Non-government-backed CMOs:

- Valued using consensus pricing.
- Bond Mutual Funds, Domestic Equity, and Equity Securities:
- Valued using various sources such as issuer, investment manager, client, etc., or default price if price is not provided.
- Real Estate:Valued using current real estate market values.

Debt Securities Lending Collateral classified in Level 2 are valued using market approaches that consider, as applicable, benchmark interest rates or foreign exchange rates.

## Investments Measured at the Net Asset Value (NAV)

The State's colleges and universities, (discrete component units) administer endowment portfolios of a long-term nature. The strategy, within the constraints of the asset allocation model, is to add assets with higher return expectations in order to outweigh their short-term volatility risk. As a result, endowment investments will typically be invested in equity or equity-like securities, including real assets (real estate, natural resources, and infrastructure). Real assets also are expected to provide the added benefit of inflation protection. The fair values of these types of investments are measured at the NAV per share (or its equivalent) as they generally do not have readily obtainable fair values and often take the form of limited partnerships. The NAV is based on the values provided by the partnerships as well as their audited financial statements. If June 30 statements are available, those values are used preferentially. However, some partnerships have fiscal years ending at other than June 30. If June 30 valuations are not available, the value is progressed from the most recently available valuation taking into account subsequent capital calls and distributions. The following table presents the unfunded commitments, redemption frequency (if currently eligible), and the redemption notice period for the alternative investments measured at NAV:

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment.

The discrete component units' policy in general for managing interest rate risk is the same as described above for the primary government and endowment funds complying with the State's Money Management Act or the UPMIFA and Rule 541, as applicable. For non-endowment funds, Section 51-7-11 of the Money Management Act requires that the remaining term to maturity of investments may not exceed the period of availability of the funds to be invested. The Act further limits the remaining term to maturity on all investments in commercial paper, bankers' acceptances, fixed-rate negotiable deposits, and fixed-rate corporate obligations to 270 days - 15 months or less. The Act further limits the remaining term to maturity on all investments in obligations of the United States Treasury; obligations issued by U.S. governmentsponsored enterprises; and bonds, notes, and other evidence of indebtedness of political subdivisions of the State to 10 years for institutions of higher education. In addition, variable rate negotiable deposits and variable rate securities may not have a remaining term to final maturity exceeding three years. For endowment funds, Rule 541 is more general, requiring only that investments be made as a prudent investor would, by considering the purposes, terms, distribution requirements, and other circumstances of the endowments and by exercising reasonable care, skill, and caution.

For the fixed income portfolio, the Public Employees Health Program's (PEHP) (major discrete component unit) policy to manages its exposure to fair value loss arising from increasing interest rates is that the investment manager's portfolio will have an effective duration between 75 - 125 percent of the effective duration of the appropriate index.

Duration is a measure of a debt investment's exposure to fair value changes arising from changes in interest rates. It uses the present value of cash flows, weighted for those cash flows as a percentage of the investments full price. PEHP compares an investment's effective duration against the Barclays U.S. Intermediate Aggregate Bond Index. The allowable duration range was 4.40 to 7.34 and the portfolio was within the policy guidelines.

## **Credit Risk of Debt Securities**

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. The discrete component units' policy for reducing its exposure to credit risk is to comply with the State's Money Management Act, the UPMIFA, and Rule 541, as previously discussed. The discrete component units' debt investments as of June 30, 2019, were rated by Standard and Poor's and/or an equivalent nationally recognized statistical rating organization and the ratings are presented below using Standard and Poor's rating scale.

(Table on next page)

## Notes to the Financial Statements

## Custodial Credit Risk

Custodial credit risk for investments is the risk that, in the event of a failure of the counter party, the discrete component units will not be able to recover the value of the investment or collateral securities that are in the possession of an outside party. The discrete component units do not have a formal policy for custodial credit risk.

The various discrete component units' investments at June 30, 2019, were held by the discrete component unit or in the name of the discrete component unit by the discrete component unit's custodial bank or trustee, except the following, which were uninsured, were not registered in the name of the discrete component unit, and were held by other entities, as listed below (expressed in thousands):

Counterparty

U.S. Treasuries	\$ 108,704
U.S. Agency – full faith	\$ 375
U.S. Agencies	\$ 1,954,566
Corporate Debt	\$ 294,500
Municipal/Public Bonds	\$ 23,402
Unit Investment Trusts	\$ 6,680
Domestic Equity	\$ 1,313
Equity Securities	\$ 40,016
Investments Measured at the Net Asset Value	\$ 133
Counterparty's Trust Department or Agent	
U.S. Treasuries	\$ 3,253
U.S. Agencies	\$ 69,867
Corporate Debt	\$ 133,589

## **Concentration of Credit Risk**

Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer. Except for Public Employees Health Program (PEHP) (major discrete component unit), the discrete component units' policy for reducing this risk of loss is the same as described above for the primary government funds complying with the State's Money Management Act or as applicable for endowments the UPMIFA, Rule 541, or separate endowment investment policies, which have been approved by their boards of trustees and by the Board of Regents. Rule 17 of the Money Management Council limits non-endowment fund investments in a single issuer of commercial paper and corporate obligations to 5-10 percent depending upon the total dollar amount held in the portfolio. For endowment funds, Rule 541 requires that a minimum of 25 percent of the overall endowment portfolio be invested in fixed income or cash equivalents. Also, the overall endowment portfolio cannot consist of more than 75 percent

equity investments. Rule 541 also limits investments in alternative investment funds to between 0 and 30 percent based on the size of the endowment fund.

PEHP's policy limits the amount that may be invested in any one issuer to between 2 and 5 percent, depending on the credit rating of the security. There is no limit to investments in U.S. Government Securities. All investments are within policy limits.

The University of Utah held more than 5 percent of its total investments in the Federal Home Loan Bank, the Federal Home Loan Mortgage Corporation, the Federal Farm Credit Bank, and the Federal Agricultural Mortgage Corporation. These investments represent 24.70 percent, 7.60 percent, 6.40 percent, and 6.10 percent, respectively, of the University's total investments.

Utah State University held more than 5 percent of total investments in securities of the Federal Home Loan Bank and Federal Farm Credit Bank. These investments represent 7.91 percent and 8.78 percent respectively of the total investments.

Salt Lake Community College held more than 5 percent of total investments in securities of Federal Home Loan Mortgage Corporation, Federal Home Loan Bank, Federal Farm Credit Bank, Federal National Mortgage Association, and Federal Agriculture Mortgage Corporation. These investments represent 12.40 percent, 10.70 percent, 8.30 percent, 7.60 percent, and 6.90 percent, respectively, of the College's total investments. These investments represent 45.90 percent of the Colleges total investments.

## Foreign Currency Risk

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or a deposit. The discrete component units do not have a formal policy to limit foreign currency risk.

University of Utah's exposure to foreign currency risk is \$10.959 million in private real estate investments that are held in Euro currency denomination.

Dixie State University held investments in international equity funds of \$1.935 million, and as such, no foreign currency risk is presented.

## E. Securities Lending

Utah Retirement Systems (URS) (pension trust and defined contribution plans), Public Employees Health Program (PEHP)

(major discrete component unit) and Trust Lands (permanent fund) participate in security lending programs as authorized by their Boards. Under these programs, securities are transferred to an independent broker or dealer in exchange for collateral in the form of cash, government securities, and for URS and Trust Lands, irrevocable bank letters of credit equal to approximately 102 percent of the fair value of the domestic securities on loan and 105 percent of the fair value of the international securities on loan, and for PEHP 102 percent of the fair value of the domestic securities on loan, with simultaneous agreements to return the collateral for the same securities in the future. For all three state entities, their custodial bank is the agent for each of their securities lending programs. URS securities under loan are maintained in the financial records, and corresponding liabilities are recorded for the market value of the collateral received. PEHP and Trust Lands securities are classified as investments. For the state entities, a corresponding liability is recorded for the market value of the collateral received. For PEHP and Trust Lands, under provision of GASB Statement 28, collateral which cannot be pledged or sold is not recorded as investments nor is the related liability recorded in the financial statements. Pledged non-cash collateral was \$1.996 million and \$53.962 million for PEHP and Trust Lands, respectively.

At yearend, URS, PEHP and Trust Lands had no credit risk exposure to borrowers because the collateral exceeded the amount borrowed. The securities on loan at yearend for the entities were \$993.228 million for URS, \$2.792 million for PEHP, and \$126.953 million for Trust Lands. Collateral received for those securities on loan was \$1.058 billion for URS, \$2.923 million for PEHP, and \$131.712 million for Trust Lands. Under the terms of the lending agreement, all three state entities are indemnified against loss should the lending agent be unable to recover borrowed securities and distributions due to borrower insolvency or failure of the lending agent to properly evaluate the credit worthiness of the borrower. In addition, they are indemnified against loss should the lending agent fail to demand adequate and appropriate collateral on a timely basis. All securities loaned can be terminated on demand by either the state entity or the borrower. Cash collateral is invested in the lending agent's shortterm investment pool.

Regarding URS and PEHP, the short-term investment pool guidelines specify that a minimum of 20 percent of the invested cash collateral is to be available each business day and that the dollar-weighted average maturity of holdings should not exceed 60 days. The relationship between the maturities of the short-term investment pool and each of the state entities' loans is affected by the maturities of the securities loans made by other entities that use the agent's pool, which the state entities cannot determine. Because the securities lending collateral is in a pool maintained by the custodial bank, the state entities do not have the ability to pledge or sell the securities, and it is not necessary to report the total income and expenses of securities lending. Trust Lands' average term of securities loans was 74 days.

## F. Derivative Instruments

## **Utah Retirement Systems**

The Utah Retirement Systems (URS) (pension trust and defined

contribution plans) invests in derivative instruments as authorized by Board policy. Derivative instruments are financial arrangements between two parties whose payments are based on, or "derived" from, the performance of some agreed-upon benchmark. All derivative instruments are considered investments. The fair value of all derivative instruments is reported in the Statements of Fiduciary Net Position–Pension and Other Employee Benefit Trust Funds. Within the investment asset class, swaptions are recorded in debt securities. By policy, portfolio liabilities associated with investments will be backed by cash equivalents or deliverable securities. URS does not have a policy regarding master netting arrangements. At December 31, 2018, URS had five types of derivative instruments: futures, currency forwards, options, swaps, and Synthetic Guaranteed Investment Contracts (SGIC).

Futures represent commitments to purchase (asset) or sell (liability) securities at a future date and at a specified price. Futures contracts are traded on organized exchanges (exchange traded) thereby minimizing URS' credit risk. The net change in the futures contracts value is settled daily in cash with the exchanges. Net gains or losses resulting from the daily settlements are included with trading account securities gains in the Statement of Changes in Fiduciary Net Position. At December 31, 2018, URS' investments had the following notional futures balances as shown in the following table:

Utah Retirement Systems (pension trust and defined contribution plans) Futures — Notional Market Value At December 31, 2018 (expressed in thousands)

Short		(728,552)		(62,298)					
Total Futures	\$	(18,597)	\$	(18,971)					

Currency forwards represent forward foreign exchange contracts that are entered into in order to hedge the exposure to changes in foreign currency exchange rates on the foreign currency denominated portfolio holdings. A forward foreign exchange contract is a commitment to purchase or sell a foreign currency at a future date at a negotiated forward rate. The gain or loss arising from the difference between the original contracts and the closing of such contracts is included in net realized gains or losses on foreign currency related transactions in the Combining Statement of Fiduciary Net Position–Pension. At December 31, 2018, URS investments included the following currency forwards balances as shown in the following table:

(Table on next page)

period. The option's price is usually a small percentage of the underlying asset's value. As a writer of financial options, URS receives a premium at the outset of the agreement and bears the risk of an unfavorable change in the price of the financial instrument underlying the option. As a purchaser of financial options, URS pays a premium at the outset of the agreement and the counterparty bears the risk of an unfavorable change in the price of the financial instrument underlying the option.

URS has entered into various inflation, credit default, and interest rate swap agreements in an attempt to manage their exposure to inflation, credit, and interest rate risk. Interest rate and inflation risk represents the exposure to fair value losses arising from the future changes in prevailing market interest rates. Credit risk is an investor's risk of loss arising from a borrower who does not make payments as promised. Swaps represent an agreement between two or more parties to exchange sequences of cash flows over a period in the future. In the most common type of interest rate swap arrangement, one party agrees to pay fixed interest payments on designated dates to a counter party who, in turn, agrees to make return interest payments that float with some reference rate. The real estate interest rate swaps allowed URS to effectively convert most of its long-term variable interest rate credit facility loans into fixed interest rate loans, thereby mitigating some of its interest rate risk. All swap instruments contain collateral clauses. Gains and losses on swaps are determined based on fair values and are recorded in the Combining Statement of Fiduciary Net Position-Pension. Swap fair values are determined by an independent third party.

As of December 31, 2018, URS' investments had the swap market value balances as shown in the following table:

Derivative instruments that are exchange traded are not subject to credit risk. No derivative instruments held are subject to custodial credit risk. The maximum loss that would be recognized as of December 31, 2018, if all counterparties fail to perform as contracted, was \$1.632 billion. Derivative instrument credit risk at fair value is shown in the table below.

	Utah Retire	nent System	s

This maximum exposure is reduced by \$1.644 billion of liabilities, resulting in \$0 exposure to credit risk. Credit ratings for the wrap contracts associated with the Synthetic Guaranteed Investment Contracts (SGICs) are noted in a subsequent table. As of December 31, 2018, the counterparties' credit ratings for currency forwards, options, and swaps are subject to credit risk.

URS Defined Contribution Plans members are able to participate in SGICs. The SGICs are fully benefit responsive, which means that URS is prohibited from assigning and selling the contract or its proceeds to a third party without the consent of the issuer. Prospective interest crediting rate adjustments are provided to plan participants. The SGICs provide assurance that the probability of future rate adjustments resulting in an interest crediting rate less than zero is remote. The underlying investments are high credit quality averaging A+ and therefore credit loss is remote. The terms of the SGICs require all plan participants to initiate transactions within the fund at contract value. The contract value is the fair value (cost plus accrued interest). The fair value of these contracts as of December 31, 2018, was \$950.049 million and the market value was \$944.737 million. Credit ratings for the wrap contracts associated with the SGICs are also noted below.

## **Trust Lands**

Trust Lands (permanent fund) invests in derivative instruments through external investment managers retained by the Board and subject to investment management agreements and other policy requirements. Derivative instruments are financial arrangements between two parties whose payments are based on, or "derived" from, the performance of some agreed-upon benchmark. All derivative instruments are considered investments. The fair value of all derivative instruments is reported in the Statement of Net Position. Trust Lands does not have a formal policy for derivative instruments.

As of June 30, 2019, Trust Lands had the following exposure types classified within Derivative Instruments: Equity Rights/Warrants, Currency Forwards, Options, Swaps, and Futures as shown in the table below.

Trust Lands (permanent fund) Derivative Financial Instruments June 30, 2019 (expressed in thousands)									
Risk Type	Ν	Gross otional Value	Ma	et Fair arket alue	Fair	ıbility Market 'alue		nings osses)	
Equity Rights/Warrants	\$	388	\$	30	\$		\$	36	
Currency Forwards		900		_		(6)		106	
SWAPs		8,900		206		(473)		(27)	
Futures		5,790		_		_		547	
Total	\$	15,978	\$	236	\$	(479)	\$	662	

Equity Rights are rights given to existing stockholders to purchase newly issued shares in proportion to their holdings at a specific date. Equity Warrants are certificates entitling the holder to acquire shares of stock at a certain price within a stated period. Warrants often are made part of the issuance of bonds or preferred or common stock. The balances of equity rights/warrants are included in the Statements of Changes in Net Position.

Currency forwards represent forward foreign exchange contracts that are entered into in order to hedge the exposure to changes in foreign currency exchange rates on the foreign currency denominated portfolio holdings. A forward foreign exchange contract is a commitment to purchase or sell a foreign currency at a future date at a negotiated forward rate. The gain or loss arising from the difference between the original contracts and the closing of such contracts is included in the net realized gains or losses on foreign currency related transactions in the Statements of Changes in Net Position.

Options represent or give buyers the right, but not the obligation, to buy (call) or sell (put) an asset at a preset price over a specified period. The option's price is usually a small percentage of the underlying asset's value. Trust Lands has exposure to Options related to Interest Rates and Swaps. As a writer of financial options through external investment manager portfolios (as authorized), Trust Lands receives a premium at the outset of the agreement and bears the risk of an unfavorable change in the price of the financial instrument underlying the option. As a purchaser of financial options through external investment manager portfolios (as authorized), Trust Lands pays a premium at the outset of the agreement and the counter-party bears the risk of an unfavorable change in the price of the financial instrument underlying the option.

Swaps represent an agreement between two or more parties to exchange sequences of cash flows over a period in the future. In the most common type of interest rate swap arrangement, one party agrees to pay fixed interest payments on designated dates to a counterparty, who in turn agrees to make return interest payments that float with some reference rate. Gains and losses on swaps are determined based on market values and are recorded in the Statements of Changes in Net Position. Swap market values are determined by an independent third party.

Futures represent a financial contract obligating the buyer to purchase an asset or the seller to sell an asset, such as a physical commodity or a financial instrument, at a predetermined future date and price. Futures contracts are valued at their last reported sales price as of measurement date and are included in the Statements of Changes in Net Position.

## Student Assistance Program

The following are disclosures for derivative instruments held by Student Assistance Program (major enterprise fund).

Objective – In order to protect against the potential of rising interest rates on its variable rate debt, the Student Assistance Program Board entered into an interest rate exchange (swap) agreement relating to the Board's student loan revenue bonds, Series 2010 EE ("Series 2010 Bonds") on December 21, 2010. The purpose of the swap is to create a variable rate cost of funds for the Series 2010 Bonds that will be lower than the variable rate cost achievable in the cash bond market. The Board accounts for the swap agreement as a fair value hedging derivative instrument and recognizes changes in fair values on the statement of Net Position as an asset or liability with a related deferred inflow or outflow of resources respectively. The terms of the swap agreement include:

Trade Date:	December 21, 2010
Effective Date	December 30, 2010
Termination Date	November 1, 2030
Initial Notional Amount	\$364,150,000
June 30, 2019 Notional Amount.	\$178,100,000
Board Pays Floating	3 Month LIBOR + 1.64905 percent
Counterparty Pays Fixed	Stepped fixed-rates ranging from 4.664 to 5.000 percent
Payment Dates	The 1 st day of May and November

Changes in the fair value of the swap agreement and the ending fair value of the swap agreement are summarized below:

Student Assistance Program Change in Fair Value For Fiscal Years Ending June 30 (expressed in thousands)									
	Fa	ir Value	Fai	ir Value	Ch	ange in			
Derivative Instrument	June 30, 2019 June 30, 2018 Fair Value								
Interest Rate Exchange	\$ 10,293 \$ 3,618 \$ 6,6								

The projected net cash flows of the swap agreement are summarized below (expressed in thousands):

	Counterpa	arty Swap	rty Swap Payment Interest					
Fiscal Year	То	From	Net	Payments to Bondholders	Total Payments			
2020	\$ (6,618)	\$ 8,110	\$ 1,492	\$ (8,110)	\$ (6,618)			
2021	(4,415)	5,410	995	(5,410)	(4,415)			
2022	(2,754)	3,375	621	(3,375)	(2,754)			
2023	(894)	1,095	201	(1,095)	(894)			
2024	(117)	145	28	(145)	(117)			
Total	\$(14,798)	\$18,135	\$ 3,337	\$ (18,135)	\$ (14,798)			

Swaps are not normally valued through exchange-type markets with easily accessible quotation systems and procedures. The fair value was calculated using information obtained from generally recognized sources with respect to quotations, reporting of specific transactions and market conditions and based on accepted industry standards and methodologies. The swap agreement is considered to be Level 3 for GASB Statement 72 purposes (the different levels are discussed in <u>Note 3.A.</u> Credit Risk – The risk of a change in the credit quality or credit rating of the Board and/or its counterparty. The counterparty's long-term ratings are "Aa2/Aa2", "AA-/A+" and "AA/AA-" by Moody's Investors Service, Standard & Poor's, and Fitch Ratings, respectively.

The Board is exposed to credit risk on hedging derivative instruments that are in asset positions. To minimize its exposure to loss related to credit risk, it is the Board's policy to require counterparty collateral posting provisions in its non-exchangetraded hedging derivative instruments. These terms require full collateralization of the fair value of hedging derivative instruments in asset positions (net of the effect of applicable netting arrangements) should the counterparties' short-term and long-term credit ratings fall below "A-1" and "A," respectively, as issued by Standard & Poor's, or below "Prime-1" and "A2," respectively, as issued by Moody's Investors Service. Collateral posted is to be in the form of cash, U.S. Treasury securities or agency securities held by a third-party custodian. The Board has never failed to access collateral when required.

It is the Board's policy to enter into netting arrangements whenever it has entered into more than one derivative instrument transaction with a counterparty. Under the terms of these arrangements, should one party become insolvent or otherwise default on its obligations, close-out netting provisions permit the non-defaulting party to accelerate and terminate all outstanding transactions and net the transactions' fair values so that a single sum will be owed by, or owed to, the non-defaulting party.

Interest Rate Risk – The risk that the debt service costs associated with variable rate debt increases and negatively affects coverage ratios and cash flow margins. The Board is exposed to interest rate risk; as the 3-month LIBOR rate increases, the net payment on the swap agreement increases.

Basis Risk – The risk that arises when variable rates or prices of a swap agreement and a hedged item are based on different interest rate indexes. Because the swap agreement requires the Board to pay a variable rate to the counterparty, and the Board is receiving a fixed-rate payment in return, basis risk is not applicable.

Termination Risk – The risk that the swap must be terminated prior to its stated final cash flow date. Purposes for termination include the deterioration of the Board's own credit and the inability of the Board to obtain a replacement transaction with substantially similar terms. In such a circumstance, the Board would owe, or be owed, a termination payment. No termination events related to the swap agreement have occurred as of June 30, 2019.

Rollover Risk – The risk that the maturity of the swap contract is not coterminous with the maturity of the related bonds. The swap agreement and the underlying bonds have a final maturity date of November 1, 2030.

## NOTE 4. INVESTMENT POOL

The Utah State Treasurer's Office operates the Utah Public Treasurers' Investment Fund (PTIF). The PTIF is available for investment of funds administered by any Utah public treasurer. Participation is not required and neither is a minimum balance nor a minimum/maximum transaction required. State agencies and funds that are authorized to earn interest also invest in the PTIF as an internal investment pool. No separate report as an external investment pool has been issued for the PTIF.

## Notes to the Financial Statements

The PTIF is not registered with the SEC as an investment company and is not rated. The PTIF is authorized and regulated by the Utah Money Management Act, (Title 51, Chapter 7 of the Utah Code). The Act establishes the State Money Management Council, which oversees the activities of the State Treasurer and the PTIF. The Act lists the investments that are authorized which are high-grade securities and, therefore, minimizes credit risk except in the most unusual and unforeseen circumstances.

Deposits in the PTIF are neither insured nor otherwise guaranteed by the State of Utah, and participants share proportionally in any realized gains or losses on investments.

The PTIF operates and reports monthly statements to participants on an amortized cost basis. The income, gains, and losses, net of administration fees, of the PTIF are allocated to participants monthly on the ratio of the participant's share to the total funds in the PTIF

based on the participant's average daily balance. This method differs from the fair value method used to value investments in these financial statements because the amortized cost method is not designed to distribute to participants all unrealized gains and losses in the fair values of the pool's investments. The total difference between the fair values of the investments in the pool and the values distributed to the pool participants using the amortized cost method described above is reported in the net position section of the following table as unrealized gains/losses. The PTIF may maintain an interest reserve to stabilize the monthly apportionment of interest. Any balance maintained in the interest reserve is reflected in the fair value valuation factor discussed below. The PTIF allocates income and issues statements on a monthly basis. Twice a year, at June 30 and December 31, which are the accounting periods for public entities, the investments are valued at fair value, and participants are informed of the fair value valuation factor that enables them to adjust their statement balances to fair value.

The PTIF condensed financial statements, inclusive of external and internal participants along with the portfolio statistics for the fiscal year ended June 30, 2019, are shown in the tables below:

	Weighted Average Yield	Average Adjusted Maturity
Total Investment Fund	2.84%	47.67 days

#### **Deposits and Investments**

The following disclosure of deposits and investments is for the PTIF. which includes external and internal participants. These assets are also included in the Note 3 disclosures of deposits and investments for the primary government. To avoid duplication, some of the detailed information in Note 3 has not been repeated in this note.

## **Custodial Credit Risk – Deposits**

The custodial credit risk for deposits is the risk that in the event of a bank failure, the PTIF's deposits may not be recovered. The PTIF follows the Money Management Act by making deposits only in qualified financial institutions in accordance with the Act.

The deposits in the bank in excess of the insured amount are uninsured and uncollateralized. Deposits are neither collateralized nor are they required to be by state statute. The deposits for the PTIF at June 30, 2019, were \$21 million. Of those, \$20.500 million were exposed to custodial credit risk as uninsured and uncollateralized.

## Fair Value Measurements of Investments

The PTIF categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to

- measure the fair value of the asset. These guidelines recognize a three-tiered fair value hierarchy as follows:
- Level 1: Inputs are quoted prices for identical investments in active markets.
- Level 2: Observable inputs other than quoted market prices.
- Level 3: Unobservable inputs.

The following table presents the recurring fair value measurements at June 30, 2019, for the PTIF:

#### Utah Public Treasurers' Investment Fund Investments Measured at Fair Value At June 30, 2019

(expressed in thousands)

,	F		leasurements ing
Fair Value		Level 1	Level 2
\$ 15,028,926	\$	_	\$ 15,028,926
533,529		533,529	_
391,740			391,740
\$ 15,954,195	\$	533,529	\$ 15,420,666
	\$ 15,028,926 533,529 391,740	Fair Value           \$ 15,028,926         \$           533,529         391,740	Fair Value         Level 1           \$ 15,028,926         \$ —           533,529         533,529           391,740         —

Debt securities classified in Level 1 are valued using prices quoted in active markets for those securities. Other debt and securities classified in Level 2 are valued using the following approaches:

- Corporate Bonds and Notes are valued using quoted prices for identical securities in markets that are not active.
- Negotiable Certificates of Deposit and Commercial Paper are valued using quoted prices for identical or similar securities in markets that are not active.

#### **Interest Rate Risk**

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The PTIF's policy for managing interest rate risk is to comply with the State's Money Management Act. See <u>Note 3</u> for information on requirements of the Act related to interest rate risk.

The majority of the PTIF's corporate debt securities are variablerate securities, most of which reset every three months to the market interest rate. Because these securities frequently re-price to prevailing market rates, interest rate risk is substantially reduced at each periodic reset date. In the table below, variable-rate securities are presented according to the length of time until the next reset date rather than the stated maturity.

The PTIF follows the Money Management Act by investing only in securities authorized in the Act. See <u>Note 3</u> for information on authorized investments.

The PTIF investments at June 30, 2019, are presented on the following table.

#### Utah Public Treasurers' Investment Fund At June 30, 2019

(expressed in thousands)

		Ī	Investment Maturities (in years)
Investment Type	 Fair Value		Less Than 1
Debt Securities			
Corporate Bonds and Notes	\$ 15,028,926	\$	15,028,926
Money Market Mutual Funds	533,529		533,529
Commercial Paper	 391,740		391,740
Total Debt Securities Investments	\$ 15,954,195	\$	15,954,195

## **Credit Risk of Debt Securities**

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. The PTIF follows the Money Management Act as its policy for reducing exposure to investment credit risk. The PTIF's rated debt investments as of June 30, 2019, were rated by Standard and Poor's and/or an equivalent nationally recognized statistical rating organization and the ratings are presented below using the Standard and Poor's rating scale.

#### Utah Public Treasurers' Investment Fund Rated Debt Investments At June 30, 2019

## Notes to the Financial Statements

## **Custodial Credit Risk**

Custodial credit risk for investments is the risk that, in the event of a failure of the counter party, the PTIF will not be able to recover the value of the investment or collateral securities that are in the possession of an outside party. The PTIF does not have a formal policy for custodial credit risk.

The PTIF's investments at June 30, 2019, were held by the State or in the State's name by the State's custodial bank.

## **Concentration of Credit Risk**

Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer. The PTIF's policy for reducing this risk of loss is to comply with the Rules of the State Money Management Council. Rule 17 of the State Money Management Council limits investments in a single issuer of commercial paper and corporate obligations to 5 percent of the total dollar amount held in the portfolio. The State Money Management Council limitations do not apply to securities issued by the U.S. government and its agencies. The PTIF had no debt securities investments at June 30, 2019, with more than 5 percent of the total investments in a single issuer.

## NOTE 5. RECEIVABLES

Accounts receivable balances are an aggregation of amounts due from the federal government, customers, and others. Receivables from customers include charges for services to local governments, fees and fines issued by the courts and corrections, employer contributions for unemployment benefits, and receivables as a result of overpayments to individuals receiving state assistance.

The majority of receivables for Trust Lands (permanent fund) represent unsettled trades from brokers, dealers, and clearing organizations.

Receivables for Fiduciary Funds listed below represent amounts due from fiduciary funds that were reclassified as external receivables on the government-wide Statement of Net Position. Other adjustments are due to differences in the presentation and the basis of accounting between the fund financial statements and the government-wide Statement of Net Position.

Aggregated receivables for major and nonmajor discrete component units at June 30, 2019, were \$1.036 billion and \$102.175 million, respectively. These receivables are net of an allowance for doubtful accounts of \$372.527 million and \$12.048 million, respectively.

Receivables as of June 30, 2019, consisted of the following (in thousands):

Accounts payable and accrued liability balances are an aggregation of amounts due to: (I) state employees for salaries/benefits; (2) service providers for childcare, job and health services; (3) vendors, miscellaneous suppliers, brokers, dealers, and clearing organizations for unsettled investment trades (Trust Lands Fund); (4) local and federal governments for services; (5) individuals and others as a result of tax overpayments or credits issued; and (6) interest due on bonds and other obligations. Adjustments for fiduciary funds listed above represent amounts due to fiduciary funds that were reclassified as external payables on the government-wide Statement of Net Position. Other adjustments are due to differences in the presentation and the basis of accounting between the fund financial statements and the government-wide Statement of Net Position.

Due to Internal Service Funds from:	
General Fund	\$ 31,946
Education Fund	432
Transportation Fund	4,419
Nonmajor Governmental Funds	1,313
Nonmajor Enterprise Funds	1,061
Internal Service Funds	1,420
Fiduciary Funds	 29
Total due to Internal Service Funds from other funds	\$ 40,620
Due to Fiduciary Funds from:	
General Fund	\$ 123
Nonmajor Governmental Funds	180
Internal Service Funds	 2
Total due to Fiduciary Funds from other funds	\$ 305
Total Due to/Due froms	\$ 150,309

These balances resulted from the time lags between the dates that: (1) interfund goods and services are provided or reimbursable expenditures occur; (2) transactions are recorded in the accounting system; and (3) payments between funds are made.

## **Interfund Loans**

At June 30, 2019, interfund loans receivable/payable balances consist of \$31.417 million revolving loans payable to the General Fund from Internal Service Funds. The balance payable to the General Fund from Internal Service Funds of \$31.417 million includes \$12.063 million that is not expected to be repaid within one year and is classified as nonspendable fund balance.

(Notes continue on next page.)

## NOTE 8. CAPITAL ASSETS

Capital asset activity for the year ended June 30, 2019, was as follows (in thousands):

	]	Beginning Balance		Additions	1	Deletions	 Ending Balance

Capital Assets, Net	\$	92,779	\$	5,141	\$	(1,102)	\$ 96,818

Construction in progress of governmental activities includes amounts for buildings the State is constructing for colleges and universities and other discrete component units that are funded by state appropriations or state bond proceeds. As the buildings are completed, the applicable amounts are deleted from construction in progress of governmental activities and "transferred" to the colleges and universities and other discrete component units. For fiscal year 2019, \$140.747 million of buildings were completed for colleges and universities. On the government-wide statement of activities, the building "transfers" are reported as higher education expenses of governmental activities and as program revenues of discrete component units.

Depreciation expense of governmental activities was charged to functions as follows (in thousands):

General Government	\$ 18,026
Human Services and Juvenile Justice Services	10,535
Corrections	8,279
Public Safety	18,670
Courts	7,909
Health and Environmental Quality	5,395
Employment and Family Services	18,692
Natural Resources	10,780
Heritage and Arts	560
Business, Labor, and Agriculture	1,275
Public Education	709
Transportation	16,553
Depreciation on capital assets of the State's internal service funds is charged to the various functions based on their usage of services provided	 18,404
Total Depreciation Expense	\$ 135,787

## **Discrete Component Units**

The following table summarizes net capital assets reported by the discrete component units (in thousands):

	Public Employees Health Program	University of Utah	Utah State University	Utah Transit Authority	Nonmajor Component Units	Total
Capital Assets Not Depreciated/Amortized:						
Land and Related Assets	\$	\$ 85,265	\$ 43,936	\$ 440,917	\$ 149,648	\$ 719,766

## NOTE 9. LEASE COMMITMENTS

The State leases office buildings along with office and computer equipment. Although the lease terms vary, most leases are subject to annual appropriations from the State Legislature to continue the lease obligations. If an appropriation is reasonably assured, leases are considered noncancellable for financial reporting purposes.

Leases, that in substance are purchases, are reported as capital lease obligations. In the government-wide financial statements and proprietary fund financial statements, assets and liabilities resulting from capital leases are recorded at the inception of the lease at either the lower of fair value or the present value of the future minimum lease payments. The principal portion of lease payments reduces the liability, and the interest portion is expensed. On the governmental fund financial statements, both the principal and interest portions of capital lease payments are recorded as expenditures of the applicable governmental function.

The primary government's capital lease payments and adjustments were \$2.335 million in principal and \$978 thousand in interest for fiscal year 2019. As of June 30, 2019, the historical cost of the primary government's assets acquired through capital leases was \$55.832 million of which \$55.063 million was buildings and land

and \$769 thousand was equipment and other depreciable assets. As of June 30, 2019, the accumulated depreciation of the primary government's assets acquired through capital leases was \$19.432 million of which \$18.663 million was buildings and \$769 thousand was equipment and other depreciable assets. Of the \$214.309 million in discrete component unit present value of future minimum lease payments noted below, \$86.350 million relates to capital lease arrangements between the primary government and certain colleges and universities (discrete component units).

Operating leases contain various renewal options, as well as some purchase options. However, due to the nature of the leases, they do not qualify as capital leases and the related assets and liabilities are not recorded. Any escalation clauses, sublease rentals, and contingent rents were considered immaterial to the future minimum lease payments and current rental expenditures. Operating lease payments are recorded as expenditures or expenses when paid or incurred.

Operating lease expenditures for fiscal year 2019 were \$45.844 million for the primary government and \$43.210 million for discrete component units. For fiscal year 2018, the operating lease expenditures were \$37.617 million for the primary government and

\$33.618 million for discrete component units. Future minimum lease commitments for non-cancellable operating leases and capital leases as of June 30, 2019, and for Utah Transit Authority (major discrete component unit) as of December 31, 2018, were as follows:

## **Future Minimum Lease Commitments**

## NOTE 10. LONG-TERM LIABILITIES

#### A. Changes in Long-term Debt and Other Long-term Liabilities

Changes in long-term debt and other long-term liabilities for the year ended June 30, 2019 are presented in the following table. Changes for Utah Transit Authority and PEHP (major discrete component units) are included as of year ended December 31, 2018. As referenced below, certain long-term debt and other long-term liabilities are discussed in other Notes to the Financial Statements.

## Long-term Debt and Other Long-term Liabilities

(expressed in thousands)

The beginning balance for Discrete Component Units increased due to the inclusion of Utah Transit Authority (major discrete component unit) as follows: \$2.127 billion and \$163.890 million in Revenue Bonds and unamortized premiums, respectively, \$40.779 million in Capital Leases - Direct Borrowing; \$1.496 million in Claims Liability; \$9.326 million in Leave/Termination benefits; and \$100.877 million in Net Pension Liability. See <u>Note 2</u> for further information.

* The Net Pension Liability and Net Other Postemployment Benefit (OPEB) Liability of governmental activities are liquidated in the General Fund, Education Fund, or Transportation Fund according to the applicable employing state agency. The changes in these liabilities are either netted as additions or reductions for this schedule since that information is not readily available for inclusion. See <u>Note 18</u> and <u>Note 19</u> for further information.

** Compensated Absences of governmental activities are liquidated in the General Fund, Education Fund, or Transportation Fund according to the applicable employing state agency. Claims Liability of governmental activities are liquidated in the Risk Management Internal Service Fund. Settlement Obligations of governmental activities are liquidated in the Crime Victim Reparation Fund (nonmajor governmental fund). The Pollution Remediation Obligations of the governmental activities are liquidated in the Environmental Reclamation Fund (nonmajor governmental fund).

## Notes to the Financial Statements

**Differences in Net Pension Liability** – The Net Pension Liability (NPL) ending balances for governmental activities of \$1.141 billion and for business-type activities of \$19.065 million differ from the NPL for the primary government of \$1.170 billion as reported in Note 18 due to the following: the NPL for Student Assistance Programs of \$1.630 million and Utah Dairy Commission of \$387 thousand are included in business-type activities, but are excluded from the primary government NPL reported in Note 18, and the Utah Schools for the Deaf and Blind (nonmajor discrete component unit) of \$12.663 million is excluded from the business-type and governmental activities reported above, but is included in the NPL for the primary government in Note 18.

These differences are due to the way Utah Retirement Systems (pension trust and defined contribution plans) combine and report the State's retirement plans for <u>Note 18</u>, which is different than how the State reports the NPL by fund type in accordance with generally accepted accounting principles.

## **B.** General Obligation Bonds

The State issues general obligation bonds to provide funds for acquisition, construction, and renovation of major capital facilities and for highway construction. In addition, general obligation bonds have been issued to refund general obligation bonds, revenue bonds, and capitalized leases. General obligation bonds are secured by the full faith and credit of the State. Debt service requirements are provided by legislative appropriation from the State's general tax revenues. As of June 30, 2019, the State had \$637.610 million of unissued general obligation highway bond authorizations remaining, and \$355.003 million of unissued general obligation building bond authorizations remaining.

During fiscal year 2019, the State issued \$127.715 million Series 2019 general obligation highway bonds to fund transportation projects.

General obligation bonds payable information is presented below.

## C. Revenue Bonds

Revenue bonds payable consist of those issued by the Utah State Building Ownership Authority, the Utah State Board of Regents Student Loan Purchase Programs, the State's Water Loan Programs, and various colleges and universities. These bonds are not considered general obligations of the State.

## **Governmental Activities**

The Utah State Building Ownership Authority (SBOA) has issued bonds for the purchase and construction of facilities to be leased to state agencies and other organizations. The bonds are secured by the facilities, and repayment is made from lease income appropriated by the Legislature and is not considered pledged revenue of the State. The outstanding bonds payable at June 30, 2019, are reported as a long-term liability of the governmental activities, except for \$75.834 million and \$968 thousand, which are reported in the Alcoholic Beverage Control Fund and the Utah Correctional Industries Fund (nonmajor enterprise funds), respectively. These portions are reported as liabilities of the business-type activities on the government-wide Statement of Net Position.

## **Business-type Activities**

The Utah State Board of Regents Student Loan Purchase Programs' (Student Assistance Programs) bonds were issued to provide funds for student loans and are secured by all assets of the Board of Regents Revenue Bond Funds and by the revenues and receipts derived from such assets. The Board of Regents has also issued a revenue bond for an office facility secured by funds within the Board of Regents budget that would otherwise be expended for rent.

The Student Assistance Programs include \$180.795 million of fixedrate bonds, \$75.211 million of bonds at a rate set at the 3-month LIBOR plus spread, and \$1.971 billion of bonds at a rate set at the 1-month LIBOR plus rates from 0.55 to 1.50 percent. The Programs' bonds also include adjustable rate bonds that are set by an auction procedure every 28 days in the amount of \$39.100 million.

The Student Assistance Programs' bonds issued under the 1993 Trust Estate are limited obligations of the Board, secured by and payable solely from the Trust Estate established by the indenture. The bonds and notes were issued to finance eligible student loans. The Trust Estate consists of student loans acquired under the indenture, all proceeds of the bonds and notes, and net revenues in the funds and accounts, and any other property pledged to the Trust Estate. The Board has pledged these assets and net revenues to repay \$292.411 million of outstanding student loan revenue bonds and student loan backed notes, which are payable through 2046. Principal and interest paid for the current year and total net revenues before interest expense were \$58.507 million and \$10.963 million, respectively.

The Student Assistance Programs' notes issued under the 2012 Trust Estate are special limited obligations of the Board, secured by and payable solely from the Trust Estate established by the indenture. The notes were issued to refinance eligible student loans and retire outstanding funding notes of the Board. The Trust Estate consists of student loans acquired under the indenture, all proceeds of the notes and net revenues in the funds and accounts, and any other property pledged to the Trust Estate. The Board has pledged these assets and net revenues to repay \$154.214 million of outstanding student loan backed notes which are payable through 2032. Principal and interest paid for the current year and total net revenue before interest expense were \$31.991 million and \$5.879 million, respectively. The notes issued under the 2014 Trust Estate are limited obligations of the Board, secured by and payable solely from the Trust Estate established by the indenture. The notes were issued to retire outstanding student loan revenue bonds of the Board. The Trust Estate consists of student loans acquired under the indenture, all proceeds of the notes and net revenues in the funds and accounts, and any other property pledged to the Trust Estate. The Board has pledged these assets and net revenues to repay \$115.836 million of outstanding student loan backed notes, which are payable through 2039. Principal and interest paid for the current year and total net revenues before interest expense were \$24.637 million and \$4.864 million, respectively.

The notes issued under the 2015 Trust Estate are special limited obligations of the Board, secured by and payable solely from the Trust Estate established by the indenture. The notes were issued to retire a portion of the outstanding advances from the Warehouse Facility to the Board. The Trust Estate consists of student loans acquired under the indenture, all proceeds of the notes and net revenues in the funds and accounts, and any other property pledged to the Trust Estate. The Board has pledged these assets and net revenues to repay \$169.522 million of outstanding student loan backed notes, which are payable through 2043. Principal and interest paid for the current year and total net revenue before interest expense were \$45.385 million and \$6.398 million, respectively.

The notes issued under the 2016 Trust Estate are special limited obligations of the Board, secured by and payable solely from the Trust Estate established by the indenture. The notes were issued to retire a portion of the outstanding advances from the Warehouse Facility to the Board. The Trust Estate consists of student loans acquired under the indenture, all proceeds of the notes and net revenues in the funds and accounts, and any other property pledged to the Trust Estate. The Board has pledged these assets and net revenues to repay \$263.902 million of outstanding student loan backed notes, which are payable through 2057. Principal and interest paid for the current year and total net revenue before interest expense were \$64.429 million and \$9.027 million, respectively.

The notes issued under the 2017 Trust Estate are limited obligations of the Board, secured by and payable solely from the Trust Estate established by the indenture. The notes were issued to retire a portion of the outstanding advances from the Warehouse Facility to the Board. The Trust Estate consists of student loans acquired under the indenture, all proceeds of the notes and net revenues in the funds and accounts, and any other property pledged to the Trust Estate. The Board has pledged these assets and net revenues to repay \$267.300 million of outstanding student loan backed notes, which are payable through 2057. Principal and interest paid for the current year and total net revenue before interest expense were \$60.951 million and \$9.011 million, respectively.

The bonds issued under the Office Facility Bond fund are limited obligations of the Board, secured solely by a pledge of the proceeds from the sale of the bonds and the monies and revenues in the fund and accounts held by the Trustee under the indenture. No other money, revenue or income of the Board is pledged to the repayment of the Office Facility Bonds. The bonds were issued to refund the Series 2002 and Series 2004 Bonds. The Board has pledged these assets and net revenues to repay \$2.695 million of outstanding Office Facility Bonds, which are payable through 2024. Principal and interest paid for the current fiscal year and total net revenues before interest expense were \$812 thousand and \$369 thousand, respectively.

Net Position.

## Notes to the Financial Statements

**Discrete Component Units** 

University of Utah, Utah State University and nonmajor discrete component units issued revenue bonds for various capital purposes including student housing, special events centers, student union centers, and hospital and research facilities. The bonds are secured by pledged student building fees and other income of certain college activities.

Utah Transit Authority issued revenue bonds to partially finance the purchase and construction of various capital assets, and to refund other outstanding bond issues. The bonds are secured by a pledge of sales tax revenues and other revenues of the Authority.

Information on pledged revenues for discrete component units for the fiscal year ended June 30, 2019, is presented below.

#### Pledged Revenue — Discrete Component Units (dollars expressed in thousands)

	University of Utah	Utah State University	Utah Transit Authority	Nonmajor Component Units
Type of Revenue Pledged *	A, B, C	Α, Β	D	А
Amount of Pledged Revenue	\$1,323,572	\$340,646	\$3,725,328	\$232,724
Term of Commitment	Thru 2044	Thru 2050	Thru 2042	Thru 2049
Percent of Revenue Pledged	100.00%	100.00%	100.00%	100.00%
Current Year Pledged Revenue	\$312,587	\$65,886	\$273,007	\$23,083
Current Year Principal and Interest Paid	\$100,759	\$14,506	\$99,955	\$14,760

* Type of Revenue Pledged:

The State's Water Loan Programs have issued recapitalization revenue bonds to provide additional capital for the State's revolving

water resources loan programs. The bonds are secured by and

repayments are made from the pledged principal and interest

payments (pledged revenues) of specific revolving water resources

loan funds. These pledged revenues will not be available for other

purposes until the end of fiscal year 2023 when the bonds are

completely paid off. Pledged revenues were projected to produce 150 percent of debt service requirements over the life of the bonds.

The total principal and interest remaining to be paid on the bonds

is \$27.385 million. For the current year, principal and interest paid

was \$6.872 million and total repayment from pledged revenues was

\$19.565 million. Of the bonds payable outstanding at June 30, 2019, \$25.520 million are reported in the Water Loan Programs Fund

(major enterprise fund). These portions are reported as liabilities of

the business-type activities on the government-wide Statement of

A = Student and housing fees, auxiliary net revenues from bookstores, parking, stadium and event centers, and other campus generated charges and fees.

B = Research net revenue generated from the recovery of allocated facilities and administrative rates to grants and contracts.

C = Hospital and clinic net revenues from providing various health and psychiatric services to the community.

D = Sales tax revenues and other transit revenues.

## D. Conduit Debt Obligations

The Utah Charter School Finance Authority (nonmajor discrete component unit) issued conduit debt obligations on behalf of various charter schools. The debt is the responsibility of the charter schools, and neither the State nor any political subdivision of the State is obligated in any manner for repayment of the debt. Accordingly, this debt has not been reported in the accompanying financial statements. The outstanding balance at June 30, 2019, is \$356.244 million in taxable and tax-exempt conduit debt.

## E. Defeased Bonds and Bond Refunding

In prior years, the State defeased certain general obligation and revenue bonds by placing the proceeds of new bonds and other monies available for debt service in irrevocable trusts to provide for all future debt service payments on the old bonds. Accordingly, the trust account assets and the liability for the defeased bonds are not included in the Statement of Net Position. At June 30, 2019, the total amount outstanding of defeased general obligation bonds was \$308.780 million. At June 30, 2019, there were no outstanding defeased lease revenue bonds.

On March 15, 2018, Utah Transit Authority (major discrete component unit) issued Series 2018 Senior Lien Revenue Bonds in the amount of \$83.765 million and \$115.540 million in Series 2018 Subordinate Lien Revenue Bonds to provide resources to purchase qualifying open market securities that were placed in an irrevocable trust for the purpose of generating resources for the advanced refunding of certain 2017 revenue bonds, certain 2007A revenue bonds, and to finance certain capital projects. These resources are intended to provide all future debt payments for the 2017 and 2007A Bonds in the amount of \$125.172 million of sales tax revenue bonds. As a result, the refunded bonds are considered to be defeased and the liability has been removed from the Authority's financial statements. The advanced refundings were undertaken to reduce total debt service payments over the next 14 years by \$122.907 million, and resulted in an economic gain of \$5.587 million.

In prior years, discrete component units defeased certain revenue bonds by placing the proceeds of new bonds and various bond reserves in irrevocable trusts to provide for all future debt service payments on the old bonds. Accordingly, the trust account assets and the liability for the defeased bonds are not included in the component unit column on the Statement of Net Position. At June 30, 2019, \$406.770 million of college and university bonds outstanding are considered defeased.

#### F. **Contracts Payable**

Discrete component units capital leases/contracts payable include \$5.047 million in life annuity contracts.

## G. Pollution Remediation Obligations

Under the federal Superfund law, the State is responsible for sharing remediation costs at sites where the Environmental Protection Agency expends Superfund trust monies for cleanup. Currently there are five sites in various stages of cleanup, from initial assessment to cleanup activities. The pollution remediation liabilities associated with these sites were measured using the actual contract cost, where no changes in cost are expected, or the expected cash flow technique. Liability estimates are subject to change due to price increases or reductions, technology, or changes in applicable laws or regulations governing the remediation efforts. As of June 30, 2019, the liability is \$5.324 million. The State does not anticipate recovering reimbursements from the parties who caused the pollution.

## H. Notes Payable

The notes payable balance consists of notes issued by discrete component units for the purchase of buildings and equipment. The notes bear various interest rates and will be repaid over the next 10 years. They are secured by the related assets. Payment information on notes payable is presented below.

## NOTE 11. DEFERRED OUTFLOWS AND INFLOWS OF RESOURCES

Deferred Outflows and Inflows of Resources reported on the Statement of Net Position as of June 30, 2019, consisted of the following:

Deferred Outflows a (expressed)							
		Primary G	nt				
	Governmental Activities			iness-type ctivities	Discrete Component Units		
Deferred Outflows:							
Deferred Amount on Refundings of Bonded Debt	\$	15,518	\$	2,816	\$	104,170	
Relating to Pensions		436,885		8,738		179,238	
Relating to Other Postemployment Benefits		31,034		493		365	
Total Deferred Outflows	\$	483,437	\$	12,047	\$	283,773	
Deferred Inflows:							
Deferred Revenue	\$	7,088	\$		\$	559	
Relating to Beneficial Interests		_		_		13,111	
Deferred Amount on Refundings of Bonded Debt		_		8,086		1,441	
Fair Value of Interest Rate Swap Agreements		_		10,293			
Relating to Pensions		43,169		1,085		42,421	
Relating to Other Postemployment Benefits		36,055		555		418	
Total Deferred Inflows	\$	86,312	\$	20,019	\$	57,950	

Of the \$483.436 million deferred outflows of resources reported in the governmental activities column on the government-wide Statement of Net Position, \$436.885 million represent deferred outflows relating to pensions, of which \$34.099 million are reported in the Internal Service Funds; and \$31.034 million represent deferred outflows relating to other postemployment, of which \$2.145 million are reported in the Internal Service Funds. The remaining \$15.517 million represent deferred amount on refundings of bonded debt, of which \$1 thousand are reported in the Internal Service Funds.

Of the \$86.312 million deferred inflows of resources reported in the governmental activities column on the government-wide Statement of Net Position, \$43.169 million represent deferred inflows relating to pensions, of which \$3.814 million are reported in the Internal Service Funds; and \$36.055 million represent deferred inflows relating to other postemployment, of which \$2.426 million are reported in the Internal Service Funds. The remaining \$7.088 million in deferred revenue represent imposed fees received before the period when those resources are permitted to be used.

Deferred outflows and inflows of resources for governmental funds, proprietary funds, and discrete component units are reported in detail in their respective fund statements.

Under the modified accrual basis of accounting, governmental fund financial statements reported deferred inflows of resources of \$687.487 million in unavailable revenue. This was comprised of \$526.034 million from various taxes and \$161.453 million from other sources.

mental activities of \$436.885 million and for business-type activities of \$8.738 million differ from the deferred outflows of resources for the primary government of \$450.084 million as reported in <u>Note 18</u> due to the following: Student Assistance Programs of \$1.021 million and Utah Dairy Commission of \$144 thousand are included in business-type activities, but are excluded in the deferred outflows of resources reported for the primary government; the Utah Schools for the Deaf and Blind (nonmajor discrete component unit) of \$5.626 million is excluded from presentation in the governmental and business-type activities reported above, but is included in the deferred outflows of resources reported for the primary government.

The deferred inflows of resources relating to pensions for governmental activities of \$43.169 million and for business-type activities of \$1.085 million differ from the deferred inflows of resources for the primary government of \$44.011 million in <u>Note 18</u> due to the following: Student Assistance Programs of \$477 thousand and Utah Dairy Commission of \$139 thousand are included in business-type activities, but are excluded in the deferred inflows of resources reported for the primary government; the Utah Schools for the Deaf and Blind (nonmajor discrete component unit) of \$373 thousand is excluded from presentation in the governmental and business-type activities reported above, but is included in the deferred inflows of resources reported for the primary government.

These differences are due to the way in which Utah Retirement Systems (pension trust and defined contribution plans) combine and report the State's retirement plans for <u>Note 18</u>, which is different than how the State reports the deferred outflows and inflows of resources by fund type in accordance with generally accepted accounting principles.

The deferred outflows of resources relating to pensions for govern-

## NOTE 12. GOVERNMENTAL FUND BALANCES, BUDGET STABILIZATION ACCOUNTS, AND NET POSITION RESTRICTED BY ENABLING LEGISLATION

## A. Governmental Fund Balances – Restricted, Committed and Assigned

The State's fund balances represent: (1) **Restricted Purposes**, which include balances that are legally restricted for specific purposes due to constraints that are imposed by law through constitutional provisions or are externally imposed by creditors, grantors, contributors, or laws or regulations of other governments;

(2) Committed Purposes, which include balances that can only be used for specific purposes pursuant to constraints imposed by formal action of the Legislature; (3) Assigned Purposes, which include balances that are constrained by the government's intent to be used for specific purposes, but are neither restricted nor committed. A summary of the nature and purpose of these reserves by fund type at June 30, 2019, follows:

**Governmental Fund Balances** (expressed in thousands)

## B. Budget Stabilization Accounts

In accordance with Sections 63J-1-312 and 313 of the Utah Code, the State maintains the General Fund Budget Reserve Account in the General Fund (the "Rainy Day Fund") and an Education Fund Budget Reserve Account in the Education Fund (the "Education Reserve"). These stabilization balances can generally only be used for specific purposes detailed in Section 63J-1-312 and 313, upon appropriation by the Legislature. State law requires 25 percent of any revenue surplus in the General Fund to be deposited in the Rainy Day Fund after any required Medicaid growth savings transfer is made (see Medicaid Budget Sustainability Account discussion below) and 25 percent of any revenue surplus in the Education Fund to be deposited in the Education Reserve, in each case up to a statutory limit. State law limits the totals of the Rainy Day Fund and Education Reserve to 9 and 11 percent of appropriations from the General Fund and Education Fund, respectively, for the fiscal year in which the surplus occurred.

The Rainy Day Fund and Education Reserve are available only under specific circumstances detailed in the *Utah Code*. Historically, resources from the Rainy Day Fund or Education Reserve have only been expended during recessionary periods to cover overall budget shortfalls after the Legislature has exhausted other budgetary measures. In two instances, resources from the Rainy Day Fund were also appropriated for state settlement agreements.

Section 63J-1-217 of the *Utah Code* requires the State to maintain a balanced budget. If a budget shortfall is expected, the Governor is required to direct state agencies to reduce commitments and expenditures by an amount proportionate to any revenue shortfall until the Legislature is able to take action to rectify the shortfall. The Legislature utilizes funding reallocations, spending cuts, and reserve funds to address a shortfall. If these measures do not rectify the shortfall, the Legislature may use the stabilization funds in extreme cases. Over the past 15 years, the Rainy Day Fund has been used three times, once for a budget shortfall and twice to pay state settlement agreements. Over the same period of time, the Education reserve has been used twice for budget shortfalls.

The Rainy Day Fund and the Education Reserve ended the year with balances of \$225.121 million and \$471.908 million, respectively. For the fiscal year ended June 30, 2019, there was no transfer into the Rainy Day Fund because there was no revenue surplus, as defined by law. The Education Reserve received \$33.510 million as a result of a revenue surplus.

In accordance with Section 63J-1-315 of the Utah Code, the State maintains the Medicaid Growth Reduction and Budget Stabilization Restricted Account ("Medicaid Budget Stabilization Account"). The account can only be used for specific purposes detailed in Section 63J-1-315, upon appropriation by the Legislature. The Legislature may appropriate money from the account only if Medicaid program expenditures are estimated to be 108 percent or more of Medicaid program expenditures for the previous year. This is not expected to occur routinely, as the state has implemented reforms in the Medicaid Program to bring Medicaid growth more in line with overall state revenue growth. In the seven years since the fund was created, there have been no appropriations from the fund. The account is funded in a fiscal year when there are savings in the Medicaid Program and a General Fund revenue surplus. For the fiscal year ended June 30, 2019, there was no transfer to the Medicaid Budget Stabilization Account because there was no revenue surplus, as defined by law. The account ended the year with a balance of \$74.819 million.

## C. Minimum Fund Balance Policies

Statutorily, the State established a minimum fund balance policy for two funds, the Disaster Recovery Restricted Account and the Local Government Emergency Response Loan Fund. In accordance with Section 53-2a-603 of the *Utah Code*, under certain circumstances, the Disaster Recovery Restricted Account may be used to provide short-term loans to a member state of the Emergency Management Assistance Compact. Loans may be issued from the account as long as the fund maintains a minimum fund balance of \$10 million. Section 53-2a-607 of the *Utah Code*, requires the Local Government Emergency Response Loan Fund to provide short-term, low-interest loans to local government entities. The amount loaned may not be more than 50 percent of the total fund balance available, or an amount that will leave the fund balance at less than \$10 million.

## D. Net Position Restricted by Enabling Legislation

The State's net position restricted by enabling legislation represents resources which a party external to a government–such as citizens, public interest groups, or the judiciary–can compel the government to use only for the purpose specified by the legislation. The government-wide Statement of Net Position reports \$7.240 billion of restricted net position, of which \$33.370 million is restricted by enabling legislation.

## NOTE 13. DEFICIT NET POSITION AND FUND BALANCE

Funds reporting a deficit total net position at June 30, 2019, are (in thousands):

Private Purpose Trust Funds:	
Petroleum Storage Tank	\$ (8,349)
Internal Service Funds:	
Technology Services	\$ (16,887)
Human Resource Management	\$ (2,692)
Attorney General Legal Services	\$ (11,169)
Enterprise Funds:	
State Trust Lands Administration	\$ (140)

The Petroleum Storage Tank Trust covers the cleanup costs of leaks from state-approved underground petroleum storage tanks. The assets in the fund are more than adequate to pay current claims. Unfunded future claims will be funded solely by future trust revenues.

The deficit net positions in the Technology Services, Human Resource Management, and Attorney General Legal Services Funds are the result recording the funds' portions of pensions and other postemployment benefits (OPEB) as required by GASB Statements. These Statements require the recognition and reporting of the net pension liability, net OPEB liability, and related transactions, often resulting in a deficit net position. The Technology Services, Human Resource Management, and Attorney General Legal Services Funds also reported a \$25.778 million deficit, a \$4.691 million deficit, and a \$11.169 million deficit respectively, in the unrestricted portions of their net positions at June 30, 2019, primarily as a result of implementing these Statements.

The Enterprise Fund deficit net position in State Trust Lands Administration is a result of a decrease in the royalty accruals in previous years because of general market conditions at that time. State Trust Lands Administration also reported a deficit of \$675 thousand in the unrestricted portion of its net position also due to recording the fund's portions of pensions and other postemployment benefits (OPEB). Other than noted above, funds reporting a deficit position in the unrestricted portion of their net position at June 30, 2019, are (in

Internal Service Funds:	
Fleet Operations	\$ (20,791)
Risk Management	\$ (5,308)
Enterprise Funds:	
Alcoholic Beverage Control	\$ (10,361)
Utah Correctional Industries	\$ (888)

The deficit in the Fleet Operations Internal Service Fund is mainly due to the significant investment in capital assets required for these

## NOTE 14. INTERFUND TRANSFERS

operations. Management is working on changing how fleet vehicles are acquired, which should help reduce this deficit.

The deficit in the Risk Management Internal Service Fund is mainly because this fund experienced higher claims than it received in premiums during the fiscal year. Consequently, Risk Management has adjusted its rates and deductibles for the coming fiscal year. This deficit was also due to recording the funds' portions of pensions and other postemployment benefits (OPEB).

The deficit in the Alcoholic Beverage Control Enterprise Fund and Utah Correctional Industries is due to recording the funds' portions of pensions and other postemployment benefits (OPEB).

Transfers between funds occur when one fund collects revenue and transfers the assets to another fund for expenditure or when one fund provides working capital to another fund. All transfers must be legally authorized by the Legislature through statute or an *Appropriation Act*. Interfund transfers for the fiscal year ended June 30, 2019, are as follows (in thousands):

	Transferred	То								
			Governme	ntal Funds			Er	nterprise Fun	ls	
Transferred From	General Fund	Education Fund	Transportation Fund	Transportation Trust Investment Lands Fund Fund		Nonmajor Governmental Funds	Water Loan Programs	Nonmajor Enterprise Funds	Internal Service Funds	Total
General Fund	\$	\$ 9,620	\$ 34,100	\$ —	\$ 19	\$ 383,622	\$ 1,241	\$ 12,175	\$ 775	\$ 441,552
Education Fund	1,134,724	_	_	_	_	200,287	—	_	_	1,335,011
Transportation Fund	51,143	_	_	38,147	_	20,077	—	_	1,033	110,400
Transportation Investment Fund	_	_	9,927	_	_	295,638	_	_	_	305,565
Trust Lands Fund	_	82,663	_	_	_	_	—	_	_	82,663
Nonmajor Governmental Funds	160,088	_	_	_	_	4,116	_	_	1,326	165,530
Unemployment Compensation Fund	2,747	_	_	_	_	_	_	_	_	2,747
Water Loan Programs	13,881	_	_	—	_	_	_	—	_	13,881
Community Impact Loan Fund	17,967	_	—	_	_	_	_	_	_	17,967
Nonmajor Enterprise Funds	120,766	1,791	—	—	_	_	_	_	—	122,557
Internal Service Funds	258									258
Total	\$1,501,574	\$ 94,074	\$ 44,027	\$ 38,147	\$ 19	\$ 903,740	\$ 1,241	\$ 12,175	\$ 3,134	\$2,598,131

Transfers from major governmental funds to nonmajor governmental funds are primarily for debt service expenditures and capital facility construction. Transfers from nonmajor enterprise funds to the General Fund are mostly liquor profits from the Alcoholic Beverage Control Fund that are required by statute to be deposited in the General Fund. Transfers of Trust Lands Fund (permanent fund) investment earnings are required by State constitution and statute to be deposited in the Education Fund (major governmental fund). In addition, mineral lease revenue was transfered to the Transportation Investment Fund (major capital projects fund) for the development of impacted communities related to various transportation needs. All other transfers are made to finance various programs as authorized by the Legislature.

During fiscal year 2019, the Legislature authorized transfers of \$258 thousand from the Internal Service Funds to the General Fund to subsidize general fund revenues. In addition, the Legislature authorized payments of \$1.166 billion to discrete component units. Payments to discrete component units are reported as expenditures in both the General Fund governmental fund statements and the governmental activities column of the Statement of Activities. They are also reported as revenues in the component units column of the Statement of Activities.

## NOTE 15. TAX ABATEMENTS

The State provides tax abatements through a number of programs administered by the Governor's Office of Economic Development (GOED): the Economic Development Tax Increment Financing (EDTIF) program, the Motion Picture Incentive Program (MPIP), the New Markets Tax Credit program (NMTC), and the Utah Rural Jobs Act program (URJA). These programs offer post-performance tax abatements of corporate and individual tax revenues, which would otherwise fund education, in exchange for specific actions that are intended to benefit the State or its citizens. GOED also administers the New Convention Facility Development Incentives program (NCFDI). This program offers tax abatement of sales tax revenues, which would otherwise fund government services, in exchange for specific actions that are intended to benefit the State or its citizens.

The EDTIF program provides incentives in the form of a refundable tax credit to accelerate business growth, job creation, and to encourage economic development within specific economic development zones. A business entity must enter into an incentive agreement with GOED, which specifies performance milestones on a commercial project. According to Section 63N-2-1 of the *Utah* 

thousands):

*Code,* the project must: (1) be within the development zone; (2) include direct investment in the zone; (3) bring new incremental jobs to Utah; (4) create high-paying jobs and significant capital investment in the State or significant purchases from vendors, contractors, or service providers in the State; (5) generate new State revenues; and (6) meet the procedural eligibility requirements to qualify for a tax credit.

Each year, a business entity must apply to GOED for a tax credit certificate. GOED reviews the results of the commercial project for compliance before a credit is issued. A tax credit may not exceed 30 percent of new state tax revenues from the new project over the lesser of the life of the project or 20 years. A tax credit of up to 60 percent of new state tax revenues is allowed if a minimum \$1.5 billion capital investment is made. A tax credit may not exceed 50 percent of new state tax revenues from the new project in a given year. If a business entity should fail to meet its obligations or has received more EDTIF refundable tax credits than it is entitled to, the excess amount must be returned and any future claim for credit may be denied and/or the contract may be nullified.

The MPIP provides tax credits to encourage television and movie producers to film in the State of Utah. This refundable tax credit provides financial incentives to qualified, pre-approved participants in the film industry to develop a strong motion picture presence in the State and boost the State's economy. Section 63N-8-104 of the Utah Code allows up to a 20 percent refundable tax credit, and an additional 5 percent, not to exceed 25 percent of the dollars left in the state by the motion picture company, if the applicant: (1) employs a significant percentage of cast and crew locally; (2) highlights Utah and the Utah Film Commission in the motion picture credits; and (3) meets other agreed-upon promotion requirements. The tax credit certificates are issued after the company completes production, pays in full all Utah-based vendors, and provides an independently reviewed financial report for verification. Each fiscal year, GOED may issue up to \$6.794 million in tax credit certificates, or more if there are remaining unissued tax credits from a prior year.

The NMTC program provides incentives in the form of nonrefundable tax credits to Community Development Entities (CDE) that make qualified equity investments in small businesses. Similar to the federal program of the same name, the State NMTC program was designed to use \$50 million raised by Private Community Investment Firms to bolster the most severely distressed, low-income areas of the State. According to Section 63N-2-603 of the *Utah Code*, a CDE that seeks to have an equity investment or long-term debt security certified as a qualified equity investment and as eligible for tax credits, must submit an application to GOED. Within 45 days of receiving notice of certification, the applicant must: (1) issue the qualified equity investment; (2) receive cash in the amount of the certified amount; and (3) if applicable, designate the required amount of qualified equity investment authority as federal qualified equity investments.

An entity may claim a tax credit if the entity makes a qualified equity investment and if the entity obtains a tax credit certificate. The entity may claim a portion of the tax credit during the calendar year that includes the credit allowance date. GOED calculates the tax credit amount, by multiplying the purchase price of the investment by the applicable percentage at each credit allowance date. The credit allowance percentages are: 0 percent on the first and second credit allowance dates; 12 percent on the third through fifth credit allowance dates; and 11 percent on the sixth and seventh credit allowance dates. As authorized by 63N-2-604 of the *Utah Code*, the credit may be recaptured in the following situations: (1) If any amount of the federal tax credit available is recaptured; (2) If the Qualified Community Development Entity (QCDE) redeems or makes principal repayment of a qualified equity investment before the seventh anniversary of the issuance of the qualified equity investment; (3) If the QCDE fails to invest at least 85 percent of the purchase price of the qualified equity investment in qualified lowincome community investments in Utah within one year of the issuance of the qualified equity investment and fails to maintain the required investment in Utah until the last credit allowance date; and (4) If the QCDE violates the provisions of sections 63N-2-607 or 609 of the *Utah Code*.

The NCFDI program was created in order to spur the development of a co-located Utah hotel and convention space to attract larger conventions that will benefit the State by bringing in tax revenue and contributing to the economy. This tax abatement provides financial incentives to a qualified, pre-approved hotel owner or host local government. Section 63N-2-503 of the Utah Code allows a refund of sales tax up to a maximum annual amount based on a maximum percentage specified in the agreement, and limited to \$75 million in the aggregate for the eligibility period, if the applicant develops a qualified hotel on or after July 1, 2014 that meets the following requirements: (1) the project requires a significant capital investment; (2) includes at least 85 square feet of convention, exhibit, and meeting space per guest room; and (3) is located within 1,000 feet of a convention center that contains at least 500,000 square feet of convention, exhibit, and meeting space. A qualified hotel owner or host local government that wishes to qualify for the convention incentive must submit a written claim that includes all required components described in 63N-2-505 of the Utah Code.

GOED entered into an agreement with a qualified hotel owner during fiscal year 2019, however, the eligibility period does not commence until construction of the qualified hotel begins and this has not yet occurred for the existing agreement. Therefore, no taxes were abated related to this project during fiscal year 2019.

The URJA program enables an eligible small business located in a rural county to expand and create high-paying jobs by providing flexible and affordable capital. This tax abatement provides financial incentives to a qualified claimant in a rural investment company that makes a credit-eligible investment of cash. Section 63N-4-304 of the Utah Code allows a tax credit equal to 25 percent of the claimant's total credit-eligible capital contribution in each of the taxable years that include the fourth through the seventh anniversaries of the closing date. According to Section 63N-4-303 of the Utah Code, a Rural Investment Company (RIC) must submit an application that includes the following: (1) a copy of a license as a federally licensed rural business investment company or as a federally licensed small business investment company; (2) evidence that before the date the application is submitted, the applicant have invested at least \$50 million in nonpublic companies located in counties in the U.S. with fewer than 50,000 inhabitants; (3) a signed affidavit from each claimant stating the amount of the commitment; and (4) the sum of all credit-eligible contribution commitments, which must equal 58 percent of the total investment authority sought by the applicant. In addition, an RIC must perform the following within sixty five days of approval: (1) collect the total amount of committed credit-eligible capital contributions from each claimant included in the application; (2) collect one or more cash equity investments contributed by affiliates of the RIC; and (3) collect one or more cash investments when combined with collections in (1) and (2) equal the RICs investment authority.

As authorized by 63N-4-305 of the *Utah Code*, the credit may be recaptured in the following situations: (*I*) if the RIC fails to invest 100 percent of its investment authority until the seventh anniversary

of the closing date; (2) if the RIC fails to maintain growth investments in this state equal to 100 percent of its investment authority until the seventh anniversary of the closing date; (3) if the RIC makes a distribution or payment that results in the RIC having less than 100 percent of its investment authority invested in growth investments in this state or available for growth investments and held in cash and other marketable securities; (4) if the RIC fails to maintain growth investments equal to 70 percent of its investment authority in eligible small businesses that maintain their principal business operations in a rural county; (5) if the RIC invests more than \$5 million from its investment authority in the same eligible small business; and (6) if the RIC makes a growth investment in an eligible small business that owns or has the right to acquire an ownership interest in the RIC or makes a loan to or an investment in the RIC.

Three RICs have been given investment authority of \$42 million. The applications were approved in calendar year 2017. Credits can only be claimed in taxable years that include the fourth through the seventh anniversary of the closing date; therefore, no credits will be claimed until 2022.

The gross dollar amounts, on an accrual basis, by which the State's revenues were reduced for the fiscal year ended June 30, 2019 are:

#### **Tax Abatement Programs**

(expressed in thousands)

Program	Amount of Taxes Abated			
Motion Picture Incentive Program	\$	16,404		
Economic Development Tax Increment Financing		9,117		
New Markets Tax Credit Program		6,000		
Total	\$	31,521		

The State has other recently enacted tax abatement programs where tax abatement agreements have not been entered into or the total tax abatement for these programs is less than \$300 thousand in a fiscal year. The State has no tax abatements that are entered into by other governments that reduce the State's tax revenues. In addition, the State has other various tax credit incentives that are not defined as tax abatements under generally accepted accounting principles and therefore are not described and included here. See <u>Note 16.C.</u> for commitments related to the tax abatements.

# NOTE 16. LITIGATION, CONTINGENCIES, AND COMMITMENTS

## A. Litigation

- The State is involved in various legal actions arising in the ordinary course of business. The State is vigorously contesting all of these matters, but as of this date it is not possible to determine the outcome of these proceedings. In the opinion of the Attorney General and management, the ultimate disposition of these matters will not have a material adverse effect on the State's financial position.
- In addition to the items above, the State is contesting other legal actions totaling over \$14.030 million plus attorneys' fees and interest and other cases where the amount of potential loss is indeterminable. Some portions of the amounts sought have been paid by the State or placed in escrow.
- The University of Utah (major discrete component unit) is vigorously contesting a legal action where the amount of potential loss is indeterminable but estimated to be less than \$10 million.

## B. Contingencies

- The State receives a significant amount of funding from the federal government. Funds flowing from the federal government to the State are subject to changes to federal laws and appropriations. Based on the financial position of the federal government, it is reasonably possible that events will occur in the near term that will significantly affect the flow of federal funds to the State. The State is taking action to identify and address the impact a significant reduction of federal funds will have on the programs and operations of the State, including requiring contingency plans from state agencies.
- Financial and compliance audits (Single Audit) of federal grants, contracts, and agreements were conducted under the provisions of the Federal Office of Management and Budget's circulars. As a result of the audits, identified questioned costs are immaterial. In addition, program compliance audits by the federal government are conducted periodically; however, an estimate of any potential disallowances on these audits and findings on other audits on noncompliance cannot be estimated as to the potential liability. The Single Audit for the fiscal year ended June 30, 2019, will be available in December 2019.
- Management's estimated liability for the Petroleum Storage Tank Trust (private purpose trust fund) is highly sensitive to change based on the short period of historical data and the uncertainty in estimating costs. Since it is not possible to determine the occurrence date of a leak in an underground storage tank, it is not possible to estimate the number or the associated costs of leaks that have not been detected.
- The Utah Fund of Funds (UFOF) (legally separate entity) was created by the passage of the Utah Venture Capital Enhancement Act in fiscal year 2003 to mobilize private investments and enhance the venture capital culture and infrastructure within the State. The State's involvement in this program is limited to public oversight of the UFOF primarily in the form of approving the issuance of contingent tax credit certificates, ensuring that the UFOF is achieving its statutory purposes of spurring economic development and protecting against the redemption of contingent tax credits. The aggregate outstanding tax certificates available to the program cannot exceed: (1) \$130 million of contingent tax credits used as collateral or a guarantee on loans for the debt-based financing of investments initiated before July 1, 2014; or (2) \$120 million of contingent tax credits for a loan refinanced using debt-based or equity-based financing; and (3) \$100 million used as an incentive for equity investments in the UFOF. The tax certificates are structured so that not more than \$20 million of contingent tax credits for each \$100 million increment of contingent tax liability may be redeemable in any fiscal year. At December 31, 2018, a \$38 million note payable was outstanding and invested in venture capital and private equity funds. The note will mature in 2021. Under certain circumstances, the holder of a certificate is entitled to a refundable tax credit against tax liabilities imposed by Section 59-7, "Corporate Franchise and Income Taxes," or Section 59-10, "Individual Income Tax Act" of the Utah Code. To date, the State has not had to place any contingent tax credits into the program, and it does not anticipate the use of tax credits anytime in the near future.
- The State is self-insured for liability claims up to \$2 million and beyond the excess insurance policy limit of \$10 million. The State is self-insured for individual property and casualty claims up to \$1 million and up to \$3.5 million in aggregate claims and beyond the excess insurance policy limit of \$1 billion per occurrence. According to an actuarial study and

other known factors, \$63.558 million exists as either incurred but unfiled or unpaid claims. This amount is reported as a liability of the Department of Administrative Services' Risk Management Fund (internal service fund).

• The Utah School Bond Guaranty Act (Sections 53G-4-801 to 808 of the *Utah Code*), which took effect on January 1, 1997, pledges the full faith, credit, and unlimited taxing power of the State to guaranty full and timely payment of the principal and interest on general obligation bonds issued by qualifying local school boards. The primary purpose of the Guaranty Act is to reduce borrowing costs for local school boards by providing credit enhancement for Guaranteed Bonds. The local school boards do not meet the criteria for inclusion as part of the State's reporting entity.

In the event a school board is unable to make the scheduled debt service payments on its Guaranteed Bonds, the State is required to make such payments in a timely manner. For this purpose, the State may use any available monies, may use short-term borrowing from the State Permanent School Fund (part of the permanent Trust Lands Fund), or may issue shortterm general obligation notes. The local school board remains liable to the State for any such payments on Guaranteed Bonds. Reimbursements to the State may be obtained by intercepting payment of state funds intended for the local school board. The State may also compel the local school board to levy a tax sufficient to reimburse the State for any guaranty payments.

The State Superintendent of Public Instruction is charged with monitoring the financial condition of local school boards and reporting, at least annually, its conclusions to the Governor, the Legislature, and the State Treasurer. The State Superintendent must report immediately any circumstances that suggest a local school board may not be able to pay its debt service obligations when due. The State has not advanced any monies for the payment of debt service on Guaranteed Bonds and does not expect that it will be required to advance monies for any significant period of time.

Local school boards have \$3.367 billion principal amount of Guaranteed Bonds outstanding at June 30, 2019, with the last maturity date being 2039. The State cannot predict the amount of bonds that may be guaranteed in future years, but no limitation is currently imposed by the Guaranty Act.

The Charter School Credit Enhancement Program (Program) (Sections 53A-20b-201 to 204 of the Utah Code) was established to reduce borrowing costs for qualifying charter schools by providing credit enhancement on bonds issued on behalf of those schools. Bonds issued under this Program are not legal obligations of the State, and neither the State nor any political subdivision of the State is obligated in any manner for repayment of the bonds. If a charter school with bonds issued under the Program draws on its debt service reserve fund, state law requires the Governor to request an appropriation from the Legislature to restore the school's debt service reserve fund to its required level or to meet any principal or interest payment deficiency. However, the Legislature is not required to make any such appropriations. A charter school is required to repay the State any appropriations it receives to restore its debt service reserves at the time and in the manner required by the Utah Charter School Finance Authority (Authority) (nonmajor discrete component unit).

When bonds are issued under the Program, the qualifying school pays up-front and ongoing fees at rates determined by the Authority. These fees are deposited into a restricted reserve account that was funded initially with a \$3 million

appropriation. These monies may be appropriated by the Legislature to replenish any deficiency in the debt service reserve fund of a charter school under the Program.

The Authority is the conduit issuer of Credit Enhancement Program bonds and responsible for developing criteria by which a charter school qualifies to participate in the Program. The Authority is also charged with monitoring the financial condition of qualifying charter schools and certifying, at least annually, the amount required to restore amounts on deposit in the debt service reserve funds of charter schools participating in the Program. The total amount of charter school debt enhanced by the Program is limited by formula. As of June 30, 2019, \$327.010 million of debt was outstanding under the Program.

- At June 30, 2019, the Utah Higher Education Assistance Authority Student Loan Guarantee Program (Student Assistance Programs, major enterprise fund) had guaranteed student loans outstanding with a current principal and interest balance of \$684.579 million.
- The Attorney General of the State sued the tobacco industry for medical costs related to smoking. The State of Utah has signed on to a master settlement agreement along with 45 other states. The major tobacco manufacturers and most of the smaller manufacturers have joined the agreement. The State received \$25.677 million from tobacco companies in fiscal year 2019 and expects to receive approximately \$26 million in fiscal year 2020. Annual payments will be adjusted for factors, such as inflation, decreased sales volume, previously settled lawsuits, disputed payments, and legal fees.
- The Utah School Readiness Initiative (Title 35A Chapter 15 of the Utah Code) created the School Readiness Board (the Board) and enabled the Board to provide grants and enter into contracts with private entities in order to improve early childhood education for at-risk students. Under the terms of the contract, private investors fund the program using a social impact bond financial model. This bond offers the investors a return on investment only if students in the program meet specific education benchmarks. The maximum number of students the program will pay on is 427 per year for each of the remaining 6 years. As of June 30, 2019, the State of Utah has reserved a total of \$5.860 million to cover student evaluations and any repayment of the social impact bond. The program has repaid \$1.780 million to investors as of June 30, 2019. The Board authorized an additional payment to investors of \$1.234 million at the October 2019 board meeting. It is anticipated the State of Utah will commit additional funds in future years as necessary.

## C. Commitments

- At June 30, 2019, the Industrial Assistance Program of the General Fund had grant commitments of \$18.612 million, contingent on participating companies meeting certain performance criteria.
- At June 30, 2019, the Economic Development Tax Increment Financing incentive program had outstanding long-term contract commitments for General Fund cash rebates of \$83.677 million and Education Fund tax credits (tax abatements) of \$577.629 million. These cash rebates and tax credits are contingent on participating companies meeting certain economic development performance criteria.
- At June 30, 2019, the Motion Picture Incentive Program had outstanding contract commitments for General Fund cash rebates of \$2.248 million and Education Fund tax credits (tax

abatements) of \$44.449 million. These cash rebates and credits are contingent upon participating motion picture companies meeting certain within-the-state production criteria.

- At June 30, 2019, the New Markets Tax Credit program had outstanding contract commitments for Education Fund tax credits (tax abatements) of \$11.000 million. These tax credits are contingent on the participating entities meeting a statutory required amount of investment in Utah companies.
- At June 30, 2019, the New Convention Facilities Development Incentives program had outstanding contract commitments for General Fund tax credits (tax abatements) of \$75.000 million. These tax credits are contingent on the participating entities meeting statutorily required construction criteria.
- At June 30, 2019, the Utah Rural Jobs Act program had outstanding commitments for Education Fund tax credits (tax abatements) of \$24.360 million. These tax credits are contingent on the participating entities meeting statutorily required construction criteria.
- At June 30, 2019, the Utah Department of Transportation had construction and other contract commitments of \$1.158 billion, of which \$424.166 million is for Transportation Fund (major fund) and \$733.845 million is for projects within the Transportation Investment Fund (major capital projects fund) highway projects. These commitments will be funded with future appropriations in the Transportation Fund and through proceeds of general obligation bonds and future appropriations in the Transportation Investment Fund.
- At June 30, 2019, the permanent Trust Lands Fund had contractual commitments of \$880.053 million, of which an estimated \$327.466 million remain unfunded and subject to call.
- At June 30, 2019, the capital projects funds had construction commitments of \$646.941 million. These commitments will be funded with legislative appropriations, intergovernmental revenues, and proceeds of general obligation and lease revenue bonds.
- At June 30, 2019, the enterprise funds had loan commitments of approximately \$474.086 million and grant commitments of approximately \$52.375 million.
- At its yearend December 31, 2018, the Utah Retirement Systems (pension trust and defined contribution plans) had committed to fund certain private equity partnerships, absolute return, and real asset funds projects for an amount of \$12.170 billion. Funding of \$9.394 billion had been provided by December 31, 2018, leaving an unfunded commitment of \$2.776 billion.
- At June 30, 2019, the University of Utah (major discrete component unit) had outstanding commitments for the construction and remodeling of its buildings of approximately \$62.700 million.
- The University of Utah, under the terms of various limited partnership agreements approved by the Board of Trustees or University officers, is obligated to make periodic payments for advance commitments to venture capital and private equity investments. As of June 30, 2019, the University had committed, but not paid, a total of \$264.422 million in funding for these alternative investments.
- At June 30, 2019, Utah State University (major discrete component unit) had outstanding commitments for the

construction and remodeling of its buildings of approximately \$27.600 million.

- Utah State University, under the terms of various limited partnership agreements approved by the Board of Trustees or by University officers, is obligated to make periodic payments for advance commitments to venture capital, natural resource, and private equity investments. As of June 30, 2019, the University had committed, but not paid, a total of \$28.639 million in funding for these alternative investments.
- At its yearend of December 31, 2018, the Utah Transit Authority (major discrete component unit) had outstanding purchasing commitments of approximately \$91.900 million for several capital projects.

## NOTE 17. JOINT VENTURES

## **Utah Education Network**

The Utah Education Network (UEN) is a publicly funded consortium administered by the University of Utah supporting educational technology needs for Utah's public and higher education institutions, public libraries, and state agencies. UEN provides internet access for all Utah public middle schools, high schools, and higher education institutions. UEN also operates a fully interactive distance learning network interconnecting public schools and higher education institutions statewide. State appropriation support of UEN amounted to \$33.801 million for the year ended June 30, 2019. UEN is not separately audited, but is included in the audited financial statements of KUEN, a public broadcasting television station operated by the University of Utah. Copies of those statements can be obtained from KUEN's administrative offices.

## NOTE 18. PENSION PLANS

Utah Retirement Systems (URS) was established by Title 49 of the Utah Code. URS administers the pension systems and plans under the direction of the URS Board whose members are appointed by the Governor. URS has a separate accounting system and prepares a separately issued financial report covering all retirement systems and deferred compensation plans it administers. URS maintains records and prepares financial statements using fund accounting principles and the accrual basis of accounting, under which benefits and expenses are recognized when due and payable, and revenues are recorded in the accounting period in which they are earned and become measurable. URS reports on a calendar yearend. The December 31, 2018, financial report has been included in this Comprehensive Annual Financial Report as a pension trust fund for URS within the fiduciary funds. Copies of the separately issued financial report, which includes financial statements and required supplemental information, may be obtained by writing to Utah Retirement Systems, 560 East 200 South, Salt Lake City, Utah 84102-2044, or online at www.urs.org. Utah Transit Authority (major discrete component unit) does not participate in URS. See Note 18.B for a description of Utah Transit Authority pension plans.

URS operations are comprised of the following groups of systems/ plans covering employees of the State and participating local government and public education entities:

• The Public Employees Noncontributory Retirement System (Noncontributory System); the Public Employees Contributory Retirement System (Contributory System); and the Firefighters Retirement System (Firefighters System), which are defined-benefit multiple-employer, cost-sharing, public employee retirement systems;

## State of Utah

- The Public Safety Retirement System (Public Safety System), which is a defined-benefit mixed agent and cost-sharing, multiple-employer public employee retirement system;
- The Judges Retirement System (Judges System) and the Utah Governors and Legislators Retirement Plan, which are singleemployer service-employee retirement systems;
- The Tier 2 Public Employees Contributory Retirement System (Tier 2 Public Employees System); and the Tier 2 Public Safety and Firefighters Contributory System (Tier 2 Public Safety and Firefighters System), which are defined-benefit multipleemployer, cost-sharing, public employee retirement systems;
- Four defined contribution plans comprised of the 401(k) Plan, 457 Plan, and Roth and Traditional IRA Plans.

The Tier 2 Public Employees System became effective July 1, 2011. All eligible employees beginning on or after July 1, 2011, who have no previous service credit with any of the Utah Retirement Systems, are members of the Tier 2 Retirement System.

## A. Defined Benefit Plans - Utah Retirement Systems

Retirement benefits are specified by Title 49 of the *Utah Code*. The retirement systems are defined-benefit plans wherein the benefits are based on age and/or years of service and highest average salary. Various plan options within the systems may be selected by retiring members. Some of the options require actuarial reductions based on attained age, age of spouse, and similar actuarial factors. A brief summary of eligibility for and benefits of the systems is provided in the following table:

#### Summary of Benefits by System

	Noncontributory System	Contributory System	Public Safety System	Firefighters System	Judges System	Tier 2 Public Employees System	Tier 2 Public Safety and Firefighters System
Final Average Salary	Highest 3 Years	Highest 5 Years	Highest 3 Years		Highest 2 Years	Highest 5 Years	Highest 5 Years
Years of Service Required and/or Age Eligible for Benefit	30 years any age 25 years any age* 20 years age 60* 10 years age 62* 4 years age 65	30 years any age 20 years age 60* 10 years age 62* 4 years age 65	20 years any age 10 years age 60 4 years age 65		10 years age 6020 years age 55*20 years age 60*		25 years any age 20 years age 60* 10 years age 62* 4 years age 65
Benefit Percent per Year of Service**	2.00% per year all years	<ul><li>1.25% per year to June 1975</li><li>2.00% per year July 1975 to present</li></ul>	2.50% per year u 2.00% per year o		5.00% first 10 years 2.25% second 10 years 1.00% over 20 years	1.50% per year all years	1.50% per year all years
COLA***	Up to 4.00%	Up to 4.00%	Up to 2.50% depending on the		Up to 4.00% compounded	Up to 2.50%	Up to 2.50%

Note: The Utah Governors and Legislators Retirement Plan benefits are explained below.

#### * With actuarial reductions.

** For members and retirees in the systems, prior to January 1, 1989, there may be a 3.00 percent benefit enhancement.

Total Single-employer Plans Covered Employees.....

*** All post-retirement cost-of-living adjustments are non-compounding and are based on the original benefit except for Judges, which is a compounding benefit. The cost-of-living adjustments are also limited to the actual Consumer Price Index (CPI) increase for the year, although unused CPI increases not met may be carried forward to subsequent years.

Former governors at age 65 receive \$1,400 per month per term. Legislators with four or more years of service receive a benefit at age 65 at the rate of \$30.40 per month per year of service. Retirement at age 62 with ten or more years of service will receive an actuarial reduction. Both the governors' and legislators' benefits are adjusted based on the Consumer Price Index (CPI), limited to 4 percent of the base benefit per year.

Death benefits for active and retired employees are in accordance

with retirement statutes. Upon termination of employment, members of the Systems may leave their retirement account intact for future benefits based on vesting qualification, or withdraw the accumulated funds in their individual member account and forfeit service credits and rights to future benefits upon which the contributions were based.

At December 31, 2018, the following number of employees were covered by the State's (primary government) single-employer plans:

## Single-employer Plans Covered Employees

Detember 51, 2010		
	Judges System	Governors and Legislators Retirement Plan
Inactive Employees or Beneficiaries Currently Receiving Benefits	148	253
Inactive Employees Entitled to But Not Yet Receiving Benefits	4	99
Active Employees	114	52

#### **Contribution Rates**

As a condition of participation in the Defined Benefit Systems, employers and/or employees are required to contribute certain percentages of salary and wages as authorized by statute and specified by the URS Board. Contributions are actuarially determined as an amount that, when combined with employee contributions (where applicable) is expected to finance the costs of benefits earned by employees during the year, with an additional amount to finance any unfunded actuarial accrued liability. For the Utah Governors and Legislators plan, an annual appropriation is statutorily required to maintain this plan on a financially and actuarially sound basis. The State paid 100 percent of the contractually and statutorily required contributions. Contribution rates and contributions for the fiscal year ended June 30, 2019, are presented in the following table (dollars expressed in thousands):

404

266

Utah Camana and

Contributions	
Contributions	

		0 0						
Systems/Plan	Employee Paid		Paid by Employer for Employee	Employer Paid	Primary Government		Discrete Component Units (except UTA)	
Noncontributory Public Employees	\$		%	22.19%	\$	126,809	\$	54,083
Contributory:								
Contributory Public Employees	\$		6.00%	17.70%	\$	863	\$	967
Tier 2 Public Employees *	\$		%	18.87%	\$	44,102	\$	11,282
Public Safety:								
Contributory Public Safety	\$		%	%	\$	_	\$	_
Noncontributory Public Safety	\$	_	%	41.35%	\$	42,189	\$	1,071
Tier 2 Public Safety *	\$	_	%	29.80%	\$	10,217	\$	284
Firefighters:								
Contributory Firefighters	\$		15.05%	4.61%	\$	58	\$	
Tier 2 Firefighters *	\$	_	%	11.34%	\$	49	\$	_
Judges	\$	_	%	43.68%	\$	8,501	\$	
Utah Governors and Legislators		Aı	nnual Appropriation		\$	384		

* Tier 2 plans provide a statutory required contribution (0.08 to 18.54 percent amortization rate) to finance the unfunded actuarial accrued liability of the non-Tier 2 plans.

In addition to the contributions noted above, the primary government and discrete component units (except UTA) also paid to satisfy contribution requirements that are identified by the pension plan terms as plan member contribution requirements of \$482 thousand and \$331 thousand, respectively.

Below are the changes in net pension liability for the State's (primary government) single-employer system and plan:

#### Single-employer Plans Changes in Net Pension Liability and Related Ratios Increases (Decreases)

## Proportionate Share of Net Pension Asset and Liability

Utah Retirement Systems (URS) (pension trust and defined contribution plans) provides retirement benefits to employees of the primary government and its discrete component units (except UTA) as well as to public education and other political subdivisions of the State. At December 31, 2018, the net pension asset and the net pension liability for all URS systems is \$0 and \$5.449 billion respectively. The plan's fiduciary net position as a percent of the total pension liability is 85 percent. At December 31, 2018, the primary government's net pension asset and net pension liability is \$0 and \$1.170 billion, respectively. The following table summarizes the State's (primary government) net pension asset and liability by plan.

#### **Primary Government** Net Pension Asset and Liability December 31, 2018 (dollars expressed in thousands)

## **Deferred Outflows and Inflows of Resources**

The net pension asset and liability was measured as of December 31, 2018, and the total pension liability used to calculate the net pension asset and liability was determined by an actuarial valuation as of January 1, 2018, and rolled-forward using generally accepted actuarial procedures. The proportion of the net pension asset and liability is equal to the ratio of the employer's actual contributions to the Systems during the plan year over the total of all employer contributions to the System during the plan year.

At December 31, 2018, the State (primary government) recognized pension expense of \$284.214 million. The State's discrete component units (except UTA) recognized pension expense of \$83.542 million. Deferred outflows of resources and deferred inflows of resources related to the recognition of pension expense are from the following sources:

Actuarial Assumptions: Investment Rate of Return	6.95%	6.95%	6.95%	6.95%	6.95%	6.95%	6.95%	6.95%
Projected Salary Increases	3.25-9.75%	3.25-9.75%	3.25-7.25%	3.25-8.75%	3.25%	None	3.25-9.75%	3.25-8.75%
Inflation Rate	2.50%	2.50%	2.50%	2.50%	2.50%	2.50%	2.50%	2.50%
Post-retirement Cost-of-living Adjustment	2.50%	2.50%	2.50%	2.50%	2.50%	2.50%	2.50%	2.50%

Note: All post-retirement cost-of-living adjustments are non-compounding and are based on the original benefit except for Judges, which is a compounding benefit. The cost-of-living adjustments are also limited to the actual CPI increase for the year, although unused CPI increases not met may be carried forward to subsequent years.

# Notes to the Financial Statements

The actuarial assumptions used in the January 1, 2018, valuation were based on the results of an actuarial experience study for the five year period ending December 31, 2016. Mortality rates were developed from actual experience and mortality tables, based on gender, occupation, and age, as appropriate, with adjustments for future improvement in mortality based on Scale AA, a model developed by the Society of Actuaries.

**Target Allocations** The long-term expected rate of return on pension plan investments was determined using a building-block

method in which best estimates ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the Systems target asset allocation as of December 31, 2018, are summarized in the table below:

Long-term

#### Target Allocations Expected Return Arithmetic Basis

Asset Class	Target Asset Allocation	Real Return Arithmetic Basis	Expected Portfolio Real Rate of Return*
Equity Securities	40.00%	6.15%	2.46%
Debt Securities	20.00%	0.40%	0.08%
Real Assets	15.00%	5.75%	0.86%
Private Equity	9.00%	9.95%	0.89%
Absolute Return	16.00%	2.85%	0.46%
Cash and Cash Equivalents	0.00%	0.00%	0.00%
Total Asset Classes	100.00%		4.75%
Inflation			2.50%
Expected Arithmetic Nominal Return			7.25%

* The total URS Defined Benefit long-term expected rate of return is 6.95 percent. It is comprised of a 2.50 percent inflation rate, a real long-term expected rate of return of 4.45 percent that is net of investment expense.

### **Discount Rate**

The discount rate used to measure the total pension liability was 6.95 percent. The projection of cash flows used to determine the discount rate assumed that employee contributions will be made at the current contribution rate and that contributions from all participating employers will be made at contractually required rates that are actuarially determined and certified by the URS Board. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments

to determine the total pension liability. The discount rate does not use the municipal bond rate. The discount rate was reduced to 6.95 percent from 7.20 percent from the prior measurement period.

Sensitivity of the proportionate share of the net pension asset and liability to changes in the discount rate: The following presents the proportionate share of the State's (primary government) net pension liability calculated using the discount rate of 6.95 percent, as well as what the proportionate share of the net pension liability would be if it were calculated using a discount rate that is 1 percentage-point lower (5.95 percent) or 1 percentage-point higher (7.95 percent) than the current rate:

#### Primary Government Changes in Discount Rate Net Pension Liability / (Asset) (expressed in thousands)

Total Net Pension Liability / (Asset)	\$	2,120,490	\$ 1,170,481	\$ 379,467

### B. Defined Benefit Plans - Utah Transit Authority

Utah Transit Authority (UTA) (major discrete component unit) offers its employees a single employer non-contributory defined benefit pension plan, The Utah Transit Authority Retirement Plan and Trust (Plan), which includes all employees of UTA who are eligible and who have completed six months of service. The Plan is a qualified government plan and is not subject to all of the provisions of ERISA. As a defined benefit pension plan, UTA contributes such amounts as are necessary, on an actuarially sound basis, to provide assets sufficient to meet the benefits to be paid. Required employee contributions were discontinued effective June 1, 1992. Participants may make voluntary contributions as described below. Interest on existing account balances is credited at 5.00 percent per year.

Although UTA has not expressed any intention to do so, UTA has the right under the Plan to discontinue its contributions at any time and to terminate the Plan. In the event the Plan terminates, the trustee will liquidate all assets of the Plan and will determine the value of the trust fund as of the next business day following the date of such termination. The trustee will allocate assets of the Plan among the participants and beneficiaries as required by law.

The Plan is administered by the Pension Committee that consists of nine (9) members, seven (7) appointed by UTA and two (2) appointed by the Amalgamated Transit Union Local 382 in accordance with a collective bargaining agreement. The members of the Pension Committee may (but need not) be participants in the Plan. In the absence of a Pension Committee, the Plan Administrator assumes the powers, duties and responsibilities of the Pension Committee with respect to the administration of the Plan. U.S. Bank serves as the administrator and custodian of the Plan, with Cambridge Associates, LLC (CA) serving as a third-party investment manager.

The Plan prepares its financial statements on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America, under which benefits and expenses are recognized when due and payable and revenues are recorded in the accounting period in which they are earned and become measurable in accordance with the terms of the Plan. Accordingly, the valuation of investments is shown at fair value and both realized and unrealized gains (losses) are included in net appreciation and depreciation in fair value of investments. The Plan does not issue a publicly available financial report, but is reported in UTA's financial statements as a component unit.

### **Retirement Benefits**

Employees with five or more years of service are entitled to annual pension benefits beginning at normal retirement age 65, or any age with 37.5 years of service in the Plan. For participants who began participating in the Administrative Plan prior to January 1, 1994, the annual benefit is based on a retirement benefit formula equal to:

- 2.30 percent of average compensation multiplied by the participant's years of service (not exceeding 20 years), plus
- 1.50 percent of the average compensation multiplied by the participant's years of service in excess of 20 years (but such excess not to exceed 9 years of service), plus
- 0.50 percent for one year plus 2.00 percent for years in excess of 30 years not to exceed 75 percent of average compensation.

For all other active participants, the annual benefit is based on a retirement benefit formula equal to 2.00 percent of average compensation multiplied by the participant's years of service (not to exceed 37.5 years or 75 percent of average compensation).

Upon termination of employment, members may leave their retirement account intact for future benefits based on vesting qualification or withdraw the accumulated funds in their individual member account and forfeit service credits and rights to future benefits upon which the contributions were based. If employees terminate employment before rendering five years of service, they forfeit the right to receive their non-vested accrued plan benefits.

### Early Retirement Benefits

The Plan allows for early retirement benefits if the participant has not reached the age of 65 but is at least age 55 with a vested benefit. Benefits under early retirement are equal to the value of the accrued pension, if the participant had retired at the age of 65, reduced 5.00 percent per year if the payments begin before age 65.

### Disability Benefits

The Plan allows for disability benefits. A member who becomes permanently disabled after 5 years of service will immediately receive the greater of the actuarially-reduced monthly accrued benefit or \$90 per month, reduced by any UTA sponsored disability plans. Payment of the disability benefit ends at age 65.

### Death Benefits

If a participant's death occurs before age 55, but after 5 years of service, the present value of the participant's accrued vested benefit is payable to the participant's beneficiary in the form of a single lump sum regardless of the amount. If a participant's death occurs after age 55 and 5 years of service, the participant's beneficiary can elect to receive a benefit equal to the greater of:

- A survivor's pension as if the participant had retired on the date before the death with a 100 percent joint and survivor annuity in effect, or
- 2) The present value of the survivor's pension, or
- 3) If a spouse of 2 or more years or a minor child, the participant's contribution with interest, plus 50 percent of the average compensation, payable in the form of a lump sum, or
- 4) A 10-year term certain.

A participant may elect a joint and survivor annuity with 100, 75 or 50 percent to be continued to the beneficiary upon the death of the participant.

### Lump Sum Distributions

Payment in a lump sum, regardless of amount, may be made with the participant's written consent. Effective September 1, 2012, a participant who has not previously received benefits may elect a partial lump sum payment with the remaining part to be paid in the same manner as the traditional annuity. During calendar year 2018, 37 participants in each respective year elected to receive their benefit in the form of lump sum distribution. Lump sum distributions collectively totaled \$4.650 million for 2018. Individuals are removed from the Plan's membership if they choose to take all of their benefit as a lump sum distribution.

As of December 31, 2018, the Plan's membership consisted of:

### Utah Transit Authority Retirement Plan and Trust Membership December 31, 2018

Active participants	2,165
Inactive participants not receiving benefits	343
Participants due refunds	12
Retirees and beneficiaries receiving benefits	629
Total	3,149

### Contributions

### Employer Contribution Requirements

UTA's contribution rates are determined by the Pension Committee and approved by the Board of Trustees based on the current collective bargaining agreement and the minimum and maximum funding levels recommended by the Plan's actuary. The Authority's contribution rate consists of (1) an amount for normal cost, the estimated amount necessary to finance benefits earned by participants during the current year, and (2) an amount for amortization of the unfunded or excess funded actuarial accrued liability over the service life of the vested participants. The rates are determined using the entry age actuarial cost method. The Authority's Board of Trustees adopted a contribution rate policy of 16.00 percent for calendar year 2018 and subsequent years. Employer contributions in calendar year 2018 totaled \$22.355 million, which represented 105.43 percent of the annual actuarial recommended contributions.

### Participant Voluntary Contributions

A participant who is vested in the Plan may make voluntary contributions into the Plan, and transfer funds from the Employee 457 Deferred Compensation Plan, for the purpose of purchasing "permissive service credit" (as defined in Internal Revenue Code Section 415(N)(3)(A)), in the Plan. No more than 5 years of "permissive service credit" may be purchased. Any purchase of "permissive service credit" must be made in the final year of employment with UTA.

Below are the changes in net pension liability for the Plan:

Utah Transit Authority Retirement Plan and Trust Changes in Net Position Liability and Related Ratios Increases (Decreases) For the Fiscal Year Ended December 31, 2018

(expressed in thousands)

### Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

At December 31, 2018, UTA reported a net pension liability of \$131.548 million. The net pension liability was measured as of December 31, 2018, and was determined by an actuarial valuation as of January 1, 2018 and rolled-forward using generally accepted actuarial procedures. For the year ended December 31, 2018, UTA recognized pension expense of \$25.104 million.

### Utah Transit Authority Retirement Plan and Trust Deferred Outflows and Inflows of Resources Related to Pensions December 31, 2018

2019	\$ 8,144
2020	\$ 5,681
2021	\$ 4,313
2022	\$ 7,991
2023	\$ 1,906
Thereafter	\$ 511

### Actuarial assumptions

Actuarial valuation of the Plan involves estimates of the reported amounts and assumptions about the probability of occurrence of events into the future. Examples include assumptions about future mortality and future salary increases. Amounts determined regarding the net pension liability are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The last experience study was performed for the five consecutive calendar years ending December 31, 2008. The total pension liability as of December 31, 2018, is based on the results of an actuarial valuation date of January 1, 2018, and rolled-forward using generally accepted actuarial procedures. The significant actuarial assumptions and methods used in the January 1, 2018 valuation are as follows:

(Table on next page)

### Utah Transit Authority Retirement Plan and Trust Summary of Actuarial Assumptions

Summary of H	countration promo
Actuarial Cost Method	Entry Age Normal
Inflation	2.30%
Salary Increases	5.40% per annum for the first five (5) years of employment; 3.40% per annum thereafter
Investment rate of return	7.00%
Cost of Living Adjustments	None
Mortality	RP-2014 Blue Collar Mortality Table, with MP-2014 Project Scale (Preretirement; Employee Table; Post-retirement Annuitant Table)
Bond Buyer General Obligation 20-Bond Municipal Bond Index	3.44%
Percent of Future Retirement Electing Lump Sum	20.00%

The actuarial assumptions used in the January 1, 2018 valuation were based on the results of an actuarial experience study for the five year period ending December 31, 2008.

### **Investment Policy and Target Allocation**

The Pension Committee has adopted an Investment Policy Statement (IPS). The IPS is reviewed by the Pension Committee once a year, and was amended effective February 2016 to revise the asset classes. A normal weighting is now indicated for each asset class. The IPS was also amended to provide a list of prohibited investments.

All Plan investments are stated at fair value. Most types of marketable or actively traded investments are priced by nationally known vendors. In the event that an investment is not priced by the primary vendor, the Custodian (US Bank) engages a secondary vendor or other source. Purchases and sales are recorded on a tradedate basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

In setting the long-term asset policy for the Plan, the Committee has opted to provide a minimum and maximum allowable allocation to the major asset classes. Best estimates of the compound nominal rates of return for each major asset class included in the Plan's target asset allocation is summarized in the table below:

### Utah Transit Authority Retirement Plan and Trust Policy Allocation

	Target Asset Allocation	Range	Long-term Expected Return
Global Equity	63.00%	51% - 75%	6.90%
Liquid Diversifiers	10.00%	0% - 15%	5.80%
Real Assets	4.00%	0% - 8%	7.80%
Fixed Income	22.00%	12% - 32%	4.40%
Cash & Equivalents	1.00%	0% - 5%	3.30%
Total	100.00%		

The long-term rate of return is selected by the Plan's Pension Committee after a review of the expected inflation and long term real returns, reflecting expected volatility and correlation. The 7.00 percent assumed investment rate of return is comprised of an inflation rate of 2.30 percent and a real return of 4.70 percent net of investment expense.

The money-weighted rate of return considers the changing amounts actually invested during a period and weights the amount of pension plan investments by the proportion of time they are available to return during that period. External cash flows are determined on a monthly basis and are assumed to occur at the middle of each month. External cash inflows are netted with external cash outflows, resulting in a net external cash flow each month. The money-weighted rate of return is calculated net of investment expenses. For the calendar year ending, December 31, 2018, the annual money-weighted rate of return, net of investments was (7.77) percent.

### **Discount Rate**

The discount rate used to measure the total pension liability was 7.00 percent. The discount rate incorporates a municipal bond rate of 3.44 percent based on the Bond Buyer General, Obligation 20-Bond Municipal Bond Index. The projection of cash flows used to determine the discount rate assumed that contributions will be made based on the actuarially determined rates recommended by UTA's Pension Committee and approved by the Board of Trustees. Based on those assumptions, the Plan's fiduciary net position was projected to be available to make all the projected future benefit payments of current active and inactive Plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability. The following sensitivity analysis assumes rate volatility of plus and minus one percent of the discount rate of 7.00 percent.

### Utah Transit Authority Retirement Plans Changes in Discount Rate Net Pension Liability (Asset)

	1% Decrease (6.0%)		Ι	Current Discount ite (7.0%)	1% ncrease (8.0%)
Net Pension Liability	\$	173,037	\$	131,548	\$ 97,093

### C. Defined Contribution Plans

The 401(k), 457, and Roth and Traditional IRA Plans, in which the State participates and administered by URS, are defined contribution plans. These plans are available as supplemental plans to the basic retirement benefits of the Retirement Systems and a primary retirement plan for some Tier 2 participants. Contributions may be made into the plans subject to plan and Internal Revenue Code limitations. Employer contributions may be made into the 401(k) and 457 Plans at rates determined by the employers and according to Title 49 of the *Utah Code*. There are 466 employers participating in the 401(k) Plan and 293 employers participating in the 457 Plan. There are 178,010 plan participants in the 401(k) Plan, 18,336 participants in the 457 Plan, 12,232 participants in the Roth IRA Plan, and 2,383 participants in the Traditional IRA Plan.

After termination of employment, benefits are paid out to individuals in lump sum, or as periodic benefit payments, at the option of the participant based on individual account balances and plan provisions. The Defined Contribution Plans account balances are fully vested to the participants at the time of deposit except for Tier 2 required employer contributions and associated earnings during the first four years of employment. Investments in the vested portion of the Defined Contribution Plans are individually directed and controlled by plan participants. Investments of the plans are reported at fair value.

Employees of the State are eligible to participate in the defined contribution 401(k), 457, and Roth and Traditional IRA Plans. Employees, who contribute to a 401(k), 457, or IRA will get a match from the State of up to \$26 per pay period. In addition, the State and participating employers are required to contribute 1.50 percent of an employee's salary into a 401(k) for those employees who participate in the noncontributory system. The amounts contributed to the 401(k) Plan during the year ended June 30, 2019, by employees and employers are as follows: for primary government,

\$38.459 million and \$33.781 million; for component units, \$5.446 million and \$8.444 million, respectively. The amounts contributed by employees to the 457, and Roth and Traditional IRA Plans (primary government and discrete component units) were \$7.484 million, \$5.843 million, and \$297 thousand, respectively.

For the Tier 2 Public Employee System, Tier 2 Public Safety System, and the Tier 2 Firefighters System, the State and participating employers are required to contribute varying amounts into a 401(k). The amounts range from 0.74 to 1.15 percent of an employee's salary for the hybrid defined benefit systems and 10 to 12 percent of an employee's salary for the defined contribution systems. These contributions vest immediately, except for the Tier 2 401(k) required contributions that are subject to a 4 year vesting period. The primary government and discrete component units paid in 401(k) defined contributions required by statute \$8.810 million and \$1.754 million, respectively. In addition to these contributions, the Tier 2 plans provide a statutory required contribution (0.08 to 18.54 amortization rate) to finance the unfunded actuarial accrued liability of the non-Tier 2 (defined benefit) plans.

### **Teachers Insurance and Annuity Association**

Teachers Insurance and Annuity Association (TIAA) and Fidelity Investments, privately administered defined-contribution retirement plans, provide individual retirement fund contracts for each eligible participating employee. Eligible employees are mainly state college/university faculty and staff. Benefits to retired employees are generally based on the value of the individual contracts and the estimated life expectancy of the employee at retirement and are fully vested from the date of employment. The total current year required contribution and the amount paid is 14.20 percent of the employee's annual salary. The State has no further liability once annual contributions are made.

The total contribution made by the colleges and universities (discrete component units) to the TIAA retirement system for June 30, 2019 and 2018, were \$266.359 million and \$246.549 million, respectively.

### **Utah Transit Authority**

The Utah Transit Authority (UTA) (major discrete component unit) offers its employees a deferred compensation plan created in accordance with Internal Revenue Code Section 457. The plan is available to all employees on a voluntary basis and permits them to defer a portion of their salaries until future years. The deferred compensation is not available to employees until termination, retirement, death or unforeseeable emergency.

All assets and income of the plan are held in trust for the exclusive benefit of the participants and their beneficiaries. As part of its fiduciary role, UTA has an obligation of due care in selecting the third party administrators. In the opinion of management, UTA has acted in a prudent manner and is not liable for losses that may arise from the administration of the plan. The deferred compensation assets are held by third party plan administrators and are generally invested in money market funds, stock or bond mutual funds or guarantee funds as selected by the employee.

### NOTE 19. OTHER POSTEMPLOYMENT BENEFITS

The State administers the State Employee Other Postemployment Benefit Plan (State Employee OPEB Plan) through the State Post-Retirement Benefits Trust Fund, as set forth in Section 67-19d-201 of the *Utah Code*. A separate Elected Official Other Postemployment Benefit Plan (Elected Official OPEB Plan) is provided for governors and legislators, and this plan is administered through the Elected Official Post-Retirement Benefits Trust Fund as set forth in Section 67-19d-201.5 of the *Utah Code*. Both trust funds are irrevocable and legally protected from creditors. Both are also administered under the direction of a board of trustees, which consists of the State Treasurer, the Director of the Division of Finance, and the Director of the Governor's Office of Management and Budget or a designee. Neither plan issues a publicly available financial report, but are included in this report of the primary government.

### State Employee OPEB Plan Description

At the option of individual state agencies, employees may participate in the State Employee OPEB Plan, a single-employer defined benefit healthcare plan, as set forth in Section 67-19-14.2 of the Utah Code. Only state employees who are entitled to receive retirement benefits are eligible to receive postemployment health and life insurance benefits, and in some situations dental coverage, from the State Employee OPEB Plan. Upon retirement, employees receive up to 25 percent of the value of their unused accumulated sick leave, earned prior to January 1, 2006, as a mandatory employer contribution into a 401(k) account. Employees may exchange eight hours of their remaining unused accumulated sick leave for one month of paid health and life insurance coverage up to age 65. After age 65, employees may use the balance of unused accumulated sick leave, earned prior to January 1, 2006, to exchange for spouse health insurance to age 65, or Medicare supplemental insurance for employee or spouse. In addition, any full-time employees of the Utah State Board of Education and the Utah Schools for the Deaf and Blind (nonmajor discrete component unit) hired before July 1, 2012, who have attained at least five consecutive years of service with the agency, have the option of receiving postemployment health, dental, and life insurance coverage for up to five years or until reaching age 65 regardless of their unused sick leave balance. Also, judges have their own retiree health coverage that is part of the State Employee OPEB Plan. The State Employee OPEB Plan is closed to new entrants since it is only applicable to employees eligible for retirement who have sick leave earned prior to January 1, 2006, or employees of the Utah State Board of Education hired before July 1, 2012.

### **Elected Official OPEB Plan Description**

The Elected Official OPEB Plan is a single-employer defined benefit healthcare plan, as set forth in Section 49-20-404 of the *Utah Code*. Only governors and legislators (elected officials) who retire after January 1, 1998, and have four or more years of service can elect to receive and apply for health insurance coverage or Medicare supplemental coverage. The State will pay 40 percent of the benefit cost for four years of service and up to 100 percent for ten or more years of service for elected officials and their spouses.

To qualify for health insurance coverage, an elected official must be between 62 and 65 years of age and either be an active member at the time of retirement or have continued coverage with the program until the date of eligibility. In addition, to qualify for health insurance coverage, an elected official must have service as a legislator or governor prior to January 1, 2012.

To qualify for Medicare supplemental coverage, an elected official must be at least 65 years of age. In addition, the elected official must retire under Chapter 19, *Utah Governors' and Legislators' Retirement Act*, and began service as an elected official prior to July 1, 2013. The Plan is closed to new entrants.

At June 30, 2019, the following number of employees were covered by the State's single-employer OPEB plans: (*Table on next page*)

# Notes to the Financial Statements

### Single-employer Plans Covered Employees

June 30, 2019

	State Employee OPEB Plan	Elected Official OPEB Plan
Inactive Employees or Beneficiaries Currently Receiving Benefits	3,171	91
Inactive Employees Entitled to But Not Yet Receiving Benefits	_	115
Active Employees	5,438	49
Total Single-employer Plans Covered Employees	8,609	255

#### **State Employee OPEB Plan Contributions**

The contribution requirements of employees and the State are established, and may be amended, by the State Legislature. For retirees who participate in the State Employee OPEB Plan, health insurance premiums are paid 100 percent by the State for individuals who retired before July 1, 2000. Individuals retiring thereafter are required to contribute specified amounts monthly, ranging from 0 to 30.1 percent, toward the cost of health insurance premiums. For the fiscal year ended June 30, 2019, retirees contributed \$1.541 million, or approximately 4.80 percent of total premiums, through their required contributions of \$0 to \$802.80 per month depending on the coverage (single, double, or family) and health plan selected.

The Actuarially Determined Contribution (ADC) of \$25.9 million, from the December 31, 2016, actuarial valuation, was used to establish the fiscal year 2019 annual budget and fund employer contributions. The State Legislature funded \$26.510 million in employer contributions, \$582 thousand more than the ADC.

### **Elected Official OPEB Plan Contributions**

For the fiscal year ended June 30, 2019, elected officials who participated in the Elected Official OPEB Plan contributed \$30 thousand, or approximately 6.79 percent of total premiums, through

their required contributions of \$0 (for 10 or more years of service) to \$922.22 per month (for four years of service) depending on the coverage (single or double) and health plan selected.

The Actuarially Determined Contribution (ADC) of \$1.026 million from the December 31, 2016, actuarial valuation was used to establish the fiscal year 2019 annual budget and fund employer contributions. For the fiscal year 2019, the State Legislature funded \$1.388 million in employer contributions, \$362 thousand more than the ADC.

### Net OPEB Liability

The net OPEB liability was measured as of June 30, 2019. The total OPEB liability, used to calculate the net OPEB liability, was determined by an actuarial valuation as of December 31, 2018, and rolled-forward using generally accepted actuarial procedures. The combined total net OPEB liability, for both single-employer plans, was \$70.088 million, and of that amount, the State's (primary government) net OPEB liability was \$69.443 million, and \$645 thousand was allocated to the Utah Schools for the Deaf and Blind (nonmajor discrete component unit). Below are the changes in the net OPEB liability and related ratios of the net OPEB liability for the single-employer OPEB plans:

#### Single-employer Plans Changes in Net OPEB Liability and Related Ratios Increases (Decreases) For the Year Ended June 30, 2019

(dollars expressed in thousands)

		te Employee DPEB Plan	ed Official EB Plan
Total OPEB Liability			
Service Cost		\$ 5,189	\$ 733
Interest		12,749	908
Difference between Actual and Expected Experience		(28,055)	(245)
Assumption Changes		31,163	(347)
Benefit Payments		 (30,560)	 (412)
Net Change in Total OPEB Liability		 (9,514)	 637
Total OPEB Liability – Beginning		349,916	16,766
Total OPEB Liability – Ending	Α	\$ 340,402	\$ 17,403
Plan Fiduciary Net Position			
Contributions – Employee		\$ _	\$ _
Contributions – Employer		26,510	1,388
Net Investment Income (Loss)		24,082	1,287
Benefit Payments		(30,560)	(412)
Administrative Expense			—
Net Transfers with Affiliated Systems		 356	 
Net Change in Plan Fiduciary Net Position		 20,388	 2,263
Plan Fiduciary Net Position – Beginning		251,464	13,602
Plan Fiduciary Net Position – Ending	В	\$ 271,852	\$ 15,865
Net OPEB Liability / (Asset) – Ending (A – B)		\$ 68,550	\$ 1,538
Plan Fiduciary Net Position as a Percentage of the Total OPEB Liability		79.86%	91.16%
Covered Payroll*		\$ 1,032,288	
Net OPEB Liability as a Percentage of Covered Payroll		6.64%	
Covered-employee Payroll*			\$ 1,317
Net OPEB Liability as a Percentage of Covered-employee Payroll			116.78%

* Contributions to the State Employee Plan are based on a measure of pay, therefore covered payroll is presented in the above schedule. Contributions to the Elected Official OPEB Plan are based on appropriations and not on a measure of pay; therefore, for that plan the covered-employee payroll is presented.

# Deferred Outflows and Inflows of Resources and OPEB Expense

For the year ended June 30, 2019, the total OPEB expense was \$7.233 million, \$7.164 million for the State Employee OPEB Plan, and \$69 thousand for the Elected Official OPEB Plan. Of the total OPEB expense, the State (primary government) recognized \$7.149 million, and \$84 thousand was allocated to the Utah Schools for the Deaf and Blind (nonmajor discrete component unit).

Total deferred inflows of resources related to the recognition of

OPEB expense was \$37.028 million, of which \$36.610 million was recognized by the State, and \$418 thousand was allocated to the Utah Schools for the Deaf and Blind.

Total deferred outflows of resources related to the recognition of OPEB expense was \$31.892 million, of which \$31.527 million was recognized by the State, and \$365 thousand was allocated to the Utah Schools for the Deaf and Blind.

Deferred inflows of resources related to OPEB came from the following source:

### Deferred Outflows and Inflows of Resources Related to OPEB

	(ex	June 30 pressed in	/									
	State Employee OPEB Plan				Elected Official OPEB Plan							
Source	_	eferred utflows	_	Deferred Inflows		ferred Itflows		eferred oflows	_	Total eferred outflows	D	Total eferred nflows

Changes in Assumption	\$	24,931	\$	_	\$	_	\$	_	\$	24,931	\$	_
Net Differences between Projected and Actual Earnings on OPEB Plan Investments	\$	6,951	\$	13,878	\$	10	\$	706	\$	6,961	\$	14,584

Amounts reported above as deferred inflows and deferred outflows of resources related to OPEB will be recognized in OPEB expenses as follows:

### Recognition of Remaining Deferred Outflows and Inflows of Resources

### Fiscal Year Ended June 30, 2019

(expressed in thousands)											
	Deferred Outflows					Deferred Inflows					
Fiscal Year	State Employee OPEB Plan		Elected Official OPEB Plan			e Employee PEB Plan	Elected Official OPEB Plan				
2020	\$	8,550	\$	4	\$	9,606	\$	243			
2021	\$	8,550	\$	3	\$	9,606	\$	243			
2022	\$	8,549	\$	3	\$	8,555	\$	110			
2023	\$	6,233	\$		\$	8,555	\$	110			

The total OPEB liability in the December 31, 2018, valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

### Summary of Actuary Assumptions

	State Employee OPEB Plan	Elected Official OPEB Plan	
Actuarial Valuation Date	12/31/2018	12/31/2018	
Measurement Date	6/30/2019	6/30/2019	
Actuarial Cost Method	Entry Age Normal		
Investment Rate of Return	3.00%	5.25%	
Inflation Rate	2.40%		
Healthcare Inflation Rate	5.40% initial 3.94% ultimate		

Mortality rates were based on the RP-2014 mortality table for both pre-retirement and post-retirement mortality assumption, along with 75 percent of the MP-2015 projection scale for mortality improvement. This projection scale applies "generational" improvements to longevity, based on the concept that children will live longer than their parents. The actuarial assumptions were updated since the prior measurement period based on the assumptions used in the Utah Retirement Systems actuarial valuation as of January 1, 2017 based on the results of an actuarial experience study for the five-year period ending December 31, 2016. The medical trend assumptions used in the valuation were developed using the Society of Actuaries (SOA) Long-Run Medical Cost Trend Model (version 2019_b). The Per Capita Claims Costs (PCCC) aging factors were updated for pre-Medicare and post-Medicare retirees from the prior measurement date. The healthcare trend rate assumption was also updated from the prior measurement date to reflect the 2019 SOA Long-Run Medical Cost Trend model.

### **Investment Policy and Target Allocations**

The State Treasurer is responsible for investing the assets of the State Employee OPEB Plan and the Elected Official OPEB Plan. The State Treasurer has an investment committee which establishes the asset allocation for the OPEB plans with the primary goal of providing for the stability, income, and growth of the principal. The asset allocation for the plans is not expected to change substantially over the short or intermediate time horizons in response to short-

### Notes to the Financial Statements

term market movements, but may change incrementally based upon long-term capital market projections. For the fiscal year ended June 30, 2019, the annual money-weighted rate of return on investments, net of investment expense, was 9.72 percent for the State Employee OPEB Plan and 11.65 percent for the Elected Official OPEB Plan. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

The long-term expected rate of return on OPEB plan investments was determined using a building-block method in which best estimate ranges of expected future real rates of return (expected returns, net of OPEB plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in each plan's target asset allocation as of June 30, 2019, are summarized below:

#### State Employee OPEB Plan Target Allocations Expected Return Arithmetic Basis

Asset Class	Target Asset Allocation	Real Return Arithmetic Basis	Long-term Expected Portfolio Real Rate of Return						
Debt Securities	90.00%	0.90%	0.80%						
Real Estate	10.00%	2.00%	0.20%						
Total Asset Classes	100.00%		1.00%						
Inflation			2.00%						
Expected Arithmetic Nominal Return			3.00%						

#### Elected Official OPEB Plan Target Allocations Expected Return Arithmetic Basis

Asset Class	Target Asset Allocation	Real Return Arithmetic Basis	Long-term Expected Portfolio Real Rate of Return
Equity Securities	55.00%	5.00%	2.73%
Debt Securities	35.00%	0.90%	0.32%
Real Estate	10.00%	2.00%	0.20%
Total Asset Classes	100.00%		3.25%
Inflation			2.00%
Expected Arithmetic Nominal Return			5.25%

### **Discount Rates**

The discount rate used to measure the total OPEB liability was 3.00 percent for the State Employee OPEB Plan and 5.25 percent for the Elected Official OPEB Plan. The discount rate for the State Employee OPEB Plan was reduced from 3.75 percent to 3.00 percent from the prior measurement period based on lower expected inflation in the future.

The projection of cash flows used to determine the discount rates assumed that future State contributions will be equal to the Actuarially Determined Contribution (ADC) as calculated in each future valuation. Based on those assumptions, the OPEB Plan's Fiduciary Net Position for both plans was projected at the beginning of each year to be sufficient to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on the OPEB Plan's investments for both plans, was applied to all periods of projected benefit payments to determine the total OPEB liability. The discount rates do not incorporate a municipal bond rate.

The following presents the net OPEB liability for the State for both plans, calculated using the discount rate of 3.00 percent for the State Employee OPEB Plan and 5.25 percent for the Elected Official OPEB Plan, as well as what the net OPEB liability would be if it were calculated using a discount rate that is 1 percentage-point lower (2.0 percent - State Employee OPEB Plan, 4.25 percent - Elected Official OPEB Plan) or 1 percentage-point higher (4.00 percent - State Employee OPEB Plan, 6.25 percent - Elected Official OPEB Plan) than the current rate:

#### Changes in Discount Rate Net OPEB Liability / (Asset)

(expressed in thousands)

(expressed in moustailes)											
OPEB Plan 1% Decrease (2.00%)		-	Current ount Rate	1% Increase (4.00%)							
State Employee OPEB Plan	\$	88,297	\$	68,550	\$	49,896					
	1% Decrease (4.25%)		-	Current ount Rate	1% Increase (6.25%)						
Elected Official OPEB Plan	\$	4,257	\$	1,538	\$	(643)					
Total Net OPEB Liability / (Asset)	\$	92,554	\$	70,088	\$	49,253					

The following presents the net OPEB liability of the State, as well as what the State's net OPEB liability would be if it were calculated using healthcare cost trend rates that are 1 percentage-point lower (4.4 percent decreasing to 2.9 percent) or 1 percentage-point higher (6.4 percent decreasing to 4.9 percent) than the current healthcare cost trend rates:

### Healthcare Cost Trend Rates Net OPEB Liability / (Asset)

(expressed in thousands)

OPEB Plan	Decrease Decreasing to 2.9%)	nt Discount Rate ecreasing to 3.9%)	1% Increase (6.4% decreasing to 4.9%)		
State Employee OPEB Plan	\$ 45,067	\$ 68,550	\$	94,573	
Elected Official OPEB Plan	 (715)	 1,538		4,325	
Total Net OPEB Liability / (Asset)	\$ 44,352	\$ 70,088	\$	98,898	

### NOTE 20. RISK MANAGEMENT AND INSURANCE

It is the policy of the State of Utah to use a combination of commercial insurance and self-insurance to cover the risk of losses to which it may be exposed. This is accomplished by the State through the Risk Management Fund (internal service fund) and the Public Employees Health Program (PEHP) (major discrete component unit). The Risk Management Fund manages the general property, auto/physical damage, and general liability risks of the State. PEHP manages the group medical, dental, life insurance, and long-term disability programs of the State. The State is a major participant in both of these programs with all state funds and

departments included. All state colleges, universities, school districts, most charter schools, and other state discrete component units participate in the Risk Management Fund. PEHP also provides insurance coverage to approximately 370 local governments, school districts, and other public entities within the State.

All participants share the risk within the Risk Management Fund property and auto risk pools. Participants in the Risk Management Fund general liability program are divided into higher education, school district, transportation department, and other state departments risk pools. All participants share the risk within the life insurance, Medicare Supplement, and long-term disability pools of PEHP. The PEHP medical and dental programs are divided into state and various other employers risk pools.

The State has determined that the Risk Management Fund and PEHP can economically and effectively manage the State's risks internally and have set aside assets for claim settlements through reserves. Risks are also covered through commercial insurance for excessive losses. The State is self-insured for liability claims up to \$2 million and beyond the excess insurance policy limit of \$10 million. The State is self-insured for individual property and casualty claims up to \$1 million and up to \$3.5 million in aggregate claims and beyond the excess insurance policy limit of \$1 billion per occurrence. The Risk Management Fund has not had a liability loss that exceeded the State's self-insured claim limit of \$1 million for the fiscal years ended June 30, 2017 and June 30, 2018. The fund had losses that exceeded the State's self-insured claim limit of \$1 million for the fiscal years ended June 30, 2019.

PEHP has reinsurance coverage for a life catastrophic occurrence in excess of \$7.5 million, not to exceed \$80 million per year with a one-time reinstatement with additional premium. PEHP also has excess medical reinsurance for medical losses that exceed \$1.25 million on a person per year to a maximum of \$2 to \$5 million during the person's lifetime, depending on the participating group's lifetime maximum.

The Risk Management Fund and PEHP allocate the cost of providing claims servicing, claims payment, and commercial insurance by charging a premium to each participating public entity or employee. Premiums are based on each organization's recent trends in actual claims experience and property values. The primary government and discrete component units of the State paid premiums to PEHP for health and life insurance coverage in fiscal year 2019 of \$323.112 million and \$48.394 million, respectively.

Risk Management and PEHP claims liabilities are reported when it is probable that a claim has occurred and the ultimate cost of settling that claim can be reasonably estimated and includes an amount for claims that have been incurred but not reported. Because actual claims liabilities are affected by complex factors (i.e., inflation, changes in legal doctrines and insurance benefits, and unanticipated damage awards), the process used in computing claims liabilities does not necessarily result in exact amounts. Claims liabilities are recomputed periodically by actuaries who take into consideration recently settled claims, frequency of claims, and other economic or social factors. Inflation and other appropriate modifiers are included in this calculation because reliance is based on historical data. The Risk Management Fund general liability program reserves of \$60.414 million are reported using a discount rate of 2 percent. The PEHP long-term disability benefit reserves of \$18.726 million are reported using discount rates between 2 and 5.75 percent.

All employers who participate in the Utah Retirement Systems are eligible to participate in the Public Employees Long-term Disability Program according to Section 49-21-201 of the *Utah Code*. Employees of state departments who meet long-term disability eligibility receive benefits for the duration of their disability up to the time they are eligible for retirement or until age 65. Benefits beginning after a three-month waiting period are paid 100 percent by the program. As of June 30, 2019, there were 157 state employees receiving benefits. The program is funded by paying premiums to PEHP where assets are set aside for future payments. For the fiscal year ended June 30, 2019, the primary government and the discrete component units of the State paid premiums for the Long-term Disability Program of \$5.165 million and \$291 thousand, respectively.

The State covers its workers' compensation risk by purchasing insurance from Workers' Compensation Fund (a related organization). The University of Utah, Utah State University, Southern Utah University, Salt Lake Community College, and Utah Valley University (major and nonmajor discrete component units) each maintain self-insurance funds to manage health/dental care and report claims liabilities if it is probable that a liability has been incurred as of the date of the financial statements and the amount of the loss can be reasonably estimated. The University of Utah also maintains a self-insurance fund to manage medical malpractice liabilities. The University of Utah and the University of Utah Hospital and Clinics also have a "claims made" umbrella malpractice insurance policy in an amount considered adequate by their respective administrations for catastrophic malpractice liabilities in excess of the trusts' fund balances.

Utah Transit Authority (UTA) (major discrete component unit) is self-insured for amounts up to the maximum statutory liability in any one accident of \$2.5 million. UTA has Railroad Liability Coverage of \$100 million per annum with \$5 million of risk retention. UTA is self-insured for worker's compensation up to the amount of \$1 million per incident and has excess insurance for claims over this amount. UTA has insurance for errors and omissions and damage to property in excess of \$100 thousand per annum.

The following table presents the prior and current year changes in claims liabilities balances (short and long-term combined). The Risk Management and College and University self-insurance balances are for the fiscal years ended June 30, 2018 and June 30, 2019. The PEHP and UTA balances are for the calendar years ended December 31, 2017 and December 31, 2018:

(Table on next page)

# Notes to the Financial Statements

			<b>ms Liabilities</b> thousands)		
	Beginning Balance Current Year Claims and Changes in Estimates		Claims Payments	Ending Balance	
Risk Management:					
2018	\$	53,645	\$ 17,404	\$ (13,719)	\$ 57,330
2019	\$	57,330	\$ 22,050	\$ (15,822)	\$ 63,558
Public Employees Health Program:					
December 31, 2017	\$	148,268	\$ 654,802	\$ (653,463)	\$ 149,607
December 31, 2018	\$	149,607	\$ 694,933	\$ (697,527)	\$ 147,013
Utah Transit Authority:					
December 31, 2017	\$	5,096	\$ 1,082	\$ (4,682)	\$ 1,496
December 31, 2018	\$	1,496	\$ 3,118	\$ (3,458)	\$ 1,156
College and University Self-Insurance:					
2018	\$	99,474	\$ 256,444	\$ (258,733)	\$ 97,185
2019	\$	97,185	\$ 355,736	\$ (346,063)	\$ 106,858

### NOTE 21. SUBSEQUENT EVENTS

Subsequent to June 30, 2019, the Governor's Office of Economic Development Board recommended and the director approved \$50.4 million of additional commitments to be credited over the next several years for the Economic Development Tax Increment Financing (EDTIF) and Motion Picture Incentive (MPIP) programs. These commitments are contingent on participating companies meeting certain economic development performance criteria and within-the-state production criteria.

On August 30, 2019, University of Utah (major discrete component unit) issued \$50 million of new capital lease debt at 2.29 percent interest, for furniture and technology equipment related to its hospital.

On August 22, 2019, Utah State University (USU) (major discrete component unit) issued \$54.995 million of Student Fee and Housing System Revenue Bonds, Series 2019. Principal on the bonds is due annually commencing April 1, 2021 through June 30, 2049. Bond interest is due semi-annually commencing October 1, 2019 at rates ranging from 2.125 to 5.00 percent. Proceeds from these bonds are

for the purpose of financing the costs of constructing a six-story student apartment building; a multi-level parking structure on the University main campus; and to pay costs of issuance.

On October 16, 2019, USU issued \$5.745 million Series 2019A Research Revenue Refunding Bonds to refund the Series 2018A Research Revenue Bonds.

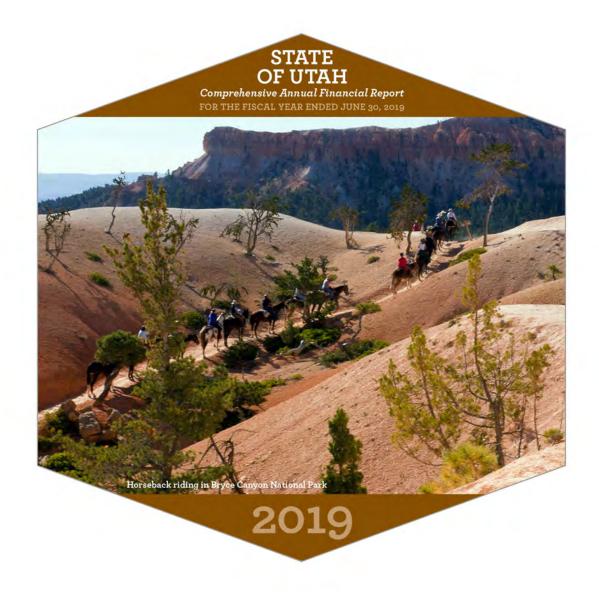

On July 10, 2019, the Utah Transit Authority (UTA) (major discrete component unit) approved a \$7.100 million agreement with a private organization to provide micro-transit service to the cities of Bluffdale, Draper, Herriman, Riverton, Sandy, and South Jordan.

On August 8, 2019, UTA entered into three new service vehicle leases totaling \$9.880 million with lease terms ranging from 5 to 12 years.

UTA is currently in the process of issuing up to \$540 million of sales tax revenue and refunding bonds to refund and restructure portions of the 2012 and 2015 outstanding bonds and provide up to \$75 million for capital projects. The bond sale date was November 6, 2019 with bond closing to occur around November 26, 2019.

### Budgetary Comparison Schedule Budget to GAAP Reconciliation

(expressed in thousands)

For the Fiscal Year Ended June 30, 2019

	General Fund	]	Education Fund	Transportation Fund	
Revenues					
Actual total revenues (budgetary basis)	\$ 7,862,456	\$	5,373,094	\$	1,129,667
Differences – Budget to GAAP:					
Intrafund revenues are budgetary revenues but are not revenues for financial reporting	(511,334)				(3,051)
Higher education and Utah Schools for the Deaf and the Blind collections are budgetary revenues but are not revenues for financial reporting	(871,324)		(8,224)		
Change in revenue accrual for nonbudgetary Medicaid claims	7,643		—		
Change in tax accruals designated by law and other liabilities are revenues for financial reporting but not for budgetary reporting	22,146		6,224		7,379
Change in estimated federal receivables recorded as revenues for financial reporting but not for budgetary reporting	_		67,205		_
Education related collections that are revenues for financial reporting but not for budgetary reporting	_		304		_
Total revenues as reported on the Statement of Revenues, Expenditures, and Changes in Fund Balances – Governmental Funds	\$ 6,509,587	\$	5,438,603	\$	1,133,995
Expenditures					
Actual total expenditures (budgetary basis)	\$ 8,730,484	\$	4,078,783	\$	998,100
Differences – Budget to GAAP:					
Intrafund expenditures for reimbursements are budgetary expenditures but are not expenditures for financial reporting	(511,334)				(3,051)
Expenditures related to higher education and Utah Schools for the Deaf and the Blind collections are budgetary expenditures but are not expenditures for financial reporting	(871,324)		(8,224)		_
Certain budgetary transfers and other charges are reported as an increase or reduction of expenditures for financial reporting	22,047				
Leave charges budgeted as expenditures when earned rather than when taken or due	(516)		(15)		(246)
Change in estimated liabilities recorded as expenditures for financial reporting but not for budgetary reporting			68,164		_
Change in accrual for Medicaid (incurred but not reported) claims excluded from the budget by statute	10,285		_		_
Change in accrual for Rehabilitation (incurred but not reported) claims excluded from the budget by statute	866		_		_
Taxpayer rebates budgeted as revenue offset but recorded as expenditures for financial reporting	5,800		_		
Total expenditures as reported on the Statement of Revenues, Expenditures, and Changes in Fund Balances – Governmental Funds	\$ 7,386,308	\$	4,138,708	\$	994,803

# **Required Supplementary Information**

### INFORMATION ABOUT BUDGETARY REPORTING

### **Budgetary Presentation**

A Budgetary Comparison Schedule is presented for the General Fund and each of the State's major special revenue funds for which the Legislature enacts an annual budget. An annual budget is also adopted for the Transportation Investment Fund, a major capital projects fund, the Debt Service Fund, a nonmajor governmental fund, and the Alcoholic Beverage Control Fund, a nonmajor enterprise fund. The budgets are enacted through passage of *Appropriations Acts*. Budgets for specific general revenues are not adopted through an *Appropriations Act*, but are based on supporting estimates approved by the Executive Appropriations Committee of the Legislature. General revenues are those revenues available for appropriation for any program or purpose as allowed by law. Department-specific revenues are revenues dedicated by an *Appropriations Act* or restricted by other law or external grantor to a specific program or purpose.

Original budgets and related revenue estimates represent the spending authority enacted through *Appropriations Acts* as of June 30, 2019, and include nonlapsing carryforward balances from the prior fiscal year. Final budgets represent the original budget as amended by supplemental appropriations and related changes in revenue estimates, executive order reductions when applicable, and changes authorized or required by law when department-specific revenues either exceed or fall short of budgeted amounts.

Unexpended balances at yearend may: (1) lapse to unrestricted balances (committed, assigned, or unassigned) and be available for future appropriation; (2) lapse to restricted balances and be available for future appropriation restricted for specific purposes as defined by statute; or (3) be nonlapsing, which means balances are reported as either restricted or committed fund balance. The nonlapsing balances are considered automatically reappropriated as authorized by statute, by an *Appropriations Act*, or by limited encumbrances.

### **Budgetary Control**

In September of each year, all agencies of the government submit requests for appropriations to the Governor's Office of Management and Budget so that a budget may be prepared. The budget is prepared by fund, function, and activity and includes information on the past year, current year estimates, and requested appropriations for the next fiscal year.

In January, the Governor recommends a budget to the Legislature. The Legislature considers those recommendations and prepares a series of *Appropriations Acts* that modify the State budget for the current year and constitute the State budget for the following year. The Legislature passes the *Appropriations Acts* by a simple majority vote. The *Appropriations Acts* becomes the State's authorized operating budget upon the Governor's signature. The *Constitution of Utah* requires that budgeted expenditures not exceed estimated revenues and other sources of funding, including beginning balances.

Budgetary control is maintained at the functional or organizational level, as identified by numbered line items in the *Appropriations Acts*. Budgets may be modified if federal funding or revenue specifically dedicated for a line item exceeds original estimates in the *Appropriations Acts*. If funding sources are not sufficient to cover the appropriation, the Governor is required to reduce the budget by the amount of the deficiency. Any other changes to the budget must be approved by the Legislature in a supplemental *Appropriations Acts*.

Any department that spends more than the authorized amount must submit a report explaining the overspending to the State Board of Examiners. The Board will recommend corrective action, which may include a request to the Legislature for a supplemental appropriation to cover the deficit. If a supplemental appropriation is not approved, the department must cover the overspending with the subsequent year's budget. All appropriated budgets of the State were within their authorized spending levels.

### Spending Limitation

The State also has an appropriation limitation statute that limits the growth in state appropriations. The total of the amount appropriated from unrestricted General Fund sources plus the income tax revenues appropriated for higher education is limited to the growth in population and inflation. The appropriations limitation can be exceeded only if a fiscal emergency is declared and approved by more than two-thirds of both houses of the Legislature, or if approved by a vote of the people. However, the appropriations limitation statute may be amended by a majority of both houses of the Legislature. Appropriations for debt service, emergency expenditures, amounts from other than unrestricted revenue sources, transfers to the Budgetary Reserve Account (Rainy Day Fund), Education Budget Reserve Account and the Transportation Investment Fund; or capital developments meeting certain criteria are exempt from the appropriations limitation. For the fiscal year ended June 30, 2019, the State was \$597.068 million below the appropriations limitation.

### INFORMATION ABOUT THE STATE'S PENSION PLANS

### A. Single-employer Plans - Utah Retirement Systems

The State's defined benefit pension systems/plan is administered by Utah Retirement Systems and is included in this Comprehensive Annual Financial Report as a pension trust fund within the fiduciary funds. The Judges System and the Utah Governors and Legislators Retirement Plan are single-employer service retirement plans.

The following schedules present for the State's (primary government) single-employer retirement plans Changes in the Net Pension Liability and Related Ratios and Schedule of Employer Contributions.

### Footnotes to Single-employer Plans - Utah Retirement Systems Schedule of Contributions

### Methods and Assumptions Used to Determine Contribution Rates

	Judges System	Utah Governors and Legislators Retirement Plan						
Actuarial cost method	Entry Age	Entry Age						
Amortization method	Level Percent of Payroll	Level Dollar Amount						
Amortization period	Open Group 20 - Year Open Period	Closed Group 16-Year Closed Period						
Actuarial asset valuation method	Based on the total fair value income of investments with the excess or shortfall of actual investment income over or under the expected investmer return smoothed over 5 years. One-fifth of the excess or shortfall is recognized each year for five years.							
Actuarial assumptions:								
Investment rate of return	6.	95%						
Projected salary increases**	3.25%	None						
Inflation rate	2.	50%						
Post-retirement cost-of-living adjustment*	2.	50%						
Mortality: (Judges):	Male: 90% of 2017 Public Retirees of Utah (PR Utah) Mortality Table for males, projected with Scale AA from the year 2017. Female: 90% of 2017 Public Retirees of Utah (PR Utah) Mortality Table for females, projected with Scale AA from the year 2017.							
Mortality: (Utah Governors and Legislators):	Male: 110% of 2017 Public Retirees of Utah (PR Utah) Mortality Table for males, projected with Scale AA from the year 2017. Female: 110% of 2017 Public Retirees of Utah (PR Utah) Mortality Table for females, projected with Scale AA from the year 2017.							

*All post-retirement cost-of-living adjustments are noncompounding and are based on the original benefit except for Judges, which is a compounding benefit. The cost-of-living adjustments are also limited to the actual CPI increase for the year, although unused CPI increases not met may be carried forward to subsequent years.

^{**}Composed of 2.50 percent inflation, plus 0.75 percent productivity increase rate, plus step-rate promotional increases for members with less than 25 years of service.

# **Required Supplementary Information**

### Footnotes to Single-employer Plans - Utah Retirement Systems Schedule of Contributions (continued)

### **Other Information:**

The actuarially determined contribution rates are calculated as of January 1 and become effective on July 1 of the following year, which is 18 months after the valuation date. The Utah Retirement Systems' Board certifies the contribution rates that employers are contractually required to contribute to the Retirement System. According to Section 49-11-301(5) of the *Utah Code*, if the funded ratio of the plan is less than 110 percent, then the Board is permitted to maintain the prior year's contribution rate if the actuarially determined contribution is lower. The Board has historically followed this policy.

### Significant Changes to Methods and Assumptions Used to Determine Contribution Rates:

- Investment Rate of Return
  - In 2008, the actuarial assumed rate of return (the discount rate) was modified from 8 to 7.75 percent, and then again in 2011 down to 7.50 percent. In 2017, the discount rate was reduced to 7.20 percent and was again reduced in 2018 to 6.95 percent. This rate is used in establishing retirement contribution rates and in determining current benefit reserve requirements.
- Amortization

Changes implemented in 2009 included amortizing 2008 losses over the next 5 years (20 percent per year) and modifying the unfunded actuarial accrued liability (UAAL) amortization period from 20 to 25 years.

Inflation Rate

In 2017, the assumed rate of inflation was decreased from 2.75 to 2.60 percent. In 2018, the assumed rate of inflation was decreased from 2.60 to 2.50 percent.

Projected Salary Increases

In 2019, the wage inflation assumption decreased from 3.35 to 3.25 percent and and payroll growth assumption also decreased from 3.10 to 3.00 percent.

### B. Single-employer Plans - Utah Transit Authority

Utah Transit Authority (UTA) (major discrete component unit) offers its employees a single-employer non-contributory defined benefit pension plan, The Utah Transit Authority Retirement Plan and Trust (Plan), which includes all employees of UTA who are eligible and who have completed six months of service.

The following schedules present for UTA's single-employer retirement plan Changes in the Net Pension Liability and Related Ratios and Schedule of Employer Contributions.

### Changes in Net Pension Liability Single-employer Plan - Utah Transit Authority (discrete component unit) Last Five Calendar Years ending December 31 *

	Calendar Year

### Footnotes to Single-employer Plans - Utah Transit Authority Schedule of Contributions

### Methods and Assumptions Used to Determine Contribution Rates

	Utah Transit Authority
Actuarial cost method	Entry Age Normal
Amortization method	Level Percent of Payroll, open
Amortization period	18 years
Actuarial asset valuation method	5-year smoothed market less unrealized
Actuarial assumptions:	
Investment rate of return	7.00%, net of investment expenses
Projected salary increases	5.40% per annum for the first five years of employment; 3.40% per annum thereafter
Inflation rate	2.30%
Cost-of-living adjustment	None
Retirement Age	Table of Rates by Age and Eligibility
Mortality	RP-2014 Blue Collar Mortality Table, with MP-2014 projection scale (Preretirement; Employee Table; Post-retirement Annuitant Table)

### **Other Information:**

The valuation date is January 1, 2018. This is the date as of which the actuarial valuation is performed. The measurement date is December 31, 2018. This is the date as of which the net pension liability is determined. The reporting date is December 31, 2018. This is the employer's fiscal year ending date.

### Money-Weighted Rate of Return - 10 Years

The money-weighted rate of return considers the changing amounts actually invested during a period and weights the amount of pension plan investments by the proportion of time they are available to return during that period. External cash flows are determined on a monthly basis and are assumed to occur at the middle of each month. External cash inflows are netted with external cash outflows, resulting in a net external cash flow each month. The money-weighted rate of return is calculated net of investment expenses.

Last Ten Calendar Years		Annual
	Calendar Year*	Money-Weighted Rate of Return (Net of Investment Expense)
Utah Transit Authority	2009	_
	2010	_
	2011	
	2012	
	2013	
	2014	4.31 %
	2015	(0.72)%
	2016	4.90 %
	2017	18.01 %
	2018	(7.77)%

### Schedule of Investment Returns Single-employer Plans - Utah Transit Authority

* Utah Transit Authority adopted GASB Statements 74, 75, and 85 in calendar year 2014. This schedule will eventually include ten years of history.

# State of Utah Required Supplementary Information

### C. Multiple-employer Systems - Utah Retirement Systems

The State's defined benefit pension systems are administered by Utah Retirement Systems and are included in this Comprehensive Annual Financial Report as a pension trust fund within the fiduciary funds. The Noncontributory System, Contributory System, Public Safety System, Firefighters System, Tier 2 Public Employees System, and Tier 2 Public Safety and Firefighters System are defined-benefit multiple-employer, cost-sharing, public employee retirement systems.

The following schedule presents the State's (primary government) proportionate share of the net pension liability for its multiple-employer, costsharing public employee employer retirement systems:

### Changes in Net Pension Liability Multiple-employer Plans Last Four Calendar Years ending December 31*

(dollars expressed in thousands)

	Calendar Year

### Footnotes to Multiple-employer Systems Schedule of Contributions

This schedule reflects the legislative authorized rates and contributions for these systems. Tier 2 rates include a statutory required contribution (0.08 to 18.54 percent amortization rate) to finance the unfunded actuarial accrued liability of the non-Tier 2 plans.

Significant Changes to Methods and Assumptions Used to Determine Contribution Rates:

- Investment Rate of Return
  - In 2008, the actuarial assumed rate of return (the discount rate) was modified from 8 to 7.75 percent, and then again in 2011 down to 7.50 percent. In 2017, the discount rate was reduced to 7.20 percent and was again reduced in 2018 to 6.95 percent. This rate is used in establishing retirement contribution rates and in determining current benefit reserve requirements.
- Amortization

Changes implemented in 2009 included amortizing 2008 losses over the next 5 years (20 percent per year) and modifying the unfunded actuarial accrued liability (UAAL) amortization period from 20 to 25 years.

Inflation Rate

In 2017, the assumed rate of inflation was decreased from 2.75 to 2.60 percent. In 2018, the assumed rate of inflation was decreased from 2.60 to 2.50 percent.

Projected Salary Increases

In 2019, the wage inflation assumption decreased from 3.35 to 3.25 percent and the payroll growth assumption also decreased from 3.10 to 3.00 percent.

New Retirement Plans:

During the 2010 General Session, the Legislature passed Senate Bill 63, *New Public Employees' Tier 2 Contributory Retirement Act*. All eligible employees beginning on or after July 1, 2011, who have no previous service credit with any of the Utah Retirement Systems, are members of the Tier 2 Retirement Systems.

### Restatement:

As a result of implementing GASB Statement 82, Pension Issues, payments made by the employer to satisfy contribution requirements that are identified by the pension plan terms as plan member contribution requirements are no longer reflected in this schedule.

(The remainder of this page has been intentionally left blank.)

### INFORMATION ABOUT THE STATE'S OTHER POSTEMPLOYMENT BENEFIT (OPEB) PLANS

### A. Single-employer Plans

The State administers two single-employer Other Postemployment Benefit (OPEB) Plans, the State Employee OPEB Plan and the Elected Official OPEB Plan. The State Employee OPEB Plan and the Elected Official OPEB Plan are administered through two separate irrevocable trusts; the State Post-Retirement Benefits Trust Fund and Elected Official Post-Retirement Benefits Trust Fund, respectively. Assets of the trust funds are dedicated to providing postemployment health and life insurance coverage to current and eligible future state retirees and elected officials.

The following schedules present, for the State's (primary government) single-employer OPEB Plans, the Changes in the Net OPEB Liability and Related Ratios, Schedule of Employer Contributions, and Schedule of Investment Returns.

* Contributions to the State Employee OPEB Plan are based on a measure of pay, therefore covered payroll is presented in the above schedule. Contributions to the Elected Official OPEB Plan are based on appropriations and not on a measure of pay; therefore, the covered-employee payroll is presented for that plan.

### Footnotes to Single-employer OPEB Plans Schedule of Contributions

### Methods and Assumptions Used to Determine Contribution Rates

	State Employee OPEB Plan	Elected Official OPEB Plan		
Actuarial cost method	Entry Age Normal Le	evel Percent of Salary		
Amortization method	Level Dollar Closed Period	Level Dollar Open Period		
Amortization period	5 years	10 years		
Actuarial asset valuation method	Fair	Value		
Actuarial assumptions:				
Investment rate of return	3.00%	5.25%		
Projected salary increases	2.50%	N/A		
Inflation rate	2.4	0%		
Health Care Cost Trends	Initial health care trend rate of 5.40% which declines to an ultimate rate of 3.94% by 2075. The health care trend rate assumptions used were developed using the 2019 SOA Lon, Run Medical Cost Trend model.			

### **Other Information:**

- Only the last eight years of data, measured in conformity with the latest GASB Statements, is available for the Elected Official OPEB Plan.
- The Actuarially Determined Contribution (ADC) is calculated biennially as of December 31 and is used to establish contributions to fund the plans on July 1, which is generally the fiscal year that begins 6 months after the valuation date. The OPEB Board recommends the ADC to the Governor and Legislature. The Legislature has historically fully funded the ADC.
- The State Employee OPEB Plan was closed to new entrants beginning January 1, 2006. This change to benefit terms was reflected in the subsequent December 31 valuation and reflected in the fiscal year 2010 ADC.
- Healthcare coverage (ages 62 to 65) for the Elected Official OPEB Plan was closed and is only available for elected officials who began service prior to January 1, 2012. This change to healthcare coverage was reflected in the fiscal year 2012 ADC. Benefit terms

# **Required Supplementary Information**

were changed again to allow only elected officials that began service prior to July 1, 2013 to receive Medicare coverage. This change to Medicare coverage was reflected in the subsequent December 31 valuation and reflected in the fiscal year 2014 ADC.

### Significant Changes to Methods and Assumptions Used to Determine Contribution Rates:

Investment Rate of Return

In fiscal year 2012, the actuarial assumed rate of return (the discount rate) for the State Employee OPEB Plan was modified from 6.00 to 4.50 percent. In fiscal year 2014, the discount rate for the Elected Official OPEB Plan was modified from 4.00 to 4.50 percent. In fiscal year 2015, the discount rate for the Elected Official OPEB Plan was modified from 4.50 to 5.25 percent. In fiscal year 2019, the discount rate for the Elected Official OPEB Plan was modified from 3.75 to 3.00 percent.

Amortization Period

In fiscal year 2012, the amortization period for the State Employee OPEB Plan was changed from a 25 year open to a 20 year open. The amortization period for State Employee OPEB Plan was changed again in fiscal year 2014 from a 20 year open to a 10 year open. In fiscal year 2012, the amortization period for the Elected Official OPEB Plan was changed from a 30 year open to a 20 year open to a 20 year open. In fiscal year 2019, the amortization period for the Elected Official OPEB Plan was changed again from a 20 year open to a 10 year open. In fiscal year 2019, the amortization period for the Elected Official OPEB Plan was changed again from a 20 year open to a 10 year open.

Healthcare Cost Trend Rates

In fiscal year 2012, for both Plans, the health care cost trend rate changed from an initial rate of 10 to 9.50 percent. In fiscal year 2014, the healthcare cost trend rate changed from an initial rate of 9.50 to 8.50 percent, and changed again in fiscal year 2016 to an initial rate of 5.20 percent. In fiscal year 2016 the healthcare cost trend rate changed from an ultimate rate of 4.50 to 4.20 percent. In fiscal year 2019, the health care trend rate assumption was updated to reflect the latest cost trend model, resulting in a decrease of the initial and ultimate rates from 5.90 to 5.40 percent and 4.14 to 3.94 percent, respectively.

• Other

In fiscal year 2019, the Per Capita Claims Costs (PCCC) aging factors were updated for pre-Medicare and post-Medicare retirees. The pre-Medicare PCCC now vary by age instead of 5-year age bands used in the prior valuation. Additionally, the post-Medicare PCCC varied by 5-year age bands in the prior valuation, but they are now based on the annualized premium rates provided for Medicare Supplement 100 and Enhanced Rx.

* The State of Utah adopted GASB Statements 74, 75, and 85 in fiscal year 2017. This schedule will eventually include ten years of history.

# **Required Supplementary Information**

### INFORMATION ABOUT INFRASTRUCTURE ASSETS REPORTED USING THE MODIFIED APPROACH

As allowed by the Governmental Accounting Standards Board (GASB), the State has adopted an alternative to reporting depreciation on roads and bridges (infrastructure assets) maintained by the Utah Department of Transportation (UDOT). This includes infrastructure acquired prior to fiscal year 1981. Under this alternative method, referred to as the "modified approach," infrastructure assets are not depreciated, and maintenance and preservation costs are expensed.

In order to utilize the modified approach, the State is required to:

- · Maintain an asset management system that includes an up-to-date inventory of eligible infrastructure assets.
- Perform and document replicable condition assessments of the eligible infrastructure assets and summarize the results using a measurement scale.
- Estimate each year the annual amount to maintain and preserve the eligible infrastructure assets at the condition level established and disclosed by the State.
- Document that infrastructure assets are being preserved approximately at, or above the condition level established by the State.

### Roads

UDOT uses the Pavement Management System to determine the condition of 5,787 centerline miles of state roads. The assessment is based on Ride Quality, using the International Roughness Index (IRI) data. This data is also reported to the Federal Highways Administration (FHWA) and used for the National Condition Assessment reported to Congress. Ranges for Good, Fair and Poor condition were established to correlate with the national FHWA ranges. Additional condition measures for age, wheel path rutting, and surface cracking are considered in project recommendations.

Category	IRI Range	Description
Good	< 95	Pavements that provide a smooth ride and typically exhibit few signs of visible distress suitable for surface seals and preservation.
Fair	95 to 170	Pavements with noticeable deterioration beginning to affect the ride in need of resurfacing.
Poor	> 170	Pavements with an unacceptable ride that have deteriorated to such an extent that they are in need of major rehabilitation.

### **Condition Level – Roads**

UDOT performs pavement condition assessments at a minimum of every other calendar year. The State has established an overall condition target to assure the system is funded adequately and not at any financial risk to maintain. This target is to maintain the Statewide system with 80 percent or more of the mileage rated in "Fair or Better" condition. UDOT utilizes a number of additional strategies and performance measures for estimating long term performance and managing allocations of funds to different categories within the pavement system. These measures vary slightly in function and purpose, all seeking to help assure systems are performing well. Some of these additional measures include strategic goals for both High Volume and Low Volume systems, internal goals for each pavement category, and annual national performance targets for reporting to the Federal Highway Administration for the Interstate system and the National Highway system. Ultimately these additional strategies and measures are only used as a mechanism to distribute funding and are adjusted as needed to assure the Statewide system remains with 80 percent or more of the pavement mileage rated in "Fair or Better" condition.

The following table reports the percentage of pavements with ratings of "Fair or Better" for the last three assessments for the Statewide system:

	2018	2017	2015
Statewide System	91.40%	90.36%	89.32%

The following table presents the State's estimated amounts needed to maintain and preserve roads at or above the established condition levels addressed above, and the amounts actually spent for each of the past five reporting periods (in thousands):

Fiscal Year	Estimated Spending	Actual Spending
2019	\$253,728	\$310,690
2018	\$252,563	\$307,815
2017	\$217,593	\$346,112
2016	\$202,516	\$291,847
2015	\$198,526	\$279,878

# **Required Supplementary Information**

### Bridges

UDOT uses the Structures Inventory System to monitor the condition of the 1,957 state-owned bridges. A number, ranging from 1 to 100, is calculated based on condition, geometry, functional use, safety, and other factors. Three categories of condition are established in relation to the number range as follows:

Category	Range	Description
Good	80 - 100	Preventive maintenance requirements include repair leaking deck joints, apply deck overlays and seals, place concrete sealers to splash zones, paint steel surfaces, and minor beam repairs.
Fair	50 - 79	Corrective repairs include deck, beam, and substructure repairs, fixing settled approaches, and repairing collision damage.
Poor	1 - 49	Major rehabilitation and replacement includes deck, beam, or substructure replacements or replacement of the entire bridge.

### **Condition Level – Bridges**

The State performs assessments on 50 percent of bridges on an annual basis. The established condition level is to maintain 50 percent of the bridges with a rating of "good" and no more than 10 percent with a rating of "poor." The following table reports the results of the bridges assessed for the past three years:

Rating	2019	2018	2017
Good	64.38%	64.52%	67.91%
Poor	2.91%	2.76%	1.45%

The following table presents the State's estimated amounts needed to maintain and preserve bridges at or above the established condition levels addressed above, and the amounts actually spent for each of the past five reporting periods (in thousands):

Fiscal Year	Estimated Spending	Actual Spending				
2019	\$44,775	\$54,828				
2018	\$44,570	\$54,320				
2017	\$38,399	\$61,079				
2016	\$35,738	\$51,502				
2015	\$35,034	\$49,390

# SUPPLEMENTARY INFORMATION

This page intentionally left blank.

# **State Endowment Fund**

This fund accounts for a portion of proceeds relating to the State's settlement agreement with major tobacco manufacturers, severance tax revenue in excess of statutory base amounts, and money or other assets authorized under any provision of law. The principal of the fund cannot be appropriated except by a three-fourths vote of both houses of the Legislature and with the concurrence of the Governor. One-half of all interest and dividends earned on tobacco settlement proceeds in this fund is deposited in the General Fund.

# **Environmental Reclamation**

This fund consists of various programs aimed at preserving open land, improving irrigation in the State, funding recycling programs, and funding cleanup and reclamation projects. Funds received are from state appropriations, fees and fines, recovered liens and costs, and voluntary contributions.

# **Crime Victim Reparation**

This fund accounts for court-ordered restitution and a surcharge on criminal fines, penalties, and forfeitures. Monies deposited in this fund are for victim reparations, other victim services, and, as appropriated, costs of administering the fund.

# **Universal Telephone Services**

This fund is designed to preserve and promote universal telephone service throughout the State by ensuring that all citizens have access to affordable basic telephone service. Revenues come from surcharges on customers' phone bills and from fines and penalties levied against telephone service providers by the Public Service Commission.

# **Consumer Education Fund**

This fund accounts for revenues and expenditures associated with educating and training Utah residents in various consumer matters. Funding is provided through the assessment and collection of fines and penalties from various regulated professions.

# **Rural Development Fund**

This fund promotes various programs in rural areas of the State including construction of communications systems and economic development grants to Native American tribes. Funding comes from oil and gas severance taxes and from royalties on mineral extractions on federal land within the State.

# **State Capitol Fund**

This fund was created to account for the funding and operations of the State Capitol Preservation Board. Funds are used in part to pay for repairs and maintenance of Capitol Hill facilities and grounds. Funding is provided through fees and private donations.

### **Miscellaneous Special Revenue**

This fund is made up of individual small funds set up to account for various revenue sources that are legally restricted to expenditures for specific purposes.

# **Capital Projects – General Government**

This fund accounts for resources used for capital outlays including the acquisition or construction of major capital facilities for use by the State and its discrete component units. The fund receives financial resources from the proceeds of general obligation bonds, legislative appropriations, and intergovernmental revenues.

# **Capital Projects – State Building Ownership Authority** (Blended Component Unit)

This fund accounts for resources used for capital outlays including the acquisition or construction of major capital facilities for use by various state agencies. The fund receives financial resources from the proceeds of lease revenue bonds issued by the Authority and the interest earned on the proceeds of the bonds.

# **Debt Service – General Government**

This fund accounts for the payment of principal and interest on the State's general obligation bonds. The fund receives most of its financial resources from appropriations made by the Legislature.

# Debt Service – State Building Ownership

### Authority (Blended Component Unit)

This fund accounts for the payment of principal and interest on lease revenue bonds issued by the Authority. The fund receives financial resources from rent payments made by various state agencies occupying the facilities owned by the Authority. The fund also receives capital lease payments from certain college and university component units.

This page intentionally left blank.

#### Housing Loan Programs

These programs provide loans or grants to low income or special needs individuals for construction, rehabilitation, or purchase of single or multi-family housing. Funds are provided from federal programs, loan repayments, appropriations, and interest earnings.

#### Agriculture Loan Fund

This fund is comprised of two separate revolving loan programs: the Agriculture Resource Development Fund and the Rural Rehabilitation Fund. Both programs issue farm loans for soil and water conservation projects and the rehabilitation of rural areas within the State.

#### Energy Efficiency Fund

This fund provides revolving loans to assist in the conversion of government and private fleet vehicles to clean fuel and for energy efficiency projects in political subdivisions and state facilities. Funds are provided from public and private contributions, appropriations, and interest earnings on loans and invested funds.

#### Local Government Loan Fund

This fund provides revolving loan programs to local governments for infrastructure assistance, to expedite construction projects, and for providing emergency disaster services. These loan programs are funded with state appropriations.

#### Alcoholic Beverage Control

The Alcoholic Beverage Control Commission was established to conduct, license, and regulate the sale of alcoholic beverages. Funding is provided through the sale of products. The net profit from the fund is transferred to the State's General Fund and is used for general government purposes.

### Utah Correctional Industries

Utah Correctional Industries (UCI) was established to provide work training opportunities for inmates of the Utah State Prison. UCI manufactures and sells such items as license plates, furniture, highway signs, dairy, plant nursery, and textile products, and provides printing services and miscellaneous other products and services. Funding comes from charges for products and services.

#### State Trust Lands Administration

The Utah School and Institutional Trust Lands Administration (SITLA) and the School and Institutional Trust Fund Office (SITFO) manage the assets of the Trust Lands permanent fund. Their objective is to maximize revenue from land assets and investment returns for the beneficiaries.

#### Utah Dairy Commission

The purpose of the Commission is to promote the use of dairy products. Its operations are comprised of promotion, advertising, research, and nutritional education regarding dairy products. Funding consists primarily of fees from milk producers.

#### Medical Cannabis Fund

The purpose of this fund is to conduct, license, and regulate the sale of cannabis related products. Funding consists primarily of fees from cannabis growers.

### **Technology Services**

This fund is responsible for providing data processing and various other computer services along with voice and data communication services to state agencies.

### **General Services**

This fund manages cooperative purchasing contracts and provides purchasing card, printing and mailing services, and surplus property services to state agencies. This fund also provides warehouse services for the Department of Natural Resources.

### **Fleet Operations**

This fund provides motor pool, fuel network, and travel services to state agencies. This fund also provides transaction entry services for the Department of Administrative Services.

### **Risk Management**

This fund provides insurance coverage and loss prevention services to state agencies, institutions of higher education, and participating local school districts. Coverage is provided using a combination of self-insurance and private excess insurance.

#### **Property Management**

This fund is responsible for the operation and maintenance of facilities used by state agencies. This fund is also used to account for the State's facility energy efficiency program.

#### Human Resource Management

This fund provides human resource and payroll services to state agencies.

### Attorney General Legal Services

This fund includes legal services provided to state agencies by the civil division of the Utah Office of the Attorney General.

#### PENSION AND OTHER EMPLOYEE BENEFIT TRUST FUNDS

# Defined Benefit Pension Plans and Defined Contribution Plans

These funds are used to account for the various pension trust funds and defined contribution plans administered by the Utah Retirement Systems. Funding comes from employee and employer contributions and investment earnings. Contributions in some systems are augmented by fees, insurance premium taxes, or legislative appropriations.

#### Post-Retirement Benefits Trust Funds

The State administers the State Employee and the Elected Official Other Postemployment Benefit Plans as irrevocable trusts. These trust funds account for the assets accumulated and the payments made for other postemployment benefits provided to current and future state employee and elected official retirees. Funding comes from employer contributions and investment earnings.

#### Other Employee Benefits Trust Funds

These trust funds are used to pay other employee benefits upon retirement or termination.

#### PRIVATE PURPOSE TRUST FUNDS

#### Utah Navajo Trust

This fund receives oil royalties, operating, and other trust revenues. Funds received are used for the health, education, and general welfare of Navajo residents of San Juan County, Utah.

#### **Unclaimed Property Trust**

This fund is used to account for unclaimed property escheated to the State. Proceeds of the fund pay the administrative costs to operate the fund and any claims. The remaining proceeds are deposited in the Education Fund and can only be used to help fund public education.

#### Employers' Reinsurance Trust

This fund primarily provides compensation to individuals injured from industrial accidents or occupational diseases occurring on or before June 30, 1994, where the injury is of a permanent nature and workers' compensation benefits have expired. Revenues come from assessments on insurance premiums and court-ordered penalties. The net position of the fund is held in trust for injured workers and cannot be used for any other purpose.

#### Petroleum Storage Tank Trust

This fund is used to pay the costs of damage caused by petroleum storage tank releases and provide revolving loan capital. Sources of funding include fees from participating companies, recovered costs and settlements from responsible parties, and investment income. The net position of this fund is held in trust for the benefit of participants and cannot be used for any other purpose.

#### Utah Educational Savings Plan Trust (dba My529)

This fund was created as a means to encourage investment in a public trust to pay for future higher education costs. Participant contributions are used to pay for future college expenses.

#### Miscellaneous Restricted Trust

This is made up of various small individual funds created to receive and disburse funds in accordance with applicable laws and trust agreements.

#### AGENCY FUNDS

#### Taxes and Social Security

This fund is used to account for federal withholding and social security taxes on the State's payroll.

#### County and Local Collections

This fund receives and disburses various taxes collected by the State on behalf of county and local governments.

#### State Courts

This fund receives and disburses various fines and forfeitures collected by the state courts on behalf of state and local agencies.

#### Deposits, Suspense, and Miscellaneous

This fund is made up of small individual funds established to account for various receipts and disbursements.

# Utah Communications Authority

The Utah Communications Authority (UCA) provides public safety communications services and facilities on a statewide basis for the benefit and use of state, local, and federal agencies. UCA supports statewide interoperability of emergency communications throughout the State, and manages the 911 funds collected by the State for the benefit of the Public Safety Answering Points within the State. UCA operations are funded through service charges supplemented with federal grants and state fees and appropriations.

# Utah Schools for the Deaf and the Blind

The Schools were created to provide education to individuals with hearing and/or vision impairments, through direct and indirect education services, as well as consultation to their families and service providers.

# Military Installation Development Authority

This Authority is an independent, nonprofit entity whose purpose is to provide for the development and improvement of project areas near military installations throughout the State. Operations are funded through service charges, project revenue, and state appropriations.

## Heber Valley Historic Railroad Authority

This Authority was created to operate, maintain, improve, and provide for a scenic and historic railway in and around the Heber Valley in Wasatch County. Operations are funded primarily through user charges.

## Utah State Fair Corporation

This Corporation was created to operate the State Fair Park and conduct the Utah State Fair and other expositions and entertainment events. Operations are funded by admissions, rentals, donations, and state appropriations.

## Utah Inland Port Authority

This Authority is an independent, nonprofit corporation whose purpose is to facilitate the development of the authority jurisdictional land to maximize the long-term economic and other benefits for the State. Operations are funded through state appropriations.

## Colleges and Universities

The colleges and universities are the State's public institutions of higher education. The nonmajor institutions of higher education are:

Weber State University | Southern Utah University | Salt Lake Community College | Utah Valley University | Dixie State University | Snow College | Utah System of Technical Colleges

## State of Utah

## STATISTICAL SECTION

#### Fiscal Year Ended June 30, 2019

This section of the State of Utah's Comprehensive Annual Financial Report presents detailed information as a context for understanding what the information in the financial statements, notes to the financial statements, and required supplementary information says about the State's overall financial health.

#### **Financial Trends Information**

These schedules present trend information to help the reader understand how the State's financial performance and fiscal health have changed over time.

		U U
Schedule A-1	Net Position by Component	208
Schedule A-2	Changes in Net Position	210
Schedule A-3	Fund Balances – Governmental Funds	
Schedule A-4	Changes in Fund Balances – Governmental Funds	216

Page

#### **Revenue Capacity Information**

These schedules contain information to help the reader understand the State's capacity to raise revenues and the sources of those revenues.

Schedule B-1	Revenue Base	218
Schedule B-2	Revenue Payers by Industry – Taxable Sales, Services and Use Tax Purchases	220
Schedule B-3	Revenue Payers – Personal Income Tax	220
Schedule B-4	Personal Income Tax Rates	221

#### **Debt Capacity Information**

These schedules present information to help the reader understand and assess the State's levels of outstanding debt and the State's ability to issue additional debt in the future.

Schedule C-1	Ratios of Outstanding Debt by Type	222
Schedule C-2	Long-term Debt and Other Long-Term Liabilities	
Schedule C-3	Legal Debt Margin	226
	Statutory Debt Limit	226
Schedule C-5	Pledged Revenue Bond Coverage	228

#### **Demographic and Economic Information**

These schedules contain demographic and economic indicators to help the reader understand the environment within which the State's financial activities take place.

Schedule D-1	Demographic and Economic Indicators	230
Schedule D-2	Principal Employers	231
Schedule D-3	Composition of Labor Force	232
Schedule D-4	Public Education Student Enrollment (K-12)	234
Schedule D-5	Public Higher Education Enrollment	234

#### **Operating Information**

These schedules offer operating data to help the reader understand how the information in the State's financial report relates to the services it provides and the activities it performs.

Schedule E-1	Full-Time Equivalent State Employees by Function	236
Schedule E-2	Operating Indicators by Function	238
Schedule E-3	Capital Asset Statistics by Function	240

#### **Other Information**

These graphs and schedules offer a historical view of expenditures in constant dollars.

Schedule F-1	Expenditures - Historical and Constant Dollars	242
Schedule F-2	Per Capita Expenditures – Historical and Constant Dollars	243

Sources: Unless otherwise noted, the information in the following schedules is derived from the State of Utah Comprehensive Annual Financial Report.

*This schedule is presented using the accrual basis of accounting.

Note: This schedule has been restated for prior period adjustments, if practical, which were made to the fiscal year and preceding fiscal year in which the prior period adjustment was identified.

¹ In fiscal years 2011 to 2013, restricted net position increased due to slightly higher revenues from a strengthening economy. In fiscal year 2014 to 2017, restricted net position increased primarily due to an increase in investment values because of general market conditions. In fiscal year 2015, higher tax revenues also contributed to the increase in restricted net position. In fiscal year 2017, unspent restricted revenue as a result of a gas tax increase also contributed to the increase in restricted net position increased due to higher tax revenues from continued growth in the economy, an increase in unspent bond proceeds for transportation and capital projects, and an increase in investment values because of general market conditions and higher tax revenues from continued growth in the economy. Recent federal tax changes also caused a temporary surge in corporate tax revenues as corporations repatriated foreign corporate earnings.

² In fiscal year 2014, governmental activities' unrestricted net position increased due to an increase in carry-forward balances. In fiscal year 2015, unrestricted net position decreased due to the implementation of Governmental Accounting Standards Board Statement 68, Accounting and Financial Reporting for Pensions that required the measurement and recognition of the State's net pension liability. In fiscal year 2017, unrestricted net position decreased primarily due to a decrease in amounts unspent and carried forward in the General Fund and for transportation and capital projects. In fiscal year 2019, unrestricted net position increase in amounts unspent and carried forward in the General Fund and for transportation projects. In fiscal year 2019, capital projects also contributed to this increase.

³ From fiscal year 2011 to 2019, restricted net position has continued to steadily increase due to unemployment revenues exceeding related claims.

⁴ In fiscal years 2012 to 2014, business-type activities' unrestricted net position increased primarily due to the State providing additional capital to the loan funds from mineral lease revenue and dedicated sales tax revenues. In fiscal years 2017 to 2019, business-type activities' unrestricted net position increased primarily due to the the State providing additional capital to the loan funds from dedicated sales tax revenues.

*This schedule is presented using the accrual basis of accounting.

Notes: This schedule also has been restated for prior period adjustments, if practical, which were made to the fiscal year and preceding fiscal year in which the prior period adjustment was identified.

¹ Health and Environmental Quality expenses have increased over the last ten fiscal years due to rising Medicaid program costs.

² In fiscal year 2013, legislative action moved the Housing and Community Development Division from Heritage and Arts to Employment and Family Services.

³ Public Education expenses continue to increase for both enrollment growth and benefit-related costs for educators.

⁴ In fiscal year 2019, Transportation expenses increased primarily due to a decrease in the amount spent for capital outlay.

⁵ In fiscal years 2011 to 2019, general tax revenues increased due to higher revenues from a strengthening economy. In fiscal year 2019, corporate tax revenues also increased due to recent federal tax changes, which created a temporary surge as corporations repatriated foreign corporate earnings.

⁶ In fiscal years 2011 to 2015, Unemployment Compensation expenses decreased reflecting Utah's improving economy and employment.

⁷ In fiscal years 2010 and 2011, Operating Grants and Contributions increased overall from the preceding and subsequent years, primarily due to increased federal programs funded in part by the American Recovery and Reinvestment Act in the Unemployment Compensation Fund and additional operating grants issued for loan related programs.

⁸ In fiscal year 2016, Investment Income of business-type activities was reclassified to other general revenues from operating grants and contributions. This change was made to comply with applicable governmental accounting standards. Prior years have been restated.

## State of Utah

Total Fund Balances — Governmental Funds	\$ 7,316,843	\$ 6,620,642	\$	5,649,853	\$ 5,435,414

*This schedule is presented using the modified accrual basis of accounting.

Notes: This schedule has been restated for prior period adjustments, if practical, which were made to the fiscal year and preceding fiscal year in which the prior period adjustment was identified.

¹ Nonspendable fund balance within the General Fund as to prepaid items varies from year to year to due the timing of yearend payments. The long-term portion of interfund loans receivable with Internal Service Funds varies from year to year based on changes in loan balances and projections for repayments for the next year.

² In fiscal year 2018 and 2019, the committed fund balance within the General Fund increased due to an increase in monies set aside for specific purposes.

³ In fiscal year 2016, the assigned fund balance within the General Fund decreased due to a reduction in the amount set aside for next year's budget. In fiscal year 2018, the assigned fund balance increased due to an increase in the amount set aside for next year's budget.

⁴ In fiscal years 2013 to 2017, the nonspendable fund balance within other governmental funds increased primarily due to a change in investment values as a result of the rebounding and then prospering economy. In fiscal year 2018, the nonspendable balance decreased due to the reclassification of a portion of the fund balance within the Permanent Fund to restricted fund balance. This reclassification was the result of a constitutional amendment that implemented a new spending plan to allow the distribution of Permanent Fund earnings.

⁵ In fiscal year 2017, the restricted fund balance within other governmental funds increased primarily due to an increase in the unspent balance of restricted resources within the Transportation Fund as the result of an increase in the motor and special fuels tax and also higher fuel consumption. In fiscal year 2018, the increase within other governmental funds was primarily due to the reclassification of a portion of the Permanent Fund, as explained in note 4. The balance of the increase was due to an increase in the unspent balance of restricted resources within the Education Fund as a result of growth in the individual and corporate income tax and increases within the Capital Projects and Transportation Investment Funds due to unspent bond proceeds.

⁶ In fiscal years 2012 to 2014, the committed fund balance within other governmental funds increased as a result of sales and use tax diversions for transportation projects. In fiscal years 2016 and 2017, the committed fund balance decreased as expenditures increased for transportation projects utilizing sales and use tax revenue. In fiscal year 2018, the committed fund balance within other governmental funds increased due to growth in sales and use tax revenue allocated for transportation projects. In fiscal year 2019, the committed fund balance within other governmental funds increased primarily due to growth in sales and use tax revenue for transportation, and also due to new sales and use tax diversions for the Medicaid and outdoor recreation grant programs.

⁷ The assigned fund balance within other governmental funds varies from year to year due to changes in funding provided for capital projects.

*This schedule is presented using the modified accrual basis of accounting.

Notes: This schedule also has been restated for prior period adjustments, if practical, which were made to the fiscal year and preceding fiscal year in which the prior period adjustment was identified.

¹ In fiscal years 2011 to 2019, tax revenues increased due to a rebounding and then prospering economy. In fiscal year 2019, the increase in corporate tax revenues was also due to recent federal tax changes, which created a temporary surge as corporations repatriated foreign corporate earnings.

² In fiscal years 2016 and 2017, motor and special fuels tax increased due in part to a tax increase that became effective in mid-2016, and also as a result of higher fuel consumption. In fiscal 2019, the increase in motor and special fuels tax was due in part to a tax increase that became effective in mid-2019, and also as a result of higher fuel consumption.

³ In fiscal year 2017, federal contracts and grants increased due to an increase in funding provided for the Medicaid program and highway projects. In fiscal years 2018 and 2019, the increase was the result of an increase in funding provided for the Medicaid program.

⁴ In fiscal year 2016, federal mineral lease revenue decreased due to lower energy prices and a decline in production.

⁵ Significant changes in investment income from year to year are due to the change in the fair value of investments as a result of general market conditions.

⁶ Expenditures for Health and Environmental Quality have increased over the last ten fiscal years due to rising Medicaid program costs.

⁷ In fiscal year 2013, legislative action moved the Housing and Community Development Division from Heritage and Arts to Employment and Family Services.

⁸ Public education expenditures continue to increase for both enrollment growth and benefit-related costs for educators.

⁹ In fiscal year 2012, the Transportation Investment Fund was reclassified as a capital projects fund. Expenditures relating to this fund have been reclassified from transportation expenditures to capital outlay for prior years.

¹⁰ Expenditures for transportation vary from year to year due to the timing of highway construction projects.

¹¹ Expenditures for capital outlay vary from year to year due to changes in funding from bond proceeds or state appropriations provided for buildings, highways, and other projects.

¹² In fiscal year 2015, the Comprehensive Health Insurance Pool (nonmajor discrete component unit) was dissolved and the remaining cash balance was transferred to the State's General Fund.

Debt as a Percentage of Personal Income ²	2.57%	2.99%		3.23%	 4.01%
Amount of Debt Per Capita (expressed in dollars) ²	\$ 1,235	\$ 1,387	\$	1,421	\$ 1,693
Net General Obligation Bonded Debt					
General Obligation Bonds	\$ 2,374	\$ 2,498	\$	2,235	\$ 2,585
Net General Obligation Bonded Debt as a Percentage of Taxable Property Value ³	0.80%	0.92%		0.89%	 1.10%
Amount of Net General Obligation Bonded Debt Per Capita (expressed in dollars) ²	\$ 739	\$ 791	\$	721	\$ 849

Sources: Utah Department of Administrative Services, Division of Finance; Utah State Tax Commission – Property Tax; and Utah Governor's Office of Management and Budget – Demographics.

Note: Net general obligation and revenue bonded debt includes principal, premiums, discounts, and deferred amount on refundings of bonded debt for years prior to 2014. Beginning in 2014, deferred amounts on refunding of bonded debt was no longer reported as part of long-term liabilities, but as Deferred Outflows or Inflows of Resources per the implementation of Governmental Accounting Standards Board (GASB) Statement 65, *Items Previously Reported as Assets and Liabilities*.

¹ During 2015 the Student Assistance Programs issued a line of credit to acquire federally guaranteed student loans. In 2017, the Student Assistance Programs issued additional bonds to retire its line of credit issued in 2015 related to acquiring federally guaranteed student loans.

² Ratios are calculated using personal income and population data. See Schedule D–1 for personal income and population data. During 2010 to 2012, the State issued just under \$1 billion in General Obligation bonds to take advantage of historically low interest rates and ease budget constraints for highway and building construction projects.

³ The percentage of Net General Obligation Bonded Debt based upon taxable property value is presented for comparative purposes. The State does not presently levy ad valorem property taxes for General Obligation Bonded Debt, but is authorized to do so in accordance with Title 59, Chapter 2, Part 901 of the *Utah Code*. See Schedule C–3 for taxable property value.

Total Primary Government Other Long-term Liabilities	\$ 5,480,471	\$ 5,514,179	\$	5,815,468	\$ 6,414,058

Note: Details regarding the liabilities listed above can be found in Note 10. Long-term Liabilities in the financial statements.

¹ During 2010 to 2012, the State issued just under \$1 billion in General Obligation bonds to take advantage of historically low interest rates and ease budget constraints for highway and building construction projects.

² In 2019, GASB Statement 88, Certain Disclosures Related to Debt, including Direct Borrowings and Direct Placements, requires separate disclosure of debt issued directly to an investor.

³ Beginning in 2014, deferred amount on refundings are no longer reported in the financial statements as part of other long-term liabilities under Governmental and Business-type Activities. This obligation is now being reported as Deferred Outflows or Inflows of Resources per the implementation of Governmental Accounting Standards Board (GASB) Statement 65, *Items Previously Reported as Assets and Liabilities*.

⁴ During 2011 and 2019, a new actuary valuation was performed for GASB Statement 16, *Accounting for Compensated Absences* and as a result the total liability increased.

⁵ During 2012, the Student Assistance Programs advance refunded certain outstanding student loan revenue bonds to manage its interest costs. In 2017, the Student Assistance Programs issued additional bonds to retire its line of credit issued in 2015 related to acquiring federally guaranteed student loans.

⁶ In 2015, the Student Assistance Programs issued a line of credit to acquire federally guaranteed student loans.

⁷ During 2015, the State implemented GASB Statement 68, *Accounting and Financial Reporting for Pensions* which replaced GASB Statements 27 and 50 as they relate to pensions that are provided through pension plans administered as trust or equivalent arrangements that meet certain criteria. In part, GASB Statement 68 requires the reporting of the net Pension liability. GASB Statement 27 only required the reporting of a Pension obligation when contributions were less than the actuary's Annual Required Contribution.

⁸ During 2017, the State implemented GASB Statement 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions* which replaced GASB Statement 45. In part, GASB Statement 75 requires the reporting of the net Other Postemployment Benefit (OPEB) liability. GASB Statement 45 only required the reporting of an OPEB obligation when contributions were less than the actuary's Annual Required Contribution.

Source: Utah State Tax Commission and the Utah Department of Administrative Services, Division of Finance.

Note: Article XIV, Section 1 of the *Utah Constitution* allows the State to contract debts not exceeding 1.50 percent of the total taxable property in the State. The Legislature authorizes general obligation indebtedness within this limit. The State uses outstanding general obligation bond debt to comply within the constitutional debt limit. The State has other long-term contract liabilities consisting of unused vacation for employees of \$100.062 million as of fiscal yearend. These contract liabilities do not affect the State's compliance with the constitutional debt limit.

¹Taxable property is assessed January 1 of each year. The value used for the fiscal year limitation is from the prior calendar year; assessed values as of January 1, 2018, are used for fiscal year 2019.

Note: Details regarding the State's outstanding bonds can be found in Note 10. Long-term Liabilities in the financial statements.

¹Revenues for Water Loan Programs are primarily interest on revolving loan receivables; principal repayments are not included in gross revenues, but are pledged to cover debt service payments. Revenues for Student Assistance Programs are primarily interest on student loans and federal allowances.

² Operating Expenses do not include interest, depreciation, or amortization expenses.

³Coverage equals net available revenue divided by debt service.

⁴ During 2011, the Student Assistance Programs had a substantial decrease in its provision for interest arbitrage rebate of \$37.200 million on its 1988 and 1993 revenue bonds.

⁵ Prior to 2015, only Student Loan Purchase Program bonds were presented. During 2015, a line of credit was issued for \$1.600 billion in order to acquire federally guaranteed student loans.

⁶ During 2016, the Student Assistance Programs had a substantial increase in interest on loans related to the line of credit that was issued in 2015 to acquire federally guaranteed student loans.

⁷ During 2017, the Student Assistance Programs retired its line of credit issued in 2015 related to acquiring federally guaranteed student loans.

# **STATE OF UTAH** Comprehensive Annual Financial Report

FOR THE FISCAL YEAR ENDED JUNE 30, 2019

2110 State Office Building | Salt Lake City, Utah 84114 | finance.utah.gov

#### APPENDIX B

# ADDITIONAL DEBT AND FINANCIAL INFORMATION REGARDING THE STATE BUILDING OWNERSHIP AUTHORITY

#### **State Building Ownership Authority**

*General.* For a general discussion regarding the Authority, see "DEBT STRUCTURE OF THE STATE OF UTAH—State Building Ownership Authority" above.

The State's Limited Lease Obligation. The Building Ownership Act provides generally that bonds issued by the Authority are payable only from lease payments received by the Authority for the facilities constructed or acquired thereunder, and that, if the rentals paid by a lessee State agency to the Authority are insufficient to pay the principal and interest on such bonds, the Governor may request the Legislature to appropriate additional funds to that agency for the payment of increased rentals. The Legislature may, but is not required to, make such an appropriation. Bonds issued pursuant to authorizing legislation of this type are sometimes referred to herein as "State Lease Revenue Bonds."

Debt Issuance. Current Lease Revenue Bonds Outstanding. Under the State Facilities Master Lease Program, no debt service reserve fund is created for any bonds issued under the Indenture of Trust, Assignment of State Facilities Master Lease Agreement and Security Agreement, dated as of September 1, 1994, as amended and supplemented (the "Authority Indenture") between the Authority and Wells Fargo Bank, N.A., as trustee, and the State Facilities Master Lease Agreement, dated as of September 1, 1994, as amended and supplemented, between the Authority and the State acting through DFCM. Under this program, all bonds are issued on a parity basis and are cross-collateralized by the facilities subject to the lien of the Authority Indenture and the respective Mortgage, Security Agreement and Assignment of Rent.

Bonds issued under the State Facilities Master Lease Program are not classified as State Moral Obligation Bonds as defined in "DEBT STRUCTURE OF THE STATE OF UTAH—State Moral Obligation Bonds" above. However, such bonds are State Lease Revenue Bonds.

#### **Outstanding Lease Revenue Bonds Of The Authority**

As of May 27, 2020, the Authority has the following State Lease Revenue Bonds outstanding under the State Facilities Master Lease Program.

(The remainder of this page has been intentionally left blank.)

		Original		Current			
		Principal	Final	Principal			
<u>Series (1)</u>	Purpose	Amount	Maturity Date	<u>Outstanding</u>			
2020	DABC	\$18,865,000	May 15, 2039	\$ 18,865,000			
2018	DABC/parking	18,465,000	May 15, 2039	17,875,000			
2017 (2)	Refunding/crossover	25,910,000	May 15, 2024	21,105,000			
2016	Justice/DABC	98,150,000	May 15, 2038	91,225,000			
2015	Refunding	30,015,000	May 15, 2030	25,150,000			
2012B (3)	Refunding/acquisition	11,700,000	May 15, 2022	880,000			
2012A	Refunding	15,610,000	May 15, 2027	10,680,000			
2011	Various purposes	5,250,000	May 15, 2031	1,960,000			
2010	Refunding	36,735,000	May 15, 2024	12,570,000			
2009E (4) (5)	Huntsman Hospital (BABs)	89,470,000	May 15, 2030	57,690,000			
2009C (4)	DABC Warehouse (BABs)	16,715,000	May 15, 2029	<u>15,410,000</u>			
Total principal amount of outstanding State Lease Revenue Bonds (6)							

<u>. . . .</u>

(1) All bonds rated "Aa1" by Moody's and "AA+" by S&P (*unless otherwise indicated*), as of the date of this OFFICIAL STATEMENT. No municipal bond ratings have been requested from Fitch.

(2) Issued as a direct purchase. Rated "Aa1" by Moody's (no rating was requested from S&P or Fitch).

(3) The 2012B Lease Revenue Bonds are issued as federally taxable bonds.

(4) Issued as federally taxable, originally 35% issuer subsidy, Build America Bonds.

(5) Portions of this bond was refunded from moneys received from an escrow account (created from bond proceeds from the 2017 Lease Revenue Bonds) on the Crossover Date of May 15, 2019.

(6) For accounting purposes, the total unamortized bond premium is \$9,139,904 (as of May 27, 2020), which together with current debt outstanding of \$273,410,000, results in total outstanding net direct debt of \$282,549,904.

(Source: Municipal Advisor.)

#### Authorized State Lease Revenue Bonds And Future Bonds Issuance

Authorized State Lease Revenue Bonds. Notwithstanding the legal debt issuing capacity of the Authority discussed in this section under "Statutory Legal Borrowing Debt Capacity of the Authority" below, the Authority may only issue State Lease Revenue Bonds for facilities authorized by the Legislature.

The Authority has up to \$18,750,100 aggregate principal amount of additional authorized and unissued lease revenue bonds, the proceeds of which will be used by DFCM for various projects.

The authorizations consist of: \$18,750,100 for two DABC liquor stores in Salt Lake City, Utah (\$8,659,000 from the 2018 General Legislative Session and \$10,091,100 from the 2019 General Legislative Session).

*Future Bonds Issuance*. The Legislature may authorize additional lease revenue bonds in future Fiscal Years, but such amounts and issuance dates are not known as of the date of this OFFICIAL STATEMENT. The Authority does not anticipate the issuance of additional lease revenue bonds within Fiscal Year 2020, but may issue additional bonds at any time in the future.

# Statutory Legal Borrowing Debt Capacity Of The Authority

The Authority may not issue any bonds or other obligations under the Building Ownership Act in an amount which would exceed the difference between (i) the total outstanding indebtedness of the State (exclusive of certain State highway bonds specified under the Building Ownership Act) and (ii) 1.5% of the fair market value of the taxable property of the State (the "Statutory Lease Revenue Debt Limit"). Under this formula, the Authority's debt capacity is reduced as non-excluded State general obligation bonds are issued. As of May 27, 2020, (the anticipated delivery date of the 2020B Bonds), the Statutory Lease Revenue Debt Limit and additional debt incurring capacity of the Authority are calculated as follows:

Fair market value of ad valorem taxable property (1)	\$402,353,021,949
Fees in lieu of ad valorem taxable property (2)	<u>13,297,245,336</u>
Total fair market value of taxable property (1)	\$ <u>415,650,267,285</u>
Statutory Lease Revenue Debt Limit (1.5%)	\$6,234,754,009
Currently outstanding general obligation debt (net) (3)	
Authority's outstanding lease revenue bonds (net) (4)	(282,549,904)
Long-term contract liabilities (5)	(100,062,000)
Statutorily exempt State general obligation highway debt (net) (4)	<u>2,537,227,043</u>
Estimated Statutory Lease Revenue Debt Limit capacity of the Authority	\$ <u>5,323,834,268</u>

⁽¹⁾ Based on Calendar Year 2018 (Fiscal Year 2019) taxable values. See "FINANCIAL INFORMATION REGARDING THE STATE OF UTAH—Property Tax Matters–Taxable Value Compared with Fair Market Value of All Taxable Property in the State" above.

(5) In the opinion of the State Auditor, the State has other long-term contract liabilities of unused vacation leave for employees of \$100,062,000, which financial obligations may be considered general obligation debt of the State. Although no final legal determination has been made, for purposes of this OFFICIAL STATEMENT, this amount will be applied against the Authority's Statutory Lease Revenue Debt Limit.

(Source: Municipal Advisor.)

Statutory Legal Debt Limit Estimate Using Calendar Year 2019 (Fiscal Year 2020) Estimated Taxable Valuation. Based on estimated ad valorem property tax reports from the State Tax Commission, the Calendar Year 2019 (Fiscal Year 2020) estimated fair market value of ad valorem taxable property and valuation for fees in lieu property is approximately \$460.4 billion, leaving the Authority (after the issuance of the 2020B Bonds) to legally issue an additional approximately \$5.99 billion of lease revenue bonds. (Source: Municipal Advisor.)

(The remainder of this page has been intentionally left blank.)

⁽²⁾ Based on Calendar Year 2018 (Fiscal Year 2019) "age based" values. For purposes of calculating debt incurring capacity only, the value of all motor vehicles and state–assessed commercial vehicles (which value is determined by dividing the uniform fee revenue by 1.5%) is added to the fair market value of the taxable property in the State.

⁽³⁾ Includes the 2020B Bonds and unamortized original issue bond premium that was treated as principal for purposes of calculating the applicable Constitutional Debt Limit and the Statutory Appropriations General Obligation Debt Limit.

⁽⁴⁾ Includes unamortized original issue bond premium that was treated as principal for purposes of calculating the Constitutional Debt Limit and the Statutory Appropriations General Obligation Debt Limit.

(a) These tables reflect the Authority's debt service schedule for its lease revenue bonds for the Fiscal Year shown. This information is based on payments (cash basis) falling due in that particular Fiscal Year.

(b) The amount of interest due is \$1,295,500 with the payment being made from escrowed moneys held in the 2017 Escrow Account.

(c) Issued as federally taxable "Build America Bonds." Does not reflect an originally 35% federal interest rate subsidy. The Authority anticipates that because of the federal sequestration, the subsidy paid by the federal government on these bonds will be reduced by approximately \$87,914 for the federal fiscal year ending September 30, 2020.

(d) These bonds issues are included in this table because final principal and interest payments occurred in Fiscal Year 2019.

(1) Mandatory sinking fund payments from a \$635,000, 4.00%, term bond due May 15, 2031.

(2) These principal payment amounts (and the related interest) were refunded by the 2017 Lease Revenue Bonds.

(3) Mandatory sinking fund payments from a \$57,690,000, 5.768%, term bond due May 15, 2030.

(4) Mandatory sinking fund payments from a \$7,245,000, 5.294%, term bond due May 15, 2024.

(5) Mandatory sinking fund payments from a \$9,470,000, 5.768%, term bond due May 15, 2029.

(6) Certain principal maturities and interest wererefunded by the 2015 Lease Revenue Bonds.

(7) Remaining principal after portions of certain principal amounts maturing May 15, 2019 have been legally defeased by separate irrevocable escrow accounts.

(8) Remaining mandatory sinking fund payments from a \$28,765,000, 5.50%, term bond due May 15, 2019.

#### APPENDIX C

#### DEMOGRAPHIC AND ECONOMIC INFORMATION REGARDING THE STATE OF UTAH

### **General Information**

COVID-19 is currently affecting State, local, national and global economic activity and consequently is expected to materially adversely impact the financial and economic condition of the State. Because the OFFICIAL STATEMENT relies on historical data for financial information about the State and general and economic information about the State, such information may not necessarily predict future trends accurately.

This appendix has been summarized from information provided by members of the Utah Economic Council, which is contained in the 2020 Economic Report to the Governor (the "2020 Economic Report to the Governor January 2020"), State of Utah Revenue Assumptions Working Group and from other reliable sources. A complete copy of the 2020 Economic Report to the Governor and the State of Utah Revenue Assumptions Working Group economic indicators may be obtained on the web site or by contacting GOMB; 801.538.1027 | f 801.538.1547 | https://www.gomb.utah.gov.

Additionally, GOMB may have updated certain sections contained in this appendix with the latest information available.

#### **Geographic Information**

On January 4, 1896, the State became the 45th state of the United States of America (the "U.S."). Ranking 13th largest among the states in total area, the State contains approximately 84,900 square miles. It ranges in elevation from a low of 2,200 feet above sea level in the south, to a high of 13,500 feet above sea level in the northern mountains. The State is in a semi-arid region (precipitation ranks as the 2nd lowest in the nation, behind Nevada). Home to deserts, plateaus, the Great Basin and the Rocky Mountains, the state is known for its scenic beauty and the diversity of its outdoor recreation areas. Land ownership in the State is distributed at about 64% federal, 10% State, and 26% other (American Indian reservation, municipal, state sovereign lands, and private).

#### **Demographics**

2019 Overview. The U.S. Census Bureau estimated the 2019 population of the State to be 3,205,958 persons. This is an increase of 52,408 persons and a growth rate of 1.7%, the fourth highest growth rate in the nation. The Utah Population Committee, whose estimates differ slightly from the U.S. Census Bureau, estimated that 53,596 persons were added to reach 3,220,262 persons in 2019. Based on the Utah Population Committee's estimates, net migration (in-migration minus out-migration) totaled 24,987 in 2019 or 47% of growth. Natural increase remains the mainstay of population growth, contributing 28,609 persons, which is over half (53%) of population growth. The State's birth rate remains the highest among all states, at 14.9 per 1,000 population in 2018.

The State is an urban state, meaning that population is very spatially concentrated. Per the 2010 Census, the most recent data on the urban population, 90.6% of the State's population lives in an urban setting, an increase from 88.2% in 2000. The State is the ninth most urban state in the nation. Salt Lake County remains the most populous county with 1.15 million residents. Salt Lake, Utah, Davis, and Weber counties are the four most populated counties, home to 2.4 million or about 75% of the State's residents.

In comparison to other states, the State's population is younger (31.0 median age), and households on average are larger (3.12 persons). While the lowest nationally, the State's median age has been increasing over the past several years. This reflects the fact that the 65 and older population has become a larger share of the State's overall population and leads to an age structure that is unique to the State.

A summary measure of the age structure is the dependency ratio, which is the number of non-working-age persons (younger than 18 and 65 and older) per 100 persons of working-age (18 to 64). The State's total dependency ratio for 2018 was 68.3, the third highest in the nation behind Idaho (70.3) and South Dakota (70.4). The national dependency ratio was 62.5. 2020 Outlook. Prior to COVID-19, projections estimated that the State's population would continue to grow at a moderate pace to reach 3,270,729 by July 1, 2020. This includes the consideration that natural increase (births minus deaths) is estimated to increase slightly, contributing 31,997 people to the State's population. Net migration is projected to remain positive but moderate to 20,472.

#### **Employment, Wages And Labor Force**

2019 Overview. Following up on a high-performing State economy in recent years, strong labor market statistics continued in 2019.

The 2019 data is still being collected, but the year's employment gains for the State are preliminary estimated to measure around 3%. The eighth year of strong employment growth coupled with an already tight labor market further pushed down the unemployment rate to 2.4% by December 2019, matching State record lows.

During the past two years in particular, the State's wages experienced strong increases. The 2018 gains reached 4.2% (helped along by national tax stimulus) and 2019 is estimated to follow with another 3.7% increase.

2020 Outlook. Prior to COVID-19, two variables dominated the State's employment outlook for 2020—labor in-migration and the health of the U.S. economy.

Labor in-migration has helped to sustain the State's robust economic growth. With the unemployment rate at record lows, it is notable that the State found enough labor to maintain nation-leading employment growth rates. The number of State residents aging into the labor force is not sufficient to maintain the robust job growth rates the State experienced over the last several years and therefore, in-migration has played a major role in the expansion. Factors influencing migration decisions, like housing prices and quality-of-life, will influence the fundamental economic trends that support the State's economy in 2020 and beyond.

The larger anticipated pressure on state economic performance at the beginning of 2020 was the U.S. economy. The State's economy runs parallel with the U.S. economy. It is rare in recent history for the direction of the State's economic statistics to move independently of the U.S. for sustained periods. Where the State's uniqueness lies is in its parallel movements, which are traditionally at a higher level. The State's ebbs and flows mirror the national ebbs and flows, but the State generally rides the top of those flows.

The full impact of COVID–19 on the U.S. and state economies remains to play out. With major effects taking hold in mid–March, as of week ending May 2nd, initial claims for unemployment insurance tallied nearly 147,000 (equivalent to 9.5% of the State's covered employed labor force relative to the U.S's 19.5%).

#### Current Unemployment Rates (seasonally adjusted)

Current Unemployment Rate	State	<u>U.S.</u>
March 2020	3.6%	4.4%
March 2019	3.0	3.8

For the State's presentation of principal employers as of Calendar Year 2009 and 2018 see "APPENDIX A— COMPREHENSIVE ANNUAL FINANCIAL REPORT OF THE STATE OF UTAH FOR FISCAL YEAR 2019– Statistical Section–Schedule D–2. Principal Employers" (CAFR page 231).

# Personal Income; Per Capita Income

2019 Overview. Total Personal Income. The State's total personal income in 2019 was an estimated \$155.1 billion, a 5.9% increase from \$146.4 billion in 2018. The State's estimated 2019 per capita income was \$48,395, up 4.2% from \$46,320 in 2018. Over this period, total U.S. personal income grew 4.4% and U.S. per capita income grew 3.9%. Both measures of the State's estimated personal income growth were lower in 2019 than in 2018. In 2018, total personal income grew by 7.2% and per capita income grew by 5.3%.

Of the State's nonfarm earnings, 83.8% came from the private sector and 16.2% came from the public sector. Within the State's private sector, the professional, scientific, and technical services sector (11.9%) was the largest source of earnings; followed by manufacturing (11.3%), and health care and social assistance (10%). At the national level, health care and social assistance accounted for the largest percentage of private sector earnings (13.3%); followed by professional, scientific, and technical services (12.6%); and manufacturing (10.9%).

In 2019, all of the State's broad private-industry classifications experienced growth in earnings. The professional, scientific, and technical sector had the highest year-over-year earnings growth of 10.4%. Other private industries experiencing high growth included educational services (8.5%), accommodation and food (8.5%), and construction (6.9%).

(Sources: 2020 Economic Report to the Governor; BEA, Revenue Assumptions Working Group and GOMB.)

2020 Outlook. The full impact of COVID–19 on the U.S. and state economies remains to play out. The economic contraction associated with COVID–19 is anticipated to have a significant impact on the State's personal income growth trajectory.

#### **Taxable Sales**

2019 Overview. In 2019, total taxable sales (sales and purchases subject to sales and use tax) in the State increased 6.1% to approximately \$68.9 billion, a bit lower than 6.5% growth between 2017 and 2018. Although growth in total taxable sales was buoyed by an increase in remote sales due to recent legislation and by a labor market that is among the best in the nation, it was also tempered by an expansion of the manufacturing exemption and by a moderation in business and consumer spending. The pace of growth in taxable retail sales accelerated in 2019, while the pace of growth in taxable services decelerated slightly. The level of taxable business investment purchases declined overall.

2020 Outlook. The full impact of COVID-19 on the U.S. and state economies remains to play out. The economic contraction associated with COVID-19 is anticipated to have a significant impact on the State's taxable sales growth trajectory.

Recent and future legislation has the potential to impact forecasts for 2020. Specifically, the 2019 General Legislative Session passed legislation requiring marketplace facilitators that meet certain requirements to collect and remit sales and use tax on each sale the marketplace facilitator makes on its own behalf or that it makes or facilitates on behalf of a marketplace seller beginning October 1, 2019. This legislation increased collection, compliance and reporting for remote sales. The State is currently collecting revenues under this legislation.

(f) forecast. (e) estimate.

(Source: Utah State Tax Commission; 2020 Economic Report to the Governor.)

#### Construction

In 2019, the value of permit–authorized construction in the State was \$9.8 billion, the highest year ever, in both current and inflation–adjusted dollars. The previous peak was in 2006, during the run–up to the Great Recession, when construction value totaled \$9.45 billion in inflation–adjusted dollars. The value of residential construction in 2019 was \$5.8 billion, 12.6% higher than the previous year.

2020 Outlook. The full impact of COVID–19 on the U.S. and state economies remains to play out. The economic contraction associated with the pandemic is anticipated to have a significant impact on the State's permit– authorized construction trajectory. Prior to the onset of COVID–19, a slight decline in the number of residential permits was anticipated due to moderation in multi–family activity.

		Construction Value							
	Total				Total				
Year	Units	<b>Residential</b>	Nonresidential	<b>Renovations</b>	Valuation				
2020 (f)	19,500	\$4,680.0	\$2,000.0	\$1,000.0	\$8,180.0				
2019 (e)	27,600	5,799.0	2,592.0	1,414.0	9,805.0				
2018	24,245	5,153.0	2,166.5	1,136.0	8,455.5				
2017	23,002	4,696.0	2,280.6	1,214.6	8,191.3				
2016	20,064	4,081.9	2,680.1	1,624.1	8,386.3				
2015	17,294	3,819.2	2,076.5	1,006.1	6,902.1				
2014	18,810	3,390.4	1,475.9	1,034.3	5,900.8				
2013	15,009	3,087.1	1,106.0	784.9	4,978.2				
2012	11,919	2,205.0	1,020.2	728.9	3,954.1				
2011	9,085	1,769.7	1,456.5	846.4	4,072.6				
2010	9,066	1,667.0	925.1	672.0	3,264.1				
2009	10,488	1,674.0	1,056.1	660.1	3,390.2				
2008	10,603	1,877.0	1,919.1	781.2	3,796.1				

#### Permit-Authorized Construction (\$ In Millions)

(f) forecast. (e) estimated.

(Sources: 2020 Economic Report to the Governor; Revenue Assumptions Working Group.)

#### Energy

The State's energy landscape continues to evolve as the balance between fossil fuels and renewable energy changes—some related to worldwide trends, whereas others are more specific to the State and the western United States. The most noteworthy trends include: (i) the weakening of crude oil prices plus operator turnover in the State's Uinta Basin area has led to reduced drilling activity resulting in a plateau in the State's crude oil production; (ii) low natural gas prices have resulted in the continued erosion of the State's natural gas production; (iii) the significant growth in residential rooftop solar capacity plus energy efficiency measures have changed the State's electricity demand growth; and (iv) increases in renewable and natural gas—generated electricity have led to a reduction in the State's coal–fired power generation.

#### Minerals

The Utah Geological Survey ("UGS") projected an estimated gross production value of metallic and industrial mineral commodities of \$3.2 billion in 2019, a slight decrease of about 1% from the value in 2018. USG reports the 2018 value of the State's nonfuel (metallic and industrial) minerals production ranked eighth nationally, accounting for 3.6% of the total U.S. nonfuel minerals production.

# Tourism

The State's travel and tourism sector experienced continued economic growth in 2019, including record-level visitor spending, jobs and wages, and State and local tax revenue. During the first three quarters of 2019, 23 of the State's 29 counties experienced year-over-year increases in county transient room tax revenue. Additionally, total taxable sales in the leisure and hospitality sector increased 6.1% during the first half of 2019, while gas station, grocery store, and other travel-related retail sales increased around 2%. During the first half of 2019, jobs in the State's

private leisure and hospitality sector experienced a 3.8% year-over-year increase—higher than the average of all other sectors combined (3.1%). Leisure and hospitality sector wages increased 6.5% compared to 7.1% for all other sectors.

The full impact of COVID–19 on the U.S. and state economies remains to play out. Analysts expect that travel and tourism will be one of the State's economic sectors most impacted by the pandemic.

#### **APPENDIX D**

# FORM OF OPINION OF BOND COUNSEL

Upon delivery of the 2020B Bonds, Gilmore & Bell, P.C., Bond Counsel to the State proposes to issue its final approving opinion in substantially the following form:

We have acted as bond counsel for the State of Utah (the "State") in connection with the issuance by the State of its \$447,315,000 General Obligation Bonds, Series 2020B (the "Bonds") pursuant to (i) resolutions of the State Bonding Commission of the State of Utah (the "Commission") adopted on April 9, 2020 and on May 14, 2020 (collectively, the "Resolutions") and (ii) the Acts (as defined in the Resolutions) and other applicable provisions of law. The Bonds are being issued to (a) pay costs of acquiring and constructing a prison project and highway/transportation projects and (b) pay costs of issuance of the Bonds.

Regarding questions of fact material to our opinion, we have relied on the certified proceedings and other certifications of public officials and others furnished to us without undertaking to verify them by independent investigation.

Based on our examination and the foregoing, we are of the opinion as of the date hereof and under existing law, as follows:

1. The Resolutions have been duly adopted by the Commission and constitute valid and binding obligations of the State enforceable upon the State.

2. The Bonds are valid and binding general obligations of the State for the payment of which the full faith, credit and resources of the State are pledged, and for the payment of which ad valorem taxes may be levied on all property within the boundaries of the State subject to State taxation without limit as to rate or amount.

3. The interest on the Bonds is excludable from gross income for federal income tax purposes and is not an item of tax preference for purposes of computing the federal alternative minimum tax. The opinions set forth in this paragraph are subject to the condition that the State complies with all requirements of the Internal Revenue Code of 1986, as amended, that must be satisfied subsequent to the issuance of the Bonds in order that interest thereon be, or continue to be, excludable from gross income for federal income tax purposes. The State has covenanted to comply with all of these requirements. Failure to comply with certain of these requirements may cause the interest on the Bonds to be included in gross income for federal income tax purposes retroactive to the date of issuance of the Bonds.

4. The interest on the Bonds is exempt from State of Utah individual income taxes.

We express no opinion herein as to the accuracy, adequacy, or completeness of any offering material relating to the Bonds.

The rights of the holders of the Bonds and the enforceability thereof and of the Resolutions may be subject to bankruptcy, insolvency, reorganization, arrangement, fraudulent conveyance, moratorium and other laws relating to or affecting creditors' rights heretofore or hereafter enacted to the extent constitutionally applicable, and their enforcement may also be subject to the application of equitable principles and the exercise of judicial discretion in appropriate cases.

This opinion is given as of its date, and we assume no obligation to revise or supplement this opinion to reflect any facts or circumstances that may come to our attention or any changes in law that may occur after the date of this opinion.

Respectfully submitted,

(This page has been intentionally left blank)

## **APPENDIX E**

#### FORM OF CONTINUING DISCLOSURE UNDERTAKING

CONTINUING DISCLOSURE UNDERTAKING FOR THE PURPOSE OF PROVIDING CONTINUING DISCLOSURE INFORMATION UNDER PARAGRAPH (b)(5) OF RULE 15C2–12

## [TO BE DATED CLOSING DATE]

THIS CONTINUING DISCLOSURE UNDERTAKING (the "Agreement") is executed and delivered by the State of Utah (the "State") in connection with the issuance by the State of \$447,315,000 aggregate principal amount of its General Obligation Bonds, Series 2020B (the "2020B Bonds"). The 2020B Bonds are being issued pursuant to resolutions adopted by the State Bonding Commission on April 9, 2020 and on May 14, 2020 (collectively, the "Resolutions").

In consideration of the issuance of the 2020B Bonds by the State and the purchase of such 2020B Bonds by the beneficial owners thereof, the State covenants and agrees as follows:

Section 1. PURPOSE OF THIS AGREEMENT. This Agreement is executed and delivered by the State as of the date set forth above, for the benefit of the beneficial owners of the 2020B Bonds and in order to assist the Participating Underwriter in complying with the requirements of the Rule (as defined below). The State represents that it will be the only obligated person with respect to the 2020B Bonds at the time the 2020B Bonds are delivered to the Participating Underwriter and that no other person is expected to become so committed at any time after issuance of the 2020B Bonds.

*Section 2. DEFINITIONS.* The terms set forth below shall have the following meanings in this Agreement, unless the context clearly otherwise requires.

"Annual Financial Information" means the financial information and operating data described in Exhibit I.

*"Annual Financial Information Disclosure"* means the dissemination of disclosure concerning Annual Financial Information and the dissemination of the Audited Financial Statements as set forth in Section 4.

"Audited Financial Statements" means the audited financial statements of the State prepared pursuant to the standards and as described in Exhibit I.

"Commission" means the Securities and Exchange Commission.

"Dissemination Agent" means any agent designated as such in writing by the State and which has filed with the State a written acceptance of such designation, and such agent's successors and assigns.

*"EMMA"* means the MSRB through its Electronic Municipal Market Access system for municipal securities disclosure or through any other electronic format or system prescribed by the MSRB for purposes of the Rule.

*"Financial Obligation"* means (a) a debt obligation, (b) a derivative instrument entered into in connection with, or pledged as security or a source of payment for, an existing or planned debt obligation, or (c) a guarantee of (a) or (b) in this definition; *provided however*, the term Financial Obligation shall not include municipal securities as to which a final official statement has been provided to the MSRB consistent with the Rule.

"Exchange Act" means the Securities Exchange Act of 1934, as amended.

"MSRB" means the Municipal Securities Rulemaking Board.

"Participating Underwriter" means each broker, dealer or municipal securities dealer acting as an underwriter in the primary offering of the 2020B Bonds.

"Reportable Event" means the occurrence of any of the Events with respect to the 2020B Bonds set forth in Exhibit II.

"Reportable Events Disclosure" means dissemination of a notice of an Event as set forth in Section 5.

"Rule" means Rule 15c2-12 adopted by the Commission under the Exchange Act, as the same may be amended from time to time.

"Undertaking" means the obligations of the State pursuant to Sections 4 and 5.

Section 3. CUSIP NUMBER/FINAL OFFICIAL STATEMENT. The CUSIP Numbers of the 2020B Bonds maturing in each of the following years are as follows:

JULY 1 OF THE YEAR	CUSIP Number	JULY 1 OF THE YEAR	CUSIP Number
2021	917542 WV0	2028	917542 XC1
2022	917542 WW8	2029	917542 XD9
2023	917542 WX6	2030	917542 XE7
2024	917542 WY4	2031	917542 XF4
2025	917542 WZ1	2032	917542 XG2
2026	917542 XA5	2033	917542 XH0
2027	917542 XB3	2034	917542 XJ6

The Final Official Statement relating to the 2020B Bonds is dated May 14, 2020 (the "Final Official Statement").

Section 4. ANNUAL FINANCIAL INFORMATION DISCLOSURE. Subject to Section 8 of this Agreement, the State hereby covenants that it will disseminate its Annual Financial Information and its Audited Financial Statements (in the form and by the dates set forth in *Exhibit I*) to EMMA in such manner and format and accompanied by identifying information as is prescribed by the MSRB or the Commission at the time of delivery of such information and by such time so that such entities receive the information by the dates specified. MSRB Rule G-32 requires all EMMA filings to be in word-searchable PDF format. This requirement extends to all documents to be filed with EMMA, including financial statements and other externally prepared reports.

If any part of the Annual Financial Information can no longer be generated because the operations to which it is related have been materially changed or discontinued, the State will disseminate a statement to such effect as part of its Annual Financial Information for the year in which such event first occurs.

If any amendment or waiver is made to this Agreement, the Annual Financial Information for the year in which such amendment is made (or in any notice or supplement provided to EMMA) shall contain a narrative description of the reasons for such amendment or waiver and its impact on the type of information being provided.

Section 5. REPORTABLE EVENTS DISCLOSURE. Subject to Section 8 of this Agreement, the State hereby covenants that it will disseminate in a timely manner (not in excess of ten business days after the occurrence of the Reportable Event) Reportable Events Disclosure to EMMA in such manner and format and accompanied by

identifying information as is prescribed by the MSRB or the Commission at the time of delivery of such information. MSRB Rule G-32 requires all EMMA filings to be in word-searchable PDF format. This requirement extends to all documents to be filed with EMMA, including financial statements and other externally prepared reports. Notwithstanding the foregoing, notice of optional or unscheduled redemption of any 2020 Bond or defeasance of any 2020 Bond need not be given under this Agreement any earlier than the notice (if any) of such redemption or defeasance is given to the owners of the 2020B Bonds pursuant to the Resolutions.

Section 6. CONSEQUENCES OF FAILURE OF THE STATE TO PROVIDE INFORMATION. The State shall give notice in a timely manner to EMMA of any failure to provide Annual Financial Information Disclosure when the same is due hereunder.

In the event of a failure of the State to comply with any provision of this Agreement, the beneficial owner of any 2020 Bond may seek mandamus or specific performance by court order, to cause the State to comply with its obligations under this Agreement. The beneficial owners of 25% or more in principal amount of the 2020B Bonds outstanding may challenge the adequacy of the information provided under this Agreement and seek specific performance by court order to cause the State to provide the information as required by this Agreement. A default under this Agreement shall not be deemed a default under the Resolutions, and the sole remedy under this Agreement in the event of any failure of the State to comply with this Agreement shall be an action to compel performance.

*Section 7. AMENDMENTS; WAIVER.* Notwithstanding any other provision of this Agreement, the State by resolution authorizing such amendment or waiver, may amend this Agreement, and any provision of this Agreement may be waived, if:

(a) (i) the amendment or waiver is made in connection with a change in circumstances that arises from a change in legal requirements, change in law, or change in the identity, nature, or status of the State, or type of business conducted; or

(ii) this Agreement, as amended, or the provision, as waived, would have complied with the requirements of the Rule at the time of the primary offering, after taking into account any amendments or interpretations of the Rule, as well as any change in circumstances; and

(b) the amendment or waiver does not materially impair the interests of the beneficial owners of the 2020B Bonds, as determined either by parties unaffiliated with the State or any other obligated person (such as bond counsel).

In the event that the Commission or the MSRB or other regulatory authority shall approve or require Annual Financial Information Disclosure or Reportable Events Disclosure to be made to a central post office, governmental agency or similar entity other than EMMA or in lieu of EMMA, the State shall, if required, make such dissemination to such central post office, governmental agency or similar entity without the necessity of amending this Agreement.

Section 8. TERMINATION OF UNDERTAKING. The Undertaking of the State shall be terminated hereunder if the State shall no longer have any legal liability for any obligation on or relating to repayment of the 2020B Bonds under the Resolutions. The State shall give notice in a timely manner if this Section is applicable to EMMA.

Section 9. DISSEMINATION AGENT. The State may, from time to time, appoint or engage a Dissemination Agent to assist it in carrying out its obligations under this Agreement, and may discharge any such Dissemination Agent, with or without appointing a successor Dissemination Agent.

Section 10. ADDITIONAL INFORMATION. Nothing in this Agreement shall be deemed to prevent the State from disseminating any other information, using the means of dissemination set forth in this Agreement or any other means of communication, or including any other information in any Annual Financial Information Disclosure or notice

of occurrence of a Reportable Event, in addition to that which is required by this Agreement. If the State chooses to include any information from any document or notice of occurrence of a Reportable Event in addition to that which is specifically required by this Agreement, the State shall have no obligation under this Agreement to update such information or include it in any future disclosure or notice of occurrence of a Reportable Event.

Section 11. BENEFICIARIES. This Agreement has been executed in order to assist the Participating Underwriter in complying with the Rule; *provided, however*, this Agreement shall inure solely to the benefit of the State, the Dissemination Agent, if any, and the beneficial owners of the 2020B Bonds, and shall create no rights in any other person or entity.

*Section 12. RECORDKEEPING.* The State shall maintain records of all Annual Financial Information Disclosure and Reportable Events Disclosure, including the content of such disclosure, the names of the entities with whom such disclosure was filed and the date of filing such disclosure.

Section 13. ASSIGNMENT. The State shall not transfer its obligations under the Resolutions unless the transferee agrees to assume all obligations of the State under this Agreement or to execute an Undertaking under the Rule.

Section 14. GOVERNING LAW. This Agreement shall be governed by the laws of the State.

*Section 15.* SOURCE OF INFORMATION. The person from whom Annual Financial Information, Audited Financial Statements and any notices described herein can be obtained is the Treasurer of the State of Utah, Utah State Capitol Complex, 350 North State Street, Suite C–180 (PO Box 142315), Salt Lake City, Utah 84114–2315, telephone: (801) 538–1042.

DATED as of the day and year first above written.

STATE OF UTAH

By

David C. Damschen, State Treasurer

# EXHIBIT I

# ANNUAL FINANCIAL INFORMATION AND TIMING AND AUDITED FINANCIAL STATEMENTS

*"Annual Financial Information"* means financial information and operating data of the type contained in the tables (except where noted) of the Official Statement under the following captions:

CAPTION	PAGE
DEBT STRUCTURE OF THE STATE OF UTAH	
-Outstanding General Obligation Indebtedness	
-Legal Borrowing Authority For General Obligation Bonds	
-Constitutional Debt Limit	
-Statutory Appropriations General Obligation Debt Limit	
-Statutory Debt Limit on Issuance of Certain General Obligation Highway Bonds (when issued and applicable)	
-Authorized General Obligation Bonds and Future General Obligation Bonds Issuance	
-Debt Service Schedule Of Outstanding General Obligation Bonds By Fiscal Year	
-Debt Ratios Regarding General Obligation Debt Of The State	
-Revenue Bonds And Notes	
-Lease Obligations (no tables – numerical data only to be updated)	
-State Guaranty Of General Obligation School Bonds ( <i>no tables – numerical data only to be updated</i> )	
-State Moral Obligation Bonds (no tables – outstanding balance of State Moral Obligation Bonds only to be updated)	
-State Building Ownership Authority (no tables - numerical data only to be updated)	
FINANCIAL INFORMATION REGARDING THE STATE OF UTAH	
-Property Tax Matters-Taxable Value Compared with Fair Market Value of All Taxable Property in the State (table)	
-Property Tax Matters-Historical Summaries Of Taxable Values Of Property	
-State Revenues and Collections-Revenues by Source-All Governmental Fund Types	
-State Revenues and Collections-Expenditures by Function	
-All Governmental Fund types	
-State Revenues and Collections-Summary of Changes in Fund Balances -All Governmental Fund types	
-State Revenues and Collections-Fund Balances-All Governmental Fund Types	
-State Revenues and Collections-General Fund-Revenues, Expenditures and Fund Balances	
-Financial Summaries-Revenues and Expenditures for Fiscal Years 2019, 2018, and 2017 (to be updated for each new fiscal year as the same becomes historically available)	
-Financial Summaries-Combined Balance Sheet-All Governmental Fund Types Only	
-Financial Summaries-Statement of Revenues, Expenditures and Changes in Fund Balances Governmental Fund Type-General Fund	

-Financial Summaries-Statement of Revenues, Expenditures and Changes in Fund Balances Governmental Fund Type-Major Special Revenue and Major Capital Projects Funds.....

## APPENDIX B–ADDITIONAL DEBT AND FINANCIAL INFORMATION REGARDING THE STATE BUILDING OWNERSHIP AUTHORITY

-Outstanding Lease Revenue Bonds Of The Authority
-Statutory Legal Borrowing Debt Capacity Of The Authority
-Debt Service Schedule of Outstanding Lease Revenue Bonds (State Building Ownership
Authority) By Fiscal Year

All or a portion of the Annual Financial Information and the Audited Financial Statements as set forth below may be included by reference to other documents which have been submitted to EMMA or filed with the Commission. If the information included by reference is contained in a Final Official Statement, the Final Official Statement must be available on EMMA; the Final Official Statement need not be available from the Commission. The State shall clearly identify each such item of information included by reference.

Annual Financial Information exclusive of Audited Financial Statements will be provided to EMMA not later than the January 15th following the end of each fiscal year of the State (presently June 30), beginning January 15, 2021. Audited Financial Statements as described below should be filed at the same time as the Annual Financial Information. If Audited Financial Statements are not available when the Annual Financial Information is filed, unaudited financial statements shall be included.

Audited Financial Statements will be prepared pursuant to generally accepted accounting principles as prescribed by the Government Accounting Standards Board. Audited Financial Statements will be provided to EMMA within 30 days after availability to State.

If any change is made to the Annual Financial Information as permitted by Section 4 of the Agreement, the State will disseminate a notice of such change as required by Section 4.

# Ехнівіт II

## EVENTS WITH RESPECT TO THE 2020B BONDS FOR WHICH REPORTABLE EVENTS DISCLOSURE IS REQUIRED

- 1. Principal and interest payment delinquencies
- 2. Non-payment related defaults, if material
- 3. Unscheduled draws on debt service reserves reflecting financial difficulties
- 4. Unscheduled draws on credit enhancements reflecting financial difficulties
- 5. Substitution of credit or liquidity providers, or their failure to perform
- 6. Adverse tax opinions, the issuance by the Internal Revenue Service of proposed or final determinations of taxability, Notices of Proposed Issue (IRS Form 5701–TEB) or other material notices or determinations with respect to the tax status of the security, or other material events affecting the tax status of the security
- 7. Modifications to the rights of security holders, if material
- 8. Bond calls, if material, and tender offers
- 9. Defeasances
- 10. Release, substitution or sale of property securing repayment of the securities, if material
- 11. Rating changes
- 12. Bankruptcy, insolvency, receivership or similar event of the obligated person*
- 13. The consummation of a merger, consolidation, or acquisition involving the State or the sale of all or substantially all of the assets of the State, other than in the ordinary course of business, the entry into a definitive agreement to undertake such an action or the termination of a definitive agreement relating to any such actions, other than pursuant to its terms, if material
- 14. Appointment of a successor or additional trustee or the change of name of a trustee, if material
- 15. Incurrence of a Financial Obligation of the State, if material, or agreement to covenants, events of default, remedies, priority rights, or other similar terms of a Financial Obligation of the State, any of which affect security holders, if material
- 16. Default, event of acceleration, termination event, modification of terms, or other similar events under the terms of a Financial Obligation of the State, any of which reflect financial difficulties

This event is considered to occur when any of the following occur: the appointment of a receiver, fiscal agent or similar officer for the State in a proceeding under the U.S. Bankruptcy Code or in any other proceeding under state or federal law in which a court or governmental authority has assumed jurisdiction over substantially all of the assets or business of the State, or if such jurisdiction has been assumed by leaving the existing governing body and officials or officers in possession but subject to the supervision and orders of a court or governmental authority, or the entry of an order confirming a plan of reorganization, arrangement or liquidation by a court or governmental authority having supervision or jurisdiction over substantially all of the assets or business of the State.

(This page has been intentionally left blank)

#### APPENDIX F

## **BOOK-ENTRY SYSTEM**

DTC, the world's largest securities depository, is a limited-purpose trust company organized under the New York Banking Law, a "banking organization" within the meaning of the New York Banking Law, a member of the Federal Reserve System, a "clearing corporation" within the meaning of the New York Uniform Commercial Code, and a "clearing agency" registered pursuant to the provisions of Section 17A of the Securities Exchange Act of 1934. DTC holds and provides asset servicing for over 3.6 million issues of U.S. and non-U.S. equity issues, corporate and municipal debt issues, and money market instruments (from over 100 countries) that DTC's participants ("Direct Participants") deposit with DTC. DTC also facilitates the post-trade settlement among Direct Participants of sales and other securities transactions in deposited securities, through electronic computerized book-entry transfers and pledges between Direct Participants' accounts. This eliminates the need for physical movement of securities certificates. Direct Participants include both U.S. and non-U.S. securities brokers and dealers, banks, trust companies, clearing corporations, and certain other organizations. DTC is a wholly-owned subsidiary of The Depository Trust & Clearing Corporation ("DTCC"). DTCC is the holding company for DTC, National Securities Clearing Corporation and Fixed Income Clearing Corporation, all of which are registered clearing agencies. DTCC is owned by the users of its regulated subsidiaries. Access to the DTC system is also available to others such as both U.S. and non-U.S. securities brokers and dealers, banks, trust companies, and clearing corporations that clear through or maintain a custodial relationship with a Direct Participant, either directly or indirectly ("Indirect Participants"). DTC has an S&P rating of "AA+." The DTC Rules applicable to its Participants are on file with the Securities and Exchange Commission. More information about DTC can be found at http://www.dtcc.com.

Purchases of 2020B Bonds under the DTC system must be made by or through Direct Participants, which will receive a credit for the 2020B Bonds on DTC's records. The ownership interest of each actual purchaser of each 2020B Bond ("Beneficial Owner") is in turn to be recorded on the Direct and Indirect Participants' records. Beneficial Owners will not receive written confirmation from DTC of their purchase. Beneficial Owners are, however, expected to receive written confirmations providing details of the transaction, as well as periodic statements of their holdings, from the Direct or Indirect Participant through which the Beneficial Owner entered the transaction. Transfers of ownership interests in the 2020B Bonds are to be accomplished by entries made on the books of Direct and Indirect Participants acting on behalf of Beneficial Owners. Beneficial Owners will not receive certificates representing their ownership interests in 2020B Bonds, except if use of the book–entry system for the 2020B Bonds is discontinued.

To facilitate subsequent transfers, all 2020B Bonds deposited by Direct Participants with DTC are registered in the name of DTC's partnership nominee, Cede & Co., or such other name as may be requested by an authorized representative of DTC. The deposit of 2020B Bonds with DTC and their registration in the name of Cede & Co. or such other DTC nominee do not affect any change in beneficial ownership. DTC has no knowledge of the actual Beneficial Owners of the 2020B Bonds; DTC's records reflect only the identity of the Direct Participants to whose accounts such 2020B Bonds are credited, which may or may not be the Beneficial Owners. The Direct and Indirect Participants will remain responsible for keeping account of their holdings on behalf of their customers.

Conveyance of notices and other communications by DTC to Direct Participants, by Direct Participants to Indirect Participants, and by Direct Participants and Indirect Participants to Beneficial Owners will be governed by arrangements among them, subject to any statutory or regulatory requirements as may be in effect from time to time. Beneficial Owners of 2020B Bonds may wish to take certain steps to augment the transmission to them of notices of significant events with respect to the 2020B Bonds, such as redemptions, tenders, defaults, and proposed amendments to the Bond documents. For example, Beneficial Owners of 2020B Bonds may wish to ascertain that the nominee holding the 2020B Bonds for their benefit has agreed to obtain and transmit notices to Beneficial Owners. In the alternative, Beneficial Owners may wish to provide their names and addresses to the registrar and request that copies of notices be provided directly to them.

Redemption notices shall be sent to DTC. If less than all the 2020B Bonds within an issue are being redeemed, DTC's practice is to determine by lot the amount of the interest of each Direct Participant in such issue to be redeemed.

Neither DTC nor Cede & Co. (nor any other DTC nominee) will consent or vote with respect to 2020B Bonds unless authorized by a Direct Participant in accordance with DTC's MMI Procedures. Under its usual procedures, DTC mails an Omnibus Proxy to the State as soon as possible after the record date. The Omnibus Proxy assigns

Cede & Co.'s consenting or voting rights to those Direct Participants to whose accounts the 2020B Bonds are credited on the record date (identified in a listing attached to the Omnibus Proxy).

Redemption proceeds, distributions, and dividend payments on the 2020B Bonds will be made to Cede & Co., or such other nominee as may be requested by an authorized representative of DTC. DTC's practice is to credit Direct Participants' accounts upon DTC's receipt of funds and corresponding detailed information from the State or the Paying Agent, on payable date in accordance with their respective holdings shown on DTC's records. Payments by Participants to Beneficial Owners will be governed by standing instructions and customary practices, as is the case with securities held for the accounts of customers in bearer form or registered in "street name," and will be the responsibility of such Participant and not of DTC, the Paying Agent, or the State, subject to any statutory or regulatory requirements as may be in effect from time to time. Payment of redemption proceeds, distributions, and dividend payments to Cede & Co. (or such other nominee as may be requested by an authorized representative of DTC) is the responsibility of the State or the Paying Agent, disbursement of such payments to Direct Participants will be the responsibility of DTC, and disbursement of such payments to the Beneficial Owners will be the responsibility of DTC, and disbursement of such payments to the Beneficial Owners will be the responsibility of DTC.

DTC may discontinue providing its services as depository with respect to the 2020B Bonds at any time by giving reasonable notice to the State or the Paying Agent. Under such circumstances, if a successor depository is not obtained, 2020B Bond certificates are required to be printed and delivered.

The State may decide to discontinue use of the system of book–entry–only transfers through DTC (or a successor securities depository). In that event, 2020B Bond certificates will be printed and delivered to DTC.

The information in this section concerning DTC and DTC's book–entry system has been obtained from sources that the State believes to be reliable, but the State takes no responsibility for the accuracy thereof.
